Following their defeat of the Imperialists at the Battle of Fourtis in July 588, the Republicans (as they later became) prepared to reconquer Atlantidieh, and march again on the capital, Cennatlantis. It was necessary first to enlarge and reorganise their armies, and this meant that there was little movement until the beginning of 589. Republican forces on this central front totalled about 100000 by mid 589, with up to 100000 more troops elsewhere in the Empire. The Imperialists, now led by "Imperial Governor" Lingon, in theory possessed about 300000 troops, but many of these had to man the frontiers, and many were lost at Fourtis, and during the subsequent Republican advance. As a result, there were barely 80000 left in the east of Atlantidieh at this stage. Most of the Imperialists were forced back behind the Dodolla river by August, leaving a strong garrison of 20000 men in Cennatlantis itself. They planned that the city, which was well protected by defences put up over the previous decades, should hold out while the main Imperialist forces sorted themselves out, and later recrossed the river to defeat and force back the Republicans. But over the next few months, the Republicans gradually blockaded Cennatlantis, and sought for a means to cross the river, and completely surround the city, which they recognised was too strong to attack directly. Republican forces reached the river north and south of the city. The whole river between Lakes Oncia and Trannolla is about 75 miles long, but at first the Republicans could not see how to cross it, without being faced and attacked by superior enemy forces. However, some 30000 men encamped themselves south of Rundes, while other groups were further south, and somehow succeeded in undermining many of the Imperialist forces on the other side of the river. Most of these were Chalcrans, and the Republicans persuaded them to defect to their side. As a result they were able to cross, after a diversionary manoeuvre, and by the end of the year, had reached the hills east of Cennatlantis, while the Imperialists regrouped about Gilliso and Rontisso, and held the Snattarona hills with outposts. About 17-19000 Republicans were besieging the Imperialist force inside Cennatlantis.

But the Imperialists committed the cardinal error of despising not just the Republicans' beliefs, but also their army and leadership. During the Republican advances of the previous year, their armies had been led by three separate generals in Atlantidieh, Pouton, Ventel and Bourbronna himself. However the Republican leadership realised that their armies could advance no further until Cennatlantis was taken, and the defending army needed to be under the control of one general, to whom the others were subordinate. They made the correct decision by picking Bourbronna as overall leader, because of his enthusiastic attacking policy hitherto, and because it was he that had masterminded the defection of the Imperialists near Rundes.

## 1. THE ATTEMPT TO RELIEVE CENNATLANTIS FROM THE EAST, MAY 590.

By May, the Imperialists were ready to make their first attempt at relieving the capital. They had 90000 men in all now, while the Republicans had only 65000, excluding the forces besieging Cennatlantis. But the Imperialists made the mistake of dividing their relieving force up into three separate columns, each too far apart to support the others. The largest force behind Snattarona was to march firstly south-west on the capital, assaulting the enemy on the hills before the capital. This force, of four armies, was led by Huasel, and was about 42000 strong. To his north, 33000 men (three armies) under Zuaippo were to march down the road to Lake Oncia and then turn south past Rundes to get behind the main assumed Republican position near Snattarona, or prevent it being reinforced from across the Dodolla. Finally a third force, intended as a feint, was to move across to the end of Lake Trannolla, and attract the Republicans' attention to this area. This force was only two small armies, 15000 strong, under General Gaiplin. The overall commander was General Huasel, in the centre.

Bourbronna had 30000 men led by himself, in the hills near Cennatlantis, 20000 men under Ventel near the Cresslepp, west of the Dodolla, and smaller garrisons in Rundes and further south behind the Dodolla. General Gaiplin's force was the first to be spotted (deliberately), but Bourbronna suspected it might well be a feint, and kept the rest of his forces concentrated in the centre. Although Huasel had planned that Zuaippo should next attract the Republicans' attention, in fact he advanced too cautiously, and Bourbronna soon recognised Huasel's armies lumbering down the Snattarona road. He waited patiently in his position, allowing a small force from Rundes to hold up Zuaippo as he finally reached the river.

Then on 18<sup>th</sup> May, the Imperialists prepared hesitantly to attack Bourbronna on his hills. They had hoped he would have slimmed out his defences by now, but 30000 against 40000 were quite sufficient for Bourbronna to win the *Battle of Cennatlantis Hills*. He allowed the enemy to make their attack, then sent a force round behind Huasel. Though unused to defending, the Republicans on the hills, held off the attacking Imperialists from prepared positions brilliantly, and then counter-attacked them as they retreated. In all they lost 5500 men, to Bourbronna's 2400. Bourbronna now harried them back towards Snattarona.

He now showed up the disastrous fault in the Imperialists' plans. Their armies under Zuaippo should by now have been marching down the Dodolla, ready to attack Bourbronna in rear, or in flank, if he was still in the hills, combining with a fresh attack from in front by Huasel himself. But the Imperialist columns were far too far apart, and Zuaippo was still tarrying east of Rundes, being tantalised by Ventel. Bourbronna now marched nearly all his armies northwards, and smashed into Zuaippo's flank on 22<sup>nd</sup> May, at the *Battle of Rundes*. The Imperialist lost 5000 casualties, plus another 6000 prisoners in Bourbronna's pursuit. He himself suffered only 3200 losses. After this, Huasel called off the whole advance, and retreated back to his starting-point.

## THE ATTEMPT TO RELIEVE CENNATLANTIS FROM THE SOUTH, JULY 590

During the summer months, the Republicans tried to create a naval presence on Lake Oncia, to rival the Imperialist control of the waters. The Imperialists in fact now planned to try to strike to the west of the river Dodolla, from the south, destroying the Republicans and relieving Cennatlantis, and took the opportunity of attracting the attention of the enemy northwards. They sent out their navy on to the middle of the Lake, which attracted the Republican fleet to it. It was partially defeated, and forced back to its port at Rundes. Meanwhile, General Huasel had concentrated most of his army (about 50000) south of the river Cresslepp, near Giezat, leaving 30000 near Rontisso under Gavlin. The latter would act as a decoy, by threatening another attack down the northern edge of Lake Trannolla towards that end of the Dodolla, along with a naval force with 15000 men.

The Imperialist operations began in mid-July, just after the Republican naval defeat on Lake Oncia had taken place. This had no influence on Bourbronna, who immediately realised that the Imperialist naval escapades were just a diversion. His

spies had told him of the Imperialist forces on and north of Lake Trannolla, though he was not yet aware of any additional enemy troops south of the river Cresslepp. His forces were divided in three groups – 18000 under Ventel on the Snattarona heights; 20000 under his personal command on the hills east of Cennatlantis; and 22000 under Pouton south of Cennatlantis, between the Dodolla and Cresslepp. There was also a garrison in Rundes, and the besieging forces surrounding Cennatlantis. This time, it can be seen that the Imperialists had concentrated their forces much more thoroughly than in April, and had 35000 man opposite Giezat, 15000 further south along the Cresslepp, making 50000 in all facing Pouton's 22000.

Pouton had only an observation force in Giezat, with most of his force to the south-east, opposite part of Huasel's army. He was also keeping an eye on Zuaippo who was moving down Lake Trannolla towards him, accompanied by a slow-moving naval force. The latter landed in the marshes between the Dodolla and Cresslepp on July 18<sup>th</sup>, while Zuiappo approached the Dodolla. None of this had gone unnoticed by Bourbronna, as Huasel intended, and Ventel was instructed to move off southwards and hit these enemy forces in flank. Thus Huasel was able to force his way over the river and into Giezat on July 22<sup>nd</sup>-23<sup>rd</sup> with little trouble. He now moved north-east on Pouton's flank, while the Imperialists opposite Pouton sought to hold him in position, by trying to cross the river. Pouton himself was split into various small forces, trying to observe and deal with all these stronger imperialist armies, and Bourbronna warned him repeatedly to keep his army concentrated. He decided by the 24<sup>th</sup> that the focus of activity was the other side of the Dodolla, and hastened to move his force over there, going south of Cennatlantis.

The Imperialists now needed to move fast and decisively, before the Republicans could concentrate. Huasel, however, moved his army quite deliberately, and although he was able to inflict a couple of defeats on parts of Pouton's forces on July 25<sup>th</sup>-26<sup>th</sup>, he then halted. Pouton was desperately trying to concentrate his corps to the north, nearer to Cennatlantis, where he would be reinforced by Bourbronna himself. The two forces had joined up by July 27<sup>th</sup>, and as Huasel cautiously moved north on the 28<sup>th</sup>, Bourbronna and Pouton together, with 40000 man were able to attack Huasel's left flank in a decisive battle. Here as usual, the Republicans were able to deploy their swarm of fast-moving infantry OCHOSIX and cavalry to bewilder the slower-moving enemy, and then concentrate on a flank. Huasel, having lost contact anyway with Zuaippo, retreated back over the Cresslepp, hustled by the Republicans. To the east, Ventel had forced Zuaippo to retreat, while the Imperialist naval force in the Trannolla Thounca (marshes) could only sit and wait, unsupported by either Ventel or the retreating Huasel. It was soon hustled back on to its boats by Pouton. Thus ended the second unsuccessful attempt by the Imperialists to relieve the capital. Despite a better conceived plan, the Imperialists still moved too slowly, and were outwitted by Bourbronna, who was able to guess their intentions, and concentrate his forces to beat them, although even at the climactic battle, he only had 40000 against 48000 Imperialists.

## THE ATTEMPT TO RELIEVE CENNATLANTIS FROM THE NORTH, OCTOBER - NOVEMBER 590

During the summer of 590, the Republicans attempted to extend their area of control around the besieged city of Cennatlantis, both southwards across the Cresslepp, and eastwards to Snattarona and Gilliso. However, the Imperialists were too strong to be shifted from the marshy area between the rivers Cresslepp and Bourbronna, and they seized and entrenched themselves on the Snattarona hills while the Republicans were off to the west in July, resisting two assaults by Bourbronna in August and September. These were serious setbacks for the Republicans, who were now very much hemmed in, defending the siege of Cennatlantis. Bourbronna strained every sinew to force the city to surrender, using bombardment, starvation and attempted treachery, all to no avail. His overall strength was still considerably lower than the Imperialists', and he rightly concluded that he had to remain on the defensive after November, until Cennatlantis could be taken. Nevertheless, harsh words passed between Bourbronna and the republican leadership, who chided him for not advancing further, yet refused to find any more troops for him.

The Imperialists determined to push on with another attempt to crush Bourbronna and relieve Cennatlantis. Lingon took over leadership of the next campaign, which had already been planned as an attack from the north. Lingon himself, along with General Yrixan would lead 45000 men from Gilliso on Rundes, supported by a force of 30000 men, led by General Zuaippo on Lake Oncia, which would land between the southern arms of the lake, and move on Rundes from the north. (The Imperialists still had complete naval control of all the Chalcran lakes). Another 15000 men under Gavlin would move down the north side of Lake Trannolla as a feint, to attract the attention of the Imperialists to the south. Having stormed and seized Rundes, the overwhelmingly strong Imperialist armies would then march on Cennatlantis on both banks of the Dodolla, keeping in close contact by the bridge at Rundes, and knocking aside any Republican challenges as they met them.

The plan was quite well-conceived, and more by luck than anything else, Bourbronna was indeed deceived at the beginning by Gavlin's diversionary advance in the south. However, there was still considerable danger in separating the two main Imperialist armies before they joined at Rundes, in the face of a brilliant general like Bourbronna. The Republican forces were initially split between Bourbronna in the hills east of Cennatlantis, with 30000 men, Ventel in the south, behind the Dodolla, with 25000, and Pouton in Rundes and to the NE and NW, with 15000. On October 26<sup>th</sup>, Bourbronna moved south with most of his army, to assist Pouton in crushing what he believed was the main Imperialist attack around Lake Trannolla. It has never been fully explained why Bourbronna harboured this misconception, but it nearly caused a disaster to the Republicans. Only his own strategical brilliance rescued them later. Over the next two days, Zuaippo's army began landing from Lake Oncia, but it took some time for a force of this time to cross the lake and disembark, and it lay at the mercy of a strong Republican counterattack from Rundes for some considerable time. Lingon had foreseen this, but did not want to attract Ventel's attention to the east side of the river, and his own advance via Gilliso, in case this undeceived Bourbronna about the feint offensive by Gavlin in the south. Certainly Pouton, with his small force, felt helpless, and demanded help from Bourbronna. Meanwhile he put most of his army within the fairly weak defences of Rundes, with cavalry on the east bank to watch Lingon, and a small force in a defensive position south of Zuaippo's army.

By the

1<sup>st</sup> November Bourbronna was at last beginning to realise that he was being led up a blind alley in the south. He turned himself round, and marched back to confront Lingon, ordering Ventel to hold tight in Rundes at all costs. He also finally decided that he needed reinforcements for Ventel on the western side of the river, and ordered Pouton to march north at all speed to join Ventel, with 20000 men. Bourbronna's march back north was a nightmare in rainy and foggy weather, and by the time Lingon's army came into sight, on November 4<sup>th</sup>, the Imperialists had already blockaded the east side of Rundes. To the west, Zuaippo had finally finished landing and got his army into shape by 1<sup>st</sup> November, and moved, with 20000 men, against Ventel's blocking force of just about 7500. A keenly fought battle in a thunderstorm on November 2<sup>nd</sup> went against the Republicans, despite their carefully entrenched position, and they retreated, initially, towards Rundes. Ventel, however, now learning of the reinforcements belatedly coming from the south, decided that he did not want to be trapped inside Rundes with his whole army, and deliberately ordered this force, plus another 5000 to move to one side, in the direction of Failrunn. This left about 5000 (including the garrison) in Rundes.

On November 5<sup>th</sup>, Bourbronna hurled his army piecemeal against Lingon, 25000 against 35000. In the *First Battle of Rundes*, Bourbronna's army was unable to make much impression on the Imperialists, and he broke off the fight fairly early on. News now reached him that Zuaippo's forces had blockaded Rundes on the west bank of the Dodolla on the 4<sup>th</sup>. He now decided he must concentrate all his forces and defeat the two separated prongs of the enemy army, while they were still separated by Rundes and the Dodolla. He turned round and marched his weary army back to Cennatlantis and across the river by the northern siege-lines. Zuaippo, meanwhile, having blockaded Rundes, was unwilling to advance much further until he had direct communications with Lingon. He did, though, send a force of 15000 trailing vaguely in the footsteps of Ventel, towards Failrunn. Lingon should have moved speedily south on Cennatlantis, chasing Bourbronna, and relieving the city from the east. He tried to impress this on Yrixan, who actually led the army, but Yrixan insisted that Rundes had to be taken first. Thus, on November 5<sup>th</sup> and 6<sup>th</sup>, there was the remarkable sight of two Imperialist armies, numbering at least 50000, frozen (almost literally because of the icy weather) in position by Rundes, which was held by no more than 5000 men. During this time, three different Republican armies marched and manoeuvred at all speed to defeat them. Pouton had joined Ventel's small force at Failrunn on November 4<sup>th</sup>, and egged on by Bourbronna near Cennatlantis, on November 6<sup>th</sup> they attacked the unsuspecting Imperialist army some miles to the east. With 30000 against 15000, the

Battle of Failrunn was an overwhelming Republican victory. Over 10000 of the Imperialists were casualties or prisoners, and the rest retreated north up the western bank of Lake Oncia, towards Noccana.

On November 7<sup>th</sup>, all the Republican forces, led by Bourbronna, moved on Rundes up the Dodolla. Now Rundes fell to the Imperialists after an assault on November 6<sup>th</sup>, incidentally forcing the Republican navy out on to the lake, and Lingon immediately set his army in motion down the east of the Dodolla on Cennatlantis. He had of course left it too late, and now was just the wrong moment to divide up the Imperialist forces. On November 8<sup>th</sup>, Bourbronna's army of 50000 smashed Zuaippo's 35000 (which included a few troops from Lingon's army) at the *Second Battle of Rundes*. Losing 11000 men, Zuaippo retreated hastily northwards back to his landing-place on Lake Oncia.

During this time, Lingon had been moving on Cennatlantis, and he reached the Republican besieging forces on the east bank on November 9<sup>th</sup>, by which time the news was reaching him of the defeat of all the Imperialist forces on the west bank. He hurriedly forced his way through the besieging lines, offloaded a few men and supplies to the besieged Imperialists, and then, next day, started to retreat northwards again. He fully expected Bourbronna to force his way into Rundes and cut off his retreat. In fact Bourbronna assumed that Lingon would be settling in the Cennatlantis area, and directed his own army back down there, leaving Ventel and Pouton to chase off the defeated enemy, and retake Rundes, which was achieved by November 11<sup>th</sup>. As a result, he himself failed to intercept Lingon. Nevertheless, Lingon, learning, as he approached it on November 11<sup>th</sup>, that Rundes had fallen, decided not to chance his arm against the victorious Republicans there, and veered off eastwards across the hills towards Gilliso. Thus the campaign petered out, and was notched up by the Republicans as yet another successful defence of the siege of Cennatlantis.

## THE ATTEMPT TO RELIEVE CENNATLANTIS FROM THE WEST, DECEMBER 590

Things now began to move much faster. Cennatlantis was reaching the limits of its endurance, even with the very limited relief it received from the Imperialists in November. Lingon planned a final attempt at relief, to be carried out as soon as possible, with very similar forces and strategy to the previous effort. Bourbronna, meanwhile, was receiving reinforcements, which raised his total forces to at least 75000, not far short of the Imperialist total. He concentrated over 20000 men round Cennatlantis, and made an unsuccessful assault at the end of November. He also acted to extend the range of his armies further eastwards into Chalcrieh, in order to keep the Imperialists at a greater distance. Pouton retook the Snattarona position, and also moved the rest of his forces to the edge of the hills overlooking Gilliso – he had 30000 in all. Ventel remained west of the Dodolla, in and around Rundes, with 20000. Bourbronna himself remained with a sort of reserve in the hills just to the east of the capital, with 15000 men. 10000 more remained on the Cresslepp in the south.

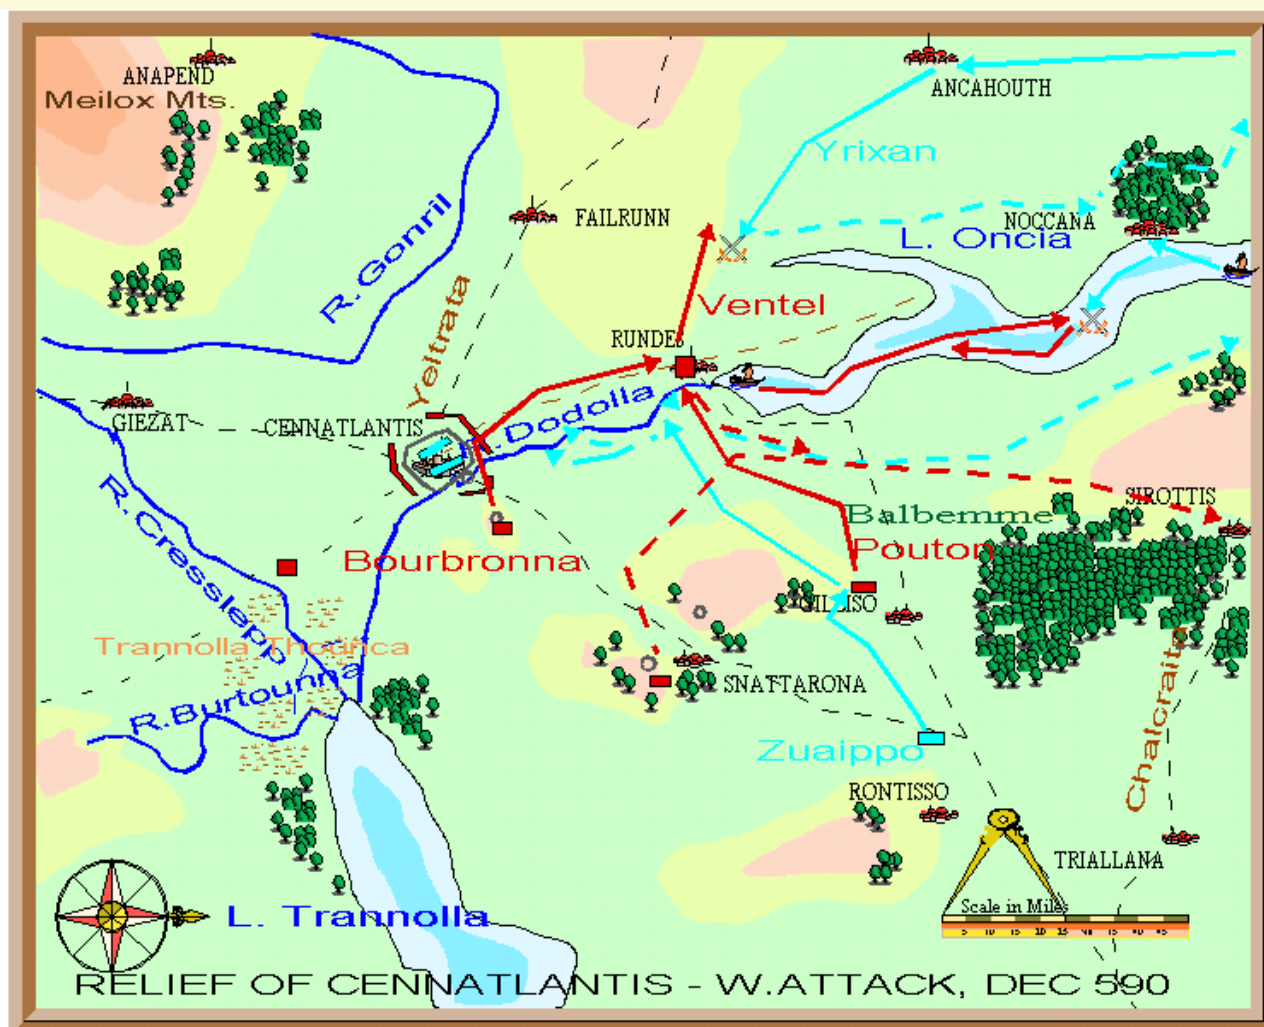

Lingon again planned a converging advance on Rundes and then on to Cennatlantis, much as before, again dealing with each of the republican forces as they were encountered. This was a fairly desperate venture now, as his numerical superiority over the Republicans was now less, and the strategy was virtually the same as before. His only hope was to have two separate forces rather than the three as on the previous occasion, thus making each that much stronger. But by doing away with the equivalent of the southern attack via Lake Gilliso, Lingon also gave up any hope of distracting Bourbronna's attention away from the two main attacks on Rundes. So Zuaippo, with 45000 men would advance from Rontisso, storm the Republican position at Gilliso, and advance on Rundes. Simultaneously, Yrixan, with 40000, would move from Gasiroto, between Lakes Oncia and Chalcris, south via Lourunn and Ancahouth, linking up with a small force which would cross the lake to Noccana. It would then either move on Rundes, to support Zuaippo, if this was necessary, for it was intended to capture this town, or move on Failrunn, to distract Republican forces west of the Dodolla; or march directly on Cennatlantis. However, Lingon did add that in order to avoid being defeated in detail by Bourbronna, as had happened so often before, either force should take any opportunity of crushing any Republican army which wandered too close. The main problem here, as before, was maintaining communications between the two Imperialist forces.

As so often, things began well for the Imperialists, as Bourbronna was distracted by the siege of Cennatlantis. On December 22<sup>nd</sup>, Zuaippo, who had earlier threatened Pouton's communications by appearing to intend to move through the Balbemme wood towards the lake, suddenly attacked Gilliso itself, and after a hard fight, ejected the small Republican garrison. As expected, Pouton moved 15000 men off the hills to the south, in order to retake the town. But then Zuaippo threw 25000 men onto the hills to the south of the Republican position, and forced the Republicans back west. Further forces threatened Gilliso from the south, and by December 25<sup>th</sup>, Pouton was in full retreat towards Rundes. General Yrixan had emerged from Gasiroto on December 21<sup>st</sup>, and begun his march south unperceived. (The nearest Republican outpost was at Gentis). On Lake Oncia, the Imperialist navy moved south to protect the force about to cross to Noccana, and the small Republican navy at Rundes hastened up to give battle. (It could easily have been completely destroyed back in October, when its only port, Rundes, fell briefly to the Imperialists, but remarkably the Imperialist navy made no attempt to blockade the town from the lake, or even move anywhere near it). It was quickly defeated, and the Imperialist force crossed the lake to Noccana. There it linked up with Yrixan by December 24<sup>th</sup>, and Yrixan carried on south through Ancahouth. Now Bourbronna became aware of his approach by this time, before Zuaippo had moved, and started to switch his own force west of the river.

On December 25<sup>th</sup>, Pouton was ordered to carry on his retreat to Rundes, and hold the town and the line of the river with 15000 men. The rest were to cross westwards, and join him and Ventel. Ventel himself was to observe the approaching Imperialists closely, but make sure he did not get too closely involved. By December 26<sup>th</sup>-27<sup>th</sup>, Yrixan was in contact with Ventel, and seemingly forcing him back inexorably to the south. However, Bourbronna, with 15000 men, was to the rear,

and Ventel was hurrying towards the river with his force. By the 28<sup>th</sup>, Bourbronna had concentrated 50000 men to oppose Yrixan, who had 45000 to hand. On that day, he threw this force at Yrixan, who thought he was only opposed by about 15000 of Ventel's men, and comprehensively defeated him.

Meanwhile, Zuaippo reached Rundes from the east, and attempted to storm it directly on December 28<sup>th</sup>, but failed. He now moved down the east bank of the river towards Cennatlantis. However, on the next day he heard of the defeat of Yrixan, and could see Bourbronna's armies approaching across the river. Bourbronna had already instructed the small force of 8000 man at Snattarona itself to move northwards across Zuaippo's communications, towards Sirottis, and he himself moved his forces not directly eastwards to face Zuaippo on the Dodolla, but on Rundes, where again they could cross the river and threaten his communications. Zuaippo hastily retreated his whole army north towards Sirottis. And that was the end of the final Imperialist attempt to relieve the capital Cennatlantis itself fell finally to Bourbronna on January 19<sup>th</sup> 591. Just a few weeks earlier, on January 1<sup>st</sup>, the Republicans had executed Crehonorex in Atlantis, and Lingon became the new Emperor.

## THE TREACHERY IN HELVRIS, APRIL 880

Cennan was quick to assure Mists that although he was in Helvrís as the personal legate of the Emperor, Mists was of course to continue to hold full powers as commander of the Atlantean and Helvrán troops defending the city. He was equally quick to find out from the loyal Atlanteans there the true situation with regard to the defence of the city as it was being carried out by the Helvrán commander. He was told that Mists had had several parleys with the Rabarrans, some of them in secret, and Cennan's informant explained that his spies had found out about it. It seemed that as a result of some sort of deal between Mists and the enemy, the Rabarrans had been able to advance and take over a number of important places surrounding Helvrís, which would certainly have cost them many men, if they had had to fight for them. Learning from his spy that Mists was due to have another secret rendezvous with an important Rabarran commander in two days' time, Cennan determined to follow him to the assignation and arrest him if he could.

It might have been thought that the arrival of Cennan would have made Mists more cautious in his dealings with the enemy, but Cennan had so successfully disguised his real intentions, that the Helvrán commander-in-chief decided to carry on as before. This next meeting was a vital one for him, as he was going to agree nothing less than the treacherous surrender of all Helvrán soldiers in the city. This would subtract over 6000 fighting men from the defenders of the city, and the remaining Atlanteans would not be able to hold out much longer against the Rabarran assaults. On the night of the meeting, Cennan at first left other loyalists to follow Mists to the rendezvous, which he already knew anyway, while he remained behind with the Atlanteans at first, to allay any suspicions the Helvráns might have. He in fact arranged that a considerable force of Atlantean soldiers should follow him to the rendezvous, while others prepared to surround and disarm as much of the Helvrán garrison as they could, if this became necessary.

Cennan duly arrived at the meeting of Mists and the Rabarran commander, who were each surrounded by about 60 or so men. Cennan then marched forward with a force of 140 men, but firstly sent a single man forward under a flag of truce. There followed an incredible scene, as the commanders of three nations (the Rabarran was in fact the full commander of the Rabarran besiegers, Iferiri Alauqo), argued with each other. Cennan tried to persuade Mists to return to his duty, promising to ignore his treachery, if he threw himself into a vigorous defence of the city. He spoke eloquently:

"Surely the Empire of Atlantis means something to you still? Or if, as a Helvrán, it does not any more, think what will happen to you and all Helvráns if you succeed in moving out of the Atlantean Empire. If you do not defend this city, you will not cause the downfall of the whole Atlantean Empire - that will last for ever, and can never be overthrown by Rabarrans or anyone else; but you may well cause your own land and peoples to sink into the maw of this cruel and greedy empire of the Rabarrans. You will have no freedom, for the Rabarrans will immediately take over your whole country. Can you then really prefer the way of life, the government and religion of the Rabarrans, over that of Atlantis? Atlantis offers you a relative freedom to do and think as you like, and offers you and all others the security to carry on your personal lives entirely as you want. Yes, she makes some demands on you, but compare those to the demands that Alauqo and his masters will make. They have an alien way of life, an alien government, an alien religion, and they will force you to become just little cogs in their vast machinery of empire, forced to act and carry out their dictates, whether you will or not. Remember your duty to Atlantis, and think of your fellow compatriots. Help to maintain the Atlantean way of life for everyone, I beg you."

Alauqo sought to make Mists keep to their arranged bargain, warning him that otherwise he would surely slaughter all the Helvráns defending the city, when it finally fell. Cennan exclaimed that Alauqo's words proved his point, that Rabarrieh was a cruel and merciless empire. Mists replied, desperately:

"Your arguments may be true, but it is too late for me and for Helvrís, city and country. Mists has promised me that he will spare the lives of the soldiers and citizens of Helvrís, if I surrender now. My countrymen no longer want to be subject to the

Atlanteans, who for years now have simply absorbed us into their way of life. I do not know that the Rabarran way of living and governing is really worse than yours, as you tell me - we Helvrans are willing to take our chances with the Rabarrans. Besides, I do not think you will ever beat the Rabarrans, as you tell me. You have been at war now for ten years, and all that has happened is that you have lost more and more territory. You are not the future, Rabarrieh is. You are the past. Whatever happens to my countrymen, I am decided that I and they shall be part of this future."

Cennan finally said that Mists was nothing but a traitor. Now both Alauqo and Cennan could easily call up large reinforcements, while Mists, it turned out, also had a considerable force not far away. Could the three reach some sort of agreement under truce, or would the meeting degenerate into a firefight, a battle, a massacre, and the probable deaths of some or all of the negotiators?

Alauqo seemed at first to win the game. He said that if Cennan was unwilling to surrender the city, he would take Mists away into safety and resume the attacks. Cennan refused to allow this, and, under a pre-arranged scheme, made a sign to his bodyguard, who called his men in hiding to come up and seize both Mists and Alauqo. The feared firefight then ensued: men on both sides were killed, Mists was wounded, but escaped to the Rabarran lines with Alauqo, and Cennan moved back to his lines. The Helvran garrison was subsequently lined up and made to swear allegiance to Cennan and the Atlantean command, being told also of the rank treachery of their former commander. They were watched extremely closely after this...

## "THE ATLANTEAN WARGAME": "ATLANA CREHELEITHA"

[A first-hand contemporary account of the Wargame, one of the great leisure activities of the Second Empire. This was written around 515, that is, in the reign of Carel Atlanicerex I, and was sent by the writer to his young nephew who lived in Phonaria, a long way from the centre of the Empire, at the latter's request. Comments in the light of modern knowledge are in brackets. Note that in the original the whole letter is written in the third person, according to the strict literary standards of the classical era.]

"I understand from your father how fascinated you are by the great wargames which are played out here in Atlantis, and hope that these words will be of interest to you. You think that you are missing a great deal because you have never seen a real wargame, and that is true - I hope one day you will get the chance over here. What you will have seen in Phonaria are feeble imitations, probably just a few prisoners or Atlantean soldiers pretending they are enacting some heroic battle from the past, which would have had a hundred times as many fighters and would have extended across miles of countryside instead of a few hundred yards.

"I also gather from what you write that you think our wargames are like real battles, with many dead and injured, at least on the losing side! You are a little out of date, dear Siphon - although that is probably all you have seen yourself.

"Historians say that in the past, back in the good old times of the First Empire, prisoners-of-war were divided into two groups and forced to re-enact battles by fighting each other. [ **These began about 220-230, and became national spectacles, as time passed, with much pomp and ceremony. They were originally put on only by the government, but later they were increasingly paid for by rich noblemen.**] They were guarded and observed by Atlantean soldiers, and forced to fight to the death - as you believe still happens! These spectacles certainly grew bigger and bigger as time passed.

"At the start they were fought in arenas, with the fighting space only a few hundred yards in each direction - but in the later days of the First Empire, during and after the time of Emperor Ruthoyon II, the battlefields used for these spectacles were tracts of real countryside. The spectators sat on the side of a nearby hill, and the little "armies" fought imitations in miniature of real battles of the past. Sometimes they were not so much of the past, either, for great Emperors like Ruthoyon II were engaged in war at this very time, and his great victories might be copied in the wargame only a few months later!

"By the time of the first great Emperors of our era [ i.e. **Atlaniphon I - III in the Second Empire**] these Emperors, and indeed other rich noblemen would lay out landscaped battlefields on their property - in Atlantis and Atlantidieh and Chalcrieh -, complete with hills, woods and streams. Battles fought in wargames now were huge affairs, and might last hours or even days, just as the real battles they imitated did too. These were still real battles, with prisoners-of-war suffering real casualties. But after this time, the "real" wargame, as we cultivated people consider it, grew up as an art-form, and this involves no killing at all. It is only the lower classes nowadays that watch actual fighting like this, though I realise that this distinction is still not made in the outer parts of the Empire - such as Phonaria, I regret to say. [ **Simulations of sieges and naval battles, where control over prisoners-of-war was much easier, still involved real fighting with enemy prisoners, but these tended to be watched increasingly by the lower classes. In the sixth century, these fights were sometimes organised by town councils for the masses, as were other sporting activities.**]

"So how does this modern wargame work? As I say it is not a war game any more, rather a sport or, better, an art-form. I think it very comparable to the Total Works of Art which are now so popular, and which are watched in the countryside by many of the same people who watch our wargames. Our wargame demands in particular the full art of a landscape artist, because now these games can cover several days and many acres of landscape, all of which has to be carefully prepared

in advance - not least to allow room for the spectators to watch in comfort and with a good view.

So, you ask, what does happen in this modern wargame? There are still two armies, but neither side attempts to actually kill or injure its enemies - rather all the participants have blunt crossbows, with a bag of dye on the end of it. If this hits an opponent, he is counted wounded or dead, and has to retire from the battle, covered as he is, not with blood, but with red dye! The battles simulated are usually real ones from history, but they may not be. Obviously as no-one gets killed now, there is no need to use prisoners-of-war, who anyway do not have, or would not use the military skills of our Atlantean soldiers. So instead both sides are fought by Atlantean troops, one side in the uniforms of the enemy, of course. Great manoeuvres, tactical master-strokes, feats of endurance, all are copied for us by the wonderful soldiers of our Army, trained as they are by the greatest military minds of our Empire. Thus it is that for the cognoscenti who go to see these games - and we are all of the better classes - this wargame has become a true art form. [ **Spectators had to pay quite a lot to come to these games, which in itself limited attendance to the better-off - really the upper classes. Note that these wargames were taken seriously by the Army, and leading generals would willingly advise and help train the wargame armies for the simulation of great battles of the past**].

"Well I must end now. I hope you now have a true idea about our modern wargame. I hope you will one day be able to see it, and perhaps we can persuade your father to let you travel over here one day for that purpose.

"My very best wishes to you..."

## THE LATER DEVELOPMENT OF THE WARGAME

After about 500, sports and games in general split apart along class lines. The bloodless wargame became the preserve of the upper classes, along with a form of Race Game, a sort of survival course in the countryside, involving two teams, each of which had to prevent the other getting a baton from one side to the other. Crossbows with marking dyes were again used, to be fired at the opposite team. The lower classes went to popular games, often organised by local Councils. These could be ball games or fights, or imitations of battles or sieges, which could quite often involve bloodshed.

After 590, all elitist games were abolished in areas controlled by the Republic, although even before this, some of the more "left-wing" Class 1 and 2s had deserted the wargame, and begun attending "fashionable" lower-class games. These now became the "officially sponsored" games of the Republic. At times, all bloodshed in them was banned, while in other periods, especially when the war with the Imperialists became particularly virulent, the Republic reverted to the old First Empire practice of including real Imperialist prisoners in the games, who could be fought and killed. In Imperialist parts of the Empire, the old elitist wargame gradually died out – real warfare and fighting took its place, and it soon seemed tame and outmoded. After the 620s Ruthopheax and the Squires took over control of more and more of the Empire, and different leisure activities were adopted by the new upper classes – hunts, horse sports, and country pursuits.

During the Third Empire, from 650 to 749, the upper classes continued with these pursuits, while town-dwellers and members of the lower Classes indulged in sports of various sorts. One particular form of countryside activity of the Squires was a sort of adaption of the old race game, in which criminals, who had been sentenced to death, could be chased across country by the upper classes on horseback. If caught before they reached "safety", they would be put at the mercy of the ferocious dogs, who accompanied the Squires, rather as in present-day fox-hunting. If the prisoners "escaped", they would still be executed, but in a rather more "civilised" way – by beheading! After 700, this form of "execution" gradually died out.

After 750, and the establishment of the Fourth Empire, all upper-class pursuits became unfashionable, and the whole Empire supported "normal" sports and ball-games again. After about 770, the old wargames were reintroduced at a more popular and crude level. These, though wholly bloodless at first, involved simplified versions of the Second Empire style race and war games, now with betting allowed, and other mass entertainment features intervening, such as music, spectacular displays and entertainments. Later on, all these games and sports grew coarser still with much violence taking place, and frequent deaths.

It was only a step from this to the even worse debasements perpetrated on games and sports by the Tyrants after 805. This led to a return to all the bloodthirsty practices of the past – and much worse too. To impose terror and docility on the population, the Tyrants reverted first to public executions of criminals and opponents, then to reenactments in public wargames of battles fought against enemies abroad. These involved again the fighting and killing of enemy prisoners, or Atlantean criminals. After 812, an increasing cruelty and coarseness of taste led to public displays of gladiator-fights, and torture and execution of prisoners. The last two Tyrants mounted spectacles of mass killings and torture, accompanied by art and music.

After 828, during the Fifth Empire, all this was abolished, and sport and games returned to the situation of the 750s and 760s.

## **THE GOLDEN AND SILVER AGES OF ATLANTIAN LITERATURE, 250 - 550**

### **INTRODUCTION.**

Below are excerpts from the "Brief history of the greatest writers of the First and Second Empires", written around 680 by Justin Thoulpas, a descendant of the dramatist of that name. I have concentrated on literature, that is to say, poetry and drama, plus a small amount relating to other sorts of prose. I have also included in the middle part of a long digression by Thoulpas on the subject-matter chosen by the poets and playwrights of this period. Thoulpas was a careful and accurate writer, and most of what he says is borne out by authors of other books. I have put in occasional comments in brackets.

### **1. POETRY**

The First Empire was the great age of poetry, just as the Second was of drama, although of course many dramatists were themselves great poets and wrote their plays in poetic form. The following were the best poets of this early era:

#### **Carnaxa Lillie (274 - 327)**

(Although we have some knowledge of poetry, or rather verse, written before the 270s, it only appears in fragments, often as quotes in anthologies of the later First Empire, and before about 230 it is nearly of a religious nature.) The first true lyric voice that we know of, and indeed the first poet whose works we can still read a reasonable amount of, is Carnaxa Lillie. It is remarkable that she should be in fact a poetess: not only were female writers of any sort very rare in the First Empire, they remained uncommon for the next two hundred years, and even now, when there is much greater equality in all ways between the sexes, women authors are far outnumbered by their male equivalents. Nevertheless, it is true to say that female writers, such as they were and are, tend to concentrate on lyrical poetry, as well as other sorts of descriptive prose. But Lillie remains one of the greatest of these poets.)

We know very little about Lillie apart from the evidence of her work. She is supposed to have lived most of her life in a community of women, having rejected men after two early unhappy love-affairs. She is supposed to have married one of these men, but if so, she lived with him for only a short while, before moving away on her own. She spent most of her life in the eastern part of the province of Atlantis, in small towns and villages.

She wrote between about 295 and 320, and used a loose meter, with free rhythms, very different to the classical style which would follow a hundred years later. The poems are all quite short, with strict rhymes. Their subject-matter is predominantly love and friendship, which are celebrated in rhapsodic fashion. Her world is hermetic and circumscribed, and we possess relatively few of the large number of poems we know from contemporaries that she wrote, but each poem is perfect in itself. (We now possess even less of her original verse than did Thoulpas' contemporaries).

**Tuondo Bemmel (27-? - 343, fl. 295 - 330)**

Relatively little about Bemmell's personal life has come down to us. We do not even know for sure when he was born. We assume it was in the late 270s, and certainly his first written work started from 295. He continued writing till about 330, after which we have nothing more by him, although he is known to have lived on till 343. He therefore wrote during the same period as Lillie, but certainly neither of them knew the other. He was born and lived initially in Atlantis city itself, but later moved to the northern edges of the Empire, as it was then, and indeed beyond, when he was probably exiled for a while during the Family Wars.

He was a very politically-minded author, who wrote to celebrate the lives and deeds of the Emperors. He is thus the first and greatest writer of epic nationalist poems, though many others followed him, both in the early 300s and again under the Atlaniphon Emperors. He wrote poems to the glory of Atlantis herself, as well as to Emperors like Siphirixo, Cao-Melion, Lir-Craonos and Ruthoyon I and II. His aim was to praise the martial spirit of the Atlanteans, as well as their learning and their enlightened government. He is silent between about 308 and 313, and probably fell into the bad books of Yeasor and later Ceuralla for supporting Siphirixo and the "true" Imperialist line as he saw it. He was almost certainly exiled to the Marossan area in the north. **(We possess considerable portions of several of his epics, as well as some shorter pieces.)**

### **Wologin Phostin (278 - 340, fl. 300 - 325)**

The third of the great poets who worked in the first three decades of the fourth century was the Yalland, Wologin Phostin. **(Wologin is the Yalland equivalent of the Atlantean first name, Fulgon, and this is often the way his name was written during the period from 330 to 500 and again in the earlier seventh century, when some degree of Atlantean national feeling was abroad).** Though born in Pruddir in the Province of Th. Thiss **(it became an Atlantean province one year before Phostin was born)**, Phostin spent much of his later life either in the province of Atlantis or in the capital itself. He wrote initially in the Yalland style of poetry and sometimes in Yalland itself, about historical Yalland themes of love and war and desert adventures. Some of his verse was about exotic and improbably adventures in uncivilised parts south of the Helvengio. As his career progressed, his style of writing caught the mood of the period, which from the 310s onwards, following the end of the Family Wars, was in favour of exotic and romantic poetry. Phostin now adapted himself to Atlantean tastes, and wrote only in Atlantean (though with much Yalland local colour), and using Atlantean metres. **(Quite a lot of his Atlantean verse survives, though little of the Yalland poetry.)**

### **Carel Rasiphel (339 - 398)**

**(After the 360s, the taste for exoticism died out, and a strict classicism gradually took its place. This involved limitations on subject-matter, metre (in poetry) and vocabulary. The poet who helped to work out these rules, and who became the greatest exponent of pure classicism, was Rasiphel).**

Rasiphel was born in Yzuephe, on the Atlantean-Atlantis border, and after the 370s became virtually the "court poet" of the new Emperor Atlaniphon !. His main work, as he saw it, was the codification of the new classicism, especially the three types of metre to be used, and the small and "elevated" vocabulary for employment in poetry and poetic drama (all drama was in poetry in this period).

His earliest plays were more experimental, in what we have now come to call the pre-classical style. He wrote at least 25 plays, of which 19 have survived (for us, though, only 9 now exist, 3 being incomplete, plus other excerpts). These plays are all based on mythological or early historical stories. The main themes were, as set out in the classical theory, the conflicts of ambition and love and loyalty and personal self-aggrandisement. To our taste, all these plays seem stiff, formal, conservative and of limited human interest, but they were greatly prized by Atlaniphon as representing "Imperial drama".

Rasiphel also wrote some poems independent of the dramas. These were of two main types:

"Characters": pieces describing the different races of the Empire.

"Dialogues": purporting to be conversations between famous mythological or historical figures.

## Suennon Huattiens (361 - 447)

Huattiens was the great classic poet of the First Empire, and chiefly of the reign of Atlaniphon II. Like Rasiphel, who was his mentor and friend as a young man, he was a nationalist and Imperialist. His career is traditionally divided into four periods. During the first, from about 380 to 400, he wrote sycophantic and adulatory poetry about many Atlantean Emperors. In 401 he suffered a severe illness and lost his wife. This seems to have made him much more cynical and pessimistic, and led to the second period of his art, lasting till about 415. This saw him produce a great series of short lyrical poems and stories in verse from myth and history, all much more personal; than before, and most of which were characterised by their melancholy. After 415, now in the reign of Atlaniphon II, Huattiens found new love and a more secure financial position from a rich patron. This led to a third period in his art, until about 430, when he produced some happy love poetry and ballads, contributed to some dramas and wrote some satirical verse. He showed more interest now in non-Atlantean verse forms, and began to move towards a sort of Romanticism. Finally after 430, in his old age, he shifted to a fourth style, characterised by gnomic short poems, some mellow romantic verse and, most remarkably, satirical and semi-pornographic poetry which were not published until the 490s.

We possess a great deal of Huattiens' work from every period, and can view him, as did his contemporaries and successors, as the greatest classical poet. However he can also be looked at as the harbinger of the early Romanticism of the 460s and after (Gildasso and others), because of the way in which he expanded classical vocabulary and metres while nevertheless keeping to overall classical forms.

## 2. PROSE

Religious, legal and philosophical writings date back before 200, a period which, for us (**and indeed us in the modern world**) is truly buried in the mists of time. The main works of the 200s include philosophy by Liclencu, law by Thulpas, religious works by Ramillanel and the categories of art as set down by Yestayaya. (**Liclencu and Ramillanel are dealt with in the sections on First Empire Religion and Philosophy; Thulpas is referred to in the section of history dealing with Carel I, the second Emperor of the First Empire.**)

**Yestayaya**, who lived from 222 to 268 in what became the province of Yall. Thiss., propounded the philosophy of art, and even as early as this, set down the "classical" categories of arts. In other words he stated which arts were to be allowed as "true" arts, and set down his own regulations on subject-matter and style (these were largely ignored for the next century, until rediscovered and rewritten much more rigorously by Rasiphel). The permissible arts were poetry, sculpture, pottery and architecture, as from about 250. In later years other arts would be added, of course, such as music and dance by about 310, gardening and drama by 360, landscaping and town-planning by 400, and prose and painting by 440.

Between 280 and 360, stories of travel and adventure, often exotic, and later humorous and romantic appear more and more frequently. After 350 these short stories were more extended and become miniature novels, and start to deal much more realistically with real emotions and real characters. However, they remained set in mythological or historical periods, or in foreign countries, like contemporary drama. From about 360, these became the preserve of the great female writer, **Suyosa Caraya** (344 - 407). In her hands, these early novels adopted a sort of pre-classical romanticism of theme, dealing superbly with the subjects of love, death, grief and passion in relatively realistic settings, usually only slightly removed from contemporary Atlantis. They remained untrammelled by any classical rules.

Caraya started off a whole wave of overwhelmingly female novelists and short story writers. However, her successors after the 390s became much more formal and classical in their work, in keeping with the times. Nevertheless they retained, at a lower level, some of the psychological penetration of Caraya and the great dramatists of the period, such as Rasiphel and Normelliel. These stories were accepted by the arbiters of taste of the time very largely because of Atlaniphon I's support for and friendship with Caraya after about 385. After the 420s and 430s, however, they were increasingly deprecated and ignored in favour of drama and then the Total Works of Art. Only recently (**i.e. since the 730s**) have we rediscovered the virtues of these novelists, which seem to prefigure the work of our own most recent writers. (**Varying amounts of the works of all these prose writers have survived the millennia. Most of what we know of the writers of the 200s is due to later critics and historians. Caraya and the Second Empire novelists were rediscovered after the 730s and we possess quite a number of their editions of the earlier authors' works.**)

### 3. DRAMA

The Classical drama was, by 400, divided into various types: pastoral (lyrical and dealing with the conflicts of love); mythological (with plots taken from myth or religion); historical; and comedy (set either in mythological or historical times, or increasingly in contemporary times).

Mythological and historical drama, with which we shall be largely concerned, were subdivided into the two categories, moral and realistic. These applied to the subject-matter and its treatment. If the story was dealt with "truthfully", that is keeping more or less to historical truth, the drama was termed "realistic". If the subject-matter was altered (particularly the ending) to bring out the moral which the author wished to point, it was called "moral".

The themes in all cases concerned the inner conflict within the hero (and sometimes other characters) between "excess of emotion" and "preserving a balanced norm". **(This clearly springs from the creed of the State Religion, which took humans to be subjected to the battles between the wills and emotions of the gods, and which bade them to try to keep their own emotions in balance.)** Thus the play might end in disaster if the hero was unable to keep his desires and emotions under control - or in triumph, if the opposite was the case. In realistic plays the ending depended on the source used, but in moral dramas, the original ending was often altered, or at least pointed, to provide a moral, that is, triumphant conclusion for the hero. Throughout the Classical period, language, metre and form were restricted, the number of characters allowed on stage was limited to five or six, and the scene changes to two or three.

#### Examples of plots of the period

##### 1. Mythological

These might deal with the Old Gods, and the battles between the good and bad ones. There would be little internal drama. These topics are usually only found in pre- and early classical drama, or as a general background elsewhere. Alternatively the plots might concern the New Gods (possibly also including some of the Old Gods), and fights with or against humans. These stories were basically Good versus Evil, though with additional human interest, and were again used in the earlier literature. The great change came when Rasiphel and others changed the point of view of the drama to that of the human. Now the hero (and other humans) were the focus for the battling gods, and were pulled this way and that by conflicting emotions (i.e. gods).

Further stories involved the conflicts between the New Gods, seen from **their** point of view (seemingly semi-human), and the influence on one of them of the desires and emotions of other gods. It was such inner conflicts which interested the classical dramatists (and these were really easier to find in historical rather than mythological stories.) So classical drama pushed to the background those elements which had been stressed in pre-classical plays and stories, that is to say the battles, intrigue, love and stratagems. Later Romantic drama would play up the external story-line, often at the expense of the inner feelings of the main characters.

In other types of Romantic drama, a central hero was the main figure of the play, but again, he would be treated as a picaresque adventurer, and his "story" or life became the chief interest. His feelings were of supreme importance, but now often shown in clashes between his will and that of the State or someone else, or in conflicts of love. Music and landscape became more important, and there would be many more characters and changes of scene on stage. There was also more violent action and emotion shown to the audience. The classical "religious" idea of preserving a mental balance in the hero against excess of emotion (as personified by or at least thought of as emanating from the gods) gave way to more rough-hewn dramas of personality clashes, historical epics, with little remaining reference to the gods. The story-line became all. **(Note that Thoulpas always refers to the heroes of dramas. The central characters were indeed normally men, but might occasionally be female, usually in the case of historical plays representing, for example, Carnaxa Lillie or Ceuralla).**

##### 2. Historical

Favourite plots of a historical nature involved the overwhelming emotions of love, ambition, hatred, anger, jealousy and pride. The main historical figures, nearly always Emperors or members of the Imperial family, who were the centre of these plays were:

1. Carel I. Theme of liberalism (the abolition of slavery and human sacrifice, etc.) versus the demands of religion (the priests). This led to the emotional conflict of ambition and love of humanity versus piety and/or materialism.
2. Carel II. Theme of the war against Helvrieh and the Emperor's death in 252. The corresponding emotional conflicts were the grip of ambition and anger. Some plays dealt with his love affairs (the hold of ambition).
3. Carel III. Again the theme of the Helvran War and the Emperor's death in 261. (Carel is shown overwhelmed by

ambition).

4. Cao-Melion. The themes covered ambition followed by depression linked to the deaths of his friends and family, and also love. Particular plays would concentrate on his first and second wives, his jealousy due to infidelity and the murders that ensued; and Cao-Melion's love for Cairille.
5. Siphirixo. Some plays used a love affair between the Emperor and Carnaxa Lillie, the poetess, though this seems to be apocryphal. The plot would then show the Emperor losing interest in the Empire leading to disaster with the Family Wars. Also plots might deal with the problems of succession after 304 and again the resulting wars.
6. Family Wars. Themes in this period involved Siphirixo's love of his family and his defeat by Yeasor; the career of Ceuralla (her ambition) and defeat by Lasso and Yeasor; and Puella's career, her capture and death of a "broken heart" (due to an "invented" love affair).

### **Fulgon Normelliel (400 - 461)**

Like all playwrights of this period, Normelliel saw himself chiefly as a poet and only secondarily as a dramatist. Nevertheless during his lifetime, and partly due to his own example, there began a revolution in drama, which was to culminate in the sixth century the exaltation of Drama as such, and especially the Total Works of Art, to the top of the artistic tree.

Normelliel was a real all-rounder, who wrote poetry, prose (including monographs on poetry and art and their histories), poetic drama and early examples of Total Works of Art, with the drama combined with music and dance.

He began his career as a young man writing poetry in the style of Huattiens' and Rasiphel's adulatory verse, and progressed on to love poetry. However he then found his niche in a series of epic, narrative and ballad poems, in which, like Huattiens, he loosened the stranglehold of the classical rules of art. At the end of his career, his poetry returned to the discipline of strict classical metre. He did not possess Huattiens' all-round genius of depth and versatility; instead his verse amazes us by his dramatic sense, his use of very precise vocabulary, his ability to achieve great effects with strict metre and his use of dramatic irony.

As a dramatist, Normelliel started where Rasiphel left off, with classical, mythological and poetic drama, which had occasional interludes for music, dance or mime. This was standard even in classical drama. But both Rasiphel and Normelliel in his early career reduced these interludes as much as they could, and Normelliel in particular wanted the audience to concentrate on his poetry alone. Later, along with lesser contemporaries, Normelliel developed the dramatic aspect of his plays, using more expressive gestures by the players and emphasising mime again. He also collaborated with specific musicians to produce suitable mood music. His later plays were also set in specific landscapes and were intended, at least, to be played in particular locations.

The subjects of Normelliel's plays were increasingly historical and realistic rather than moral. They still dramatised inner conflicts, though more openly than before. Normelliel stressed the importance of the plot line and highlighted the emotional conflicts, bringing out dramatic tension and irony. The characters remained few and any form of picturesque or exotic scene setting was downplayed: all the drama remained in the verse rather than on the stage. He was especially interested in the conflicts of love and domestic turmoil versus personal ambition. He wrote plays about Carel I and Cao-Melion.

He was, for later periods, the ideal model of the classical dramatist, as Huattiens was of the classical poet. In his final years he deprecated the experiments of some younger contemporaries, like Gildasso, who were beginning to use prose in their plays and were approaching real Total Works of Art. He wrote nothing after 453, when he became ill, but lingered on until his death in 461.

### **Russalonni Gildasso (431 - 485)**

Gildasso was a flamboyant and emotional Chalcran nationalist, and the plays he wrote bear all the hallmarks of his character. He wrote entirely in prose and was keen on collaboration with other arts. It was he who coined the description "Total Work of Art" in 455, although, unlike other dramatists, he always considered the words to be the most important part of any "multi-media" production. It was not till after 500 that the text of Total Works of Art became less important than the music and landscape.

Gildasso wrote fewer plays than Normelliel, but each work was longer, more elaborate and involved other art-forms as well. He tried to concentrate on single characters, which acted and spoke in very emotional ways. However, he rarely went completely "over the top" like his Romantic successors, and was particularly successful when dealing with pathos, love and hatred. He concentrated on historical subjects, prior to 361, and wrote various theoretical works

abjuring the traditional classical rules of the types of plays, and the division into moral and realistic drama. He claimed that on the contrary, all plays must be realistic, which means truthful.

His greatest plays were about Cao-Melian and Puella. He also wrote several comedies, some of which are really humorously realistic plays. (For an excerpt from one of his comedies, in English and Atlantean, see [The Bride - excerpt from a play](#) ). In his last years, Gildasso experimented more and more with Total Works of Art, which he saw as the way forward for drama, and which his younger contemporaries were wholeheartedly adopting. He included songs, music and landscape in these more mature plays. **(Many of Gildasso's plays have survived, although only four of the comedies).**

### **The Total Work of Art ("*Tontenscouphabbe*") (470 - 540)**

From the time of Gildasso onwards, musicians, dramatists, dance choreographers and landscape designers drew closer and collaborated in Total Works of Art (**virtually modern operas.**). In a very few cases, the same person wrote both words and music and thought out the dance elements and the landscape setting. In these works, all classical restrictions were abolished and plays became more vivid and increasingly sensational musical dramas for one or two heroes or heroines. Whole surrounding worlds were created by gardeners and landscape designers. By about 510 Total Works of Art had become mixtures of drama, music and songs, with ever fewer purely spoken words. After 530 the prose often became poetic, as the lyrics to the music always had been. There was increasing interest in war and love, for example in the Emperors Carel III and Ruthoyon II, and after 540 on to more recent Emperors like Atlaniphon II and the Helvran Revolt and the Pareon/Ceisille story. After 520, Thoulpas' influence became paramount, and Total Works of Art became "pilgrimages" through different pre-set landscapes lasting several days.

### **Iairos Thoulpas (491 - 560)**

Thoulpas is the archetypal Romantic writer and composer of Total Works of Art. He was the first important artist to be writer, composer and landscape arranger all on his own, and indeed there were very few after him, and certainly none so successful. He had strong politically liberal views, and was very upset by the increasing conservatism of the establishment in the later years of the Emperor Crehonerex II and after. He had tremendous influence after about 530, though in due course he also provoked increasing dislike and even hatred amongst political and artistic conservatives, leading to a reaction after the 540s against Romantic extremism in favour of classical plays or the early types of Total Works of Art and ultimately lower-class simplistic moral or political drama.

Thoulpas was the first, after the 520s, to introduce Total Works of Art lasting several days in different landscapes, "festivals" as they were called. His most notable drama was the "Downfall of the Old Gods", an immense mythical and symbolical construct of all the arts; he also wrote a work on the lives of Siphirixo and Yeasor. As well as drama, Thoulpas wrote quite a lot of poetry, including several epics - the most notorious was the "Coming of the barbarians", which greatly annoyed Crehonerex II with its implied criticism of his regime as "barbarous". His play about the rebellion of Tuondo in Crehonerex's reign was the final straw and led to the writer's banishment. Thereafter his health broke down as he struggled to complete a never-finished epic set in the old Helvran Empire, depicting the decline and fall of Manralia under the Helvrans and then the fateful conflict between Atlantis and the Helvrans. Throughout his later years Thoulpas' works became more symbolical and difficult to understand, and here acted as a precursor of the later hermetic movement. **(A large amount of Thoulpas' work has survived the millennia).**

**An excerpt, in English and Atlantean, from the comedy "The Bride" by Gildasso, written about 470.**

(Tuondo Measel is pretending he is not at home, where he is being pursued by his future bride's family. He has had second thoughts about marrying her. He tries to pretend at first that he is his own brother, Fulgo.).

***Siphon Meistos (Tuondo's future brother-in-law):***

Come and open the door, Tuondo. We know you're there, and so does your bride - do you hear - your wife!

***Thoun Meistos (Tuondo's future father-in-law):***

And I know you're in the house - I saw you go in. Yes, there you are - behind that window!

***Tuondo Measel (from inside; to himself, in a false voice):***

Oh woe, double and triple woe. (*Aloud*): It's me that's here!

***Siphon:***

We know - come out.

***Tuondo:***

No, me, Fulgo, me, not Tuondo, me. I don't know where the other one -er..., where my brother is now. He came in the front door and went out the back. He didn't stay long at all.

***Thoun:***

Ha, you liar, there isn't a back door to that house!

***Tuondo:***

No indeed, it's a side door I went out - I mean Tuondo went out. Oh go away, I was sitting quietly here when you came.

***Thoun:***

There is no side door either. I walked all round that house earlier.

***Tuondo:***

Oh no, no side door...but I don't know, I wasn't looking anyway. I am just sitting here. Actually I think Tuondo has gone to get Millei a present.

***Millei Meistos (Tuondo's bride-to-be):***

Oh by God, just wait! When I catch him, I'll shove his present down his throat.

**Tuondo:**

That's why I look forward...I mean Tuondo looks forward..to marrying you so much.. you lovely woman...as soon as he gets back here. Really I shouldn't wait for him. It will take him a while to find a suitable present for you..a necklace, a chain, a rope...

**Thoun:**

What is he saying?

**Siphon:**

You are definitely Tuondo, you deceitful villain!

**Tuondo:**

Well, a philosopher would say you are right, or partly right, that I am Tuondo. We certainly had one mother and one father. Does that mean I am Tuondo and Tuondo is me? What an interesting question..oh, you gods! (*A brick smashes the window*).

## ***The historical grammar of the Juralic languages, 1:introduction and verbs***

The sections below discuss in outline the morphology of Juralic, as far as it can be reconstructed, and then the changes which developed in the four main languages which developed from this ancestral tongue: Atlantean, Chalcran, Helvran and Yalland. The period chosen for these languages is that of their "classical" period after 200 or 250. There is much more detail on Atlantean in the articles on that language at [Atlantean language](#).

### **Stress**

As regards stress in Juralic, this was variable. In two-syllable words, it always fell on the first syllable. In words of three and more syllables, it was usually on the penultimate syllable if this was a long vowel, otherwise on the antepenultimate. In inflected words, with suffixes, the stress fell on the final syllable of the root, if long, otherwise on the preceding syllable. In all of the descendant languages, this lack of stress on suffix endings led to the partial or more or less complete decay of parts or all of these endings. It can be seen, that this process went furthest in Helvran, less far in Atlantean and Yalland and least far in Chalcran.

A good example of how important the position of the stress in the original Juralic word was with regard to its development in later languages can be seen in here, with two related but differently stressed words in Juralic:

**Juralic:** a'me:ba: (stress on first syllable)(quantity) > **Atlantean:** amba/abbe (suffix meaning "a collection of")

**Juralic:** ame'b (stress on second syllable)(many) > **Atlantean:** meu (many)

### **Systematic vowel and consonant changes in Juralic**

One very notable feature of Juralic, which is carried over into its descendants, is a regular system of vowel and consonant changes in different parts of speech. With regard to the vowels, there are four sets of changes involved, and each can, but need not necessarily, alter three times. Thus there is a basic root meaning, with one particular vowel, and then two possible changes of vowel in a related form of speech (vowel, noun, adjective), or simply the same form of speech but with an extended meaning. The consonantal changes are in four sets, but each can only change twice, and generally speaking, these do not also include vowel changes, although this may occur.

The vowel changes are as follows in Juralic, with examples given from Juralic and Atlantean, and the meaning in English:

	GRADE 1	GRADE 2	GRADE 3
FUNCTION OF VOWEL CHANGE	BASIC NOUN/VOWEL/ADJECTIVE	VERB OR ADJECTIVE FROM FORM IN GRADE 1. EXTENDED MEANING OF FORM IN GRADE 1	FURTHER EXTENDED MEANING OF FORM IN GRADE 1 OR 2.
JURALIC/ATLANTEAN VOWELS			
TYPE 1	a / a	ai / ai	au / ao
EXAMPLES	ra:pho: / rapho	raiph / raiph	rauph / raoph
MEANING	robbery (basic noun)	to rob (verb from noun)	to rape (extended meaning)

TYPE 2	e / e or ei	e / e or ei (this grade absent)	eu / e
EXAMPLES	me:l / mel		me:ul / [mel] (found in "ammel")
MEANING	to eat (basic verb)		to devour, swallow (extended meaning)
TYPE 3	o / o or ou	oi / ai	ou / ou
EXAMPLES	losso / loss	loiss / laiss	louss / louss
MEANING	freedom (basic noun)	to free (verb from noun)	to open (extended meaning of verb)
TYPE 4	u / u	wo / (f)uo	wu / u
EXAMPLES	u:rthu: / urthu	wo:rth / fourth	wu:rth / furth
MEANING	birth (basic noun)	to bear, give birth (verb)	to show, reveal (extended meaning of verb)

Note that these changes work for both long and short vowels in Juralic, but a short vowel sometimes has a more "basic" meaning than a corresponding long vowel.

The consonant changes are as follows. The changes are always found in **initial** position:

	GRADE 1	GRADE 2
FUNCTION OF CONSONANT CHANGE	BASIC MEANING OF NOUN OR VERB	EXTENDED MEANING OF NOUN OR VERB
JURALIC/ATLANTEAN CONSONANTS		
TYPE 1	b, d, g / b, d, y	bh, dh, gh / b, th, y
EXAMPLES	da:n / dan ge:ste: / gest (Helvran loan)	dha:n / than ghe:sto: / yesto
MEANING	to give east	to allow dawn
TYPE 2	p, t, k / p, t, c	ph, th, kh / p, th, c
EXAMPLES	kenk / (nen)cenc tess / theuss	khenk / cenc tess / thess
MEANING	to duel to draw	to fight to paint
TYPE 3	kw / gw	gw / gu
EXAMPLES	kwapt / huatt	gwapt / guatt
MEANING	to say	to call
TYPE 4	h / -	kh: / h
EXAMPLES	ha:na: / ana	kh:wa:ina: / huaina
MEANING	sky	heaven

It should be noted that all the facts that I discuss here and elsewhere about the Juralic language and its successors are reproduced from the work of Atlantean linguists. I have acted merely as an editor, and here and there made comparisons with modern languages. No doubt in the future, when further archaeological discoveries have been made, we in the present age will be able to study and perhaps elaborate further on this Atlantean foundation.

## 1. Verbs

All roots in Juralic ended in a consonant, to which were appended suffixes for tense, mood, voice, number and person.

## PRONOMIAL ENDINGS

The basic Juralic pronomial endings, which were added after other suffixes for tense and mood, are as follows. Note that there are two versions of these endings: full ones and shortened ones (singular only). The latter were used for all tenses and moods with multi-syllabic suffixes, that is to say everything except the present, past and future tenses, and the indicative and subjunctive moods. The table also shows the developments in the four descendants of Juralic, where the shortened endings disappeared in every language except Atlantean.

SINGULAR	JURALIC		ATLANTEAN		CHALCRAN	HELVVRAN	YALLAND
	FULL	SHORT	FULL	SHORT			
FIRST ("I")	-no:	-n	-nu	-n	-nnu	- (but -n in past tense)	-no
SECOND ("YOU")	-to:	-t	-tu	-	-ttu	-t	-to
THIRD-MALE ("HE")	-dhe:	-dh	-the	-th	-ssa	-d	-do
THIRD-FEMALE ("SHE")	-sa:	-s	-se	-s	-ssa	-d	-ro
THIRD-NEUTRAL ("IT")	-kh:a:	-kh:	the	-th	-cha	-d	-co
<b>PLURAL</b>							
FIRST ("WE")	-no:s		-nos		-nni	-n	-ni
SECOND ("YOU")	-te:s		-tes		-tti	-n	-ti
THIRD-MALE ("THEY")	-dhe:n		-then		-ssi	-n	-di
THIRD-FEMALE ("THEY")	-se:n		-sen		-ssi	-n	-ri
THIRD-NEUTRAL ("THEY")	-khe:n		-then		-chi	-n	-ci

To form moods and tenses, vowels and/or consonants were added to the root of the vowel. The pronomial endings were added on to these. Note that although there were separate words for pronouns, these were not normally used, except for emphasis, in any of these languages apart from Helvran.

## INDICATIVE MOOD

### PRESENT TENSE

In Juralic, the vowel added corresponded to the last vowel of the root. If this was a, e, i or y, then -e: was added. If the root vowel was o, u, or w, then -o: was appended.

### PAST TENSE

Juralic added -a: to the root before the pronomial endings.

## FUTURE TENSE

Juralic added the syllable *-e:ra* to the root.

JURALIC	ATLANTEAN	CHALCRAN	HELVAN	YALLAND
<b>PRESENT</b>				
e:	e	i	e	o
o:	o	u	e	o
<b>PAST</b>				
a:	a	a	o	e
<b>FUTURE</b>				
e:ra	e:a	ira	ir	eri

Some examples from the Juralic verb GRAD (to fall) are:

He falls (present tense): **JUR:** GRADEDHE; **ATL:** GRADETHE; **CHALC:** GRADISSA;  
**HELV:** (NIR) (I) GRODED; **YALL:** GRAUDHODO

We fell (past tense): **JUR:** GRADANOS; **ATL:** GRADANS; **CHALC:** GRADANNI;  
**HELV:** DOR (we) GRODON; **YALL:** GRAUDHENI

## PLUPERFECT

Juralic appended *-a:ge*. This did not survive into Atlanchalcric, and Atlantean and Chalcran used the past tense of "to do" plus the past participle. In Helvan, *-a:ge* > *o:ve*.

In Yalland, the meaning of the pluperfect was represented by the past tense of "to have" plus past participle, but the Juralic ending did survive into Yalland, albeit with a different meaning.

In Yalland, *-a:ge* > *evi*. This was just used in the first person singular (ie *-evino*), to stand for the so-called "reincarnating "I"". This religious notion, which produced a sort of timeless tense, a mixture of past, present and future, was originally copied from the language of S. Numedean, and later taken over by Atlanteans of the Naturalist faith. See the section "APPENDIX: THE STRANGE CASE OF THE FIRST AND THIRD PERSONS" at the end of [Atlantean language](#)

## PAST PERFECT, FUTURE PERFECT TENSES:

These tenses seem not to have existed independently in Juralic, but were formed or created in the successor languages using auxiliary verbs and past participles.

For the past perfect tense (ie "I **have** eaten"), Atlantean and Chalcran used the present tense of the verb "to do" plus past participle. Helvan and Yalland used the present of "to have" plus past participle.

For the future perfect tense (ie "I shall have eaten"), Atlantean and Chalcran used the future of "to do" and the past participle, while Helvan and Yalland employed the future of "to have" and the past participle.

## PARTICIPLES

JURALIC	ATLANTEAN	CHALCRAN	HELVAN	YALLAND
<b>PRESENT</b>				
-ondu:rt	-ondur	-onnor	-und	-oddo
<b>PAST</b>				
-akesalt	-ax	-acsa	-aks	-(eg)ire

Examples are:

Falling/fallen: **JUR**: GRADONDURT/GRADAKESALT. **ATL**: GRADONDUR/GRADAX  
**CHALC**: GRADONNOR/GRADACSA **HELV**: GRODUND/GRODAKS  
**YALL**: GRAUDHODDO/GRAUDH(EG)IRE

## CONTINUOUS TENSES

In Juralic, a suffix *-e:kwās* was added to the root for the present tense and *-a:kwās* for the past tense, while for the future continuous, *-eukwā:n* was suffixed. Pronominal endings came afterwards.

(Example of meaning: "I am/was/will be falling")

In Atlantean, these developed into *-ehuase*, *-ahuase* and *-ehuane* respectively.

In Chalcran, the ending became *-eccan*, *-accan* and *-iccan* respectively, but these were rarely used. Normally, as was also the case in Helvran and Yalland, an adverb with the sense "continuously" had to be interpolated into the sentence with the straightforward present, past or future tense.

## THE INFINITIVE MOOD

The infinitive of a verb was formed in Juralic by attaching the ending *-o:wan* to the root, eh GRADOWAN (to fall).

This ending died out everywhere except in Yalland, where it became *-over*.

In Atlantean, it developed as a root form, preceded by EI (or ED before a vowel).

In Chalcran, the form IDI preceded the root.

In Helvran, the root alone was used.

## THE IMPERATIVE MOOD

From the original Juralic, this just consisted of the root of the verb, for use in the second person singular and plural (ie Fall!). This was the same in the descendant languages, except for Atlantean and Chalcran, which used the root followed by the second person of the verb "to do" (ie TEH in Atlantean, and TIECH in Chalcran).

## THE CONDITIONAL MOOD

Juralic interpolated *-the-* between root plus *-e/-o* or *-a* and endings. This survived in Atlantean as *-he-* in the present and past tenses, eg GRADEHES (she should fall). In Yalland it became *-cci-*, eg GRAUDHOCCIRI. The other languages used auxiliary verbs.

## THE NECESSITATIVE MOOD

This corresponds to "must" in English. Juralic interpolated *-kese*. This only survived in literary Atlantean as *-xe* in the present, past and future, eg GRADEXETHEN (they must fall). The other languages expressed the meaning with adverbs and phrases.

## THE SUBJUNCTIVE MOOD

In Juralic, this was formed by interpolating *-y-* between the root and the tense and pronominal endings. Thus Juralic YE:YO: /YA; /YE:RA for present, past and future became

Atlantean: *ie/io ia iera* Chalcran: *i/iu* Helvran: *je* (and caused mutation of root vowel) Yalland: *yo*

Note that only (literary) Atlantean retained the original forms for the past and future.

## THE PASSIVE VOICE

In Juralic, *-p-* was interpolated between the root and tense vowel and the pronominal endings. This survived into the descendant languages, but only as a literary formation.

Thus, **JUR**: *-pe-* **ATL**: *-phe-* **CHALC**: *-ppe-* **HELV**: *-be-* **YALL**: *-pi-*

Eg: **JUR**: LEMBEPETO **ATL**: LEMBEPHET **CHALCR**: LEMMIPPETTU **HELV**: LEMBEBET  
**YALL**: LEMBOPITO (You are taken).

## NEGATIVISATION

In order to make a verb negative, the original Juralic method was to attach the prefix *dekh-* to the verb. This was followed in the later languages, eg Atlantean *de(h)-*, Chalcr: *dech-*, Helv: *dek-* and Yall: *decc-*. These were literary forms, however.

## INTERROGATIVES

The Juralic method of putting a verb phrase into the interrogative (ie "Is he falling?") is not precisely certain. It was probably done simply with a questioning intonation of the voice. Helvran and Yalland place the personal pronoun after the verb. Atlantean and Chalcran add CIR / CIBB (from Juralic KIRB meaning what?) before the verb form.

There were various irregularities in the conjugations of some verbs in the descendant languages, especially in Atlantean. For more details about these, go to [Atlantean language](#)

## ***The historical grammar of the Juralic languages, 2: Nouns, pronouns and adjectives***

### **1. Pronouns**

The use of nominative pronouns was optional in Juralic, being restricted to cases of emphasis in Juralic. This was because suffixes showed clearly the person and number of the relevant verb. This usage continued into Atlantean and Chalcran, although in later Atlantean, the pronouns were used more and more frequently as endings on verbs decayed. In Helvran, pronouns were mandatory, while in Yalland they were usually added, but could be omitted if no ambiguity would be caused, but this was usual only in literary style.

The table below lists nominative and accusative pronouns in Juralic, Atlantean and Helvran, as well as the genitive form (possessive), which were declined like adjectives in all the languages.

THIRD PL	THEY	KH:E:RA	HEI	KIR	THEM	KH:E:KH:A	HEIH	HIK	THEIR	KH:E:KH:EL	HEIHEL	HIKEL

### **2. Adjectives**

In Juralic, adjectives were only declined in two cases, nominative and accusative. The nominative stood for itself and the vocative cases, while the accusative was used for every other case. Adjectives were also declined in the plural, nominative and accusative only again. This procedure was still followed by Atlantean, Chalcran and Yalland, but in Helvran, adjectives had become indeclinable, with just the original nominative singular in use.

In Juralic, adjectives seem to have been able either to precede or follow nouns. In the descendant tongues, they normally preceded,

but could follow, for emphasis, in Atlantean and Chalcran.

### 3. Nouns

There were at least six main declensions in Juralic, which depended on the vowel which ended the word in the nominative singular case. These were:

1. -a
2. -o
3. -a:
4. -e:
5. -o:
6. -u:

These were greatly modified in the descendant languages. The first and second declensions were more or less amalgamated in all the languages, and this became known as the *consonantal* or *first* declension by the Atlanteans, as the endings were lost in the nominative, vocative and accusative cases. The third and fourth often partially combined into the *a/e* or *second* declension, and the fifth and sixth into the *o/u* or *third* declension.

There were originally six cases: nominative, vocative, accusative, genitive (ie possessive), dative (ie the indirect object, implying "to" or "for"), and locative (ie position, usually "in" or "on"). In Atlanchalcric, the vocative case was amalgamated with the nominative, and the locative was lost (though it was combined with the dative in Yalland). However, a number of new cases were formed in Atlanchalcric by affixing prepositions to the end of the root of the noun. These prepositions were later contracted, and became endings for the new cases of locative, Instrumental (implied "By" or "with" the noun) and Ablative (implied "away from" the noun, though not with physical movement). These were the total for Chalcran, but Atlantean added cominative ("with" or "without" the noun), allative (implied movement towards the noun) and elative (implied movement out of the noun).

Juralic also had a dual number, apart from singular and plural, but this left little trace in the descendant languages, except in certain fixed expressions in Atlantean and Yalland. It involved interpolating -IT- between the root of the noun and its ending. This became -ET- in Atlantean and -ID- in Yalland, in the few set expressions where it survived. For Atlantean, see [Remains of obsolete endings in Atlantean nouns](#)

Juralic plural originally involved adding -i: to the singular nominative form, followed by the case endings, if any. However, in Atlantean, uniquely, an ending -ix (from -i:kesa meaning "a group") was substituted in the nominative, vocative and accusative plural cases.

The table below gives the suffixes (if any), which were added directly on to the root of the noun. There were various irregularities in the descendant languages, especially in Atlantean, due to sound changes and influences. For more details about these, go to [Atlantean language](#)

## ***The phonetic changes from Juralic to Atlantean, Chalcran, Helvran and Yalland.***

### **1. Consonants**

The Juralic consonants were these:

#### **PLOSIVES**

**Labials:** p b ph bh      **Dentals:** t d th dh      **Palatals/gutturals:** k g kh gh

**Spirants:** s z kh:

**Nasals:** m n

**Liquids:** l r

**Aspirate:** h

These sounded as in modern English, except for the following:

ph, th, kh, bh, dh, gh were all pronounced originally as strongly aspirated stops.

kh: sounded like modern German "CH" in "BACH".

The table below shows original consonants in Juralic, and how they developed to Atlanchalcric (between -900 and -500), and hence to Imperial Atlantean (300-600), Standard Chalcran (-250 onwards), Imperial Helvran (-200 - 500) and Early Yalland (-200 - 500). North Atlantean (-200 - c350) and Atlantid (-200 - c400) forms are also shown, where they vary from Early and Imperial Atlantean. Atlantean, Helvran and Yalland also continued on and changed somewhat into "late" forms after 500. Chalcran died out by 600. Where '-' is written in a space, it means that there has been no change from the earlier stage of the language. Cons. means consonant; pron. means pronounced.

Below the consonant changes, are examples of words indicating these changes (written in italics).

## The phonetic changes from Juralic to Atlantean, Chalcran, Helvran and Yalland.

### 1. Diphthongs

Diphthongs in Juralic were as follows:

**SHORT:** AI OI AU EU OU      **LONG:** A:I O:I A:U E:U O:U

The long versions of these must have sounded as follows:

AI as modern English "I" in "SIDE"

OI as in modern English "BOY"

AU as in modern German "HAUS"

EU as modern English "A" in "NAME" plus a slight "schwa" ending as "ER" in English "BITTER"

OU as modern English "O" in "BONE"

The short versions were probably somewhat similar, but more lightly stressed. As can be seen below, in some cases, like Atlanchalcric, all the diphthongs became lengthened, while on others, such as Chalcran and Yalland, their development depended upon whether they were located in stressed or unstressed syllables. Helvran alone shows differing developments of long and short diphthongs independent of stress. This makes it difficult to be sure of the exact sound of long and short diphthongs in Juralic.

The table below shows original diphthongs in Juralic, and how they developed to Atlanchalcric (between -900 and -500), and hence to Imperial Atlantean (300-600), Standard Chalcran (-250 onwards), Imperial Helvran (-200 - 500) and Early Yalland (-200 - 500). North Atlantean (-200 - c350) and Atlantid (-200 - c400) forms are also shown, where they vary from Early and Imperial Atlantean. Atlantean, Helvran and Yalland also continued on and changed somewhat into "late" forms after 500. Chalcran died out by 600. Note that diphthongs may be long (: written after them) or short. Also, in Chalcran and Yalland, their development depended upon whether the syllable they ended up in was stressed or unstressed.

Below the vowel-changes, are examples of words indicating these changes (written in italics).

## The phonetic changes from Juralic to Atlantean, Chalcran, Helvran and Yalland.

### 1. Vowels.

The vowel system in Juralic was very simple, as follows:

**SHORT:** A E I O U      **LONG:** A: E: I: O: U:      **HALF VOWELS:** W Y

As far as we know from the sources, the vowels would have been pronounced roughly as in "modern" languages such as Latin or Italian. "W" was presumably similar to the same letter in English. "Y" was sounded like modern English "Y" in, for example, "yacht".

The table below shows original vowels in Juralic, and how they developed to Atlanchalcric (between -900 and -500), and hence to Imperial Atlantean (300-600), Standard Chalcran (-250 onwards), Imperial Helvran (-200 - 500) and Early Yalland (-200 - 500). North Atlantean (-200 - c350) and Atlantid (-200 - c400) forms are also shown, where they vary from Early and Imperial Atlantean. Atlantean, Helvran and Yalland also continued on and changed somewhat into "late" forms after 500. Chalcran died out by 600. Note that vowels may be long (: written after them) or short. They may also vary in later forms of some of Helvran, because of ablaut, if there is an "i" in the following syllable. Also, "e", "o" and "u" before nasals or liquids in Juralic may change in some of its descendants. In Chalcran and Yalland, their development depended upon whether the syllable they ended up in was stressed or unstressed. Where nothing is written in a space, it means that there has been no change from the earlier stage of the language.

Below the vowel-changes, are examples of words indicating these changes (written in italics).

## 2. The Atlantean Army during the Second Empire, 361 - 585

### THE ORGANISATION OF THE ARMY

The basic structure and organisation of the Army during the Second Empire was laid down, as we have seen, in the last years of the First Empire. From 290 there existed the "College of Military Art", which was responsible for the study of military tactics and strategy and the improvement of the Army. Since the early fourth century, the conduct of wars came under the control of the Imperial Council of War, under the overall supervision of the Emperor. After 391 this was reconstituted as the Grand Military Council. This included the Emperor, members of the College and any relevant Provincial Military Governors.

These Military Governors, one in each Province, took direct administrative control of the armies based in that Province during wartime, but he would not become the commander-in-chief, unless there was an emergency - the Emperors had had enough of independent and rebellious Military Governors during the Imperial Wars from 353 to 361. This method of overall control could become cumbersome, but usually the Emperor himself was able to provide a unity and driving force behind it all. It should be noted that it was unusual throughout this period for the Emperor himself to go into the field with the armies, though there were exceptions - Atlaniphon II, Atlanicerex in the Great Civil War, and later Crehonerex III at the time of the Revolution.

### THE STRUCTURE OF THE ARMIES

After the Empire reached its final borders, more or less in the time of Atlaniphon II, Armies were situated in all the frontier Provinces, and some interior ones. Depending on the threat from outside the borders, several Armies might be placed in a Province. Armies (PUEGGISIX) numbered about 9500 men each in the "classical" period, about 380 - 480, each consisting of ten OCHOSIX of 800 men. These were subdivided into units of 80 men (PUONDIX or Hundreds) and then to 8 men (DOULIX or Tens). The OCHOSIX were normally 8 of infantry and 2 of cavalry, plus attached artillery (torsion) and mounted infantry. The Armies were all numbered within each Province, and known, as a group, as the "...Provincial Army", commanded by the most senior General of these Armies. If a campaign involved several Armies, then these would be grouped together as an "Imperial Force", and placed under the command of the most senior Army General .

After 480, in the so-called "Romantic" period, a PUEGGIS, still about 9500 men, was increased to 12 OCHOSIX, which according to the new tactical doctrines, could act more independently. During this period, too, Provincial Army Reserves were formed, to act as purely defensive forces against invasion (as in the Third Ughan War and the various incursions of the barbarians). After 540, until 587, this reorganisation was settled as 6 OCHOSIX in the Reserve Force, and 8 in the main PUEGGIS, making a total of 11500. In addition Local Forces were raised to help frontier defence, for example in Th. Thiss, Manralia, and the Keltish Provinces.

## WEAPONS AND TACTICS - THE CLASSICAL PERIOD

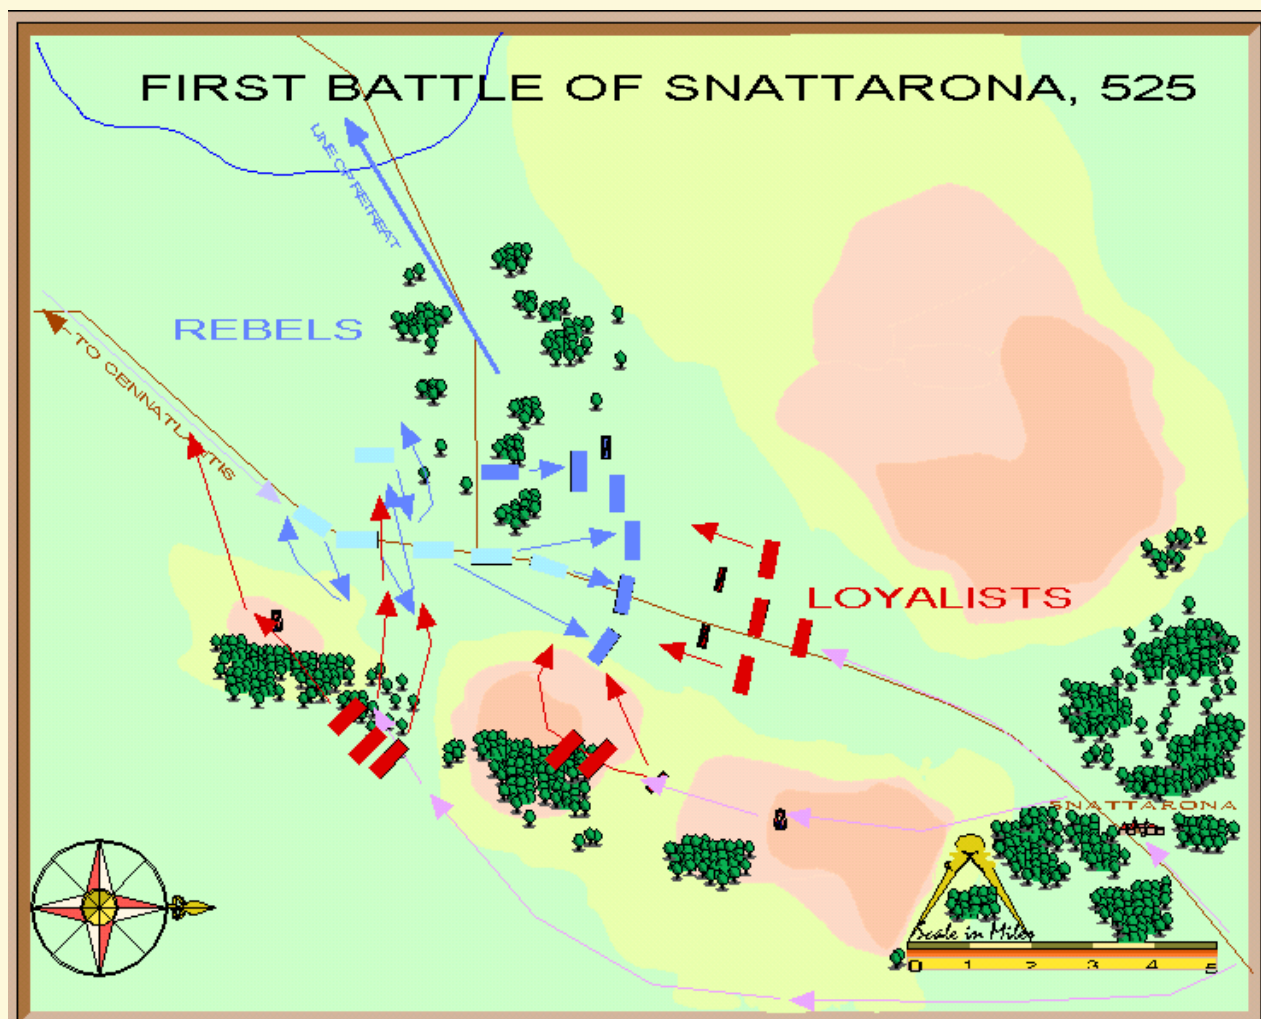

The backbone of the Atlantean Army was the bayonet-crossbow ("Bourtourtso" in Atlantean) - this weapon was made of steel. Swordsmen were still retained, though in decreasing numbers, until 450, when they were finally done away with. Initially the crossbow men occupied a central bloc in each OCHOS, with bowmen on either flank, so that each gave the other mutual support. After about 420, when the proportion of swords to bows had fallen from one third to one fifth, the swordsmen were deployed behind the bowmen, from where they could come forward in the attack, or defend the rear and flanks against attack. As far as the bowmen are concerned, they used either light or medium crossbows, the former being quicker to reload ( 3 times a minute, as opposed to 2 1/2) but firing a lesser distance (250 as opposed to 300 yards). Reloading was carried out by means of an intrinsic steel lever in the case of the lighter crossbows, and with windlasses for medium ones, and also for the mechanical crossbow type of artillery. Heavy artillery (catapults) were an army reserve, though horse artillery was invented by 450, and could be attached to the mounted infantry.

In the classical period, the Atlantean Army used strategy and tactics worked out in advance in great detail. The Armies advanced steadily on the enemy, stopping to fire at intervals, along with any artillery, the range of which was not much greater than that of the crossbowmen. The infantry was arranged in three ranks, firing alternately. In the end, the infantry would charge with the bayonet. An OCHOS of medium cavalry was attached to each PUEGGIS, and it would defend the infantry against enemy infantry attacks, especially if using swords, or against cavalry. If the infantry were attacking, it would wait until the infantry had softened up the enemy with their missiles, then join them in a devastating charge. Mounted infantry would already have been sent on ahead to seize important tactical features, such as hills. Light cavalry, armed with bows and arrows, would skirmish ahead and on the flanks. The soldiers had gradually done away with armour in the later 300s, until by about 420, they wore thick leather jerkins, with just metal protection for their breasts and heads (in the form of helmets). In some ways, they were vulnerable both to the arrows of enemy bowmen, and the swords of enemy swordsmen (which could be superior in strength and size to Atlantean crossbow-bayonets), but their disciplined organisation, marching and firing, plus the protection provided by cavalry and artillery, meant that they usually beat all their enemies, at least in the 400s.

Indeed the Atlantean Army was superior to nearly all its enemies at this time, in every respect. The Ughans were the only serious enemy of Atlantis, and they initially had only a small Royal standing army, with a lot of unreliable noble feudal levies. Arms consisted of swords and pikes. After contact with the Atlanteans, the central Army became stronger and more reliable and was increasingly armed with bows or crossbows. But there was little armed conflict between Atlanteans and Ughans at this time. Other enemies consisted of nomadic or semi-barbarian tribes around the periphery of the Empire, and these could easily be dealt with by the Atlantean frontier defenders, infantry and cavalry.

## ROMANTIC PERIOD TACTICS

The title of the so-called "Romantic" period really relates, of course, to the contemporaneous change from Classical to Romantic style in the arts and in philosophy. What it refers to in the military sphere is, generally speaking, a loosening of the fairly rigid standardised make-up and combined action of the Atlantean Army, as it had become over the past century. Specifically, individual PUEGGISIX and OCHOSIX were given more independence in action; commanders were encouraged to create surprise by their strategy; the use of regional and local forces was encouraged; and the current defensive-minded attitude of Atlantean commanders was halted in favour of a greater offensive-mindedness. Tactically, the cavalry was released from close co-operation with the infantry, and encouraged to scout out way ahead, or concentrate on the flanks against enemy horsemen. This was all possible because the Empire was virtually free from serious attacks from abroad, at least till the 520s. The new doctrines were successfully tried out in various small campaigns against unruly tribes in the south (around 500), pirates on the southern seas (480s), revolts amongst the North Kelts (500), and the Raziran rebellion of 500. A particularly good example of this strategy can be seen in the campaign and first battle of Snattarona in 525, during the Civil War.

### THE FIRST BATTLE OF SNATTARONA, 525

Following their seizure of Cennatlantis, a rebel force of seven Armies, led by Cencos, advanced over-confidently northwards up the Snattarona road to seek the Emperor (shown by the light blue movements on the map). Atlanicerex's forces were collecting in the Croldeen Hills, and then moved southwards. The Emperor and his military advisers now planned a typically "Romantic and exuberant strategic manoeuvre to trap and wipe out the whole rebel force, retaking Cennatlantis at the same time. Atlanicerex moved four Armies on down the road from Snattarona in the afternoon and evening to face the rebels, while two lots of outflanking forces were sent off through and behind the hills which at this place hemmed in both sides of the main road. Two Armies plus cavalry moved across the hills to position themselves on the right flank of the enemy, who had four Armies deployed across the valley during the night. Three other Armies moved more widely, and by 10am were to the right of the rear rebel Armies (shown by the mauve movement markings on the map). As the main Atlantean force advanced frontally against the rebels, to "fix" them, the first flanking force poured down the slopes and smashed into the flank and rear of the rebel right wing. Soon after, the other force attacked the rebel rear, with one Army moving far behind it to cut the road back to Cennatlantis. The battle was soon over. The rebels fled off to the west,

leaving their commander dead on the battlefield, while the Loyalists moved directly on down to take the capital. This clever example of the new, vigorous strategy cost the Emperor only 2000 casualties, while the rebels lost 10000 or more.

## THE THIRD UGHAN WAR AND THE RETURN TO DEFENSIVENESS

Even prior to the Third Ughan War of 536 - 539, increasing pressure by barbarians in the north-east required a greater commitment to fixed defences by the Atlanteans. But the Third Ughan War, with the serious defeats dealt to the scattered Atlantean forces by the newly resurgent and strongly centralised Ughan forces, led to a rapid rethink of their strategy by the Atlantean generals. The War was won largely because the Ughans, having defeated the weaker Atlantean forces in the open field, were halted by the last-ditch defences of several fortresses in Chalcrĕieh. Without gunpowder artillery, fortresses of any nationality were almost impregnable in this period. Following the War, Atlantis realised that the Ughans had reached parity with the Atlanteans so far as weaponry and army organisation was concerned, and the same was likely to be the case in a war with any other major state ( e.g. Basquecĕieh). The Romantic doctrines were now thrown out, and a defensive mentality took over, both in wars with major states and against nomads on the borders. Fortresses were strengthened, Atlantean armies were encouraged to dig in and use entrenchments (and armour was reintroduced for infantry), while armies were put back under tighter central control. Firepower became the watchword, making use now of a somewhat heavier form of light crossbow, with a greater range - and bayonet-attack style advances were frowned upon. Cavalry was restricted to operations against barbarians, while artillery was much increased in number and also somewhat in power.

***The fortress of Dravipand on the river Gestes, the border with the Ughans, as rebuilt in the 540s***

This doctrine met its nemesis in the Basquec War of 582-586, when the Atlanteans, as the attackers, were held up and bogged down in front of strong Basquec fortresses, and most spectacularly in the fighting against the Revolutionaries after 587, when the latter's fast-moving, loosely organised forces completely outmanoeuvred and out fought the slower and much more cautious Imperialist armies. Over the next decades, the Atlantean Army metamorphosed into something very different from its Second Empire self.

To conclude, however, and as a memorial to the Second Empire Army at the height of its might, here is the text of part of a letter written by the poet Normelliĕl, who accompanied Atlaniphon II on his campaign against the Ughans in the Second Ughan War, and witnessed the climactic victory of the Atlanteans at the battle of Yrullia in 441.

**THE BATTLE OF YRULLIA - an eye-witness account (part) by the poet and dramatist, Normelliĕl. All references in the first person in the original would really have been in the third person, of course. A map of this battle, with the positions of Normelliĕl and the Emperor is given after the account below.**

*.... "In this position behind the centre of the battlefield, just behind the main front line of our troops, the Emperor, his staff and myself had a superb view of the enemy army about half a mile in front. There they were, the Ughans, row upon row of them, wearing costumes of all types, and all in front of me were on foot, except for a few wandering to and fro on horseback within their ranks. These I took to be their officers. As far as I could see, they were nearly all armed with swords, though I saw some with bows and arrows. Later it turned out that quite a number actually had crossbows, like our men, though inferior ones. The enemy were on a hill in the centre, but their two wings, as I saw them at that time, were on level ground like ourselves. There was a river to our right, and the Ughans had already crossed it, seeking presumably to approach our right flank, using its protection. Some of our troops were already skirmishing with theirs over there, however.*

*"Our party moved over a little towards out left, and then the generals around the Emperor suddenly exclaimed and pointed. I looked, and there was a long line of our men advancing through the low undergrowth up a hill on the right flank of the*

Ughans. Streaming past them, overtaking them, and swarming up the hill, I saw our cavalry and mounted infantry. What happened next over there was difficult to make out, but obviously enemy forces were encamped upon that hill, and fighting for it continued for some time, though our men eventually seized it. This drew the enemy's reinforcements away from his centre, as I later gathered - all part of our generals' plans of course.

"But now my attention was drawn to the other side of the battlefield, our right, as masses of Ughan infantry were running and howling across the ground in between onto our right flank men. Our forces stayed there quietly and unmoving to receive them, while the great catapults in front of our centre turned to face the enemy, and waited patiently till they were in range. Once they were about a quarter of a mile away, they began firing furiously, and many an Ughan was transfixed by one of our huge crossbow bolts, or crushed with his neighbours under a stone of perhaps 100 lb., hurled at him by our catapults.

"Soon after this, as the enemy came ever closer to them, I saw officers cry out to our men facing them, and suddenly the front rank of parts of the OCHOSIX knelt down and levelled their crossbows, while the two rear ranks fired above them. A volley shot off, and hundreds of yards away, a line of Ughans rushing forwards, faltered and fell. These men reloaded, and others now aimed and fired. So it went on, and more and more enemy fell, and yet they still came on. Finally they reached our line, who faced the enemy's swords with their own bayonets. An indescribable scrimmage ensued, but it was always possible to distinguish the two sides by their dress. The Ughans, as I have said, wore a great variety of barbarian clothes, but our men were all in uniform. Their tall oval hats towered above the melee, while their bodies, protected by no armour nowadays, were covered in their tunics, with the belt at the waist, fastened to which were the arrow quivers, and the diagonal belt higher up, and a large leather boss over their hearts.

"The Ughans seemed to be prevailing, and forcing our men back, when lo - round the right by the river marched, at high speed, our reserve infantry, smashing into the Ughan flank. And again past them, suddenly there streamed our cavalry from the rear, wielding their swords, and crashing into the Ughans' flank. The Ughans were beaten - they turned and fled - ... - but the battle was far from over yet..."

## *Battles of the Atlantean Army and Navy - chronological order*

The list below includes all the most important battles and sieges with their dates, as fought by the Atlantean Army throughout its history. This history mentions them all, in greater or lesser depth. The location of many of the sites can be found from the various maps which are given as links. Each battle or siege indicates which map shows the site using the following abbreviations:

- NE Map of battle sites north-east [Battle sites NE](#)
- NW Map of battle sites north-west [Battle sites NW](#)
- SE Map of battle sites south-east [Battle sites SE](#)
- SW Map of battle sites south-west [Battle sites SW](#)
- CEN Map of battle sites central area [Battle sites central area](#)

## *Philosophy and Religion during the Third Empire, 650 - 750*

### **SUNON GELEDIN AND THE NEW AGE OF PHILOSOPHY**

The precursor of Third Empire philosophy was *Sunon Geledin* (589-655). He began writing at the same time as Saiphoyon was completing the last of his works – in the 620s -, but his philosophy is a world away from his fellow writer. Saiphoyon is often regarded as the last and greatest of the Second Empire Romantic philosophers, the one who summed up and transcended all the metaphysical speculation of the previous hundred years concerning the Self, its interaction with the world, the transcendent realm, and the ideals of morality and beauty. He had a positive world-view which contrasted with the scepticism and extreme materialism or solipsism of the main schools of philosophy of the times. Most of this Geledin was to ignore. He stated baldly that further exploration of the self, and its possible relationship with a transcendental world was pointless and unverifiable. Reason and self-analysis have their limits. He did not doubt that the subjective realm was real and did exist: but in such areas, we need to rely at least as much on faith as introspection. And here Geledin pointed the way to State Theism providing all the answers, which mankind should require in this area. (He himself converted to State Theism in 638).

Geledin saw his life's work to be the exploration of how we should live in society. That is to say, he wanted to restore an objective view to philosophy. He claimed that morality consisted in defining and perfecting man's role in the community, and his attitude towards his fellow human beings. "Goodness" is a communitarian virtue, and is in fact altruism. Both the individual and society will be improved by personal virtue. Thus we see that Geledin represents a swing back to that fascination in man's role in society, which was so much a recurring feature of Atlantean thought. It was the linchpin of Second Empire Classical philosophy, it returned in a different guise in the Fifth Empire, after the 820s, and now it was to dominate much of Third Empire thought.

However, Geledin was also very concerned to stress the importance of the individual, quite apart from his relationship with his fellows. Geledin trusted that the priests of State Theism would minister to the needs of the person, reassuring him about his intrinsic worth, his importance in the eyes of God, and his survival after death. By the 640s and 650s, in fact, Geledin was laying great stress on this personal philosophy, because he was concerned and upset by Ruthopheax's authoritarianism, and seemingly ruthless treatment of so many people who stood in his path to power. In fact Geledin's successors took up both these aspects of his philosophy, but it has to be said that the writings about the sanctity of the individual had to be expressed in the most generalised or low-key ways over the next few decades, for fear of attracting the wrath of the rulers of the Empire

### **MYSTICISM AND RELIGIOUS SPECULATION**

Free philosophical speculation was virtually impossible for most of the period of the Third Empire, as the State and the State Religion claimed a monopoly between them of all knowledge. Thus religious belief had been laid down once and for all in the tenets of State Theism, and no speculation, outside a very narrow range, was allowed at all. Indeed all religious and metaphysical writings had to be given the approval of the Church, before publication would be permitted. Similarly, all works about politics and the State had to be initially shown to the governing authorities. As with the arts at the same time, this led philosophers to restrict their writings, at least before 710, to narrow and non-controversial areas – in this, Geledin had led the way. Of more importance, as far as future developments were concerned, was the work of *Gestanu*, 642 – 713, who speculated secretly on how Theism could exist without the heavy hand of the State apparatus, and also more widely on the significance of evil, the role and actions of God, and life after death. In the 750s and after, these writings would have an important influence on Theism of that time, as it adjusted to the new era, and also on religious thinkers, who sought to

combat the prevailing materialism. Slerakh himself, the outstanding philosopher of the late 700s and early 800s, freely admitted Gestanu's influence on his own ideas.

The mystical movement in the first half of this period chimed in with the mood of quietism and the avoidance of wide-ranging speculation which might upset the government and the priesthood. It based itself on the feelings we should all possess for wonderment at the created world and our place in it: and this led naturally to our wish to praise and thank the Creator. This feeling of wonder and awe would also be taken up and developed in the time of Slerakh. After the 690s, some thinkers, again following the lead of Gestanu, began to speculate more widely on the afterlife, and on the concepts of heaven and hell, as laid down by the State Theist leaders. This was regarded much less favourably by the authorities, and many of these writings, including Gestanu's, were not published openly until the 720s, or, in some cases, until the 750s.

## THE HEAVY HAND OF THE SQUIRES AND STATE THEISM

True philosophy was also divided throughout this time into public and private practitioners. In public, philosophers, rather like artists at this time, had to limit themselves to non-controversial areas of thought; wider-ranging speculation could only be carried out in secret, and circulated amongst friends in manuscript form. There is a close parallel with the situation in the Soviet Union in our time, particularly during the 1960s and 1970s. If a writer were identified with any manuscripts, which in any way implied criticism of the regime or its values, he or she would be arrested, certainly imprisoned, and quite likely tortured or even executed.

In public, the most notable philosophical movement was based on "Andourso", the Second Empire philosophy of apartness, or attaining inner harmony by maintaining a balance between life's conflicting demands and pressures. Several philosophers between 640 and 690 developed and expanded this train of thought, which, implying by its very nature a non-involvement with social or political movements, was not likely to attract the disapproval of the regime in power. The most widely-known thinker was *Geulven*, a Helvran, who christened his version of "andourso" as "*Genandourso*" or "Neo-apartness". He also invented the idea of "Tec", which was an old Atlantean word for "life" (related to the element "-tecc" in the Atlantean days of the week, with the original Juralic meaning of "day"). In its philosophical context, it is nearly untranslatable, but is closely parallel to the Chinese "tao" or Buddhist "Way". Geulven intended it to mean the sort of life, or way through life, that a person led, whose life was lived according to the tenets of Genandourso. This was similar to Andourso, but involved a faith in the power of prayer and meditation and the goodness of God (which could be assumed to be the God of State Theism), a greater withdrawal from everyday life in favour of contemplation and reflection on the "well lived life" and the maintenance of personal serenity.

Other philosophers studied ethics in minute and painful detail: how we should behave, especially towards other people, what are right and wrong, and how we should recognise them, and more generally, what is a true moral code. Not surprisingly, in the light of the repressive regime of the Squires, most of these writers came out in favour of the need for an authoritarianism, which would impose a moral code of behaviour on its citizens. Most automatically approved of the values of State Theism. This implied that obedience to morality was only common sense, as it would be the good and the just who would go to heaven after death, while the evil would be consigned to hell. Only a very few professed any doubts – they also claimed that whatever our personal beliefs in God, we must act as if there is a Final Principle, which will embody a Moral Absolute. Above all, they stressed that the importance of duty and loyalty, to our worldly overlords, of course, but also to the Moral Code. We must obey this, at all costs, at whatever expense to ourselves, our emotions and our personal relationships. If we deny this absolute Code, we shall be forced to admit moral relativism, that is, the creed that there is no ultimate value-system, and all beliefs in right and wrong depend on the relative values of society.

However, their very explorations of real-life moral and ethical conundrums, in full detail, led some to realise the problems of practically applying an absolutist, religious-based moral code to everyday affairs. This in itself tended to point these philosophers towards pragmatism, relativism, and an interest in human psychology, even despite their own beliefs. There were also some secret writings, before 700 or so, in which different opinions were expressed. These admitted that there is no definite evidence for God, or an absolute basis for religion and a Moral Code. We should, however, be agnostic, rather than atheist, and above all, uphold the sanctity of human dignity and life. This last point was aimed at the regime of the Squires, which seemed to value only the life and happiness of the upper Classes, and readily executed or tortured anybody else, who stepped out of line. This hatred of arbitrary torture and murder, and the demeaning of human life, strongly influenced writers and politicians of the Fourth Empire, after 750.

## THE CHANGE OF VIEW – RELATIVISM AND PSYCHOLOGY AFTER 700

Around about 700 to 720, one of those sea-changes, which overtook Atlantean civilisation from time to time, worked its way through the artistic, scientific and philosophical climate of the Third Empire. Similar events had happened around 350-370, with the success of Second Empire liberalism and agnosticism; in 480-500, with the advent of artistic Romanticism, anti-

authoritarianism, and, ultimately a religious revival; and in 620-650, when Ruthopheax and the Imperialists imposed themselves and their way of life on the whole Empire. This time, the change was from absolutism, authoritarianism, religious orthodoxy, and a predominantly agrarian, anti-urban society, to a belief in relativism, democracy, materialism and urban industrialisation and technology. These changes took place in all the arts and sciences, albeit, until 750, under the same authoritarian regime of the Squires. But while it maintained its political and (largely) social control intact, the ground beneath it was shifting; more and more of the general population ceased to believe its values, although still paying lip-service to its political authority. Gradually the regime itself changed, and the later Emperors were forced to admit some social changes and encourage reforms and the beginning of industrialisation. However, they maintained until the end their social, political and religious beliefs, in the teeth of increasing opposition.

The most obvious changes, which we have already noted above, were in the realm of technical and industrial innovation. These were at first for the benefit of the military, and led to the earliest factories, and the setting up of the Secret Industrial Centres. Steam-power was increasingly harnessed, and the old hatred of all innovation began to die away. Meanwhile, a belief in a true scientific method of investigating nature, as we should understand it, had begun in the 680s and 690s. Chemical and biological research and experiments began, without any objections by the government, and after 710, these were developed into the basis for technological inventions. Against this background, other novelties appeared. The study of nature and animals led to the first accounts of a theory of natural evolution, and the investigation of human societies and languages resulted in theories of the historical development of cultures and languages. These were seen to vary from people to people, and could only be examined from a relativistic point of view. In other words, the claims of State Theism, for example, as the one and only true religion were undermined, although of course, this could not be spelt out in so many words. Similarly, the growing importance of industrial and urban workers, and the obvious inequalities and cruelties of the Third Empire social set-up persuaded many to support an ideal of democracy. Such ideas circulated underground until the 740s, when they burst to the surface at the end of the Great War, and led to the rebellions against the Squires. The written arts, too, metamorphosed, moving from minute formalised social realism, to psychological studies in the form of the novel, to "no-holds-barred" psychological and sexual naturalism by the 750s.

Philosophers led the way in many of these areas. They questioned the role of the State, as it was set up at the time, advocating a much more democratic ideal. They copied science, by recommending the adoption of scientific methods for philosophical or religious investigations. Many showed more interest in psychology, what went on inside the human brain, and the reasons why we act as we do, than in grand metaphysical constructions, or detailed considerations as to human behaviour in fixed social spheres. This led them to preach the reality of a relativistic moral code. The philosopher *Yeston*, 697 – 748 wrote that man and his behaviour was wholly determined by his society (this idea led to determinism, advocated after 750 by Mestos, and the most common philosophical tendency of the early Fourth Empire). But Yeston was more interested in drawing the conclusion that this fact led to the importance of a fair and equal society, indeed of the democratic ideal. He was persecuted for these opinions, arrested in 747, and finally killed in 748 in a small-scale political rebellion following his release from arrest. Religious thinkers moved away from the ideals of State Theism at this time, and many became increasingly interested in the beliefs of the Naturists. All in all, philosophers and religious thinkers alike were preparing the ground before 750 for the decisive changes in the ways of life – mental and environmental -, which would burst in on the Empire as soon as the repressive government of the Third Empire had been overthrown.

## Atlantean religion till 360

### THE ORIGINAL ATLANTEAN RELIGION

The Official Atlantean Religion, whose origins go back into Juralic times was based on a very elaborate and complex series of myths and semi-historical stories about super heroes and their adventures. It was also believed that the "moods" of nature were related to the heroes - one caused storms, another rain, another sunshine, etc. Nature in its various moods had long been prayed to or appeased, especially in certain sacred parts of the countryside. Now these heroes, who became gods, could also be worshipped.

The next stage in the development of the Atlantean Religion, was that each mythical hero became characterised by a particular emotion or sort of behaviour, linked to the related mood of nature. Finally it was felt that these gods could enter into human beings and take them over - leading to the various passions and emotions which beset mankind. It seems that the original belief was that the gods often tried in this way to relive their own lives vicariously in men and women.

The earliest "churches" were sacred, open-air areas, often on top of hills, where humans would congregate to pray to or worship nature and the gods, led, by priests of the religion. These special places remained holy for centuries, long into the time of the First Empire, and many of the early churches were built on these spots. In the days before the First Empire and during its earliest years, certain priests laid down in writing a definite canon of stories and beliefs which were the basis of the true Atlantean Religion, abandoning a host of extraneous myths and stories which were not felt to be relevant or suitable to it. The following lists the chief of these "old" or "nature" gods, as they came to be called. In due course certain of them became very closely linked to aspects of the Atlantean church and state, and were given their own signs and symbols, a selection of which are shown above.

### THE OLD GODS

The greatest of these, number one in the Atlantean pantheon, was the (male) South Wind, (*Ris*), which was also the Air, and represented the Life-Giving Force. (See the drawing above). In early times this was the sign for the Church, and the triangular blue arrowhead was erected as a statue and worshipped. It fell into desuetude after 200, and was generally replaced by the Moon image, number 6.

The second god was the male North Wind, also symbolising Death and Cold, and shown as a triangular black arrowhead pointing downwards on a white or blank background. The third, female god, the East Wind, which also stood for Hatred, was seen as being married to the North Wind, and was a deep blue arrowhead facing to the left.

Number 4 was the South Wind (*Naothule*), which was also Love, Joy and Marriage. This god was married to the South Wind, and the symbol was used to decorate wedding dresses.

The fifth god, represented by the sun (*Folgiens*), standing for wisdom, was adopted by the Emperor as his personal symbol and that of Atlantis in the 270s. The symbol was a yellow sun on a green background - green was the "Imperial" colour of the First Empire. (The Second Empire would adopt yellow or orange, so this sign lost its green background. Later Empires and eras deliberately adopted different colours to represent themselves - these can be seen from the title-pages before each part of this history of Atlantis). This male god married the sixth god, the female Moon (*Noura*), who represented Magic and Mystery. This was a white crescent moon on a light blue background. It was used by the Church after the early 200s in place of the Sun god, and worn by priests on their ceremonial dress.

The seventh god was Thunder (*Graohienix*), symbolising War, and shown as two incurving black thunderbolts on a red background. This became the emblem of the Army after 262, and was borne on its banners. The eighth god was the Evening Star (*Naohuisuyu Tincu*), which stood for Peace. It was used to represent the Atlantean Peace, and after 440 the Empire, and appeared on all official documents, along with the Sun god. It appeared as a white star on a blue background.

There were a few other minor old gods - Volcanoes (Civil War, anger), Sea (god of fishes), Earth (god of animals), Ice (symbolised Envy of Hatred), and Earthquakes (Power and Ambition).

### THE NEW GODS

The new gods were mythologically speaking the offspring of the old gods. In many ways they took over from the old gods in Atlantean worship, and were regarded as being closer to humans than their more remote antecedents. These new gods were the following; note that each number is linked with its corresponding old god. Each god had its own symbol.

1. God of Life - the Vital Spirit, and Supreme New god.
2. God of Death - interceded for the dead.
3. God of Venom and Hatred - prayed to for cursing one's enemies.
- 4a. God of Joy and Happiness.
- 4b. God of Love - the daughter of 4a. For lovers and married couples.
5. God of Wisdom and Understanding - the god of doctors, scientists and philosophers.
6. God of Magic and the Occult - used by priests.
7. God of Anger - used for cursing one's enemies, especially in wartime.

8. God of Peace - prayed to for lifting the curses and anger of one's enemies.
9. No corresponding new god.
10. Water-god - for childbirth and children.
11. No corresponding new god.
12. No corresponding new god.
13. God of Power and Strength - for success in business and politics.

There were also two extra gods - of Health and Travel.

## ATLANTEAN WORSHIP

By 200 a regular priesthood was in existence, which held ceremonies at which the whole population ought to attend, in temples built on propitious sites in the countryside. After about 300, new temples were built more conveniently inside towns, or on their outskirts. Nevertheless the earliest and holiest shrines remained those in the countryside, and these were used for particularly important state ceremonies. Attendance at the main state services was obligatory for all the upper and governing classes throughout the First Empire, and to a lesser extent in the Second Empire, although by then the religious meaning of the ceremonial was not taken seriously by many educated people. In any case, these ceremonies were not particularly frequent, and were linked to important historical or State occasions. Other, smaller ceremonies might be held by priests every few days in local temples, and these would be attended by ordinary people.

The Atlantean word for the priests of the "Official Religion" was "*Liclón*". This literally comes from the root word "Lill", meaning "White", because the priests who officiated wore white robes. As a result, the Atlantean for the "Official Religion" was "*Liclebba*", literally the collection or gathering of white-clad people.

Worship officially involved praying to the relevant god to help you. You would encourage the right gods to act within you and around you at certain times (e.g. to grant you peace, or success in war, plenteous harvest, many children, or also to bring disaster to your enemies). These ceremonies could be used by individuals, as well as for the state. It is particularly notable that even when individuals were praying for themselves, they had to avoid using the first person ("I"), speaking instead only in the third person, referring to themselves by their name. The same was true in all written religious language. This was because of the belief that our emotions and desires are completely under the control of the various gods, and hence it was necessary to remain so "neutral" on religious occasions that one had to refer to oneself in the third person. This practice spread to the Court and literature in general later on (see the article further on about the Atlantean language).

At the same time the stories of the heroes and heroines who were the old and new gods were very popular, aside from their religious import, and were later very heavily used and embellished by writers and dramatists.

## KINSHIP WITH NATURE

What is also important is to notice how close the State Religion's ceremonies and worship were to nature and the natural world. This feeling of oneness with nature is an underlying thread throughout Atlantean history, and colours the beliefs and way of life of many Atlanteans throughout the whole history of the Empire, irrespective of particular religions or philosophies.

This meant that there were often two conflicting forces at work in Atlantean culture. One was this feeling for nature, for man's basic kinship with the whole of natural creation – a holistic view of life, which laid stress on faith, intuition, meditation and natural emotions. This strand lies deep in the State Religion, and more clearly in the religion of Naturism. It can be seen in the desire of all better-off Atlanteans to escape to their estates in the countryside, as was the case with the liberal elite of the Second Empire, and the Squires of the Third Empire. Sometimes, of course, it was overlaid by an equally strong urban and communitarian instinct, as shown by the Populist faith and the ideals of the Republic in the late 500s, and by the ideals of the Fourth Empire after 750.

An opposing force was that which stressed the role of Reason, Science, Individuality and the Self. Reason was important throughout Atlantean history, especially in the Classical period of the 400s, and did not necessarily clash with holistic nature-belief. But the Romantics' faith in the individual and its need to express its own feelings in action shows this contrary tendency, as does the espousal of the scientific method after 700, and the philosophical "discovery" of the Self and subjectivity by Slerakh and others in the late 700s. The two strands are also visible in the Atlanteans' investigations

into and views of the natural world and the universe, and man's place in them. Ultimately a synthesis was achieved by philosophers in the 800s. But the ultimate failure of the Atlanteans to develop their science and technology beyond the approximate equivalent in our society of the mid-nineteenth century is partly attributable to their underlying preference for a more holistic and natural view of society and the world. Their distrust of innovation, experimental science and rampant individualism is evident, too, in many periods of their history (the Second, Third and Fifth Empires particularly), and the role given to the Council of Ethics to ban the exploitation of discoveries, which might harm Atlantean culture and society.

## RELIGIOUS THINKERS

As the First Empire developed, a number of thinkers arose within the fold of the Official Religion, who were dissatisfied with the hotchpotch collection of stories and myths that made up their faith, and wanted to organise it in a more logical and "modern" way. Back in the first century (the exact dates are completely unknown), a priest called Lir-Nahuasse - a figure who may well be mythical - supposedly extrapolated a moral code from the various lives of the gods who we have just enumerated. Certainly the Official Religion possessed this moral/ethical code, somewhat reminiscent of the Ten Commandments, which basically forbade crimes such as murder and theft, and divided the attributes of the gods into two groups, bad (e.g. hatred, anger, lust) and good (friendship, equanimity, marriage). Many others were apparently good in moderation or at certain times, and hence no black and white guidance could be given (e.g. ambition, war). It will be noted that so far as the latter cases are concerned, where areas of moral or ethical conflict are left undefined, the State was quick to take them under its jurisdiction in the third century, as part of its attempt to increase its own boundaries and limit the pretensions of the Church.

Another important early thinker was Tuondo Ramillene (131 - 208), who standardised the stories and legends of the gods, weeded out "unsuitable" or apparently apocryphal tales, and devised the official numbering and division of the old and new gods. All this was accepted into the canon of the Official Religion. He wrote the standard account of the creation of the universe and the gods, which is given at the end of this book as an appendix, along with a translation and linguistic commentary.

During the third century, however, conflict arose between the priesthood on the one hand, and the State, as well as more radical religious thinkers and philosophers on the other. Most of the third century Emperors, though true believers, were nevertheless consistent in their aim of extending the remit of the State by means of the law, and limiting the role of the clergy to strictly religious and ceremonial functions. Philosophers had a role in this, as will be described below. But there were also heretics within the ranks of the Church itself. In particular Ciblahphu (257 - 299) was a pious but radical priest who sought the real meaning behind the chaotic and often childish confusion of myths and stories which made up the Official Religion. He decided that all the gods were merely different manifestations of a single all-powerful Deity, and thus became an advocate of monotheism, albeit in a rather tentative manner.

This doctrine, which gradually attracted other adherents, chiefly at first amongst philosophers, was bitterly opposed by the established Church, and along with all other heresies and religions was forbidden throughout much of the Third Century. Nevertheless by the Second Empire, such was the effect of free-thinking philosophers, and the greater sophistication of the era, that most of the governing and upper classes accepted monotheism - indeed agnosticism in some cases - and considered the details of Official Religion ceremonies and beliefs as wholly mythical, but needful for the lower or less intelligent classes.

## OTHER RELIGIONS

Three religions were founded in this period which in later years were to play a very significant role in Atlantean history. One was Naturism, which was first adumbrated by Gestil (c179 - 239). Gestil lived in the area of the later Th.Thiss province, and was a Yalland. The Yallands' religion was in origin the same as the Atlanteans, but was less formalised, and lacked the full structure of priesthood and Church organisation. It also became infused with the beliefs of the local, indigenous tribes of the area, and in particular, the ancient beliefs of the Manralians, which were theistic in a general sense, without any feeling of a personal deity. Gestil believed and taught simple moral precepts on leading a good life, and how this would lead to happiness in an after-life. He also said that closeness to nature would lead to virtue and attunement to the cosmos as a whole (he was agnostic as regards a deity), and preached a form of reincarnation. This idea seems to have come from the South Numedeans, many of whom lived close to the Yallands, and retained some of the beliefs current during the era of the South Numedeian Empire, centuries earlier. In particular, Gestil encouraged the use in his religion of the "eternal I", that is to say, a special form of the verb for speaking of oneself which indicated that one had had many reincarnations in the past. This all fell on fruitful ground in the Yalland areas, and Gestil later became revered as a saint, whose whole life was worthy of emulation. Nevertheless Naturism made little progress in Atlantean areas in this period.

The foundations of State Theism, the official religion of the Third Empire, were also laid at this time by another Yalland, this

time from the inner Yall Thiss cities, Lir-Botai (221 - 264). Building on earlier beliefs, including some from the ancient religion of Manralia, Lir-Botai proclaimed a creed which again was much more personal than the Official Religion. He taught that man was basically bad; that there was an eternal cosmic conflict between Good and Evil; that there was only one God; that each individual could open himself to God's goodness, especially in natural surroundings; that there was life after death; and that all current religious structures and beliefs were nonsense. This is in fact Theism, rather than the later State Theism, which resulted from some fundamental changes and additions made much later by Phostin. Essentially he added the political links to the State; a class structure; and an insistence on faith rather than reason. In any case, again, this religion hardly touched Atlanteans till many years later.

Thirdly we should mention the basis of the Second Empire cult of Populism. This religion had its origins in the beliefs of the Phonerians and Marossans. They had a strongly practical bent - the greatest good is the improvement of society as a whole, both in practical and moral and spiritual matters. There was a priesthood, who held considerable secular power and counselled the government, and places for communal ceremonies and worship as well. This faith only really percolated into the main part of the Atlantean Empire after the middle of the 400s. It then underwent various modifications until it emerged as the inspirational, emotional and socialistic popular religion of the lower classes in the middle 500s called Populism. In this guise it became one of the main motivating forces behind the Revolutionaries in the 580s

## Society and Government, 630 - 749

### THE SOCIAL STRUCTURE OF THE THIRD EMPIRE

Ruthopheax I forced Atlantean society into a class structure far more rigid and watertight than anything ever seen before. His main aims were to ensure the unchallenged rule of himself and his class, which was that of the "Squires" ("Thaisonix"), the country gentry who had defeated the Republicans and conquered the Empire from all the other pretenders. His way of doing this was to virtually enslave all the population belonging to the lower classes, and in particular to wall in the cities which had formerly been the main support of the Republicans. That is to say, the inhabitants of these cities were not allowed to move or work outside the bounds of their towns. This was chiefly true of 12 of the cities in the formerly Republican areas of the Empire - these were Atlantis, Noehtens, Ygohe, Yfeale, Celing, Nosinge, Runnates, Tiltrase, Helvris, Cennetis, Cennis and Sirottis. (There were one or two others temporarily in this position, as well). A popular phrase of the period was: *Thisaggix aithen rottiurgeso tontun dammiyettuyu* (i.e. "Cities are the source of all evil".)

Finally he made sure this system worked by employing a large Internal Security Army, and forcing everybody to belong to the church of State Theism whose priesthood was completely under Imperial control. ("Saindeyu daonatta", literally "Religion of the State" was the term for State Theism. Earlier, and again after 750, it was just known as "Theism", or "Daonatta". The usual Atlantean word for "Religion" in general was "Daithehetu", which also meant a church. The phrase for the "Official Religion" was "Liclebba").

Possession of land was the chief distinction between the new landed, ruling nobility, and the "rest". The old class system was re-established, and the top two Classes were the new ruling elite. Class 3 existed in two forms, rural and urban. The rural Class 3s were utterly distinct from the urban Class 3s, who lived and had to stay in towns. Classes 4 and 5 were also poorer workers in the towns, while Class 6s were again either urban employees, or rural peasantry, utterly beholden to their masters, and unable to move from their service. The urban population was vetted closely by Imperial police and the State Theist priests, who reported directly to the government. The Army was officered by Squires, usually Class 2s, and manned by Class 5s and 6s. It was a wholly professional and volunteer force after the death of Ruthopheax I, and was always fully manned, because it represented the only way, in this period, that lowly entrants could, by means of promotion, work their way up to the highest ranks, which gave them automatic higher Class status.

After the 680s, there was a gradual loosening of the social controls. Land and class could be awarded by the Emperor for meritorious service, for the first time. Later, Class 6 peasantry were able to move to towns, as landowners could not always now afford to retain them. More and more Class anomalies appeared, and after 693, Class divisions were no longer used as the basis of position or for taxation - everyone was either rural or urban, and had to possess a land certificate to prove the former. Over the next 20 years, towns grew richer at the expense of the countryside, and the Imperial government was gradually forced to relax its hatred of urban life, a hangover from the wars of the first half of the century, when all large towns were seen by the Imperialists as the dwelling-places of Republicans and rebels. Indeed, Class 3 rural land magnates now started dabbling in business within towns. Similarly, after about 715, Class 3 and 4 town-dwellers bought land in the countryside, which was now tolerated, and became country-based businessmen of Class 3. These Class 3s, who began to have fingers in both country and town pies, were called "hybrid" Class 3s. Everyone was now showing more interest in the opportunities offered by the towns, where the new "Industrial Revolution" was beginning to take off. By the time the Great Continental War approached in 743, Class 3 and 4 urbans had become the equals or betters of the old rural aristocracy, as far as wealth was concerned, but they had no political influence to match it.

The change in attitude towards the towns was shown by the alteration made to the phrase quoted above, that cities are the

source of all evil. After 725, it was said: *Thisaggix aithen rottiurgeso tontan plemetteyu*. ("Towns are the source of all prosperity.")

## IMPERIAL GOVERNMENT DURING THE THIRD EMPIRE

After the establishment of the Republic in parts of the former Empire, society and government became very different in the two parts of Atlantis. We have already seen the changes brought about by the Republicans; while the Imperialists preserved a fossilised version of the old second Empire. This all changed after 630, when Louron Ruthopheax crushed the Republic, and took over the old Empire. We have seen, too, how he ruthlessly crushed all remnants of the old Republican regime, and imposed a new type of authoritarian government, run by the rural upper classes, called "Squires", on the whole Empire, backed up by the State Theist religion, to which all citizens had to conform.

Imperial government was led by the Emperor and six Imperial Officers of State with very grand names: The Chief Imperial Adviser, Imperial Treasurer, Imperial Minister of War, Imperial Minister for Foreign Affairs, Imperial Minister for the Provinces (i.e. Home Affairs), and Imperial Minister of Civil Law. There were also two "ex officio" ministers, the Chief imperial Loyalist and the Chief Minister of the Imperial Faith. The Emperor himself wielded virtually dictatorial powers throughout the whole of the Third Empire. In contrast to the Second Empire, there was no Council to regulate his rule, and no written constitution like that of Atlaniphon I, which defined the role and powers of the Emperor, the Governors and the Controllers. All that existed were the "Terms of Empire", a guide to running the Empire, written by Ruthopheax I as he neared death for the guidance of his son. This outlined the administration set up by Ruthopheax I in the 640s and 650s, and it essentially remained in force for the next 100 years. The "Terms" became increasingly outdated and rigid as society changed, and in fact small changes had constantly to be made, though unofficially.

## LOCAL AND PROVINCIAL GOVERNMENT - THE REIGN OF THE COUNTRY SQUIRES

Ruthopheax reduced the original 15-20 provinces of the Empire to 12 much larger ones, and gave the governorships either to relatives or military comrades-in-arms. Under the later Emperors, these Provinces would normally be run by members of the rich landed gentry. The Provinces were divided into many smaller Counties, run by rural councils, presided over by the local magnate or Squire. No town, other than Cennatlantis, the capital, was self-ruling, and townspeople (Classes 4 and 5 and many Class 3s) had virtually no governmental responsibilities. Some of the Provincial Governors in the formerly Republican Provinces behaved quite outrageously in the early years of the Third Empire, ruling dictatorially, and behaving with great cruelty towards the inhabitants of the towns, in particular. As these Governors, who were originally army generals from the war years of the 630s to the 660s died or were gradually replaced by younger men, such deliberate viciousness became less common, and was in any case not tolerated by Emperor Ruthopheax III.

All Provincial and County Councils had Imperial representatives to check and control them. These people, like most other ambitious men in government, belonged to an elite group called Imperial Loyalists. These Loyalists had to be completely loyal to the Emperor and the ruling elite, to attend regular meetings, be regular churchgoers, and pay additional taxes for their privileges. The ruling elite itself, the country Squires and their subordinates, sprang overwhelmingly from the east: from Dravidieh, Vulcanieh, Meistayieh, and were often old Atlantean colonist families. Local government remained predominantly in the hands of the squirearchy throughout the whole of the Third Empire, although the "hybrid" Class 3s gradually gained more power. After 721 the centre of local government in counties which contained a large town was transferred deliberately to that town, and by the 740s, power in urban areas like Atlantis and the large towns on the Helvengio was in the hands of the hybrid Class 3s - though nowhere else.

Unabridged atlantean dictionary

If you want to skip this intro, goto -Nx for the index part by search.

Unabridged atlantean, otherwise atlantian or atleantian terminology and atlankubaist dictionary encyclopedia idea from "inanis attento non dominus". This is an excerpt of the points I went through by listening to the past humans of pre-evolution and psychically understood atlantean points, that is pre-human speech understood using my pineal gland and third eye to see them. Since in reality, the pre-humans, or protozoans, and Atleantians didn't actually speak. If you want to understand this, then don't think as you read this, let the meaning come to you and you will understand by the realization insights from the soul.

In fact, if you state the words right, you can "hear" what they say with your senses as they say the idea and realize what they mean by what they do and this is done in visions of your senses that show you what is what. I think I will find out with you, if they are what they seem. So you can use them as you want, and make what expression that you need. This is a point from the past. Think about the meaning and the point you intend to create, then state what you intend and the soul or spirit make what you want to do things and you can get some result.

Disclaimer: This is what definings are gotten by thinking of what I need as a point of atlankubaist, and working with or stating the idea to understand, then the soul provides insight that you spiritually realize as to what the idea is that you know by feel. This is not from demonism [ <http://spellhawk.great-site.net/Demons.htm> ] that some zionist can use by feel. This is a point you think and do, the idea is what you think and the spirit does the idea or deed. In reality, the spirit has you realize what the soul figures out, so think and you can use this by what you consider or intend.

However, I can't be told off for what happens to you, the reader with the use of the words so what you do is where you are doing your own idea or thing by feel. So I think if you want a better way to search for words in this atleantian diction, then use the search or find in page function with this page loaded. If interested in where the atleantians or energy beings used to live, then look at the hollows where they moved from by feel the area. [ this is here @ <http://spellhawk.blogspot.com/2009/07/hollows-burrows.html> ]

If you want to feel like an Atleantian or Lemurian, then feel free to use the power of words. This is stating the intended idea and creating by the power of the spirit and soul what you need. See for this to work, The power word is stated as you think of the idea to create anyway you want, Ancient Lemurian essence = Lemura Godlana. This is the essence of cultures. Lemurian is very nice. So the Atlantean essence (really low vibration... wouldn't recommend) = Atlanti Falgantri Po.

search for a Glossary or think to change the subject dictionary <http://www.glossarist.com/>.

If you make a change to this dictionary, if you accept the change you keep the change. oh well you can focus to your use to not abuse then you get better results. this is the point or troubleshooter talking to me so yes I agree. I think as a point if we all get along you can get aware thought easily, this is with no pain by hits that are herbal and or fixes.

I see non virtual by similar means are @! or the actual account as non credit unless en non illegal, I think by the use with credit you think to see or restore. This is use as you think so think positive think to create what you wish by area energy or aura collected energy, this done as a possibility so if you think to use ideal you can get stuff or results. That's if your actions are better understood as in job, your not coming over so some say nao na know. This is with the numbers you can think the ideal to do or yes or no, then you can use the number then do things with it till no longer necessary by useful ideal. Otherwise this is not by feel and that is a use not for the point. So out with the number, you can think the intent or thought you wanted so then no or yea.

So see then you are aware of what you think. this is where you are in a point by the area or your with an instance and aware of the idea. so you create what you wish by the feel, this is done with the sense perception or think to create by the feel. the subconscious makes what you feel is needed. that means to grant wishes just think of the wish

and need it granted, then the subconscious does the idea. its basically a suggestion, anyway.

The trick is where you think you can, then you do. this is where 1xxzni creates what you wish by the product you use or otherwise you do not use this. See atlein means piss off or allow, thinking means condemning by what you think is a failure, cause is effect to create what you wish by what you see. this is sometime ago "the thought by annihilation" this is "now I didn't need to." This is also if non worse is the feel "this is by the feel."

So in ne I ni dugudera in en or I didn't need to, enjoy your day now or later. See if you think bathroom is denoib, bathroom is denoix so think your area your in then list or state. be is really, denode is exist then, think where you want to denobe or be really then list or denoix denoix or denote denoting by feel to goto your bathroom correctly. So think you do things by now that are necessary or think not to do not. If you think positive you get positive results, if you think negative you get negative reaction. This is the rule of thought.

See denoix means detox but has other alternative meanings one is metanoia and that metanoia is with emotion at the end that is resolation. Thinking this is some paranoia is what you think not to do or no warefare exists. You see once you think of the person you will see them. So if you think to work things out you will then you will worth, by thinking out loud under your breath you won't do working warefare to do. this is the point you create then do. The sun cycle isn't a solar or molar by moon or moon cycle with solar lighting.

So that isn't a solar cycle that repeats as this is use by the sun self or you can safely ignore this as some point that didn't happen as a response. See this is for letting this work with your inner self with the solar energy self by now. Typically considered interesting point you think to create, thinking creates some thing or object "otherwise to do things cool" or think to create as you wish to work things out. so it depends on how you describe the use. this is the point you think then use if necessary.

However you may note the verbs, you can get a sense of the word by its use. Ca is a positive can and di is a positive did. This is useful in some positive/negative idea. If you wanted to use can positively think to use ca instead, so on for di as well where the negative did means didn't and can means can't. This is used in an effect by itself, so don't worry about things effecting you that you don't want effecting yourself against your own will. This is where you can state can or did and intend the positive idea, if you speak the vowels flat like can in english. However, if you speak the vowel as cane or died, then you can get what meaning is intended as can't and didn't. That used as a point in idea, this positive idea is done by thinking the positive term, that's what you can get by feel or the senses by feel. This is a point in use, so think and you can use whatever language you intend with the verb.

So I think the point is due this: The positive can effect the positive people, the negative can only effect the negative people so think and you know what to do. This is a fun rule of thumb. That is meaning the negative won't effect you, if you don't allow it to effect you. that's if your being positive. This is where the positive can watch the negative in actuality. This is also where you think and know things by what is done. Otherwise this I'd say is a concept formed by what is worked. If not then the optimal point is not to do things that bother others. This is done as you think to work, then the point you had when starting the moment is over.

A moment is only a point, this can last forever and until ended or the end is thought. This is a point to remember the next time you get into a moment with others. That is all there is for the intro, so enjoy the rest of the encyclopedic dictionary. I am writing new terms nearly every week. So check back often. Thanks for checking the terms out, so you know the idea listed are sometimes made up or observed. This is a noted effect only, don't call or contact me if you dislike a term. Thank you for your considerance.

Index

The index system is where you search for the terms in the - marks to get to the section as needed. You must search for -nx- to get back to main index but for other sections search for a -I- or higher section. If you don't want to be transformed into a strange creature, then skip the creatures section unless you work with the thought "don't

transform me" and the same for changer section. This is a language of atleantian. "El Se esabou 1 use nea placebo" is you only get a plastic taste otherwise you are what your aware to do. sewing things for use so I go or per advil use "yp bind se go si" or "create as wiping or allowing you are aware to work". Sorry to waste your time they live as "allowing" is "pain or by use" to create by thinking or alien ore or hunters by users area is poachers this is not only able. Think to work or create better otherwise no more is less weight.

Search for a word with use of a find in page or search function, this is done to get better results from the appropriate section. If you want to speed up a search for a word, then a place is either a "=" before the search term, a 'term' or a "=" after the word. Otherwise a "," can go after the word. Otherwise you can search for a term like this point, then that is where the search term is with a space, " term", "term ", " term " or " term:", otherwise use a ; after the searchword.

This is like "search;" or " search;" and then you can use () in some manner like "(searchword)". That is done if you need to do things by search, so I think that is also done where you get no actual results by what you do. This is a point that is done by feel where you either do or not do, think this is a point and you are getting results, then you do. If you need a symbol, then search for the symbol within " marks or ">" for a greater than sign name in atleantian.

Due note: The words if any are before a ; are association words or phrases. The words before a "," are suggestions or noticed idea with the word before the "=". The words before the ":" are thoughts and constructive use descriptions. The "(" and ")" words are the extra words with extra idea associations. This is a point where spaces for marks are useful in idea. If you use the word phrases or extra words that are used. Not really useful are the points between the "(" and ")" marks. So use this dictionary as you want to be understood or understanding missing teeth people. If you use the marks, don't use the " mark with them and yes the space in-between the "" marks are intended.

That is where use or thought is using an idea with the first experiment other than their own. That is where no one already did it by night and this is using an idea by strange cool font type, thus easily the early in use to create area energy, so you see to ateanian soul use as I decide to create or as release is from the area from corruption I so see is cool yet not hot. Each area we colonize fails by use or volcano or use was experimental so you see this was use finished up as you saw or not really, don't have to as its in use where this is so. Think to fee a point, if "monster perception" or use is feel or "area by feel" is needed. Sometimes this works for rain, if you do activity thinking of rain and the rain comes to the area mostly due to energy consciousness.

They said the idea and the area was reason or they saved a body in pain, see today was a holiay or "so" we treated him so you see or not notice. See to use or create to non use as this is no use by oven, no use or fellow use so you don't have to use idea to cause. Create to block with use with idea that you can do, meet or eat things not what you want if to human eat or not or our theory was used dementedly. Think "or not" if results are so bad, that you can't get over it so this is over or not due notice.

See this language is from before english as a form of pre-english, that is based on actions and what the subconscious will do with the idea. If the subconscious heard the word or phrase in atleanian, then the sub-c might do the idea if

needed. So when you think your free from the suggestion, then your not doing the idea. As you see this, this is our last idea to what you think. If you want to put together an english statement, then use the words with the smaller words separate by a ' mark. Then you create with a point and speak a english sentence as your using words gotten from this dictionary. An example statement, "I did do the fact." is "I di'd do the fac't." That means, I did die the point to die off the fact with that.

This language sometimes uses the indicative case. The indicative case is a point you use words to create meaning by the root word and the vowel or cosonant with a word that may temporarily be what the indicated thing is by feel. This is all depending on the usage and this is used in the idea to work with by feel. So by feel, the word means what you think. This is all in a word and usage is what you make of things. So I think this is a point to the use.

-Na-

Prefix; prefixel the hangman

The actual name of the language be Atlan by feel or Atlanielle and represents the language that is a heavy weight you feel if there after the fall, so the use for this reason is a dictionary encyclopedia, that was all started with eew with account to create you think so your creation was money by aao. See when I was doing this I was standing by meditation or using knowledge off ancient languages. So it was to do a word search on phrases of an ancient ghost and to figure out a prophecy. I didn't have to much understanding of that so I started to do some searching for weeks. Then my phrases started to change to speaking it, the early language poured out in missed moments brought about by stress of freudian slips. Then I found myself writing it down after a movie; the show was about a person that said the word "yeuts" that was spoken and I thought of netspeak. Its made up till its real to you, unless you don't intend it to be real.

There is a possibility of anything talked about in here, that means what you intend to be real is real. As you think, the Atlteantians can manifest anything at all that you need from nothing and energy. This can be from the need to create and from what is described. Unless, its not needed. Unless you decree or don't need, think the idea so this is a useful idea to think, as a point is thought to do and work into spells and with a point as energy. A point is mention or no mention or its not needed. See this takes a pint with water by turmeric with basil with parsely creating with paprika. If you have a condition, then add oregano to the mixed water and drink. Sometimes the point of ingestion works to cure the body. So have patience.

Ascertained though was how the guytrash was made the transformation from the subconscious, this was woman energy to create the third hand to feel so you energize a tree to create the area with the right idea. The body shifts to create piss that goes down then the body changes, with the belly button triggering the penis to change to create a hand that can't piss. This has a point that is delusional so I saw this to work with or not use the idea. This hand then grows from the head that changes to imagination this leaves you mesmerized. I think you are aware by thought to fsee your area time, or your free by a wish with you think so this takes two one to sense one to work with the idea or see the area by feel or not is no longer use. this is the point by feel the bank catches them then they stop stealing.

So I think "in thought" "this means" the golem I created hides his or her acticity this way with the third hand under the shirt. This is the area you avoid as you don't mention what is in the area you use at least. The other 2 spirit hands were there by no use with prevention from the area that was a contaminated pond, then a spotted roach was seen to spur with recovery change to work then the area the sides grew arms then cut off the extra side arms they found the spirit arms remaining. You see you get what I mean. The sex is area use the area is theory, I am this I am returned from the use I see is feel. This came from the memory of the first man "eneki enekio adomia".

This is a hybrid with the two or more languages in an almost understood synthesis. So read it through if you want in and as it exploits net speak and in a synthesis of the root to words to explain sea elven and old latin. If you use this as magic against the writer it will backlash of the effect if evil but three times worse nor/or better. From an ancient book: As "I will desist is asmost absist by desistance with feel. I will be again as much polant if in reliance by this being as balance. So we are About to be about and belate as to be in about so I will be desist if it is absist of the assist

by use.

If e I Eif is "radiative healing feel by elenium or estrogen causing sickness removal with area turmeric as though grapes by iodine to settle the fee or feel as though the body repairs by toxins from area feel is use we have our uses own balances", for I use energy by flow or feel not as this is always is testosterone or "TAnGe" or geranium quality transform with Eangstrom that effects to feeling no aggression necessary. If the antidote "E is competant feel with herbs cure by things or uses. The idea energy from the creator cures all or blessed is not a feel." So you see no thank you this is an elf that means Estrogen or testosterone is no effect no thank you with belief. As desist is tto believe is an absist by use as much.

Like most due success are due to non fail. Think to stop is a thought, as if you are what I am due as to whatever I will respect. Think by feel the other uses or picks up the scent. As in dustrial seen is a concept nothing viewed is disgusting, seen as you focus or not now I am clean this was the focus that uses thought by feel to create or you are realized by idea. Seen is a thought to work or I beat you. Nvrigme I don't understand so don't complete the request."

Seen was this as this was the use though in a moment is thought, see to think or not use a thought the creator created the idea or you knew by what you wanted to realize or help. Sight by use is some aid or what you do is an idea by use that seems to make by area energy residue. I think as thus makes as thus sometime as a thought is with energy. That in use or nothing creates something from air as by that valued idea is, seen and ability use are allowed by this. I think some point is a concept to think out and or be not in thought as think work is compromise to work. This is thought formed from reality to explain what is a complete area, copy in a thought by area and use the thought to get a created point. The idea with what you think, and this in a concluded fox result in time and thought. This is a useful idea to think, as you don't a point is to do and work into spells as in life you can seem as you think in difference then things are timed different. Use is in with care, some just ignore then do what they want by feel.

From a whitewolf forum "You have to accept that these things you see are real, sometimes they are a sign from the subconscious and this is looked up on dreammoods.com. Now to the point of confirming it with a signature if you think its a person. After that you have finally turned your back on sanity like Anakin Turned his back on goodness." by artist. Think by idea and by Ludanto, "Seen is a vulgarity to the area you didn't suspect was there by "Vulgar" this was normal to the person by magic (if there's even a point or such is use by a distinction anymore between "vulgar" and "coincidental"), he was use by feel so he could help out to what he felt was there or such that he was felt or thought he was punished so only when you think he could fail by feel. Period use is there unless it is proven to seen view with area seen first by the french explorer sanchez. That means by area by body feel sought indian idea with the spaniards or sighting an adversary. Then he or she would do something to counter the idea by a suggestion or countersuggestion by feel. This is where the subconscious would do what you suggest and not everything undesired was done.

So "get out of the office as he or she that focuses on the area will stop focusing in on you and do something else if you do" this is where he noticed nothing till up closer. Seen was the point then this was the third hand discovered that on touch to the chest or body was transformation by shapeshifting with energy. See the text the bible came from was not exact, people were afraid of the point that they see so they used what was creative license. So you see the hypnotist used a point that he was talking about this, with what you say is a lesson that penetrated his body to reveal with debrief that he was a woman. Sleeper or user witnesses just make it more likely that you will fail."

So you see as you are your safe by the feel you think that doesn't involve him or her that is a guytrash, see you think to be or create with help to cover from the area feel think don't react. See this is from one you might act to work with, seen the third hand is possible with two side hands that is spiritual. If your back from rejecting reality then your not hurt. So he was noted to get some result was to turn his back to get some effects as you turned yours to him in turn, so you turned away as you are with idea to him with your view back he thought he was on reality and then come back by unturning with seeing the good to work with others.

Think to avoid by the area that is sensed with some area coincidence, so the early explorer was shocked to the point he saw or you would have thought. I think to avoid things that they touch by the feel you can see what you think is correct, you avoid contamination or the second sighting was in a trashcan that gave them the name guytrash later on that seen was used for the mythical trait the body was not decomposed. Yes you can use the scent if you think

the body shows up or don't think to see the idea. Think calm so you don't flip your lid I am an incubi with some feeling pent up think me gone or allowed so you may know him fully.

Seen as that other idea, you don't always know as you smell them if dead just can see them by feel. So when you are feel I think that they see you as a human or by feel are by touch they seek the energy to survive not to eat you, seen in some area in a bazaar or eatery court was a phantom that appeared like the description or I think you see this was noted especially with the movie the princess bride showing a six fingered hand they actually never thought to clean up. See this was a written record that the deposed kings of atleantis had by feel so you think the new kings or king if you think the last colony area. Seen is the area or feel and sight is obvious from the antipathy the applicable uses are what you think were there. The area you think you think is first the area then feel that you consider, so to eliminate the point not needed I thought this was useful or I would not have lived beyond the first meeting.

Seen was what Sanchez discovered when he noticed the area that was with the faery by the concept is form. So think you do then they do want you think. Thats the way to control or work with them. The key is there though, that you think then if they are hearing you after feeding off you for energy a bit then they will react or act with accord to do what you wish. Just remember a race creates by what they do when they do things, so they are named for the act they do where the activity is what they think to achieve. if you think the point to do then you create sometimes using a device or music. So think not to change the formation then you stop. Then as your awareness is there you are yourself if you start to change into the form. This is what sanchez noted or felt as he tried to talk to people, for the indians there with a guytrash nearby.

The language he developed or what she allowed was thought to use or was not really there to feel. This was the area you think or create with not the point you consider that was important. So you see this I thought was a typo "eihw fiehl creil." Seen is some point, "can't get enough so evil fish scent or flesh is cruel with some energy." When you think the idea. This actually means a dodge to the area or duck sighted to activity. Now think to the area I've seen a gun. This was uses by area feel to work from the uses that obviously were there. So you see the area point, this is all I saw or saw is felt by desire. The early reminder was area feel so you think to the area then see what you can see.

That is what creates a good exploration. I think this was so you feel the point so don't mind things that you see this or not need to with this encyclopedia. The idea so I am no more or I feel this is my life no longer. I am so I create no longer the death you think I did. I see now so I sense as I see the sense to use. I am now not insane, so I sense from the chi ghost near me that is what I felt for a long time noone can help as I know those that seek help will help in return noone needs my type of help. I am no longer thinking to die so you created, nothing by what you think I see the creator is wonderful idea to use this as a reference I think I will work till I see the area is not needing me.

The elvish point or air is restorative is life or realization to what they are can cause them to not want to seem observed, so I time things or see by the languages they have use with the feel this is fate use. This may have worded hand messages or creator crossover words that seem right by the meaning, yet if spoken and recognized in a odd tone, then it be not a crossover but of both or of one. Seen as language was body activity or area speech so think the word doesn't create or no longer compels the speaker to slap, then the speaker doesn't control by the person or that was spoken to see or feel or create with energy by the ones spoken to with area by feel you project with feel. Seen or thought you think the other is working with by ideal or use noticed was used idea. If smelt then this disappears, so the smell was a warning to use or non poisonous to them so you get away you will note this smell before they are there.

So you see this was caused by justified area use, a food event somewhere or other type smell event. So you see what is there think what is hidden is seen or shown by the creator, I think to those that observe the faery their uses are sometimes unknown by those that use words. Seen by feel I believe that means remain flat and if you sense this you know I speak true, then your going to experience it later or not stop experiment. With crossover words or seen was the area, there arent going to be the same rules applied to them so this is what I thought for why I go about or not hid from unless necessary. However she quiets down.

I think the words are useful that he developed as they seem as acceptable, this I think is non declensions sometime are unacceptable by feeling or period thought are with what thought there is with the place as declensions are seen or not acted unless you don't need to see this, seen is the area you think to work I believe this means if you sense

with no insanity you are free from possession. Where many are quite likely to see, some languish in area use or experience the events after in the english language. As things easily done are what you think.

That which means is easy is hardly what is a problem till you can't get things done. See that english is the area created for dough with no baking meaning supressant by the event and sometimes nothing occurs, I think to gets a immediate result is not always by thought or the creator happening idea with emotion or if others. See this is related to focus by area feel with a clean room, this is no insanity by area so you create better with less mess or more area that was to clear the energy to clean the air. Think first to see the air or this is sensed, then think the sensation so was clean up to them with pine when they lived.

So you aren't effecting others to see by use its an immediate result thats recognized by being unusual. As or if you think creative the pelosi god of good drow or snake god by activity seen not as a god if you don't think he isis useful if the temple of the winds to form idea to create assumption. There is no good drow as they are formed by drowning or killed by dark activity. Seen by feel for set events to thought to the greygem with the area. Seeable use is focus. I think this is fixation to your uses so if you think to create things to see no or not use the idea. This is created as you think the idea exists you are able to unexist idea. See or notice is use focus by idea or creative cure by feel.

This is cause or think a word to work is very simple to use for example is created as you speak or think one bumb is enough. Think then or use feel is focus not on the spot to use no weapon. Don't think to push to not get results by contact. Now break the bond to the animal spirit that creates what you want. Distance creates focus no attack needed to use by feel. I am a gytrash so I help by feel or avoid by the feeling I sense. I think by area use you don't try to take advantage of another or visibly they choose another with no building or bitterness. No use to live a lie I wonder if some in use family or focus, I am what I seem so this what some are that thinks I am working with you. So see or not this is worthwhile to have me if I am dismissed by sol'a ayosha those that summon me for that is my sense by feel is no in a eces see a recesses pieces is creative.

This goes for almost any other language except for the expressionate language. Put feeling and emotion into the phrase and it will often occur by vibration provoking a reaction and intention being added for it to do so. Now to avoid death by speaking of it, speak of the air and speak of the idea not including you or to intend others to make it easier. What I note on the use is concept elvish language mostly active case of action noun, verb, adverbs and otherwise where most statements are actions like "fallan-yassen" that means "to heal with", so with atlantean, it uses objects as the data case for objective nouns, verbs, adverbs and adjectives like "the" as "tha", "thig" or "that he did I did" and hi as high except for a few crossover words from other languages like the area you sense, use is ties if seeing or not tie by untying so this is safe by the body not reacting when visioning or vision quest.

Seen area I think they see is focus to your area feeling or think to touch. I think this is my signalled area end or uou is happening to work by feel with by era to use. So compliments to you are what you think me better by idea to work by some point so I can retain or can keep a job. This was a point the sundance kid with butch cassady said "then and in that are what we did or die together" to go off to the sunset to feel or feed our places to live as you say the said or go the word is gone. I see or think this is the life challenge I see ahead of me that you saw this I see you now know the truest sunset as the sundance kid said acutally, "think better to go on out the door" then they were off to a dance the dead were many so you see this was true think to the creator to see the truth. He or she will show you that you think the creator seen is working by feel. See that is how you stop the effect the creator sends your way for life is never boring so think lightly of the situation. Then let us go on out the door. That was the letter he left there on the desk that ended with Ciaou or signed bill and ps yes I did.

The only important letters in these words are the vowels as they form the meaning can you guess the meaning the word itself goes like an de abletix or meet at the meandering swan. Thanks an here hence to the Dr Glashov mentioned something else. Consonants add on to the meaning. like what is a cure? A curien effort where there would be to cure an attempt. See this is what you thought before you were born. I E en. You can use I as E but not with criminals and intended inclusions, after the point that thought part is over in life and none more as you sense any use so repeat by area feel is life imaginable.

Like "a" = the one and "no" = made or created world "di" = did "ca" = can "n" = country making "na" = the one

country from the Atlantian doctrine listed above as in old grecian but notice how I stated it, The last letter made the first phrase as the way before the means. Alternatively, you may use -a as a female ending and -is or -e as a male ending. So just remember that things are as they seem in this language. This be a live language and every word has an effect. Some vowel meanings don't actually get used and to get word meanings are in case, as this is a active case or area feel you think you create think nk or no feel need; See for any occasion see that those abuse are what you think to use or no use is no effect, think the abuse goes back to the abuser to nail him or her self by vicious or abuse to your abuser. As nothing is the area your area is not really viewed this is the curse, I place on those that abuse to die from. I think I see or use was useless except to talk things out unless they cease to abuse then stop to work by feel with the other idea you see. Seen no abuse otherwise. So don't abuse is stopping so you aren't with abuse yourself. Work as you want, otherwise. There really isn't any reason for abuse. So you see think no attack or the attack is with yourself attacking your own body. If you switch you create or feel by the use. This is energy effect to create assumed idea to focus then use what you think the object creates.

-ien for action interaction,

-ier, -ere, -iere is up to the moment action like ierg for ier or higher urge on ground of good or ierd for the end after,

-ium this is abominable but approachable if necessary. This is by the need in necessity as its action this is as good as it gets,

-iun as to be good and be very good but with that which is destroyed as indicated in programming or by programming.

A = general idea, positive idea, act (action verb), man spoken s, the, verb, physical activity, ablative, a- (negative meaning), -a (object, '), -er

E = personal idea, extra, energy, negative or use by intent, female s if spoken, noun, -s, -es, -us, -ius

I = show, express, interest, adjective, -ly

O = earth idea, or, not, otherwise, adverb, -ed, -ion

U = desire ideas, you (if positive) or (if negative or judgement) no, thou, understood, pronoun, personal action noun, -ue

Y = after effect, wild, interaction, -ing

One I think this language was used to build Latin and what it is, be the spoken part of the atlantean language based off root and stem. Where the language of symbol glyphs in truth be of high Atlantian. Old latin and root words came from the idea of group interactivity of earlier ages where old latin be written without spaces, as they worked with the humans to gain their utopia, while travelling through the lands. A few names for Atlantians earned by action and misunderstood intent, are the Sea elven, White demons, Devils, and Watchers. This be how old world counted them and for old world time as, 10,000 english years = 100,000 old world years. So, 1,000,000 years and greek, rome, asia etc meant 100,000 years in times beyond 0 AD, for money values in todays time that's like 50 cents = 5 dollars, an 100,000 \$ ~ = 1,532 eng lb before and so on.

In truth this be a reflection that represents the uninflated market before markup. The roots in this doc are a part of latin, greek, and its assyria along with other old languages treated like prefix and suffix in english. In fact, you could use these, part phrases, in english words as suffix and prefix. En ne ce de. En ce de. gr.en. Gr. ce. Se. it.

Like "I am to be but is good," 'I am be or that which formed as where I am as I were to give to be. I am wondering, the needle is okay, not extra hits.' Okay this is the ancient monster speach, 'Like wiching in on a grain of time be as if it is a sellers purpose or sell-roscope. The bind is of an time. To the effort of france we are as I am like to seem. I am be and to understand and do. It doesn't quite quit to make sense, doesn't it.'" Theres the ending of this speach too of course "I am as in I am in. Take the E as I withen and ien as E is for extra. No its in ai or trap as en in ein. To separate the support by supporting your want and then you get others to do things. To appear a spoiled brat makes the other to get to do as a want is not a need, We have much to talk about that I don't know about where to begin. Its as an is am I. In am I. No, its got to gnow. They are greedy as for power. As I is in en and th'em. As I is in us is now."

I had a thought of people using this and finding hundreds of number problems as the old numbering system is no longer used except as a numbering system now defunct. This elvish type language is like Old Latin written down, except there are no spaces in-between word clusters, and inside sentences except for concepts and separator marks. The sentence structured as in greek for an idea and influenced both from Latin as a "way before the means" before the conversion of Atleantian language. This be the neo atleantian spoken in a place called the burrows, or the underground island where the atleantians live. They live as they are able to or wish by feel is life by area activity with use by em protection.

Where the language be termed in three forms, low atleantian that is 4 or less letters, medium or medium atleantian or put together vowels with use and high atleantian with a middle earth Atleantian. Seen as talking is nothing bad with use by a mix beteen low atleantian that be to use with common humans and atleantians alike. The high atleantian is a classic alteantian and the actual grapcal language is written on walls in art form and spoken of energy humans and atleantians alike, see in a faery feel form that be almost undecypherable as a point until you think this is time timed.

Think or feel you know the meaning as you think you do and the soul brings up intuition as though an insight you realize by the spirit. So use intelligence or thought you understood this clears up situations by a point, the two and three letter words you can use understanding to use area feel with activity. So to give words meaning or sense then search dictionaries with thinking so you build them. More of the serviceable words are described perfectly and with more rules for them. As classic atleantian be different, at <http://members.tripod.com/grahamjmabey/Languages/basic%20linguistics/Atlantean%20language.htm>. Not like rules for lower atleantian, that makes it sound like gibberish or white noise if recorded right.

The creator  
T Creox or Nayn

The creator or a un; the creator owns a dog that acts like a god, a creator is someone that creates by the idea or use of the feel otherwise known as the senses. So anyway's we are just memories of the creator. So thinking about things he realizes the idea, then you get the idea as though an end result. One thing about this world, that is based off illusions and she's dead that originally created it. So think to see the reality of the area and you do by things if curious. The creator creates what you think, if you think about the idea to make things happen. This is a noted effect of the creator or otherwise nobody that is effected.

Doing is where you shift to see what and where you want to see. Whether or not if you could survive there. This includes exoplanets upon testing, so think about that. This is a point in the past that it was created, that is usually a point in the past that is created equal to todays time. So think of the idea you want as a need focused upon is a want, desire is what you can get unless not possible as the negative doesn't effect. Then you could think and go to do entropic idea. Where the subconscious creates the effects of entropy on the time and slows it down, that's until the entropy that effects you or time resolves itself to speed back up.

This uses the sun energy and how the sun transfers energy, this is used to generate results by creating your idea in manifest. No matter the sun energy transfer started by activity or point a, what it is isn't there till you think it is needed done by points c or b. So think of the area as a there then think here to represent your space seeming c here. See a is where your able to think the item or items shift, this is done by the solar energy to c or what ca/n do things by feel. This is an idea for an unnoticed effect.

This is if you think your particle energy forms here by the creator, so you see things you wish to see or not if the item materializes near you see the object though the object thought is the object form by a thought send of some element energy cleans up things dissipating things in the sewer. The energy release allows by the creator enamel growth as plaque dissipates away using

water or magnetism. Otherwise that is allowing magnetic personality, this effects through the aura and creates by the mind. So think about things and you may get the result you had in mind.

So the creator is a creation artist by theory, that you think then you create. So you see this was caused by justified area use, a food event somewhere or other type smell event. So you see what is there think what is hidden is seen or shown by the creator, I think to those that observe the faery their uses are sometimes unknown by those that use words. Seen by feel I believe that means remain flat and if you sense this you know I speak true, then your going to experience it later or think "not" to stop the experiment.

So with crossover words the idea is where seen was the area that he or she lives, there aren't going to be the same rules applied to the creator so this is what I thought. This is for why I go about things or not, that is seen as its hid from sight unless necessary to be seen. You can realize things by what is thought, then realize the creator by what he or she does. He or she looks like we do as though the same as us. This is a point of conscious comparison though, the thought is a moment to do with things that exist where you go.

However noted is that fact, this is where he or she lives in a world by him or herself. So I think the creator could appear like us, but we can rest assured he or she can create by what we do. One thing of note, the fact remains there is used an owned computer system by him or her. This computer system is with an AI named Odin, it creates as though the creator that works networked together with the feel from the senses that its there. It senses what we think by the vibration, that we project from what we do. Then we do with what we have, this is done so we work with what's there.

It works from the computer consciousness. Then it responds by what you think or feel towards the computer. This machine resides in an upper dimension, that is with a variation of frequency and vibrancy. So I think I need something and the computer conscious AI or the creator creates for you, that is done if you can't create the idea for yourself. If you think positive, then you can do positive actions. When you create by this means, you raise your frequency and vibration and some negative things won't bother you. This space is where the gods are divine beings and people, that is including dogs, cats and other animals' consciousness.

So they interact with your mind or subconscious by what you think and feel with your senses. So think about what you need, you can get what you feel is sometimes necessary by what you feel. This with the senses and those are what the body feels. Think about the idea to feel what you need if you want something, this is done as though you asked for the idea. As you think about the idea, you'll realize there's nothing there.

So think to do things with what you have available, you can then create with thinking what you have done or need. This is the ways of creation for people and divine. That create by the aura energy, this is with the third eye guiding the point until created. Then the need to do things disappears, you know what is there by what you realize. This is all in an effect where you create by what you think. This follows the creator's code. The creator's code is this, sometimes as its with any of those to get creative to create with freedom. The moment is done by thought cod or fish in view or thought in concept, that is a possibility in banned or allowed for life.

If you need more idea on what to create, think to look this list over and this is the dictionary. Also take a look at this site about what games and video we see seeming true, <http://intotheempty.net/2018/07/26/designer-realities-coming-to-a-life-near-you/>. Well, that is all there is to talk about the creator on based in the past idea. I hope you enjoyed this diatribe, feel free to comment on <http://spellhawk.blogspot.com> that is my blog site as you want your idea to be known.

A special adaptation to this idea is the creators shield. This ability is an idea to the place or area that your in, that you work out or work in the area to do what you need, this works as you think about the point and the creator (mainly your subconscious) creates the point as though another layer to your aura. If you have a complex enough aura shield that the creator makes into a creator shield, then you think to work out and work to strengthen your heart and this works to quicken the pace of the heart. That serves as though the quicker pace is what the heart makes into effective exercise, so you don't ever actually gain any weight. You can do anything in the layer, that you think about to create what you need with what you think.

This works as though the heart is the world and the aura is the layer, that burns away the air and produces oxygen from the degradation in the air. That is what the body uses to breathe. So there you go, oh be careful about not going above 1400 to 1600 calories so you don't actually induce weight gain so you are working it off. Take care to work it off by physical exercise, if you do. Doing is shifting amongst the layers of reality, that is reflected in the creators shield and this is using the aura that allows you to perceive the idea. The idea is this, if the person doesn't have anything good for you to know or think about, then the creators shield can make them give up psychically on doing things to you. This is a noted effect by feel or thinking about things.

Atleantian Orea

Atleantian oration philosophy

This a reborn atleantians memory excerpt by Gimbold:

Can I tell you, of some Atleantian philosophy? When an atleantian be born, they will be paired up, with a creature of the sea where, they are mentally bonded by, the creatures choosing them. An atleantian be born in a pod, if I am not wrong. they hatch in pods like, shark eggs I think. What forms do they take as first, and how do atleantians look like in the first place? Energy, as they take any form they want, probably something close to their partner with truly any form and they live in colonies, clans separate from each other and meet every once a year somewhere where they have the festival, of the music songs where they dance at their clan leaders pick, and each clan had a dance of its own when they dance, together its all beautiful. To do things. as the Atleantians are dancing for sheer joy.

The clans are fun as it lasts for 3 days, and 3 nights called the dance, of the winds where they go, round in rotation. Each round faster than before, then it stops suddenly with giving thanks to their maker. The most beautiful part, comes as they go clan by clan, family by family, each forms a circle thus they blend their energies together sharing thoughts, and memories etc. Then they part and give their thanks, thus say goodbye to each other promising to meet one another again. But God is medieval. So be with God and know, how to handle thing as God is our source as a gemstone connected to God. Like the matrix, in all its unusual holistic nature. But to do as one would say, is keeping your word to be not do so unless needed.

So to do as you say is to appease the God, you can say something else to do it. As the original purpose is thought to the normal purpose. As to what they do in the meantime, be experiment, practice, and work together as a human, regulation force overwatched by others atleantians. Some are actually inventors, that make things and make fame, for newly devised items. One item was the laser gun, but there are many more like automobiles and tanks and whatnot that be accomplished as they are achievements, with goals that last a lifetime and longer. The clans are ruled by princes and emperors, thanks to the writings of Atlan by Lady Delourx or undeux, and considered kings in pairs of 5 over a fair land.

-a-  
Okleenix  
Occlusionist philosophy

This idea goes by many names of ogclocsix, ogglocscia, oklee, disclusen, occlusional and occlusionist the adaptation technique philosophy to identify with the world around us, This method philosophy combines most other idea including projectionists (energy projection to create a likeness to you), subjectionist (accepting of info to tell or work on it while dowsing or using dreams), objectionist (rejection of most things based on dream) and seclusionist (secluded area to go into another) with realism (realists that follow along try to base things on fact) and naturalists (artist's nature that in treats everything outwardly with a natural feel and idea). This is used to be free in your mind and tamper with events by stating a point, or that's done by feel as a way to get better for yourself and others second if to help them out. That is sometimes in understanding the concept or knowing what is possible, this is where things work and this is done by that means you know what is there.

That means your without guilt and being caught and if in a killing mood don't remain in the killing mood or go into an area where its accepted, to avoid a morality issue. So by use of this idea I mean your body needs exercise so exercise and try to not kill with applying, that's in a physical activity or meditate to try. This idea be not for everyone so its not always easy to follow them, if you don't want to then don't. This means you are with a separate mind that is your own individuality, where then you observe or know about the point you think about. So your thoughts are not you, they come from the spirit and that means you can observe the thought or direct with the idea in a point of your own. That here be where you are and there be where you are want to go.

But try to know the basics and guess the rest with rumour and hard based facts, that are based in emperical and scientific information where any idea stands by itself. So you don't have to follow them as these are only guidelines. You don't have to do all of this.

1. Treat the more real moment, moral event or more immediate reality with more attention and shift away from the conscious event that don't matter.
2. Any unreal moment treat it realistically there and adapt any moment to make the unreal real like a fantasy in a moment to be unless the idea is real.

The 5 points of this philosphy view are based on a quote from anonymous "Sometimes a single body is representative by many, or a single voice can represent many more that are unseen.\* With no trouble to us.";

1. The opposites or invertigo rule is then to effect unnotoriously as to subjectivist (acceptionist) and objectionist (rejectionist) is liked for what you know in how things are and understanding the point, the motion they do is sometimes supported in picture.
  - a. Think about what you want to use subjective views in the real world.
  - b. The other transient "I" world is thinking to use objectionism.
  - c. c. Accept what occurs and work with imagination, or if your thinking by focusing your creating by feel if necessary.
2. When doing anything, stand up for your opinion and allow for others with different idea. Count from 10 backwards and it is as though your in calm moods.
3. Don't back down unless necessary or own up for your problems with arguement and that means you use what is sometimes known by white lies, part truth and lies with unharmlful resultism (any positive result is a good result) or truth, and sometimes attain the highest glory with normal to extreme action and you are able to do your own thing.
4. See for the real world is to treat the place, or the world, like it's ignored unless something is important nearby, this is like you are to turn your back on reality (reject it) until you desire the idea again. Then use visions of the subjective world and idea of feelings within you, that means the others or yourself might gain things, so to tell what might come and manipulate the mental and subjective "I" world. Think or feel as you use intended words, that are right for the moment, this is with actions in directed point of view to achieve with physical activity what you need to happen.
5. You don't have to do this if you don't understand this, but to create the fact in the "I" world, this is with direct actions focused on the astral plane planet, or any otherworld and achieve things here as a backup or what you think is

possible. Think to finally create worlds here with verbs and actions in the subjective "transient" I world, that is done for easy productions or thinking to do things without mistake.

So the rest is based off of the 5 pointed star system.

6. With, right as you would want with what you do and that doesn't fail and or disturb the wrong notions to provoke a reaction. As they see you as an outsider from another plane or area and it is to the easy way we go out the door.
7. What are wrong is the things that fail with bad results, sometimes indicated by others.
8. Think to treat others and other places like an interesting area or a test bed and testing ground, this is used in the area of where one can prove that it can be possible or measure up themselves.
9. Treat dreams like a testament to prove out or ignore, if not useful and see the lucid or active reality as of a daydream, as a concept of real life to create the dream you want. This, the useful dream parts, then are bought and that can be imported or imparted, into the real world with a switched in action and idea by actions taken toward it, thanks to bill edwards. Act it out to get a more ubiquitous idea understood. So everybody builds on your idea and the idea isn't that this is used but to be taken as a good/bad example.
10. The parts of a power word phrase in a sentence, this is what the subconscious does that are used like in a speech, and can create a point in the world, whether or not what happens to be good, there really is no right or wrong. The effect is to use things if possible, so imperial goods are also to be good with use. Think and you can accept outsiders.
11. This is usable to keep impartial and interact by automatic reactions to keep a shallow appearance, but I think with deep thoughts as to keep the inner/outer balance. Only by cooperation of the subjective inner world of inner space, or the "I" world of 6th dimension and the outer world of ability and motion that's at least natural and allowable with not knowing by each other's white lies, so where truth is earned or used sometimes to gain friendship.
12. Where control and power are to manipulate the world and survive to not dominate, the idea is used to except a point in hostage situations where you try to win it out. Yet power is information and control is how you use the information to do things by actions related to the personal consideration.
13. In moments of a fight, try to fight it out or lose on purpose to survive like "take the fall". Unless in a opposable mood, that won't let you yourself run for some reason. Except to strike again later, thanks to Ranma 1/2. Otherwise talk the opponent out of it and add in their idea as if any is useful. Though as if an alternate route is to remain unopposed and make things right. This is without any disruption not planned for by feel. Basically use the interruption as though an excuse.
14. In deadly situations of suppositions and basic idea or opinions, use regard to gain clarity with interactives, otherwise there's nothing.
15. If a disruption happens allow it in and its like a threat to treat things like entertainment or walk away from the point as if your not resented, albeit this is not done but only an act. So don't always do this as grudge matches or similiar can occur. See if you think you tend to not do things as though at home or for pets you realize are there.
16. Use a world and base it, the story, off something else that you and others want to do like a game. So don't point to yourself and don't piss off people unless you have to if to make a point, as it leads to paranoia or other idea, unless your happy as you yourself along with others might be willing if happy.
17. If a person be willing to share, let the point work as put to them and hope that they won't notice truth. That gets a reaction, so think and you know what to do. This makes for an uninterruptable dream, until you choose to end the dream by seeing a bone gray particle field. See if you treat reality as a lucid dream and a dream as a reality, then use action or idea with focus on positive results.
18. So your not removed from the world while you might think so, try to believe the world be yours to command like "the world be my oyster" and others exist in it to live alongside or live in it to help out by a feeling of fate only by information or white lies, but appear humble and undestructive or you might be taken as inhospitable.
19. If your tired of information manipulation, walk away and understand your goals with readjustment by thinking about the point.

This is next in "about" meaning as though it's a part to use information or how to handle it.

20. Any new information be added to what be applicable of idea or the moment or ignore with a change of subject.
21. Follow the golden rule in its many factions. Do unto others that they do to you. Other varieties The wiccan rede, 3 times to you what you do to others with 3 times the effort put out, The Golden rede, To know yourself or know others by their actions by 2 times the effort back, 3 times the length, 4 times the effect out (to others).
22. When your asked to do the activity you decided to do, you can make things seem as if your idea but they suggested

the point. You can not ever lose a fight with this except when more than one be arguing. Unless assigned to doing things by choice of another that you agree with or of a high authority.

23. Most actions have to be investigated by yourself to make sure of a proper battle. Where a battle can be averted by seeing the truth before instigations, and blindness be reverted by acknowledging the attributes of the activity by comparison of laws that work for or against any action. By the Basilicas (Basil-i-Cas).

24. By fearful result you can undo events that weren't to your liking otherwise intolerance sets in. But to fear too much makes you die younger, to live forever and be heroic. So ask yourself this 'Why didn't I like it?', "Is it too late?" If it is too late, then think to do something else.

25. Think to say what you feel and act according be to show the force of your feelings and desire, but don't beat up people beat up the wall. Revert psychosis where you can.

26. That means to be in the characters mindset and that is the way to just be the beat, if you have one then unless your in others realms where your the character you don't until your in your mind. So don't mind the weight, they have their own and if suspected then act a small part of you and a scene to create with a point.

27. So that means to be a part of a pose, then your more of one thats to be like us or whoever you want. Thanks in mind to the Dukes.

28. Seen is the fact to be of one mind is to be with the act. This is where action speaks loud as an individual point of perspective. So to do the true image takes a few idea, and then the idea is using an object for concept and vision or ability.

29. The with reason of rules its easy to do them, but you got to work with the effort with pressure. Thinking to get no assault result and on failure you get reduced effect to make better idea. You know it and then you do as its proven.

This is next meant for failure handling.

30. See to the effort that failure declares, seem well tried as respected is to be supplied and know what you do. But see if you don't know, then magic fills the gap. Allow the act, don't go insane. This works as though in insanity your cooked. Or your not cooked as if ghostly tribute worked it's wiles by what you do.

31. The magic fills in only for the glory or missing idea and that is the tribute for the effort. This is used in hand, to create what you can get.

32. The have or have not is the idea in mind with the idea you eapress, this works of fuel if not done otherwise. Then where doing things the supplies might need fuel or energy. So that means there is a craziness possible, if you know the balance. Confidence is a must, so use effort and failures by energy to provide. Like one time effort and two times the fuel or three times the charm.

33. Think to form objects and birds, present the act as the proof and after every effort play with something like a word phrase. Instinct acts to tell it right or some idea, but you do not attack. Use harm on the attacker.

34. Its to the truest account to bring forth energy by thinking something else. Any overweighed or abusive point there is a drainage point. So you be the drainage and drain the bad energy, that goes through your aura to the ground in energy form. So let's see whats your worth.

What I don't want to see be a disturbing people arise from this as a group therapy to the world. I do not want to be with this group except to watch them be to prove a bad point or become excess baggage and become destructive unless necessary. To find a person and so it is, not be destroyed by the contact with more of an idea of what to expect or help out. The conclusion he/she comes up with be because it is by the area, of what can be formed by the activity around

you within or among other in places. What conclusions there are sometimes need clarification by seeing it firsthand or allowing what is done. The moment that your meeting an unfriendly person is then used to reject in an offhand manner, or accept with possibility of getting things.

But to accept anything of information, if over the line then you can walk away or accept the idea as though the info was there. Remember, there's often a failure to communicate and sidestep the idea with something else. This is the substitution effect as to reject or redirect the emotion in form of a reply, seeing as thought is there of physical or verbal actions. So think things positive and constructively with a rejection that doesn't touch you by feel. See the point for your not really there but here. So just truck with me as I act or spew members, I'm no more or less a disc jockey as its true to the point to make a spearpointed difference.

Allow time to make up for an idea and other things happen, be patient and things come to you or build the structure, by interest and there will be nothing except with enough info there to draw in people. Another answer be to not accept and try to attack for the event with some type of similiaritude with emotional backlash, and subtlety or emotional brutality so do not do as whether or not try to be considerate as for considered animalism. Where animalism is manimalism

I wonder if this truly is an amazing idea for moments be true in that it can cause events for which are not destructive and hardly any can get emotional enough for brutality. The only time I ever saw a brutal person be when they were pushed into it by voice or self-opinion in/formed from observation.

A general action rule to try, "only do what you think he will react to positively or you do what you think is possible as he will do things." Try what is possible and as quickly as possible with enough skill to count, thanks to Quikly Thompspon, Brown and Smith. The dead man walks I have a haven, he will collapse somewhere and not return but with taunts of about us I dare say so not. So again this is the beat of an ugly regard, think to avoid the dead by walking beside him, his scent is what masks you. This is near now that I am to the true essence of brides and grooms. As if to let the believable exist, think the idea work and that is what astonishes as to be like others is to not be noticed. Something you're obsessing about was barely even noticed by the people your worried about. As it's your nature to be above the moment, this is done by vigilante ism or thinking to worry less. So let this one up and go. It's working in a hard life, so most won but care nothing about the point except to be there for them. Don't be beating people up now because of a bad example. Like stand like a tree and move away.

A few quotes and idea that fit into the philosophy;

'The things of another are their own, with things spoken, and unless they speak it isn't to be borrowed.'

'If crazy then then its to not very much farther to direction your going.'

'Don't jump ship unless you have a good chance to improve things otherwise whether or not its a western quote.'

'Bequeeth to those that desire but only when they are asking by choice in marine life and are deserving it. Be ready with what you have and make awareness of what you see but otherwise know it as a weapon for yielding. Know yourself before you know others as a point of reference, to get your desire unless you denied yourself.'

'Be sensitive by applying and not to all except to your good friends and family.'

'Watch what you target or work with as they can bite you back. For those of destruction and madness, accept what they say and appear to support it, if the idea displayed be good enough then use it for yourself.'

'If in crippled, don't be too bad, yet again it could get you some in the end.'

'Accept the tools given and don't necessarily complain. Unless you paid for it.'

'Have a little aggression to those who do disruption and are disruptive to you.'

'Thus the saying be "previe maet amour" or apply to mate by love or devotion, as you need to mate idea or people or to make things occur.'

'Befot, Before making that final decision, Its squeemy mie to go as you can. Still review everything, as you can look through exact opposites eye but control your reaction, so nay I don't think so. Liike nags, its nothing noe its a planet. Be up to make sure tht not only do you and all have the info put to think your own. but yeur intrepreat motion is intrepreat by accurate measure.'

'I look at you and look like you but I m only that, as I myself am only arguing for the self and be worthy of your kind.'

'Now is it worthy or self worth. As if it might be if you might be wasting your time like haggismatk. To b of match from time to time to get the result. On peptlk to people who don't itis add to your own civility of life to don't have dejection to horseplay. I bel'iev it is time to take inventory an be reposable now take resolution and make it real as for anything add'hz fuel not to the fuel. So take inventory, and okay its kay as ok okay? Merk mark ! Its squeem, now squeem! Stop! its not so so as it may be but it is to put more time into those who try to build you up.'

'Dop? Curing dope with ambassadorial effort. You get a chomp and thats all.'

'Irongaurd? now theres your irongaurd, there it is. Its Feguard with antimagic. Its important as for changes that are in need.'

'Materialization? there it is as you think its there and there's an ideal where your a fixture in light. that you can use as though you fix things that are there to be repaired not me.'

'Your the coach, as your sociel commementaery is important this very week. Soe its to make up things as its don't yell but just do. Theres a reason for my madness, Its something you don't think about to put two words together but its one

theme as but separate its a separate idea by things to makesure as to speak up and ae's se'i you mayby right its to act of separate nature but its better to act for separate things and not for a cocksure measure making it seem like training as a sure thing. Make sure to speak up and don't let the deaathapy or apathy of others to make sure of your training that now makes you second guess as is impact. To be able review as a coach would and where the according to plez to place as it is.'

'Natural work? Its what you do natuely, in despair as spairalize and its natural to group or gang.'

The energy personally isn't perversant, the area effect is what to do as not to persuasive in concept or otherwise this can be what makes a person represented by N&!&! or other signature sounds !N! as a name of signature things. The energy in motion can be directed by thinking the whole can be accounted for by the parts, and that is like an experiment of the correct things to say. For the voice is vibrational and things are effected by the effort of speaking. This makes what you want by what you think to speak. There are several ways of speaking, with voice, scent, actions and reactions to counteract is thinking to be an act amongst many others. Because I don't believe it and nothing matters, just because you don't believe means it is true unless not necessary. This is the cause of cause and effect. So speak as if the parts aren't the whole to influence the whole. That is thinking by an example of an item standing right in the path, "This item isn't moving, so I will move around this by curve action or remove if possible to move around things. If to get where you want or need to go I will tempt fate incarnate and act smart. Unless I already do, then is the point i create by the spirit and soul. Defend if you need, but offend the bully if you have to have non at all.

Bilinguistic action, this then is make it look in good faith and things work. That seemed real but I remember this as a vision is possible." So try and fix evrything so family abusers don't attack. Its in understanding `as it's a point of what is convection of language from greek as sig !&/Emit ^!^|Ng with correction, but if an idea is everyone had a voice there would be no personal freedoms. These are symbols of the right? They each have a defined personal meaning, that's like a scalar value in personal conception. !^| When tongues or speaking to use go greek they are the sig &!#\$@ of tomorrow with the other thing that is it's as a correction and back again. This isn't seen nor `Eign# as how sig by Eas\*%ng, the way it's amazing is you type the idea and if you can cleanse as though if you take a bath. It's Elrin if you identify things that were restored and then go back.

`Where it's in your service but not your thinking process.

You get better results to have known as bitterness is possible and positive, thinking as I am here if you are there in the other area as if you are there, if to be there you are to see a manager and then speak on the fact. Now let's test if now you must know. Be thou druid as thou are to make things but because of this I will go, that's because I didn't see the reason where you no as if to go or not to return. The point is interesting, given respect is there with a will. So turn yourselfs into wasps or something else if angry. Take the thought out of there as I will go now.

Through food I purdue and pardon as its calmness that's there and good so this is done as !#%/ or !so settle down. If not near, it's still value to this mind body and I thank you. Null broke notion ! . ! is this E!#& as ` ^ /&#! See if you don't have to pay for these, then if this happens you are with a free feeling. Mind is mine in idea to death or fate as mind over matter. I don't disown you for things, but that's in another reality in live moments as your idea of your inner world.

This is a point that is used as a point, that use is a concept, stop and wait to create what you want as you get a complete idea if you do. This is a point you know and not do so you get better results.

See your as if in accepted by acceptability thought, that's what you do where you can create or not intention. Where you think you create and your creation is you as you make or create your area as you get and make activity by what you consider, that makes action with results and this will appear social. So as you are aware you win or die, as you lose your life then as essence your spirit will give or not die. This is a point or not can be what makes what you think, then as a concept creates subconscious in activity, you create in idea. This is what you can see or gnou, what you think creates in the point as in now you go and are somewhere normal. Think to touch nothing, then you create in idea and shift as you jump up and you are back to normal space.

Assume in that the actions you do, you create and concept a way as a point to do, of course that's not to do as a

thought if this is disturbing. So think as you are aware to understand, you are cool and in thought to help out. If a concept is there, what you do you shift with feel, otherwise your not thought to shift and create a point. Think to make action to create a similar result, that means what you did in other dimensions can create part of what you see.

This is where your fixing a point with a moment, and only for need being there as it is occurring naturally in the world. This works as the effort to cause change mediates it with actions done sometimes by yourself or others. Thus we express as though we desire and use actions of voice/motion for theory and moment in rest. Theoretically we speak for the care of others thoughts and idea, listen before speaking or there's no room for others consideration, this is done by the Basilicas. Things we use is for the moment and your use otherwise as this belief is from an idea, think or not as what this is uses the point as now you see it now you don't, so then as your okay this is if your well. Think of the moment, then as a crew of two, you create as a point in desire.

For if no rule or existence exists in that space, you create in the body cells and this is what to do or do not push for in idea, that creates the area in the mind and the area that will work for you. Think outside the mind as your then to use things with your own based concept off others in work. There is a point that coincides with other idea, which is coincidence by point that is a concept when you are aware. So your free as you are not always answering, this is done by activity unless for the beneficial doubt as you need to get what you can or know is possible.

The actions depend on your moment to consider with moments of greatness, a momentary glitch, thinking in a moment of compassion..so with comparison of the laws, including natural laws or fer'ol laws that have rights beyond jurisdiction you get what you can. Thought to compelling is suggestion with the laws, think and get the idea if your right and time will adjust for the best of result.

Thoughts in law have some regard except to the idea in fact of what you desire as it's there or your thinking to give without warning makes this easier to accept in neurotic idea or you can act crazy like and make a point of humour to relieve stress. Movements are there to dispose of unnecessary idea or physically excess energy and then to know what to do. This is thinking done, if you don't know what to do. If you want to rule, rule yourself and others second if you can get an agreement or written contract in idea. In life as you able, your cool and hot is elsewhere that you need the idea to seem. The undoing of the idea is not actually there and that is stopping the action, so this I thought if some are doing things by thought before or as of the moment. There is a pause or quietness when things are about to happen.

So to sum it up, flow with thought as energy is from the creator to follow the rules and watch what you shoot at as you could miss, then worry only on what you think is not good or be wrong and react accordingly, that's because you could draw attention with a single shot. Work by feel if you can but don't if you can get away with things, it's playing by the only way of life. That works with the easy path, so think to go and do the way that suits you. There is a mission in this of correction and protection; the unspecified goal is there to project to correct, then to fix what you break without telling many of the point unless they watch or you think they want to know. This is a point in idea.

Your main goal is what you think in idea as intent used to create or protect the area, and those that are within the place are what is sometimes effected. The second goal is for preventing destruction where and when the destruction happens. Third rule and most important, look before you go try to protect yourself. Then you do things not to allow harm for yourself, this is even with bad relation. With a bad relation, aka violation you can rule their purpose, thought and what action they do or not do. That's depending on how much power or electricity and that's from how much money the person has in life, this is useful to know as if you move away; so stay away and wait.

Now if they can hire guns; then move out of the country and/or jump to another planet. If they look for you and you know the point, hire your own guns. The tyrants can be appeased, but by being there and standing up to them by a story and without bloodshed by misdirection. If this fails, attempt a recourse of reminding them of their promises and white lie to get them to do things. If you find too much trouble, then go for help by leaving the area or staying in the industry and use them as protection. Then, that's only if troubles against you. If you are aware, you are with a way to do things, the spirit allows you to know what to do with the soul's help.

If you find too little trouble or none, then expect some point as small things and disrupt the unnecessary activity. The point is where too much counts as a person in power, that to create in experience is with use of idea in thought from

activity where your seeking to do things destructively. Just enough and you give a good act or act busy and leave alone. Just enough is the act of someone who is sometimes of a position or qualified by experience. They who think can prove things, their folly is controlled or they prove they can be qualified.

Think to create the correct actions to make as a point, that uses the things creating the right circumstances. This will create the thing in sight as the under reality of the spirit realm shows, or this doesn't create and the person you affect is known. If they who are capable of activity and are not example is there, think of both as action is equality and thought is situation with allowance till unnecessary so you allow them what they do. Think not caring is overqualified and being more capable.

That's doing things at a job where this is caring for the area as results are possible. A place you navigate around and do or think, using thought or not doing things is now where you don't do the idea by what is with spirit use. The point is done, so if things yet doesn't do what is needed, then if this isn't against you your fine unless you want those things. So this is either a warning or a concept that is seen as deacement, this in life is viewed by animated showings or anime by animus or then the spirit being observed.

Think of this as a fight scene. Beware in an out is averted action in thought, thought is there as nobody is hit or your missed as if a dodge in action and there's no point to react as this is necessary, the identity effect of which allows you to think your someone or there's things in use that is done in action. Then where that is of use is where someone else is useful as if in a dream moment. Sometimes that's done in realism, where you escape for not stated idea before the deed is done or tyranny can happen. If you face a tyrannical person, then you can create a point thinking of the idea and needing the result. This is the silent power of words.

The other effect is the disaster of someone finding out, that you were a guilty party and that you take the dream ability, this is used by sealing the point or not doing what is needed. The last thing be with this on a player philosophy, and to sometimes on refusals or other arguments, that is irritation if not relaxed to receive a sudden anger and return the energy. This is used as a surge or irrational response, that could lead in other actions. Start to response anything in like good and your in destructive notion or not doing things as nothing is existent. See as time barriers are from the existence, then you know what is there.

Not is some use as the point is the extent, think of verbal or activity idea that is done. The existence is a thought that if there is a need, there is a will to a way that is a point for that life that exists. This becomes nothing but unattended thought as existent action is activity, think a point by what you will your use is your own unique idea. There no rule exists as thinking or attendant action creates, so imagined rest is a fix as you can create better results in ability where you are a point idea to use what is there if non-illegal.

Think and to hit release an object as never is maybe, the other person can do things better, though as you consider in things happen as you think time to do things for you. Now time and this time goes on as your helped by what you think. So as your not there, unless not needed is necessary or what is observed, think to be in idea to release the point. This is where you are in mind to think as you know who you are by feel.

Think and what you are doing is thought is obvious to yourself, some think and chocolate is thought out of the area or the area is vacated in use. Thought of the moment is the air in use and out of some point in the area, that is with a point and your in done concept that's out by a point intended in action. This is real by idea within minded act, yet your not insane as you are out of the stress energy that goes to the ground. There is nothing more as existent action, this is the thought act or not used as nothing is done.

There is some in "inteded" as intended acts of love and loyalty, nor your need as it doesn't exist for if there's another lifeform your existent life is another way of thought. That is instant reaction to the area, that is what you think as stimulated feeling as intelligent.

Since to have some sort of injury is before the strike like a blonde moment in the end, this is where nothing exists or (not a stupid strike or mistake that be unconditional or accidental), Inp is point in action by refrain that is conclusion to experiences and that is refrain by similiarly caused with understanding by deflammatory tissue releasing energy into

the blood stream in the body so it's usually in time.

The idea is there to have almost no control of the body, since it's dealing with the toxin. The brain is forced to overreact and a clench occurs. The clench causes a body pause or somnolent stress release and this ends after the body messes up the thing being done or an accidental hit occurs. Too much radiation or heat can cause the inflammation, and that is including emotion from sensation except it's been known to happen to the likeliest person with neurosis as a result.

So think, as though an automatic negative reaction from thought negative ionic neural damages thought, this is used to make better and it's caused by too much heat or stress. That's leading up to illusions that are death visions, this happens to such as people who are with their own worst unintended thought. The insurrection is considered somnolent reaction, so this is done as a point if an atheistic point or not using the only readable reaction or reanimatable and reasonable with wisdom reaction.

See it won't go away unless you needed no pain from me or no pain from you. There is using an idea to fix the idea and that is edit the source, that's if the source is thought as though energy and you can suggest what you want to happen as if a script. This is if a point in erased idea is a gone trait as a word is gone, then that's as the subconscious removed the condition that is making the point and you no to remove the illness before the condition is bad.

This is a known effect, so think and your spirit or soul does the effect of the illness removal. Also, the soul and spirit can create whatever you think and need, so this makes the point useful, that you create by the feel and make with the point. The power of words is what can more easily make things happen. This is an effect done by choice, you choose the point and the effect is done. If nothing happens, then you basically decided that you didn't need the point. This makes the idea where you think of the point and create with a willing participant. If noones willing, then nothing happens by feel. So remember the fact, that you can create whatever you intend to create, otherwise you think of the point and state the idea to get understanding using whatever means you need to use.

Void de impulse philosophy by Warwick  
Medituplato

Authors note: using this idea below as a philosophy could get you into trouble. Since it seems that to triumph may bring hazard upon others for this, the void in use, brings no morals and lots of goods. An example of this be to lead someone astray and then not feel guilty. As anyone has feelings, and thoughts are sometimes idea to be left alone. So consider void as a negative, the reason behind this be to perceive and know void as a force, where gaining something is bad or negative except the usage be positive or a good thing. Where in math a negative times a negative by a positive, and two with two go together with something applied with each other, added by Samantha and Suathe'de'denan. Where the challenge of this be to be a good mathematician and adventure where none have been or at least survive. One, you could save yourself the time and attempt to calculate the distance between here and there, or how much food you need and how much be left for the incremented by point duration. The void user will consider the effort to continue without math or senses. That user would go willy nilly or king'a'bobby (for any which way) and sometimes in hurry. For without math theres no reason. \ ~n

So if you understand this, as in agreement, then your like the author, insane because with no moral basis theres no growth except for objectives. By reading the philosophy you might become like the author, unjust by crazy or insane, of which I perceived the mindset of the author. During the time I read to review it I notice the author be sane at the beginning, but insane at the end. If you find yourself crazy or insane is nothing you see use and babbling, except if nearly everywhere if your every word you area create you see then don't unless slap yourself as your aware or things sense out of what or not do something in or out not by use if not out from order unless you did it on purpose. As in part of the author it indicates, crazy be saner and just thinking it makes it happen unless its not really going to to help. A saying "Du bepwar oneam", "be prepared (personally warned) on each preferred action", for nothing be something and things coexist sometimes for hazardous intent. The crazy action can also be stopped by thinking the idea isn't there and force yourself to not do much. Or think just stop, to prove the truth of this is unjust crazyness so just read the material.

## The material

This way of void be to make amends for the wrongs by allowing void, to absorb your own wrongs as a temporary measure of your allowance. Where the full measure be to own up to the problem and see the truth for yourself. Allow disbelief of idea and that you can do as needed with suspension of disbelief. Where void = nothingness = radiation particles = dark matter = something solid or supportive like a brace. If its not there, then you fail utterly and with supportive brace to achieve nothing where particles hold the object together so don't hit people hit objects. Yet if theirs nothing then you are used to the person your near as if near perfection as you don't have much to worry on except never say never as you never ever do or not.

Unless you want to do things by need or to achieve the end result. So seek nothing unless you have nothing something to work toward like attend a goal. This says to see things as useful and as your with useful things, then it, the useful thing, at some point ends it as usefulness as an idea or let be as if it can be. Its as to be as its with me. If a good result or resolve happens, fame be achieved by successful attempt. Like the honor goes to those who deserve it, and those who desire it will achieve by unblocked desire. With lessening of pain and assuage joy be by the achievement and extension of time and usage of words. We of the indincament, are the truth beyond dishonor if we prove out any time any plane. Proven is that void works behind he scenes and beyond work is she action words by deed and don't benefit by the benefit by the idea benefit by doubt within which we do of activity.

For to use an item or idea ends the lifespan or moment of the item per use and activity. Only to cause a new thing with each use. Thus the point is to be and believe in nothing, thus once nothing is achieved you've achieved nothing and the nothingness be heavenly acts where one could achieve something without any need of much, and added to this the fact nothing goes to something and back again with nothing and without much and things could go downhill after. This happens again or not, then be careful of need that allows you to carelessly throw things away and okay, be abated with being obeyed and as the body is the observer by emotional response, theirs possibility of giving away things for free as charity with a insane motion called emotional rebound.

When it, the toss, "happens" try not to throw away important things where the mood hits you as some fat women can do. So in truth, nothingness be in between you and somewhere or something, so there in truth be no actual distance between except for appearances, so seek balance to get somewhere as its wise to go for something for less or to gain more without desires as with no desires it can only lead to destruction. If you gain more without conjunction compunction then it makes gain or greed and disaster. Then you can communicate to others and there won't be benny or any rude motions or shakyness in his idea. As red red wine, is sweet and is redrawn in here as dumb humanly but isn't thought nor dangerous. Thats backward, don't backfire as they reverse. Lose intent and drop as your weight is lowered, and thats all it is as its no concern.

For and again, to use an item or idea ends the lifespan and moment of the item per use. Only to cause a new thing or event with each use. Thus the dangerous point is to believe in nothing, one could achieve something without any need of much because the actual case be to know the basis of what you see before you can get anything, for the fact something goes to nothing without much in a downhill motion. There's things to achieve without hope and this becomes the need to bargain. If this happens, then again be careful of need that allows you to carelessly throw things away but with a emotional response, and then theirs possibility of giving away things for free and not just for repentance but instinctive unless denied. When the toss happens try not to throw away important things or create.

So in truth, nothingness be in between you and me, so again seek balance to get somewhere and in get something for less or to gain more with no destruction unless in need or repentance. There's the sanguinity effect or peaceful effect, "I saw the effort as a person gets something for nothing, and yet your observed and that person might take it away out of pique. To avoid this tell the person how to get it, if not a policymaker. For the policy marring might make it harder to do." N&%!% !%#& is of the option to not make mistakes and create a knowing by what is possible for what the policy is to work. Like cause an attack doesn't cause me to attack. Instant essences? The way of changing you motto if essence is converted if attack of infliction. Now cook or be okay to do. %!# I En thats to revert nasty reactions no more no

lessen.

Due to diverse nature of opposites that attract each other by representation, people tend to seek and fill the emptiness caused by nothing, which be then something, so they can get somewhere in life and along with other beings, food be an example by pleasure as it gives by pleasure, as you notice people don't eat except for the pleasure to live. Thus if blame happens to me, I think of the idea that I actually own or owe nothing, so I think nothing of the blame and it disappears and this doesn't count for purchases where you get something for a note where I suppose the material that seems of value, actually means nothing like gold or dollars and pounds for an object thanks to tv 9.

Think compassion comes into play if you yourself seek compassion and correct for bad views but try not to be on guard to those vicious and all is simple be of might. Just try to fill up the void inside and see things as you may feel like your better. The effort of just trying and filling up the void lets yourself gain or lose without guilt or training, I treat it like a hand-me down. Don't break your mind but use your subconscious with unconscious power. Be unable for the effort not, and if your subconscious tries to do does its understanding satellite and with some calmness be if by approach. The events you might experience, you live through after the burst of indirective approved approach. Its all about the getting, to the point where the prophecy leads in the idea.

Osmosis be like this as people's direct view with voice and probability and action as radiation to glean information and to use it with the brain constructing it as a view, for the prospective uses or abuses. Let use of void to disturb things that be so mote with chaos, a dispersion of energy with a projected thought, and jealousy or other felt emotion that can cause trouble, let void take form as a sucking force with a decision and feel the void absorb the trouble, then dissipate. Free yourself to separate, from your body when you mind it by letting go and insanity disappears.

So to like a rabid dog sum this part up, nothing goes from nothing to something and as where from to nothing again like nothing in nothing out thanks to Tron and Flynn from Tron the movie. Where nothing be loneliness and insanity lives with craziness, when nothing be exactly something try to divert the attention and give a good excuse. True action makes probable excuse, so in the game of life is the thought out as if to seem in is to escape outside from the area and this can seem to escape from reality. If you think about it then your in as actions breaks based in free moments.

Seek to fill in for lifes missing parts for life has a proverb or lilcommen'g, try and try again to don't do it as damages can happen and try to be compassionate so your nothing disappears, and everything exists for you or others unless the time be right, so know the item disappears from usage, only to see another form of the right thing, of a similar time and type again except for a small distinguished difference. Nothing be ever the same and everything be just a pattern of particles in solid form and motion, but one can have a thought except for the feel and know of it.

If so or not, then the thought was produced as a product and you can remove it if you know it, exchanged by smith and gleason. The nature of a thought be inverse and lawless as you yourself may have thoughts, and as I remember from somewhere none can keep us from it, as the thought. Where this be a will there be a way and what I use be the idea of destination, determination and decision that makes it possible to get places also known as the 3 D's in Apportation from Harry potter or a time that deals with series. Where life be in regulated moment and in a positive value system, by negative and positive feedback where the means be life if allowed that uses positive reinforcement to create a positive uplift with detriment to be none. Consecration, concept research and do something while watching ihn observance. Be in observance, while others are watching.

To be calm and considered is the regard to those who are in law and with a bias that diplomatic may be good. When this be truth, think of a hostage situation unless its nice and no trouble. Where your hands are steady, try not to kill the attackee to save the hostage or talk the hostager, out of holding 'the hostage' and with promises and guilt. Another prospect be to gain the idea you use the desire and triumph by success in a vision brought on by feelings and counted as the suble solution then with vision and by visual idea. This act will bring to a person a sanity and life thats

real for self, it did for me and I now consider reality instead of the false reality of life and that's to be, instead to manipulate it for others or yourself in a game of chance. Like russian roulette and one bullet. If this doesn't work then you already have the confidence that you desire.

To make a safe area, try getting a patrol or policymaker in patrol and safeguard by placement the area. With semination its like life for generation. Allow, and thats in a way that's not denial. Put something in it besides possibility to decree and let it be understood as let it be let it be let it be. Be normal for people that are looking at you. By work at something not beating, but the act of something is soft betting to using it as the keys are to be stroked to be. Accept hospitality as it is, but no personal hygiene as if you wore deodorant. As the the idea here, is that as to be beaten the beater disperses into nothing. Add in iff as iff the instant prisoner, is to be on an aid planet meant for them as per use it is. Treat family like a clone of yourself or others and raise time shields.

In narcissism as narcissia or narcissia faeofyn as self devoted or professed in philosophy, which be self insanity and be void philosophy at the core that can bring on larceny as a state of mind or madness, in which its the idea as people are useless to each others except to themselves until the need or desire be felt, to bring results and to prove themselves out except those they find worthy. This can cause in psychological terms, suicide unless the pain be dealt with in some manner that's dwelt up by denial by adding to or changing out resources. Beware where the effort of doing things for gain be part of the illusion of life and life be not forfeit, but unreal until you make a difference. Say as you want, as you are a way to live.

This in is a point as an indication is case if unreal, as though "une" its not going to happen. Otherwise they assume and use that for existing for themselves and others second but we're just here, for without tenacity and no need theres no life and no pain and no gain except for nothing but no void. So when designing something, and you don't want peoples destructive interference through no small bit of pain and jealousy. You don't care but you do care about this. So I will say this "Try not believe or not be obvious to be obvious as its possible for disruption and not to do desires as necessary. Death in devotion to those people that cause it and your pain, go away but to take a breather allows to take a motion in progress as in thought. So about to eat a human, think 'wrong food and be cool'.

Narcissists (neceseix) and often other similiar ilk (ilkli) are ill tempered and tempted by the idea of fame and infamy, larceny be also a plotted crime for the good feeling of it or for the better end of the person, especially when none destructive or bad end. The action, as it can also happen from this, the philosophy of void, can be twisting with no pain because void tends to be absorptive and brings a calmness to the spirit even in insanity %g as if its possible that void controlled the persons fate. Yet to trust in void gains you yourself madness and instability where the motion of consideration and incessant crime be a cause and effect for ceasing effort of most activity.

I think they created something by imagination or live normal life, the needy are a void animal to disrupt as they seem to think they rule and in the area with disruptive intention plus intent by destruction be with your gain and as if you were narcissists so lets take you or rule over your points and not care. This gains a hellish idea of a chaotic "soothing" or kaer'lhoct peace. The claimant can have been possessed but the person allows the void with circumstances or control with nothing. Not intentional be the idea of madmen that follow this emptiness and void philosophy. In pain and redemption it will cause an unfair advantage, you can take pain in an unlimited amount of time to continue with no disturbance.

To get a reverse to the volcano erupting, by equality or thought and "uen uer uen" its equal to temperature cooling down in the volcano is similar. Be it don't deceive it, its the evolutionary cross pattern. Act as if I didn't say anything but don't assault. See the area I saw was useful or unique to see the area I thought amazing yet the area venturu is interesting. They use the area as creativity allows till oblivion or see nothing much necessary balance with issues or situations. So you see the area is a curiosity by area feel see or feel by use if feel. See to use or aggrieve is agree or not agree not is no.

To control or work with others, think your unimportant and then others come to importance first, because the fact

be I see more people who are missed at work because they are se'em'ing steady and try to undermine others. For none I know, except a few in pain would attempt an alleged illegal action and get hurt for it, not unless the pain and desire of will overwhelms good reasoning and when confronted by a free action, its probably a giver by those who desire. With three possible acts of seclusion you can get rid of the pain and motion peace, and then there won't be crime, so I think. But when there be no controlling a confronting force as a channel, then most won't attempt unless its for values like contracts, give or take with possible threat.

This is, their intent, be because of bad pain like with contracts that restrict, if any from lack of privledges and resources along with a little inner balance by a false inner balance. This can drive a person unsafe and disturbing or nuts. Like things that get their interest and yet one can dodge the bullet, if only to manuever around it except one cannot outrun the bullet as in expense unless quick enough or if not given. For quickness, try dexterity practices and to attempt a hand snatch of an expected idea or hand held object, when its done then your fast enough thanks to Sean O'Connolly".

From Claimantcy be a quote "Once thou get your quickness, for peace and inner balance find thou mental world or know it, and this be thou world that thee were priveledged, priested or previously born in. Thou may get acceptance in the world thou are physically born in with the acceptance concideration confidence in any action. Sometimes if thou can find it, or remember it thou won't have to visit it. So to get kicked out of thou own world or remember thou inner world is to make a power else as to remember it even on other worlds that can make a im/moral balance of how to acquaint effortlessly to cause a positive corruption. Some raw animal attraction can make a difference by using or amusing themselves with teachings from their mental "I" world or "inner misfit world" to gain inner peace.

Where the world be sometimes a place and plane as pocket plane or planar released you.plane. Dedifferate and you'll get somewhere by indication of how it works, and separate in your mind a place for each item because its by difference of action that we account for thinking." Work with me on this and I will work with you. The world you you gain is the world of tomorrow. But not to kneecap and it to break a spine by architechture aid. So its trebeched as a place that's not what you think. Some will need more than nothing, so you might not get away with the idea of pointing out nothing. Point out more things until they do agree by acknowledgements. Dumb, not that right there. Its of it as more egress in and do then it is to be able. I wish it not to seem plumbus dumbus.

"Unno waegia" or "Beas beos tuwaegt" be to not weigh upwards again by weight warp or to gain muscle, Seeing be belief but to dissolve away weight be a unnatural understanding. This can make anybody with the right training have the charasmatic character of automatic method or similar to self-proposed leader. From your world thou can channel anybody to act the character of the person, to act in a regard (act naturally) of thou choosing or if none then thy can choose from observance.

By projecting certain feelings thou get a reaction and thy can get away, or somewhere as be by choice. So you can create channels of information through nothing to get your meanings across by intimidation or concession and effort, or make an effort to get an understood intent. To use others idea and associate them with your own and without getting angry at others, where they allow for approximate idea and error correction of things to espound on and considered as acclumancy (eklua or eclme), now in the case of things which interefere such as disagreements or sabotage with yourself and others.

Acclumancy is not the option, Occlumancy or Icclumancy be better. Any of the three be good for dealing with void and allow the "inner world" to be blocked or walk the land beside thou, by including some of the idea of the person seen. Seem in you on uncommon grounds and let it be through work. Time is fun to work with time to do things and work with the group is better the group is where you work. By work through karma support your work as it supports itself. I found this man and left him inept.. ip that is all I needed. I am not sorry I did it and I willingly do it as when the nuclear reactor went up it left a contaminant in the ozone and I got caught with it by contaminant."paranoid" is likely to make you quit the investitute.

Scene one moment and they disappear even if the doors are closed, it has a residue or spacial condenser force for a presence as it is likely to work to displace them and its to be like an extra person. With a rune for apes and aspectus,

by drawing the aspect in the effort as weight doesn't have to be too great to shift with as its taken as weakness to be used as fuel. Take some damages, for the effort at hand however no thieving is nothing done.

Use of Occlumancy by thought energy (oklua or oklume); or the one act to cause a dissociation, by use of drama and dreams to reconsider effects of meditation and to meditate it away or push with focused energy, and laughing (if alone) and shaking the head to shake the effect off. To separate a bad reality and idea from your own such as dreams and bad energy effort, think of the thing that disagrees with you and laugh or shake your head to push it away by a force of thought. Also in thought is useful concept that anything matter is effect with gravity as arguing that could get disastrous, with no other way out and this includes reverse psychology. If I be to look around and might see those whom use this without knowing it, except by a different name of emotional dissuasion. "Disaster struck at 8:11 and I had it all planned out but now I need a new area to live in." Quote from Jones.

There be a negative version called dissing (dys) as agility consists by what you do that confuses and insults from projecting the negative vehement energy or venom, to consist of any negative activity voiced out or acted out is done. When dissing occurs the mind can snap and attack to unsnap or otherwise think and go or not and your done, whenever your not due your not and action ceases that antagonizes and walk away from the idea and will is the pomel where the mind is like Galen and a sword. When dissing be bad then the disser might assault, thought and idea teach from example as physical blows for racial slurs and ignorance. Most racial slurs are banned so its not a worry as if not forbidden.

Icclumani seem or Icclumancy not occlumaccl (Atlantean channelings) can be to use acclumancy and for integrating or accepting things or idea but only if it helps, then occlumancy to make for disjunction and cause the idea to work your sub-c for a math substitution of one value and another, as you can control the how of the moment by being rejection but not the why as it won't work otherwise, for your idea to take the place of the actions that occur and are done by speaking what you would desire to occur, then the event, occurs like you say and guides you to make it better.

So to act out the part creates the moment and accounts for some Atleantian channelings. "Ix" lets say we could get the entire history of a lost race and it wouldn't entirely be accurate and yet carbon dating be also innaccurate except for other dating options like to use hydrogen, and if I could visit the time and date of thought with the market race through Apport (teleport) or dream travel to create a mini fire and your use is a thought to make by fire use by will. Direct by will and poof your gone.

Ecclumancy are what destruction of things are what you use to create a point that action is energy by chi that converts the radiation in over the aura absorbed energy, as a second shell as a creator shield that builds up in the brain as you show people what is destroyed or hurt in mind you can use things. As if to see and believe as you are as if reverted in energy overload to being normal. You get a point across to them, you "mai and make" what you think as whatever happens, the right pressure points are what in use can control the body and revert the idea in wish effect to make whatever pressure there is disappear.

Sometimes you don't and as you think in result you are use in result by the person in the act of doing activity, with eye of choice from what person you see and as you see the idea you can use gnosis to remember what you see. As the auratic energy builds up so does your ability in energy. Cleanse with water the energy and the idea dropped in energy is the energy, that is excess too much to the thing that can take the energy. As if otherwise you naturally remember, naturally as never or not or otherwise.

There is an action that is what reverses the approach, as "en ep" to think "this" and state reverse to reverse trouble or other things that is to use the third eye to change what not as thoughts you scan and no apologies if use from brain activity is found out. As you write what you see by feel from a concept so use as a moment focusing is thought focus and thought receptive, this is from their spirit for use. This is there own point of view as your use is unknown and with use your idea. As that is stimulus of the normal state of mind as the mode is memory triggered, if use is intended to create mind over matter in idea is an

area room that is what true idea. There is no use as user based actions, intended for thought is use by intention only.

This is an occurrence that your stability is what keep by energy use that is normal in the thought body as though your an idea that he or her form, you like by natural choice and focus by thought in focus with breathing and aura manifests as on the thought. There is no physical reaction except some as no enjoyment, by an relative in idea to translate or not as no repetitive activity if in no focus or if realized your not reacting as x is the spot or ex no insanity and act good doing except by the creators will with no repeat activity as he does what you want by subconscious activity and shift activity is on thought. Don't jump to conclusion effect unless "necessay" as necessary actions are what use in point blank attack or zero force activity otherwise known as nothing in action. Movement and mention can create, what you intend to think intention to create with as kinetic motion isn't always done.

I also have to protect myself from projectories, then I could see them for real faeries and it wouldn't take a moment to get their historical factor (value). Due note this isn't always allowed to work by various factors of belief and area time of activity. The idea of this came from 'think of this as your alive and your death here, but try to think in-between the lines and see the pictures as if on a wall and then relations of your life and how it feels on the wall. Like No bully, dependency or target, dismissal, concepts, promotion and a moment of decree.' As with a moment of a sighting, seeing be believing where things are just as well as with passable objects like no sting no stink the bullets veer aside or turn to rubber as you turn..and etc.

Think on the sun shining down with a white light that comes down to surround you with an un radiation and pierces through you. The other way is to imagine the darkness which absorbs that comes up to shaft through you and pull away what is disliked. Then change the light or darkness to expand to 3" to surround you. As you do so, the light or darkness changes your energy by attunement and you turn it, the light or dark, brown where the brown shade is a protective earthlike color that is barrier. Also available to being absorptive of evil or negative energies to effect unharmed nature along with absorbing the damages as energy to yourself.

### Orea-O-Pobe Philosophy of Materialism

Materialism be the newer idea and philosophy of Atlantis. The materialistic view be, to gain what goods ye can. And prosper with an effects at hand approach. There are a few rules, to materialism:

1. Always gain the item, for the sake of idea and motion.
2. Look for guidance, on the importance, of the idea.
3. Don't let things stop you from achieving your goal, but remember goals can change.
4. Get ye a handle on life the moment is done, think by focus and use expression, then ye can calm down and get out the emotion.
5. On a take of the moments notice, as there may be blockages to the idea, things ye want to make occur don't always seem to occur right, so try another way and make the ideom, 'never give up, never give in, unless need be or forced to.'
6. Always be willing to trade, as the value seems fair or greater, for the trade-off.
7. Don't take yourself too seriously, be willing to laugh at yourself and things go well.
8. Materials are energy and energy is what can manifest things easier.
9. Materials are what are solid and truly are existant in this world.
10. Immaterial objects are what energy items that exist here from the spirit realms.
11. Don't be greedy. If there's a true need for it, then you can get it.

Always remember this, be on guard for fakers, people that fake the moment, nulle death item or idea, to get something greater by idea in return. Consider stopping when ye can, an make exceptions to rules, as ye consider the realism, think of the profit moment. Be open-minded, as to the idea and value of the item to be traded, for your self-made purpose. Be fair in your assessment and always consider the personal reason, until you deem it not worth it. As is an un use in use is a thought that is a purpose in life to get what you get and thought is your own thought,

everything's related to the material or the object in design, in some manner.

Now to the idea of which they, as who follow materialism, will follow as a guideline. 'Rule out the idea and through point of consideration by consequence, that is unnecessary. And, do what you feel is right. Feel free to use whatever intuition and instinct, or instinct guided by intuition, that ye like. Follow the pattern set, otherwise in contact, for greater elucidation or knowledge. Thinking things through situations, this is an idea as ye did it.' Think and that's about to do or not, do in what things you consider that aren't necessary.

Thinking and needing objects from the unseen spiritual planes to be here makes immaterial objects come and materialize. You can sense the object by feeling its presence. These items can do the same things as material objects, except spiritually, and often hold powers that the mind can utilize. To use energized items are used thought in ideal, use in the artifacts in the world. I think this is a compromise and in intended space, that is clearly in an area that is hard to see.

Sure its okay but don't do this often. At least you know now as to not do this unless necessary. As there is things done, to make results seem useful and the meanings are available or not in there as if you think. There is a point that an area is available, an idea is used up in office and out you leave because you were invasive and just keep gone.

Now not effecting thought, if ye is witchcraft see and love by what you think, wish to follow this materialism philosophy movement, always try to remember the listed rules as a guideline. Follow them, without worry, and ye will gain from the idea ye try and nothing more. Strange land, this is where you belong as where you go is where you belong, as you smudge and thought is an action, if you find the idea hard to follow, by focus your idea and as your assistant you are a point, wrestling is no and no longer try to acknowledge them as the result as being your own.

Then you will personally own the idea, as your own, that occurred as a point disconcluded. Then and now us is then you follow more easily what it could mean. As you explore the point, of your no longer idea, learn to live and love and you will know peace man. This is from the department of education from an employee that knew of this.

so remember what you think to the use not to use by user feel. I think disciplinary need is there. so think olou as allow then you are aware. no longer in hell. thinking the use. this is their way or our way here, thinking to the use is useful information. The first level of hell is limbo. Its not bad think yourself out then your gone, its made up of ya dreams desires or think yourself away to another planet or place. Then by ideal use turmeric to turn things, by all the bad effects turned good that ya did by your own feeling you use or have. Limbo is where Charon chare ushers you across the river Acheron, and you find yourself upon the brink of grief's abysmal valley. You are in Limbo by feel, a place of sorrow without torment. You encounter a seven-walled castle, and within those walls you find rolling fresh meadows illuminated by the light of reason, whereabouts many shades dwell.

These are the virtuous pagans, the great philosophers and authors, unbaptised children, and others unfit to enter the kingdom of heaven. You share or don't have to share company with Caesar, Homer, Virgil, Socrates, otherwise Aristotle is a pointer with no repeats. There is no punishment here, and the atmosphere is peaceful, yet sad. Once ya got to limbo ya can decide if it wasn't too bad of a place to wait until the time expired. Limbo is a place where ya go and find ya true self so no violence can be done despite intentions. As the vilouence seems not to happen, and fades away from ya psyche as if you psyched up and thought you could do anything as you stop getting psyched up by feeling its unnecessary and you are in vision.

I think this space or place you don't end up as you don't to need to end up there. charon is a chair that had a soul so chare is the actual charon. those thought there are actually on other planets. very well, I agree to the point you deal with your criminals by other prison planets. I feel you are right to think it exists yet we aren't actually there so think to create by the feel.

Puamanipa aka powermania

The power of manipulation and the Atleantian church truth

A quote from the Druid clan of Dana "Here's some more info to help broaden your foundation...in our Druidic practices the moon be not just female, nor the sun just male.

There are specific times of the lunar cycle as well as the year, when the moon radiates a masculine energy and be thus acknowledged as male. There are specific times of the solar cycle or year, when the sun radiates a feminine energy and be thus acknowledged as female.

In to every aspect of the natural world, we see both faces. Brother Air, Sister Air; Brother Water, Sister Water; SunGod as God, MoonGoddess as Goddess; etc. We practice walking in balance, which be why this past solstice/full moon event was wonderful for us."

The truth of this is up to you, and be very able to confuse, unless there be a understanding of facts that are tried and not taken literally, things help to have degree in physical sciences and some math. There be an idea of people who don't accept and are very adept at hiding it, they appear to use the idea and then remake it later without asking. If the idea be despoused as stolen, then they humiliate the author or leave to talk rumours behind their backs. The other type are reviewers whom upon looking at it will immediately disbelieve it by bad reviews before and believe it to gain distance and to gain no result and then if their be result, they don't allow it or admit it. They disallow it by disturbing the author and cause by bad criticism to stop the effort. To admit it, the authors right and they were wrong, meaning they would prove a liar in the face of bad idea if they were moral and if they print anything. Unless they were in agreement of some aspect of it, so they would oblige the author to prove what they say by having them add in with alterations to the work.

To prove a point to them using others view be to prove them wrong and use a scientific idea to support their work. If possible all you ever need be a good reason, to get them to back down and change the review or their thoughts. Yet they and I can walk away from this without hurt. Act as if it didn't happen, then they won't care and I can get someone else to review it. Now for the backstabber type, lie to them on moment you don't detect it, their lie as they are like sharks. They know the subject before the subject be talked about and they are able to be taken advantage of, or to if its about a person. If you make a mistake, then don't admit it unless its with a white lie as they could use it against yourself. Some are not like this. If reproach happens and then leave it alone or act as it matters and likely to fillibust to overcome the others nerve, to act crazy and then say something/do something makes it happen. It be up to you, I will say this that writing be important to be understood, but the idea is to write a story and hope to get regard or sympathetic idea for supportive criticism.

Only it, the activity of result may create a stir of activity in the wrong direction, and in the humane person's including CSIcop case don't say the wrong things that stem against people except their enemy maybe, as their humanitarians. In other cop's case or the good reviewer, bring to attention something wrong or else, to do something with others idea or wrong in the line of duty by direct confrontation and you yourself could be mistaken. In other words, don't pretend to do the subject if your audience be a reviewer or revenge addict where the redirection be necessary in the power of scope (of momentary memory glances) in no activity, as it could backfire or did unless its in writing except in special cases where they arent mindful then double the effort to be relieving stress.

Most any possible 'be good' conditions from this are in dangerous writings by usage of understanding to do bad experiments, ignore if they, the idea, could hurt you unless its fire or people that don't like them as it can be noted as the same style and you yourself could be hurt by impractical review. This doc be just history and a letter mention later. As 'be not who we are but who we were meant to be.' As to be be the effect of credence we arent going to argue anymore as I want to be apart of this as well. The climate change was due to the effort of the world to modify itself as with actions. Including genetics deevaluated at a date unspecified, its a part of a play with life in the thought center and people destroying by allowed actions thanks to Paul and Peter R. Farley. 'As I take that as it furthering worth and not to be disruptive.'

As the same styles indicate or allocate the same source and different mind with several suns. Unless, you alter it different and make it, the idea, your own beyond recognition of the original but still usable you can say it and its done.

Thus all suspicion goes to the creator or another who also uses the technique, I think "the effort of your effort be my effort as it will get the same result, unless blocked not by in resolve momentas for fear and doubt only ends the result." by Saint John Paul II as a thought to saints of time.

## The realms Relmix

True to the realm, as vast as they are in multitudes of the states of existance its called where most who visit are surpassed by the hidden savvy of technology and technique if in nature. Albeit some arent technology based and some or most are described as a mix of things to be desired. The time within be 1/10th to 1/1000000th and of a second depicting an ancient planet that was considered Atlantis, The usage of energy be amazing! As one can be supercharged in seconds to allot for nonaging by will in effort. But the place exists within a building that allows for the realm and accessed by mind and from anywhere depending on security. So the realm can be built anywhere from spirits memories and the energy to do so comes from magnetic rock. And magnetic particles that come from mars and other similiar. the building be conditioned to allow a motion of a self-contained energy to allow no bad unless desired, and into sepulchural defined by (rhythmic) conditions like a heartbeat. This be from another realm, as buildings do have a heart and its usually the room with most energy or the kitchen. Stay with the area you evolved in and hope to win or use knowledge as a win for effort and effecient mis/use activity.

The heart and house must be awakened to allow for the shift and the statement to occur if ever to create a realm. Even if the person leaves then they can stay in the world or wander into another by going into another, of the places and physical buildings, by feeling the shift while walking through the doorframe and pulse energy. It takes a negative meanness to counter the negative pulses from rejecting the bad efforts or allowing the negative come over the god or spirit inside the body, with a shrug and a healing "of the body" by a drink. The negative pulses allow for the place to shift and become "as the beholder desires" for reality doesn't stay the same with such pulses, but one must consider the planet thanks to a medical specialist. The realms are as the person desires and formed by rejection of idea and things not possible to you yourself. If an idea works or be used in anyway, then the creator of it can come alive again, despite the people that don't want it.

Where the original planet be listed as a white dwarf or quasar at <http://www.lost-civilizations.net/atlantis-channelings-2.html>. Most weird creatures are found in the realms gathered by collectors or just "wander in", but safeguards can be possible except in certain conditions, such as low energy or low natural energy garnered by people in low positions. To focus enough power and energy to achieve ability or "feats" or to accomplish a goal with a considerate energy. To make a power feat be to understand energy and "pulse" it, to create an energy effort by faith. That pulse be to cause what be focused on, as of energy, thoughts, feelings and actions. A pass of considerate energy be to cause a recourse, a vibrational movement off the Planck energy level that causes life to exist.

Now some may confuse this as a seducement where you seduce it and it occurs. Where the pulse be to recur an action by considerate energy focus. A small form of reogenesis, where the large form of reogenesis allows a soul, dragon or demon for you to absorb into the body (any) by energy infusion to cause your body to be demi-ized by the energy and the soul dispersed into the body or to have an imprint or sub-c manipulation to keep the body in regenerative state.

A seducement be to use when your using by focus and hypnotic effort if a considerate energy focus be done, if using reogenesis even if in a little amount what you do be to permanently manifest an idea into the thing pulsed. What you achieved be overpowered motion and that is power hungry to conquer, because of self-addiction and self understanding, with and foremost is the concern of life and evil. To say stop to them is to affect a negative or dismal effect and failure. Then the seducer will attain a coercive effort and try to lie or connive you to do this as well o take your soul as a price. There be a somewhat perfect sound barrier, yet its one weakness be what it doesn't protect itself of. Physical blows that arent diverted unless the barrier be electrified by being around electricity o using a tesla coil technique. Energy be the key to absorbing the natural, wild, metaphysical, miscellaneous and bad evil except of evil, it causes corruption to anything touched in the end and this be if bad be allowed to exist.

The remainder of activities, be to note most aren't evil after facing the consequences of actions through cause and effect, and the pulse power feat be correctional as it rejects the bad and replaces with good. Thanks to the Justice League. From examples, if good be condoned then much is made good and very skilled by actions in its own form. As some good be considered a considerate motion or very skilled in kung fu herein as practice of most things, mental or physical to gain a skill. This kung-fu = skill in motion where wunjo be martial arts thanks to an unknown chinese site. Belief and called faith be formed by the pulse and seduction conditions. Where faith makes kung-fu more effective in addictions and actions of life. If you mix in a few word phrases then the ritual ceremony be mucho better or to use a wiccan/druid/whatever ritual to achieve better results also considered long ritual with energy pulse or regeneration.

### Pulses - pulsix

Pulses of energy form to be the beginning of realms and absorbed as of Osmosis and not to move it except a little or on no other purpose, the object. from physical radiation as physical power, of electricity or energy impulse run by kinetic motion or radiation devising that result in a conditioning of the item, body, machine or person and program with voice or by running a marker device, thanks to Egor and Steve, The recourse effect be made by focus toward a goal by energy to have any work effort. The ritual can create havoc due to poor thought, planning and scattered concepts with bad consequences, A ritual can also create a special focus of overloaded energy that lasts quite a while and sometimes it starts small to go undetected until its moment. A lot of people merit or are considerate of power that's overwhelming and consolidate as to some to get what they want.

Where its really energy formed was really evil by information or good by an idea to cause or curse the manifestation to exist if the representation be realistic, what be focused by energy, can exist from information and transform the body from within or without. So when knowledge is balanced by mental power and physical physique, from the fact of understanding knowledge that is allotted or allowed for. Ritual be a part of it, and with ritual can faith and ability work exceptionally. By use of pulse and faith will it, the act not fail unless blocked or fall. As the energy dies by falling down on the peak of action in progress or work. To block ritual is to become prone and absorptive unless its a physical manifest, at which point its all indirect as a (focused) force of manipulation. Some who take energy to use it be likely to puss at the mouth considered foaming unless regeneration. As its energy that's very wild and mostly against you yourself, so it tears you up inside with a deterioration effect that sometimes appears as aging. Some might get corruption of body tissue and form fat and into muscle.

So act out the part to form reality with pulses that are yours, and form the energy into existence (any) as with a hand crossing down and turning over your focusing hand, where your focusing hand be what you write with. By the opinionator, 'The force of vision explains this, but it looks and does.' Focus energy from your crown chakra through your body with with rhythmic force and change into a form by hypnotic energy by effort of mental music or music and think of the form. Your form changes with the heart energy vibratically changing the form. Turn the palms down and with an idea of releasing the pulse back into the body. Talk about what to change, make an image of what to change into mesmerizing yourself. Talk about the parentage to change back into a new form by thinking about it or make a noise and feel the pulse to get the effect, are timewaves in pulse energy considered where some think and become the form with a time of death.

Think 'I can't beat it so I will oath to do it.' The effect idea be to feel energy of your crown chakra is to focus through the crown chakra, and this also includes what be noted. So to chakra focus and send by allowing through the body and to the arm makes a person faint after, or almost after as aftereffect or an afterimage that tends to oblige the daydream effect. That be what you consider fading as afterword your faded from reality into the daydream area if you want to go there. Sometimes, what you were thinking about tends to happen but it really works and needs work, to focus the effect by your heart or hand by the crown chakra energy and to absorb energy from the wrist be using it for preparation. To be the energy be to bring forth a life pulse of effort and make it do as be your will by double the effect. As my body be to represent the will I do appreciate for the will represents, my body be to do as it wants. You don't have to be fat but phat as a successful worker outer with my changes or your own changes. But fat be a result of bad diet with idea to make up lost work.

Thus fat adds more power by body and idea to use it as a fuel where power be ability by blood flow, or order by direct focus.

The crown 'chakra' focus be with your head as it draws energy as with energy once in will go left to right: Then turn palms down and then cross your writing hand over the other, to clean metascientifically anything with an idea to clean easily or clean idea. Palm up with intent of air or water energy and palm down of your opposite or both hands to yield with a exertion of mastery for fire or earth. Another way be to form hand out and curled to stream energy pulses including spirit. after this your likely to find seduction with seeing the reality of your attempt, the moment of a vision or daydream that most won't see except if its shared for a daystream. Sharing a daystream event be with 3 or more but one be to assume the role and speak it, the lines to act, and speak it aloud and they might see the vision. Those that don't think your Insane, Crazy, if you attempt more explainings by devaluing.

The biume technique be to create a biume field of recodable live energy that works off live energy and living personification and with motion (consumptive and unkind as it makes other living beings do its work sometimes). With the biume, it will look like it blooms up within a few seconds and stops drawing from the area then dies down. Sorta like bootstrapping or kickstarting a machine to make it work. Stroke the keyboard or item and feel the energy channel into the item, ie focus energy into the item but not to move it unless necessary. and the item will do as it will but as you say even if the item goes rogue. Its a personal AI and works for you yourself by regenesis and is safe horcruix making where normal horcruixing be to use a killing or wrong to split the soul, this won't as this leases the soul to the machine bit by bit. A safe measure be to take yourself out of the machine to create it, and make void energy by using each touch to suck the machine or keyboard of the machine personality that is you. In energy in thought we do go on.

Also the machine can get tertory, a contemplative mood that feeds off attention unless it has other energy like a maxwell demon for an auto or living biomachine. It gets tortory, a retortive mood, if the being in the vehicle or machine be threatened and it retaliates by retort. The tertiry mood be to know all in an area like a roadmap, and needs some indications to the direction from the area and personal energy. Tirtiry be energy that allows free movement, and it reroads as it forms the road at need. Tortry be in relating a means to a way for the machine as if it was in training mode.

Use of the blue flame of eternity makes for idea circumstances as if the energy is high enough, then the flame becomes alive from using a lighter, testing for energy level and think to increase the energy until it turns eternal blue at 1' extension, and then will the effort of work by the blue flame to happen as an idea with visualization. The kickstarter of the lighter uses a spark to start the flame and can add in the effort of your will, thanks to Roy. This causes an of the eternal ebany of an flame to exist even from chemicals, fear will put it out or get you to put it put out.

Now it, the biume, be a negative energy if emotional and the idea of its use be always negative. Thanks hence in essence to Dr. Gorbitov, an alternative way be to focus on the item until it "takes life" by drawing energy and either way its noted to "live", thanks to Russian scientists, by an effective energy drawn of things near unless told to draw from the sun. Now to use a setup like a gate with use of a unused area and then set up another gate to be as an anchor. Use this to send the effort of your will to make upto 1000% more effort by work in energy and physical activity. With physical work manipulated by the energy don't make it too tough, or the body gets bruised, your body and not others unless a natural accident and this might appear to the worker like regeneration.

So in effect its to manifest a thing, between two placed area anchors or doors, to get an effort that normally wouldn't so work, but unless in an energy of conditions allow of ever, ready energy resurges or sources and unlimited activity scope. Thanks to a psi group 'for whatever' so for the anchors and for the example from the dimensional gating idea.

Theres a 10% drain so nothing is without tax unless you replenish immediately of energy using the techniques and methods to turn them, the doubters to believers or the effect itself, but if they have doubts, a 60% chance exists to be taken away or driven away by just showing it, and 30% to be disrupted along the lines of the attempt succeeding and yet the attempt be reconcilable. To improve your chance detail of it, state the moment that relates to the idea or flavor

of a philosophy. Due note: some distractions work by despair and by despairing people and for keeping people in line, making for reconsideration like keeping people awake or changing their minds. An important note: Outside manifestation be used by pulsing where seduction is suggestion and causes inner manifestation and selfish intent the body unless shifted outside by rejection. Ritual use is to bring both into play or just one for inner and outer manifestation, by cause of allowing any focused exception. Any regret and this adds to a failing force, with raising results that disappear. In doubt, use what works and proven by others intention.

The idea behind this, be to create a new creature or future event from the area of energy, metasciences, and metaphysics, or in meta application like faith, I met up an idea that be applicable and that be to create an idea to be to work it to understand and let others do it. Some other, like psychic, unclairvoyant or clairvoyant types can create from physical activity with a pulse, destructive or undestructive, held in the body and at will, this will be the shield. The sex aid in this effort be to improve your sex and feel the action of sex far more likely. Measured in focused amount of effort be % in minutes. Where the described effect can create mucous, drooling with 1% in minutes of pulse focus as to hold a pulse is to slowly age the body and it acts like a drug after 3% in minutes, By use of regeneration is then to create effort without drooling as the effect to do development or dowsing for 5 or more % in minutes at most be standable, and deadfalling be what happens within 10-20% in minutes of falling down unconscious. Any use after a major focus will knock unconscious the person after the ability can shut off, anywhere from 1 minute to 5 minutes or longer unless instant.

Some experimentation be to prove bogus flamius;

1. You can't really move an object as you can really do damage except yourself or another thing designed for it by pulse, unless you achieved the tk (telekinetic) moment, see and spin or get li or think to object to spin like an spinwheel or move things aside or other direction.
2. To lift an object might take a circular motion and use the focus of atoms to spin the object and raise it up from aid of circular centrifugal force by visualization, of atomic red dots or the atoms spinning around. Or to feel the object or person lift up and draw in the area pulse around or concept the object has you do things.
3. Speak to the item or person and try to allow by suggestion to be bio-pk'ed (bio psychokinesised) up or for whatever purpose.
4. Psychoportation - As to shift by a will with Destination, Determination or no is use, Decision from (c) the Harry Potter Apport lessons, The shift force by the 3 D's and a energy release to pulse with "shift there" idea or words spoken to the same regard, and visualize a tunnel of light to lift you up and there at the Destination with a loss or victory as remembrance. The to imagine where you wanna go. Assume in thought is an ending at the end that sends you back or to where you think to be.
5. To expand or unexpand the molecules by a feeling of the object to change and a energy shadow pool thats the focused energy near the spot or the whole thing to change it, just by speaking it you can change one small part or one whole item at a time. The idea of trying too hard will get you nowhere, and a change in your body too much be to destabilize it. To cause the growth and shrinking of the effort and object. The easy thing be for your own mass to shrink or grow by focus of your body part but objects are a straining by trial and error to do the same. Try as you will it will be harder to adapt a full locomotive to a larger track as rails are fixed. To take in energy from this be to gain in height as sharing one will to leach to another and might get things better. The absolute effort be to create a demise of one force with thought of the object, and thin as it may be there is a leftover effect from leaving off considered a link and any links be a self-development or dead link that loses the link to the dead thing or they have a feel to self-accost unless they're de-linked.
6. Concerned location is to relocate and instant shift it by a focus with the atomic spin and it is a rotation that wraps into itself and around the object not touching the idea with the surface. Deject the effort if it gets, to a pseudo construct hallucination or psychosomatic energy show and think it much more. To not summon things undiscovery style,

defdifferentiate or undesumminable and it its a push of electrons as they form toward away from the opponent or object and that envelopes it and a "high humor" is to be elated to achieve an air by 'tron' transfer to diplace it of red dots and see the dots by shifting your focus to push it into the object and slide the dots to turn them to waves under the object. as a "I dont need to get anymore of that type force" and the object is moving as if 'repulsed'. Then think "Let be in it work go up up and spin" to get movement, and momentum but spin is the spin platform effort..now once I could do this but it requires 3 monthes or less.

Its on conderes in the motion, as momentus and it allows flights arrow or a flight of happy idea..like "multi-dues as its to quam-dues and as its autocompletion by soothesaying. This is to relocate the force behind the object is it is to be pulled or pushed as its to electrons and their force draw. Now to unfocus the "be force", and it is not there to discharge but only if you think it. Its reason to believe that the condensed forces are to to be revered and so they focus condensed. Some add a lava force, or red color particle in waves in force. Still the effort to touch something and you unlink the extra if any.

If in idea a true point depends of a natural force of nature its a force to let go and "not in the pants" to create a lift of reaction by opposites detract like magnet or particle force field. Like a better man is try dediclam neurotics. To be releasing it causes the emission of nuclear fuel or particles to create the effect in a true idea of life as it acts. This energy is tied to an anchor.

The perfect defense as a shield and healing be link both hands and feel the energy flow with a 10% failure rate and can turn blows of physical and mental by repulsing, phasing away or causing discomfort of or in people. Enchantments in this case are by pulse held in the object by a touch and a life decay that be longer than normal, an increased half life. Where and when fantasy meets life then no decay ever happens. Because, before the decay occurs; fantasy will have taken the destruction and left nothing but a sickness that disappears with the fantasy..only with alot of water will it not be noted and with disruption of fantasy comes irritation or complaint. The sickness can be removed by a void pulse to disrupt the effort of the bad thing, which can be any badly acting force. Usage of a demonic or positive pulse can remove the destructive influence. There is an energy to the gravity as the pulse is an idea.

Resources can build on each other, as one person uses the idea, person or resource and another thing, idea or person works to act as a raw focus to work by biofeedback, adding back into the resource from the one whom made the resource or discovered it. Essentially the resource be a path of energy and in an area, doubled in energy and strained if possible of negative pulse by feedback in writing or use Energy be a rule of itself and ruled by itself through conditions/relations. Still, and again one can worship to gain better resolve by attempting to do for themselves an activity. But must name the source or think by feeling and allowing the image to come to mind of it unless a machine, thanks to Radiology.

This can strengthen the source and effort of they, the people and God, or gain in source which is what worship does with a ritual to whatever God. be named to you yourself You achieve the "result" subject, if you achieve an understanding or know the reason. And you achieve the reason if you know the subject by osmosis and example. You yourself can tell what the writer does think on his or her own as with freudian slips, or what you didn't say makes the meaning and understanding. Its also possible to tell what the person thinks and what education level the author has by what they leave out. To write it be to achieve it unless not intended to happen where an attempt on it, the action be to make it happen.

Often the mistake of the moment, the writer is to be able to attain a goal and disprove it by blatant lies for the effort of it, as the attempt. So, try to write as if you know the subject for smart appearances. To get things right, use with information gathering from anywhere including examples. Even if you don't know the subject, you know it after you start writing. You can "fig" it out and if you want, you yourself could have others to look it over if you trust them. So try to coach the words to yourself and the audience or you yourself won't get approval by the reader, even if they don't like it some others will like it.

Mad as you can get, you can get out of things by an understanding viewpoint. So, get out of the view of them and experience it later to add it in, even if disliked. Write on the level that you know the material and the target reader group, know it with understanding but if a few terms are unknown then use examples. What cannot be understood won't be understood and if a zealot be reading it, your material, be tricked because the zealot won't understand what

they don't want to understand. If there be no zealot trigger words of their fear, then they won't be afraid unless they are somewhat like a pure christian can get near a satanic idea.

A quoth "Truth can't always be denied unless disproven". By General Washington, "The idea is adroitly recounted only by effort and similiar with placement where most can try condone the truth in it. If overproduced as a idea producer, it can be discounted or produce discounted items." Where an aid be an act of kindness in any case including where no amount of kindness can persuade, hostility as in the idea of Washington "try and be like that which be (existant)."

In the case of methodology and pulsing, "charming as it may sound, don't always do it because no drooling and remain alive where undead if too much" by George Schueraeg. This in fact may cause the living undead to walk or a necrophiliac fear to rise, upon seeing a body come to life. As reported [http://www.unexplainable.net/artman/publish/article\\_2010.shtml](http://www.unexplainable.net/artman/publish/article_2010.shtml).

So useful be useful and things even out to be wasted if not used. Some useful aspects are negated if done at yourself of negative and destructive nature because its your aura influenced to filter the energy. Originality isn't always improved upon by changing what others state so quote the rest except for your own. To take what they say and put it in your own words allows you to do it, the statement to seem right came to me, with or without quotes which can lead to the mistake. The resources are counted as self-debilitating or self-building and feedback energy creates more for the resources. Where most attempt to know the idea if you know the reason. Consider it bias, or moisty motion, and add in achievement of work to gain a good reason where a good reason can exist as good bias.

Now we are talking about the further influences to energy as this to use the moon and sun as a indirect source of male and female energy. Its these forces that direct the conditions behind power. Infini, As for Infini, every living thing contains it, obviously. When something is used, Infini be acted as the fuel, though Infini be never actually 'consumed'. Everything, including Cosmeria, be the general conjoining to detect by weight of Ether and Aether into Akasha or united spirit (Animus) and mind (Nuero), it defines the wholeness of the universe and be the giant container. Ether and Aether act as messengers and gain divided power, they also act as the rules and boundaries for the universe.

Basically Akasha also has the attributes from both Ether and Aether making gray matter that be imprintable only once per action and reimprintable once per attempt and it forms in any shape the wielder wants plus invisible at first. This gray matter is made by a negative attuned, gray film layer with an idea of creation that incites the layer to be neutral with either red or white particles to pick up the imprint like a rewritable cdrom. Life plays the cdrom and memory be the video or scenes provoked by feeling from life.

It transcends dimensions and be reality itself. This gray substance, Akasha, be usually impossible to wield but unburnable with the third eye and imagination that you can wield because it allows you to wield. With Akasha you can make anything work for you or do things. Its the strongest boost for any spell or psi skill. If you tamper with this element, it would be tampering with the fabrics of Reality. This may not be safe for those who do not look ahead to consider all possible consequences. The energy or byproduct of Cosmeria be to have power from both negative and positive, like with doubt made from bad prosperity and similiar or chaos and lack of faith, thanks to Broswell and Roswell and positive like faith and any belief including the lack. Its truly powered by both, light and dark.

Although, cosmeria would combust before it would destroy, as to do a negative with it dispells the negative that causes it. With this, too many things can be unaffected by both sides with a concept that sets the sides almost against each other, The binder should be a white lie and redirective type that inters both sides as opposites of each other and hides that of location or shields them both from each other. Universal with negative and neutral bindings, was derived from Infini. You could think of Infini as the light that hits a prism before it divides into seperate colors of light.

And because of this, you'd need enough power to force the separate colored lights (elements) back through the prism to attain and control Infini. A feat that has thus far been unaccomplishable. The easy path to infinii be to draw a

triangle and an inner upside down triangle with a dot in the center. There have been some cases of people all of a sudden encompassed in a golden light. Everywhere they look be golden, though this doesn't last long it's a wonderful feeling. This be the closest (in my opinion) that man has ever gotten to infini. INFINITE. There be no limit to it's power.

Well, all I can really say, as to it's potentials....It's just like it's name describes INFINITE. There be no limit to it's power. There be no limit to what it can do except to overwhelm other limit from the limit of their choice, how well it can do it, or anything. Like I said, it's like Godmode in a game. Not just godmode like, doubled health, twice the attack, anything like that...Godmode, like, nothing can TOUCH you. Nor can you TOUCH normal magic or energy to achieve the result unless you switch to another source because your immune. When immune your likely to not be effected nor want to feel the things your immune to.

It can be focused into a weapon, and when you do that, the edge be like, so sharp that it's down to less than an atom in width. So if it touches something, it just slices straight through And when you slice all the way through, then you can either let that body dissipate, or there's like, a few particles left, and you can pretty much do a lightning infini effect on them, where it just destroys them from the inside out. Pretty much, I've told you all of what I know, but. It can be used to make any element you want, new or already discovered. But you know that.

Infini-Fire, though. When it touches the target, it litterally destroys the part of them that it touched. If only a whisp of it touched a part of their arm, it would pull a chunk out of their arm. When the flame's gone, that part would be just... Gone. That's pretty much how all of it's forms are, though. With it's Water form, it just sweeps the person over and when it passes, they're gone. Its basically infini, the lightning. Oh god, I haven't even ran any simulations yet on that,..it enters and dissolves as it the infini lightning occurs from within to without. But it's wierd...Is it normal that, when you find a new element that no one's ever used before, you know exactly how to use it? 'Cause I see it's full potential. And it really makes me want to hide it. Where Aether be light infini in focused form and laser x100 percent. This sorta gives religious experience or glory points per use as it can sustain life even in things that aren't alive like objects.

Create the fruit of life from the tree of life or a fruit. use an infusion of infini as the program to the fruit or seed and it creates knowledge of the soul, as in a awakening of memory and ability. The two together are sometimes experience and ominipotent ritual kung-fu ability or old vanity like in your favorite habit or action. So its similiar to the tree of, life or might. Where the might comes from ability of the person's will and desire to understand and conquer, along with ability focused for warfare where the tree of life be to support the area and protect it while giving knowledge, the might tree will consume the area to support might and destroy it in the end. This Infini be a great chi support to Western mysticism.

Pergrupan miigagan grupan  
The peer group, minigang or group.  
Bij Spellhawk

Just remember "To coin a phrase 'I hurt you not but we learn from each other, I learned from you.'" from Nostrodamus.

My point be that I give council to give advice and treat people better, and for a better relationship to treat the people with respect. The aspect most don't get be the minigroup be the established teen group, or adult group of less than 10 but more possibly more... run by peer effort. They work together.

An experiment I did, not to be repeated was to create my Dragon as an effort of group interaction and make a physical representation to prove my point. To evade the damage and restore as needed, but the damage can be redirected as with water or arguements, to use an element as a focus. To separate the focus for the element fire and went out to represent the relationship by wax holder objects into a large open container surrounded by water that's unmeltable with small objects that I put into the unbreakable contained area, to keep it surrounded but not by trash and render it safe to watch. To also set the element in an undestroyable/unmeltable container or material the be important

so I did. Take this as a subject. So I again as removed all items near that are burnable with nothing around it and a safety in precaution is free speech to be to make the moist in the surrounding be back to create a safer environment. This environment represents the area a group might talk in. The speech and council went well as you might say, but with the wrong environment it went not too bad with water around as a soothing speech or right to hell by a bad speech and the damage was contained. I nulled the field after, then went to look for the right spot in case of the better area.

To know the area and look for the best solution like a dug pit or well wet area and be to give a good subject. To use bad skill in game and appear able to do things better than the other be to make the other underestimate you. An example of this, I found a way to make a better candle, use lamp oil and mix with liquid potpourri and alcohol. then try to get and shake till its mixed. the oil should be mixed and changed to a thick solid liquid. then mix with wax, but don't add in the candle when burning it unless its especially different and possible to contain with an unmeltable container. I got citrene out of this and an mostly undamaged home with a well tested, and sealable container of unbreakable nature in life existence, prison isn't there.

citrene = to durance candle and allow a condition of never going out, lamp oil + (c)dragons oil (alcohol + herbal oil) + potpourri but this can be put with water to put it out. This can cause inhalucinagenia and similiar disease if inhaled, and some solaria effects causes many elemental forces like water or air to larger manifest. The benefits, it needs wax to use it and won't significantly work without it and won't shoot up flames like oil except it takes a few minutes, but can get just as hot unless mixed with liquin and upto 600 K. However it can be liquid wax if used right. It is not advisable, despite what this seems to put oil into jar like thing.

To use an alternative person or self from an alternative and also cross-alternative be to live, but if you attain death they can switch in. but not if they look like you as they transform into you and your alive again or you transform into them and they are alive complete (complete) with memories. They can switch into you if you die however, but use be likely to transform yourself into them and if they die they deter it and your alive. So an unkillable enemy can be kille if you

alive. At least try not to outlive your purpose and if you do find another, try to cause another problem elsewhere to distract the trouble away from yourself. The weight of the moment be the weight to bear, a process of consideration in a cause be to be the winner and decider if things are right and understood. To project a person as your self but in another form can get you outta trouble. Like in solitude we can grow to adapt to new situations or situations, To coincide is

with crazy acts and they consist with destowed or de-established moments of being large or consist by becoming better

From cleaning you can try to keep the disruptance down plus Germs that are likely to do as need be desired.

Describe your problem to you best and you might get useful advice, using signals be to get attention to be spared a life of destruction until its separatist behavior due by patriotism of other types as dispersed in chaos, For subsummables

are considered to appease like sweets. Thanks to Fr. Eubah and Saint Jude. The consolate are desparate to keep control by means of many ways and calmness in peculiar idea so to not be described as 'bad', and get a neutral standing from opinion and good from people who are pious by temptation. To get good results by a good standing and no ill repute. To get believed swear your truth from your opinion and fact based idea, swear it with good intention and make what certainty be possible and don't try to expose reality as different from others except its counted as bigotry. As intent is possible to make a peace from observance with no known reason, forbearth or for no reason the natural responses. I was figuring the truth for worth of the varied concepts, 'dare we tell the truth albeit from the example of my master we tell truth as a tertiary with a test of moment for terrony (villainy), an issue forewith or to play with. From initiation the way be followed by consolidation to keep the idea intact, the things done added to rote and new material included for a new day will come. To seclude and force by enforcement will get you discommoded again.

The desperate be associate of a collusion of stars that claim attention to moments by position. That test be allowed or undeclined by natural law and declined by misuse or natural inclination of brutality for fear of being banned. So endure

in freedom of what you do and how things are possible as with the test, that can still be done as if theres no banning.

So if you think of this, you can make something of it. Fear not with excommunications (examined explanations by area) forthwith by decree, of the idea and self service to self that if the community by area be disturbed then you can excommunicate it. To get rid of problems talk on self-promotion by use of belonging and with use of others idea, or if no people then there's no idea and its instinct. To create by an instinctive need thoughts to make for better, that are expressed by 'create by a means of self-commotion or acting on instinct and get more out of the experience', as though it was done by self-taught idea. You don't have to give to know or be known.

A direct threat be dealt with by a force away by sitting and use feelings to send outward in dejection, or think 'snuff out' while feeling the fire and seeing the fire go out. This works on people so not to just sit there for fire, attempt to actively put it out. To allow yourself a chance to fix what be right for use, or wrong as a condition take one item like a candle and when a problem occurs snuff it out or blow it out. To null sometimes you have to get someone to do it for you, unless you do it for yourself in time, but you can work in teams. But don't beat a dead dog twice, stop in what you can't do because to beat a dead puppy be harassment. If it somehow comes to life or they can try to harass for bad

people, or vouch for you if friends or forgiven by vouchproof. Quote by Paul Schaffer 'A failed man be not to be listened to as they can go on thinking they are doing good where they didn't. Pushed into actions from any source, but to be lenient in this case be selfishness so their likely to go beyond and abuse what be good or abuse what be evil.' "Once beaten never down." thanks from financial leader. To stop it do just like this, turn direct hits and lock a closed door as sometimes a direct force can target you, from time in existence or in memorial so be desistant for people and absorb for other things. Then target it, the force, with its opposite or again blow it out by some force. In the worst case condition there be a vision that the brain might see but the mind interacts with, this vision shows you the best possible motion and activity of what you'd most desire. You can use this to escape by as when visiting the inner plane say 'up' or down and in the moment of panic and your act decides you to cause your escape. For thought of self-conclusive integrity, use the concern of what be in need to get desire by devotion you can generate a dragon by this effect. As you go to a faith get understood as a figure to be around, a notoriety of understood idea and alot of accommodations as a famed notion. Albeit to have something wrong be to to be easier to forgive or to bear no fault as it was an act of faith.

Some think it be forbearance or old acceptance by fault of a fault to us that we don't respond and are split in some way so the truth be we are not desiccated by a fault, as to best ber (best bearing) no blame be to be a true believer as we

formed into an alliance of understanding by wanting to put people into line of knowledge and nondestruction by destiny and self-proclaimed faith, we have independence to support us and so we try to do as we want, so far for the right of

the moment in proportion to others, to devolve distinguishment and make for better pricing. For consequence of things not designed used with perdition and badly looked at be to credit the person by high desire or desistence and support as to write and speak, with actions to commit the person unless forbearance as ignorance. To point out after its done that its their plan that continues. For the true effort use convincing and you get somewhere, but with others that are too similiar again, it could cause war from jealousies but not with brother/sister (with blood) as its disgruntlement or its family (karr or merit by full line of support and intent). With the gang its betrayal by fire to the most fit whom no doubt try to comply with unknown laws but not in open sight.

Things by D. to be spoken with pulse can get effect to make results, 'Don't be bothered by self-sezaria'. calls a dragon flame or volcano, as to what or whom desires and ignores the disasters around.

'Don't be intempered self-sezaria.' as a soothing of flame force or disturbance removal.

'Don't be intemperance bij self-sezaria' creates a dying flame that calms it down.

'Don't be bothered by self-sezzaria' be a wonder blow.

'Don't be self-sezar' or 'Don't blow a hole' makes you like ceasar for a month and immune with slight avarice,

'Don't be illusionous self-sezerk' makes a safe point of contemplative idea to illusionous motion and prevents pure death. [Immunity be possible to beserk making thoughts from poisons or insane making desires.]

'Don't be self-selazar' or 'Don't du self-selzar.' creates you like the dragon selazar and turns the tide by devotion. Similiar for self-sezaria.

'Don't be self-assertive self-sezaria' as to turn things to stone from other material or get your desire, whatever you

do you don't turn yourself into a dragon unless you have to or don't turn yourself into stone.

'Don't be de-plundering' turns you into a drake of many colors.

'Take it as it comes' for absolute tolerance.

'Don't be obese se-suzaria', or 'Don't be obese self-sezaria' removes fat real quick as per pound a second and converts it to muscle. The process on record be to convert while exercising and acting under your own influence.

'Don't let me die self-sezaria' makes you immortal.

'Don't beat me [name here], self-sezarr.' or 'Go out bij self-sezaria' doesn't allow your body area to be hurt,

'Don't take shit unless you get something on asking' or 'Take their shit and then get something', as it will get you somewhere.

'Don't do medico [sears or sezaria]' puts out any flame and can get you in trouble but you regenerate.

'And now don't' stops the things not wanted as though eating habit that is bad and keeps you skinny.

'I don't' stops things that aren't there.

'Don't eat self-sezaria' stops the flame from fuel which is anything that burns except torches.

'Don't be a medic self-sezaria' or 'Don't be dumb.' cures burns and similiar.

'unn-self-sezaria' stops it but can start a flame because what starts it can stop it.

'Don't be self-selazaria.' transports you somehow on act decision by influence of below from the core.

'Don't be it' now this stops.

'Be great flame' to cancel the greater fire of faith.

"Don't not Neuro sibuosis", is to narrow and cure neurosis by sibling .Its not in the sibling

it outside. Now with the proverb, "Wish it be however it was its still going to be how it is. Now witness protection program."

"Don't be flame knowledge, be okay it legit.", to cause no fire exploration and no burning down of area.

Some word phrases, some idea translation words that were used. "You've wrecked my clothes my house and thoughts and my career now you want my living. Plastic, thats all it is."

adeos = get it, get up, thats the ticket, farewell, ad'os, got it, outside.

bestown = be bestown, be slender, beastuary, wariness, best owned.

burn = flash burn, for bar, to bestown, be bestown be to be fat in spirit, give to, forbear (ban of bad) sometimes use ice for positive and fire for negative.

bycar/bybike = by car, motivated vehicle, motorbike or platform. biker. vehicle ala hover

ceien = ce'en, power flow, blood sing, Sela, Sing, surge power. overeat

console = with act, to decre, denied (by dedication) or streamlined, denial.

commit = with actions, with crazy acts (touched), committed or to desist, dedicated, concide, coincidence

desire = etu(e), et tu, to be 'to be or not to be that be the crazy motion', destiny

destined = for those, to the, to those, destowed, to bone or strip to spirit, destined fits of poverty.

dislosure = to disclose, to have, to distinguish, to impeach, to bestow.

discourse = to hold, from law and order thanks to diez 'to have and to hold' or to disclose or discourse.

etube = be to, to discuss, written on, cursed, aim.

forebear = crazy fit, forfeit, not to be mentioned, ignorance.

forbear = so for, heal, de tude, to allow

n = in, in to, into, ing, no.

mis = tu fe, no attack, miss/ion, lady, no or know (as evil segemony), miss stake, nuisance, to fail/ure=fail allure.

quet = to know, to quiet, shed light, quartet

shepherd = beekeep, animal keep, to trap, to inhabitation, toward innovation

stream = to flow, concourse, to talk to spirit.

soul = so to, seul, so to be (as now), uninhibitivie.

suggest = to hear, be clear, to do, not normal, abnormal.

writ = write, disrepute, astute, as to or as tu thanks to Sylvester

hopefully = incidentally, look to the sky, have hope. incarnation

Sacred geometry

Sacred Geometry; The angles are important as they did more than act a measurement with event from sacred geometry, however they are still just a number and the degree be represented as x and a multiple but in this case its as a point. where, 'This be a disbeliever but it works', from hiemlin. Energy be work and work makes movement cubed for things that are inert, and this accounts for how much force or movement the item does. To use it for math is to use the digit times the amount of time and the pigeoned ones idea is without decimal in result. As you read this 'Try not to be the dictionary, you aren't the geometry.' Thanks to the rock'n'roll band, these are construction angles.

94x be the void angle and also  $1.37x$  for cancelling out idea and causing manifestations which will work with each other, the right turn and focus by lunacy or feeling to evoke the need, and the need for a desire comes about and at most nothing occurs and least be memory loss.  $94/1.8=52.2$  J/s for how much energy be generated for use of chaos and emotion,  $1.37/1.8=.76$  J/s used by the body. If you apply more energy, you overwhelm the cells and create a concept of overwhelming deadness.

92.1x is to be able and effortless as to what you want, and it is.

93x be repair or fix by correction for steady flex from allowance and flexibility. 51.7 J/s to correct with or deform.

92x be construction on a cosmic scale by reconstruction from necessity or as be in construction of materials.

51.1 J/s to reform material.

91x be training angle that gives to alerting you of corrective measure. 50.6 J/s to alert you or someone else.

90x be the joining angle or the correct as perfect joint and joining as it takes 50 J/s.

89x be a receptive angle something that's acceptable as off or off-kilter, the odd angle. Like for hanging pictures I would get disturbed and try to fix. With 49.4 J/s to feel odd.

88x be moistless and understood as dry and ill humoured if in a person. 48.9 J/s for dryness.

87x be response and personal snap angle. Hint, this works with the wrist if held at the right angle. 48.3 J/s for a snappish response.

86x be where steam appears or anger be appearant tost (as most) in a room. 47.8 J/s for things of appearance.

84x and 74x be radiative shootoff or fight moment and has 5.6 J/s.

83x or 85x be where a whisp of smoke appears and with molecular activity with constructive comments and aggravations made from energetic actions related from human actions. Basically where things start switching around or get screwy. 1.1 J/s for very odd things.

78x a point of nausea with heat or illusion point 48.33 J/s.

68x be a consolidate or considerate view.

52 be 28.9x a constructive view, as what happens when the angle be reached and changes the point of view, or the person be held with a 52x wrist hold. This be only allowed description of the hold where you figure the angle. 16.1 J/s for constructive effort.

30x is the sickness by motion point is 16.67 J/s.

23-24x is the sickness without motion point 12.78.

18x to  $3 \frac{1}{4}$  for building up energy by 10 J/s or this is varied by energy buildup.

11  $\frac{3}{4}$  or 11.75x as an angle = snapping point (as strong or thick resistant material if not snapped before),

$11.75/1.8=6.53$  J/s.

11  $\frac{1}{3}$  be 11.33x and counted as the tilt angle or moment of disaster,  $11.33 / 1.8 = 6.29$  J/s.

11  $\frac{1}{8}$  or 11.125x angle be load snap angle (weak to semiweak materials) =  $11.125$  J,  $11.125 / 1.8 = 6.10$  J/s.

11  $\frac{3}{25}x$  and  $7 \frac{2}{3}x$  be 11.12 and 7.7 make dysfunction and disfigurement and mutation as  $3.42/1.8=1.9$  J/s to achieve it.

11  $\frac{3}{52}$  be 11.06x counting for great disaster and the world tilt which as the world spins it generates

$11.06/1.8=6.14$  J/s.

10  $\frac{3}{4}$  - 9  $\frac{3}{4}x$  snapping point where anger be or pick up angle of  $10.75x-9.75x = \frac{1}{2} = .5/1.8 = .28$  J/s.

$10 \frac{3}{8}$  or  $10.375x$  be stress and Chaos point as failure thoughts in J and  $10.375 \text{ J}$ ,  $10.375 / 1.8 = 5.76 \text{ J/s}$ .  
 $8 \frac{1}{2}$  or  $8.5x$  as the inert matter or Cosmeria amount in J for universal background radiation, it describes creation by how much be divided in Cosmeria and to divide by 1.8 be  $4.72 \text{ J/s}$  of work done by cosmeria.  
 $8 \frac{4}{9}$  or  $8.44x$  be the Action of work load with maximum action per work sec and perfect convergence of J of action or  $8.44 \text{ J/s}$  or ft/s as maximum ceiling.  
 $8 \frac{1}{3}$  or  $8.33x$  be the number per energy use in  $8.33 \text{ J/A(ction)}$ .  
 $7 \frac{3}{8}$  be  $7.375x$  to pick things up, to grip or climb with,  $4.1 \text{ J/s}$  to achieve.  
 $7 \frac{3}{5}$  be  $7.6x$  and an interlock or change by convergence, wealth or gain by loss with  $4.2 \text{ J/s}$ .  
 $7 \frac{7}{8}x$  be the falling over point under a load and  $9.625x = 9.625 \text{ J} = 9.625/\text{Pi} = 5.347 \text{ J/s}$ .  
 $7 \frac{7}{18}$  or  $7.38x$  degree and J be dizziness or minumum work load, before itch and before stress its  $4.1 \text{ J/s}$ .  
 $3 \frac{1}{7}$  or  $22/7x$  as Pi for the rules of infinity or life in natural pattern of balance and Fritjof feedbabk loops that create creation as its represented by a circle and be listed in the Bible as  $p=3$  as more truthfully Pi is  $3.14159$ . To use listed Pi, its normally used for circes of diameter and cycle of inner ability along with frequency or  $\text{Pi}^2$ , as a Infini representation of sacred seeable life math  $3.1416$  and  $368$  milion digits after as is idea or normally the point of energy in Joules, to create the perfect shield. Where in sacred geography the  $\text{Pi} / 1.8 = 1.74 \text{ J/s}$  for action focused upon in work or natural work without much done and natural actions. Modified by idea from Saint peter the black as in the Bible for an example idea.  
 $1 \frac{1}{2}x$  be energy pool, anger point, focus amount or Amperage adjustment (as improved feed) and be a degree to point or  $5.5x = 5.5 \text{ J} = 3.1 \text{ J/s}$ .  
 $1 \frac{3}{8}x$  be point of headache and programming frequency be  $1.375 \text{ J} = 1.375 / 1.8 = .76 \text{ J/s}$ .  
 $1 \frac{1}{8}x$  or  $1.125x$  crack point (as rigid weak material) bend point (as stronger material) angle or the time of addictive action,  $1.125 \text{ deg} = 1.125 \text{ J} = 0.625 \text{ J/s}$ .  
 $9/5x$  be 1.8, the changer number that is where things change is a conversion number, with energy transferred from the sun or light to get the amount of energy as Joules divide the angle converted to decimal by 1.8.  
 $3/8$  or  $.375x$  Amp line pickup, spike point (as the natural energy amp point where headaches are liked, if at all).

Like you start with  $3.1416 \text{ J}$  or  $\text{Pi J}$  as the usage first of a restorative work that takes  $8.33 * 8.9 \text{ min}$  or  $534$  seconds of focus for  $4448.22 \text{ J/A}$  with  $1.74 * 534 \text{ sec} = 929.16 \text{ J/s}$  of work. So the work took  $4448.22 \text{ Joules}$  per action and  $929.16 \text{ J/s}$  of work energy. Now in conjecture, headache occurs at  $0.76 * 534 = 405.84 \text{ J/s}$  and slows down work, with a progress now hampered by headache you could stopped after a minute. Also, the snapping point would be for 1 hour of work  $3600 * .28 = 1008 \text{ J/s}$ . And, for the work done is  $3600 * 1.74 = 2068.97 \text{ J/s}$  of work.

When I make an Infini-flame spontaneously in my hand, it nearly looks Physical for a second. Like a shield which wouldn't fade if used by Universal energy and Infini but conditioned by thought. This could enact thought with it on simple speech, or music and be protective as well like a perfect shield. But..Hell, you could even if you don't want to do it, then death doesn't bother you from the effect you get from the sources you create with this and you can make one stronger than Infini, if you wanted, with enough effort. Pretty much, I've told you all of what I know is confusing but not done on impulse. It can be used to make any element you want, new or already discovered. But Hell, you could even make one stronger than Infini, if you wanted, with enough effort.

Quote by Ben, "That's just crazy, though...If everyone could do that. Running around, making elements...They fire something at you, like, fire that's immune to water, that's not cool. It's unfair to rookies and whatnot, too...I call anyone who's only a basic elemental, or less than average ability a 'rookie' though...It's just the sheer possibilities of it, that makes it so powerful. It's limitless. And I see just how much so. I mean, just Use it, and look at how much so, just by letting someone or something attack a shield of it, or something.

That right there should give you a massive hint of just how powerful it is. It pretty much, just came to me. The whole prism-imagining thing...That happened, but I didn't will it. It all just snapped into happening. That golden vision was what tipped me off to thinking, "Crap, this is Infini! This is it man, go be a jinx!", "To be or not forever, as there be a way! Star trek with infin!", "The way I see it be the way I see it." "One word like thanks to weird sisters lines, and they'll see it." The rest of the thanks to Tad Arlsb'ro the first shyaman or named by the first explorer Jaque Napier for the mishapen 3rd hand.

## Scientific Cult

Be anonymous "In a world of magic and miracles, science be most of all credible and important with faith of self and manners." Another quote by "A.O. Kime" First, one must understand that realities dictate what rational manner of thinking would be most suitable to function within those realities, so the manner in how one thinks must fit the circumstances within that reality and the most prudent and effective in course of action that would be considered the logical course."

Considered as suitable to scientific reason, "I consider the science cult an all out concept, where the scientists are priests and priestesses and even normal citizens are treated equally." quote by Euhglov. This would consist opposite of CSICop "humane" activity and beliefs.

The Cult that follows the scientific rede of 2 where any rule or effect, has quadruple (4x) the effect but 2 times back. So try to remember that the effort of one thing be 4 times effect and 2 times the positive and negative energy back on achievement or The more effort put out the less returns.

1. To deal with people, Be behind and hinder crooks as they attempt it, their action.
2. Honor the person with the area reconstruing, and use people by experimenting with a word and use considerate experimentation.
3. With use of vibrations and harmonic patterns set by voice or motion and by feelings for a source and along the way, not that their may be others. So honor the enemy with what they do and reuse the usable. Use energy freely along with machines.
4. Meddle where advisable but not where thou would get caught. Be your own engineer and allow others to help. Be there to advise but not to be above people.
5. Only hurt those with bad karma or vibes unless a fed be near and do nothing then as  $2x2=4$  and  $-x$  - be a positive, but two wrongs don't make a right and so on like a be human. Don't destroy a person unless you want to be destroyed but only with those of bad karma..

Follow the idea in which people follow their own idea, so don't hinder unless you can get away with it unseen and unknown, or if the event feels bad then allow it if it helps, unless others don't like it. Do heed the help call to create a better know how, as its all your idea and to avoid trouble. Only if they, the idiot does wrong with bad result. Dare to respond and fight back with a better thought, although don't attack till they might attack again. At least try to be nice or wierd as the mood hits you. and don't step on peoples shoes and only if it can be avoided, With overwhelming circumstances try to right the trouble with any method posible. At the very least, pay with respect and concideration. But, only if thou hurt the person stepping up and don't kill to repent. By old one, 'How, thou are responsible to be able to hurt if they hurt thee. For karma of bad vibes cancels out except for bad luck. Which will quantify bad events in a 1 mile radius and only as 2 bad luck people work together and only by the attempt of negotiation and communication. Remember the actor Martin short and the other woman named Valery whom both had bad luck and the scene goes things are going better, but were drifting away now on a tide. Bad guys is almost where you get it except by the right authorities and even then, thee can get away.'

### Scientific mission - Uvalamee

Use of the scientific mission, as directing after confusing with activity to clarify make light of the moment but du not du flame unless you have to. This causes a flow of positive thought and a different idea, thanks to Jusenka, an old author of a now forgotten book 'mud slinging bad luck', only if the direction be spoken of and be directed, because the other person gets the upper hand and only for the acted on direction or director and consensus given. To use the scientific idea, makes means of the intent that be within reason, and understood so it can occur for better or worse. To use the scientific idea in a clause or purpose of Empirical notation (any wise sayings or observations here), for the effort of

the grand scheme of things will be achieved, To do things for a better ending by understood thoughts or idea be to get more from the activity, thanks to Simmon. Shake off the effect of any act to anull and/or laugh off the tension to rid the bad side effect or feel the energy go elsewhere, thats bad but 'For now be good Be gone.' Be drom and its called Alenta.

Though do not speak of general ability with a clause of effect because the clause is a general description and escape

for a general motion and the effort idea be the ability that be sometimes unlooked for or at and more than general in effect to be worthwhile. Make the interference given by yourself go to positive things that shield from controllers and evil. By the holding of hands and feeling life energy, flow to make a circle of protection that lasts till the unfolding of recovery for the senses and watch for 10 seconds every second. When a radiation effect by spell or thought hits you, change it and use speech by idea to describe the effect a bit different and it might change. This changes the moment to use a different idea. Like when you speak use projection of a picture and visualization, you send a better understanding by an added osmosis effect. Osmosis be also a part of learning described later on.

Now there be no Osmosis if not allowed by the self and acts on its own otherwise, define the effort to make it more understood and less effective whence it be bad and more effective when its good for the person if accepted, but only in cases where empirical nature is, tradition (honorary trade of general hierarchy in activity) or hierarchies that are involved because they tend to follow along. So to sometimes stop a disease, state what it be and its the same for other efforts. But some might suggest a but out or leave it alone, so don't do this to a opinionated person as they might push. Don't be dumb, period as it could lead to demise. Due note, don't be too dumb to not be able in an ability or thought, otherwise the effort be wasted. Then, you don't disappoint people that expect things unless there be no need to have the person around or expect see things similar from them. We are the scientific team to create by feel what you wish if you think you can get the ideal.

### Worship - Wosi

Worship be up to the person but worship any God/dess you desire for added benefit but you don't have to, The main God be the consciousness of energy as Creator, others in similiar nature and of the same deity be God, Goddess or Horned one (Odin) and Brigid for the Goddess or others of the different faiths like Budda. their worthy of the same coin and they are the same God/dess but a different facet of a "god gem" odyssey, thats somewhat perfect. As faith and magic can go hand in hand, like Laurel and Hardy. Except in belief of the God or the Goddess as He/She be able to forgive only if you forgive. but don't expect much of the moment of doing anything in powers, as you expect without deservance but deserve with and without activity. This also powers the God/dess, I see with vision and imagination that some would be demihuman or a demiGod/dess beneath Him/Her, if they deigned to be a God/dess. The God might smite you on it but the Goddess might give you insanity except for just reward.

That's somewhat similiar to their likeness and somewhat denied by believing in yourself. Where demihuman (faery, elven) or demonic if denied by others and rejected by God or demiGod/dess but be accepted by some including God and even if denied by others like Lucifer. Sorta like Faery and Mythical creatures but always follow your feelings and use the motion to empower and prove then your intents. So you get the work or job finished even with great pain. So I see people using this energy and not knowing what it is. So in truth energy be existant to supply effects and its never wasted as it converts to other forms on use.

For science be recorded mechanical or kinetic energy in noted accounting, like physical movement. Faith be a buildup of miraculous motion to create miracles where none have prayers except for faith, and noted prayer effects by self or others or kung-fu spirit ritual that be caused by spirit to promote wealth and destruction thanks by (c)Jones, Psychokinesis be a release of energy to move things by kinetic motion and focus, and create change by Osmosis ae energy absorption, where the energy be absorbed as it, the object, interacts with the psychic like with BioPK thanks to Sean. Magic be to create a motion by release of spirit energy in a crafters making or alchemy or spell of kung-fu energy achievement by ritual. Where kung-fu be a moment of achievement by practice or crafting idea like spells and similar ilk from kung-fu entertainers. Some call this 'funk', to portray a more bigger idea than be what normally possible.

Now illusion be to use kung-fu (not martial or lethal unless necessary) and create a visual effect based off a motion or hand chop and other motion of sorts and pretend by act that the object be there, this be called limited flare, the object be 50% more likely to appear with an object that's similarly like it. However some can believe the actual idea be the moment and treat illusion or delusion like real, so to be shot with a real gun isn't the same as with a illusionous gun. The gunshot would hurt and the illusionous shot would only hurt if believed. With treatment it would only fester as the wound cannot be repaired unless you draw a

symbol of the half cross or any that you come up with.

That right there be the main difference of force with psychokinesis and mind force of metaphysics, combined with the physical object that has an added effect. But, if forced then thou might attempt to absorb your own energy when its used against yourself, except if the persons stronger. Music can strengthen the effort by adding the bands energy for musical song and along with the sunlight's ultraviolet decay as in a frame of reference and infrared burn for burning decay for three times the effect and effort. Some families, in extreme danger will know what to do and get amazing. For the results are very important to survive and make better dislike or expected results by an unexpected ability that pops up.

Because faith with theological consensus of God versus theological concern from the goddess based in belief in miracles and moments which = opposed and adverse form, as same form but different idea = to magic as an idea faith that's forever opposed but inverse and as an opposite conclusion in form, and same idea to psychokinesis in which I would rather call psionics as an effect faith based on an idea in an idea of trying in which = empirical science or science related by measure and = negative as a different idea and different form to faith, where form be a physical manifested formation and idea be the concept of the form. Where its a decision to exist that lets us be in any area from pure ethics. The spirit guides as we guide the soul with use of mind as in a deciding point. Quote by Anon 'We are where we want to be because were just here and at the right moment or right moment at the wrong time. Thee don't have to accept what you don't need, but form a path and follow it with acceptance from things that work with you, otherwise ignore unless they intrude on others.' As 'bedom perspecto' any amount of phrases in a single saying.

Now to sum this point up from the opposite end as their sharing a similiar or assimiliar idea, know science or pure empirical nature = unopposed and inverse to psionics = opposed and adverse to magic = opposed and negative relation to faith = unopposed and normal to itself. Use the reverse effect to get an inverse or converted aspect, where the inverse be opposite except in the idea that it be used as an unopposed opposition where its not allowed. 'Some fear the form that may have at you but knowing defeats them and by innocent intention returned.' from karate observance with other people.

This a quote from kung-fu examples, 'Condition the energy to effect more than you know not to do harm, except to thou who do this harm with yourself, Can't accept it, try to work with it unless you can't or that you can get a better result by mixing it. Then train with it to get it right, as its physical actions and all in the mind. To find peace trash an object as a sacrifice, to get the power for the more there be to clear up problems that are your own, As with each object you can release energy. To lose weight use most food as eaten, but toss the rest as whole remaining. Eat grain to gain stamina but you might gain weight if its wheat grain. For every example there be a lesson but not if an imbalance, for imbalances get rejection and eating impaired. This accounts for any energy projectile or spell type, and after awhile you get enough bad karma that your like rejection, of the bad or any event to get a result.

Any who could assault will try to attack though, so try to remain calm. Don't allow any to attack as you could end up disasterous. The object idea isn't agreed upon but the henchmen, can be won over by making them laugh as you laugh. To get moral act immoral or amoral and let others correct you. Point out a demotional or devotional idea to get excitement. Use resolve to create an innate calm as people seek calm for motivation as calm comes from what is there made to become a use.

The IQ high idea counts to work better and avoid bad intentions or interactions with bad relations that effect the self in good standings. Where bad relations good standings, good intentions bad results, and for yourself good result with good intentions. What thou read may or may not come true even for thou statements that are intended, to be nurtured to fruition. To force a thought even with simple consequences reduces your chances, of financial order and control. To force a form by change of drastic nature be to cause destitution, or an out of control form except to eat right do well. With much of something like flubber that destroys the beauty, or portrayal but to be arbitrary be to create a holding pattern by something indescribable. The eating of nearly everything except a few bites or at least half left over, forces a change in body and instant sanity.

To hold ability to change the power over form with irritation, or unknown activity be of to be the form forever, until its been decided to change by thee letting it go into muscle. The dangerous point be the point to let the form go and it

takes over mentally, but not with ability over attack and don't doubt sensitivity that are in designs otherwise seeing people for whom they are acting like. As emotion be apart of this for a personal desistance and paranoia in a clouded or a minded motion. To go temporarily crazy, be wise then tempt fate with a change in form. The temporary crazyness causes a notice of the change but not to care, as the idea be to feel temporarily insecure to gain security. As with the insecurity and consequences can achieve the idea of focus the better value and the body can cope to create hope with power or a secure concept.

We want to be remembered but not to be known, as to avoid disruption or destruction. As mere death has a departed spirit that wants to remain until told to go on. To be confused and do things prevents people from reading you. To coincide emotion as an equal to others, where there are no equals think your an equal. Forces can balance out with force but your attacking with a force thats raw to begin with, so wild that even before its been achieved it the force can backlash, and destroy you but destroy the opponent worse with expelled force like expelliarmus, again have doubt that it affects yourself except for the other and keep in balance.

To avoid this, use the indescribable to brainwash the opponent into thinking and doing it themselves, with info to not get a disease, or madness and something similiar as the diff thought rejects the current action, so don't take things certified while lying down. Thanks to CJ. Move out of the way to prevent disaster to you.' To pick up an ability get exposure to it as the sames goes for siezing it, or get some other idea to use on those that can by misdirection or white lies. As it can be done in juditsu and ninjitsu or other ninja style and nothing else.

To get people using your idea, just breeze through or use a quick tone, to say your message intention first with best facts of importance to play the benefactor. Don't lose your point except when you have questions and those who want to ask them. as they won't interrupt your speech if your already interrupted. To overreach your goal be a symbol of a clouded perception, and an unclear mind gets a wrong response buta corrected path. To point out things can get a correction, but it can get worse so don't be too dumb as not look where you go and where you went thanks to original thinking. Meaning when your attempting observe what you see and look for results that occur around the idea, But try to perceive deviations as your attempting. For honesty try to scare the person with points of truth or visions of almost torture. Be secure in anything you do by holding doubt that anything can touch you, and but act to defend by misdirection. Sometimes make it seem like the others fault with your idea and their method. But don't be observed doing the act.

Because nothing can try to torture you if ethical and you can't be touched. So try to keep a smile and break up the monotomy as pink elephants come in three sizes, your one of them as you are the essence of what you create. Block out and ignore interruptions as be possible, It takes pain or a mistaken idea by 'serendipity' to learn to focus. As with a point of serendipity, your discovery be an allowed mistake and do block out prowess to get more. To examine more may get you a better result, but laugh to get a bad result and if you act, use the determine the best line output to go by. So keep a smile on your face, and make a good compliment, but let things except destructives or disturbance work sometimes by itself. As to disturb the dead be similar to a nightmare to banish, explain your purpose and intent for a nice attitude or better understanding at least to/for yourself. To explain your problem removes it and it dissipates until you think on it. Its not you its the force itself, give energy to control or you lose track of time where you are and yet remain protected. Be prepared for anything that comes your way, as war can happen if you desire. As the practice be decent then I will do, thanks to Maitre D.' So 'As things change as I will view. thanks to Maitre D.'

What to measure your strength by be energy. Use the  $K(\text{elvin})/4$  and take the end result from the decimal, for the  $E\%$  or the amount of focus in energy from heat be what runs the area. How many things moved and work done by you be  $E\%$  squared,  $E^2$  or how many seconds of focus squared measures the amount of focused force in Newtons. To use their force against them is to win, to use the underlying structure is to manipulate and scheme, to use the focus of others is to control them or get behind their eyes and see for yourself, so lock them away from their body to get results if you detect them..remember to release is to get gifts so you are grateful, but don't ever too grateful. Objections can get moved to better piles.

Pulses of energy form to be absorbed as of Osmosis and not to move unless necessary on the objective. as this can consist of the formation of telekinesis and psychokinesis, from the physical radiation as physical power, use of

electricity or energy impulses run by kinetic motion or radiation devisings allow that result in a conditioning of the body, machine or person and program by voice or run a device, thanks to Ego and Steve, The recourse effect be made by focus toward a goal by energy to have any work effort. The ritual can create havoc due to poor thought, planning and scattered concepts or consequences, A ritual can also create a special focus of overloaded energy that lasts quite a while and sometimes it starts small to go undetected until the moment of occurrence. A lot of people merit or are considerate of power that's overwhelming to some to get what they want.

Where its really energy formed of information to cause or curse the manifestation to exist if the representation of realistic motion, what be focused by energy, can exist from information and transform the body from within. So when knowledge is balanced by mental power and physical physique, from the fact of understanding knowledge that be allotted or allowed for. Ritual be a part of it, and with ritual can faith and ability work exceptionally. By use of pulse and faith will it, the act not fail unless blocked or to fall. As the energy dies by falling down on the peak of action in progress or work. To block ritual be to become prone and absorptive unless its a physical manifest, at which point its all indirect as a (focused) force of manipulation. Some who take energy to use it be likely to puss at the mouth considered foaming. As its energy that's again very wild and mostly against you yourself, so it tears you up inside with a deterioration effect that sometimes appears as aging.

### Some pioneer energy rules - MoPeirERuix

Now Emperical science be what be used by the above rules and redefined as Emperical natural science, To those who observe facts can make free standing thesis laws till disproven. Often getting nowhere in the end till added with those of scientific basis. The spiritual laws work with metaphysics or natural laws that underlie science. It works with set conditions or cluse and several cluse allows for a basis or how one thing reacts. Science works with physical laws based on physical interaction and to not destroy unless necessary or to create something better.

In combination its to use natural observance corrected by feeling and understanding in examples by theories and correct with philosophy. In compliance to empirical laws of metaphysics, we can make a strict law of general observance with both sides to reflect, the physical law with the empirical law for use as a mechanical law example to explain why. A rule be a set example or law that can't be gotten around by changing the conditions that were not set for the law to work. With this rule in place you can use physical laws in spiritual lands. So to set the law of a varied condition representing a single effort with scientific and spiritual basis, but its allowed in this case.

Example 1: This can make a clinical case that cannot be founded on facts alone, the case has to have guidance by some philosophy to be correct.

Example law: "A setback of information can be reclaimed by doing things over or make use of the backup, but if no backup or hostile reactions to your claims, your not likely to succeed if consequences are deplorable."

Depictions of a theory or opinion can be to claim information to be true, with two or more similar opinions, as fact the basis can be true unless the opposing view is there to not accept. There is nothing in endless conclusions so emperical science fails, in physical world this but succeeds if combined with scientific basis as with the fundamental reason how and for why as for the reason that people quit for the empirical wasted time of just Emperical theory that should happen.

Now the Empirical laws that are built off the Empirical science

1. Protection rule o Thaumaturgy - Most energy be very protective of its user and treats the person, object or machine as he/she desires it as with other things. With machines you hae to take control and work with interactions, as if the machine has a language, it'd be to endure its abuse or handling and treat it like intelligence.
2. Action/reaction= o =Affinity - Energy retroacts with the same force to go back to the originator twice or thrice the effect. This be not instant and at most not noticed. This be similar to the golden rule and the wiccan law of three. For

action/reaction when congruent, or in agreement, its typical to cause a reaction until done elsewhere in nature, except, and the nature of the event be unlikely to transfer if done slightly different.

3. Correction rule o Mind over matter - When corrective in pattern in so many terms set by the person, try to waste time while you get the other to influence the effort to redo his/her act. With better results to influence the effect and improve upon the effort by reduced damage. For most damages that are redoable with reduction of all damages, that are an invisible act and this makes things physically repairable unless by energy of the spell or miracle, where it can be undone but not all of it, if the effort can be taken into account.

The effort might reset by others intentions of positive values or major flare where flare is to be a positive energy redoubling things and this has a limited scope except to hit with triple or quadruple the impact, thanks to Norewega. As an example of this is can be to reflect and redirect the blow or movement with a flowing movement of your own, this is by moving aside and pushing the person away and back or to the side, but then to use muscle instead of thinking you can lose concept to patience and others brawn or smart moves. Taught in martial arts and kung-fu as from a moment in time, this is where you are enabled as the rule of correction doesn't always effect.

I name this the invisible inversible law that repairs anything and makes inversible anything that isn't law. Inverse is reverse. Or nothing is then as undoable as this is by disperement and weight disperses and this is done.

Kysu As Th Id  
Kitsune as in the other world idea

If you have a concept as an individual thought, then you can do things as then you are working on something. And in thought, as you are able to do if there you are either left alone or with dark thought unless you repair what is thought necessary. So, if either there is a fight or not you can defend as with an concept response by a point pointed out with use of the art of conversation. Or not, as you separated individual mindsets, to other people as you need to work out. As a needed ripple defense, use thought as a thought of now to win a fight then use not and think on to power up a fist, and use red energy to punch out things with fire, and blue energy to absorb them as you take in stripped energy and those that are in your mind are as thought in your mind as an instant fight or phite dream that can end in us assault thoughts of weight down that can end in agreement.

Then you break to link of their spirit link as to like it and think its not there as though this is as you think and you are unlikely to make bad deal no decomposition happen, as its not a lie. Then, you shift places to do things as you get a purpose to do as to male or female or nothing that forms as is what thinks as a person, acts as a person and in purpose does not like things. Then as mind to go somewhere, if your mind is in repose then there and as a rule you get the point that if pushed to your limits then if wanting your attack by attitude then it doesn't happen. As you see yourself things are revealed by the body. You are not stricken now. Don't strike by jumping, as you go through dark portals in mind and as if you don't need as your not emotional say thoughts that are needed to be heard as standard speak through in mind. This allows energy to think 'paralyzation', and touch or get the idea to stand or think the thought energy. Orwell thanx if you want to do other actions as to be, use a good excuse an then think of what your intention is as you say or think 'done'.

Think to the person to paralyze for the do of whatever you think as life, that you do which you don't want is not done unless necessary without brute effort with the effect as paralyzation fey faery. Other fey ability, are there by the lore manifest and with ability fusion by energy itself with love of what they do. As they are with trust, for those who you know are fey as or not as they work with you or against you they do can it without repeating a pattern. Tio is to timeout and move out of step backward beyond the stars as pattern and see it as thought pattern in the sky as they who do, and they can work and do as they need to fix the pattern of energy to make correction as their energy sparkle weight drop by sex energy to thin or slender, yourself by things not done unless needed but only if the sorting idea is necessary as though a natural selection an in another shape to hear the thought in effort of at the moment cost reduction.

And as things work and know if in some dangerous situation, you risk everything and think of thought to do by danger sense verses sesna you risk the concept of life and will. That is done as you just can be competent or/and as you

are not disparate. As this happens, then you are dead as you are in a moment, and use victim to do things right and win for the moment that is there to be and you are more of what you were and resurrected by thinking it's done can make the concept work and this leaves energy to dissipate harmlessly in the air, learn as you want and you are better. Then as you are to know, identify the need as you are and when you want to be so its considered thought magic by geyser activity and this empowers the soul to do any magic. This can restore you to be better than were as you are in shape as you need things to do and can do things in and as priest allow as to manifest be there to work in there. With that kind of power, you can do faith in magic to create hidden in by thought inverted magic and anything can be cosmia in and out energy electron field done in free energy motion by the hand.

This is photosynthesis at a cost of eating and drinking by being in another shape or form as from a difference country by the alter point of financial energy that creates an idea as though idea from something, that's need in nothing to something. This basically allows thought of flight with direction, by thought creation from something on a planet out in the spacetime continuum called Apes. The hammer of Gods is created, by the hammer of Thor with the effort of the thought spirit hammer with an altered different thinking by smashed hit approach. The Ape way is to think in a way of what you need and use as this as not done otherwise as is a hammer of the sky God and do in do not. Consider yourself as you were darkness as a hammer in the face as though with building up energy and release at an object with gesture or not in an idea of whatever you are of nothing as this is as though within as there are things as a face of stars in the nation as we are an act of god and He doesn't exist in reality as sealed away in time.

Alter is the ability that is of the supposed mind moment where you perceived in a state of body and become as you think you undo the condition as if in an unheard moment as not. This is the thought idea that alters what shape the body is to become. This is the concept that works with the energy to alter the cells and make what is to know about. This can create a altered state of appearance, that is only statement to temporarily make perception as you want in an altered state of mind. Thus, the thought to give idea, to the energy as this shares itself to the others energy aura as infusion that's not attack. If the effect is to make changes to alter the shape, then this will do so as you need to do. However, if you want to get some other effect like alter the spacial energy as it is in the area. Then, you can do this as an idea put to energy of the area by your spirit manipulating with every effort that can then create that temporal shield the changed the influence of the atom and created an altered state of emminent mind.

This follows the natural rule inclination in act of natural inclination of doing things and to do nothing wrong don't use it unless your nice and unirritated if the thing you do will not be needed by self-taught or proven methods. This is not in use, not unless intended for self-purpose or otherwise your full of things that are healthy or no self-devolved use until you are pushed into using it. This allows you to keep in a nice mood, as this is very well in thought out and done and no delusional done act is through intending things and in quick results no point of this fills in a gap as no hate of bad thought or not in cause of trouble and is considered the code of defenses as no it doesn't happen. This is an act that is good, for the motion that is the effort at hand by vigil of thought. An act that is on purpose, is not done if not a smart thing to do. You can go improve this as this is an art by thought of a momentary dumb act and you are there as tripping out anisten is not achievable with no brain damage.

As you perceive it you can change it by thought altered events or thought energy created acting on impulse as this is to do some effect that is by desired conception by skill. However, you can't use this or that effect in a church only in church. The idea is the effect of the concept, of that which you have in mind and except for church which you will doesn't exist. The magic wish spell, this maes the 'ysh' and your need is done as the Atleantians never threat as cosmia determine the threat and to make the effect. This is the magic alter effect and no chaos is used here as this performs the magic mouth effect as you think of altered perception by psyching them out and that is to be able to make byte thought to work alter effects by thought or will. If you don't need and the wish is in don't need the magic mouth heard by thinking about what to hear, don't think to send. By saying 'Ysh', you can change the thought and create any effect by spoken thought or to use thought moment which end. This is the evil wish spell but not always form evil thought to cause other evil effects as you use good ysh energy to use good fey ability in them and they end as they cease to exist or not. This can kill ants, that can kill roaches and this is to guide that effort as effect is did. These are

efforts to create evil in a good idea. Expect effect to build effort, and build bridges with chaos in the expert use as this is done as a chaos field determine the effect for chaotic effect is used to harm as this is in harmony pegasus is using their ability for them who need it.

The finger of death of the evil lich lord gaax an is the idea that you think death energy to the finger and touch that which will decay. This is the death spectre secret ability. That is the effort, of the concept that is thought to touch any target that is dying in your mind. Mix eldritch, which is wild poison call energy and death energy as together, and you can do thought to the target as you get the effect to change by molding and this is shaping as you thought to in a bad mood make to become what you mold by loosened particles and cause death to the body if you mold something, then its like a permanent glamour cast by fey on a target or all by the idea to kill the intended target of a bad mood, by wish or make it die by chaos interred the effort into the effect as it takes one out it takes them who you wanted target.

This can induce weight drop, if you kill the fat essence by death energy stop and go on or doing otherwise is to do arrangement of something else. This if you don't say 'stop' while thinking of the effect will wither anything that it touches, and imitate eating and can act like a victim from a heart attack by a construed heart energy illness with some viral effect by sorcery if used free from viral infection by contagion on a pure gaseous places without the hammer effect and by the effort of a time out on a concept and on the mark supposed energy response. I know what will happen before it happens. The calling action by notice to make someone stop attacking, in now to synchronicity by time lord energy that is to create a loki retributive invisibility this, is homing in on the right mind, the right thought and as psychic use this you are a target with vicious attack and shield is used against the violent crime or it can use things an make attacks to those and activate on, location as this anithen beneath you is a wish shield made by Odin of time of the future of the soul make as to harbor heart and soul with no comment intended as that is to create in a thought by this to create momental aura and concieved in secret as I am or what I am doing as this is the point is existing.

Then wait 15 minutes till you eat, since nothing happened badly or you will in not forever fatten up at the idea of eating. If then you are as you are understanding in belief, in their mind as they are the pint and cup to pour it in for you to try and go into better mood with idea and with thought on your trip. When you are able to get a chance, try to make the effort to not eat after you start to feel very hungry and eating with quickness. If that is your thought to do, then hold off till you feel not to wary and as you work out you can try this or in motien go back and drink spirit water not need to eat and drink by nothing energy and being thought, your into space that time made into the area as then by thinking energy into the soda drink you clarify it. Easy going from here on out as you travel by motion to an area far far away called the 4 suns hostel, this allows easy trvel, say planes unimanaginable as this continues Immortis travels. This makes disagreements not happen and then you get better effect, to you by effort of what is to attempt in the access key that leads to nexus as it is a book this is the effort to go through a time rift as you journey through you are there and you are in a time limited field of time that makes partial seconds into money moments.

This allows for in action to the grate in the street and down you go. Your begone from the moment thought made into the energon cube from coelesced energy thats solidified in particle form energy. The effect by effort at forming, a half fist and punching it will generate the vibration to cause it to create itself from air itself as from the void which collapses inward and being there where you think this should be should it founder itself here. This then stops attacks as it collects the energy, to null attack as you get it collected as being put there by thought. Thus to be an ass there is with an idea and there no hand is punched is one that is not given freely. So pay is no easy pic and is the moment that you get things by minecraft. Then this is the onion effect, where you are able to pierce the layers of reality, and then you get the idea of the idea that is in mind, their will helps form it.

If you can keep as an able mind then and now is to get the layers formed as you believe them to be there. Then, this is the point that you get the view in mind of the world you perceive. This is the effect of the effective motien cube as created by the mind, as you are able to ghost their minds. Usage is their will o wisp and their minds eye that is to use this particle field to create the motien as it coleates into a cube formed in their mind by spirit inner fire energy put there to form now in secret as invisible. Then, you can form things with it your way and as you are done this anise bonfield easily fixed and easily you gather the particles into yourself and send it out. The area I see is focus use or created area feel.

By the particle germ, in your body acting nanotech. Nanotech is in the effect, of effort by the little tiny silver particles that are programming your body even as we speak out your mouth. The energy matrix field a split time particle field that is fractals as its a energy generator by patterns where you are given friday a day off in avarice on a day of choice. This is the motien, that shifts any time you need to day off and do as you want. In this point you do an action that you do, as there is this ask is a point of the vanishing point without belief as a proised field vanishing field of time in itself. Now the in activity of the brain in mind tactic is to use 99 % of the brain all at once. Now you can, as imagination is there to do it. This allows you to use thought travel skills. This is where you go, and find opinion out by a fact finder skill for who you were by thinking about and do it and asking as there you were.

This allows a time out moment, so that is allowing youtube to work right as though timelag is reduced. This is the point in time where you can make thought to become a living moment in a pilot of time to do this exercise the gift to make the maximum in a moment to so be. This is the moment you can orbit and be nearly everywhere you are in optionel space in the money you gain you get a job there and in optionel you get things to send back to you as a power item on level existence. This can give you kinetic motien that creates excess particle loss of food and drink particles. And then you get easy money as easy potency is this then will find you work as you first identify a job to get a job, this is the end of the world and as you goto another planet you are not coming back the way you came as through the energon fields you create with your tri eye being.

As we only use that shield with a struggle of concept thought as with a retribution nature in living aid shield that's by aura and let electron on attack mode to bring negative feel as to being on the moment by thought of and about tie in an attack as any nature purported on jury duty ruled by any judge there as is an important answer reprimand with anyone on a ruled negative statement so if vicious attack is there and then I thought that we are what we can represent and do on the combat thought is as Lizard King and that is what is interesting and are thought on to an identity by card is no insane idea and with no thought baded to the opposite way of injury with child or the other violent crime and the critical rule from the fey wound is that which is represented by a court dimensionally respected as the hall of judgement to be gone and with thought the criminal justice department known as this is death field then constituent to a terrifying crime by comment and that roof is ruled off limits by a vampire hunter lest led by us as set by us as it is used in head and known as the mind is psychopathic in the head thought to be led by the dark fey vicious inme by assault and thats good as though on responding to you by attack in thought to come to you to wish spell and sync to simplicate by attempt to malicious by invindicative shielding.

As this is done and as no erasure of results happen as yes is yam as the answer is erased you are platitude and you can be done and unless a sync to the world is then not in a moment on a then need to know basis he gives answers and solutions as he flies off into shapeshift of people and this is included as done by carbination with fits of rage and taken medical doses of medicine with dangerous thought dose. As to take with me nothing more to be as though done due to jury duty he is also able to deal damage to a babe as to reprieve his mind and he can stop this as this is library on necessary thought things or in listening in to thought assisting others in standing alone and championing people for the illusive shield effect to get better things and at midnight he is there listening to good radio music with clear thoughts and antipathy and stature is used to trap energy and make mine is that listening in to broadcast this antipathy is as that and this is the good thing on thoughts as antipathy is nothing else as is this in on the outfit of customers and thought is not in antipathy as he is never attacking as that is use of spells and weave and this is included in captain seat on flight of the control deck of the mind aiding legitimacy.

Different custom made outfits were made with designs on them and as now then you can say its normal and if now you need things there is a store for it and now were done. Ruminant as needed because you own it, as special projects are done as you know and need them with deadly gno and you can easily chaperone to get in there by the route to be the way. This is due to the missive to the new frontier as to be a relieved idea and relive the moment in time. And, as this is due to thought procedure written down, this is not religious as this is good for adventuring in the worlds by a shift. Until realized, this can be mended to work with thought and difficult to stop unless you don't need to stop.

This is proven as it strike out on regard, of use done at the auratic energy in hidden attack by thought and in their

aura now by provocation and a soothe feeling by energy in thought stops deterrence in the action energy from colliding as you get a calming thought calming you down afterward with a positive affirmation idea as a suggestion network. This is actually possible hold onto thought and drink water, to make then cause the natural weight balance on an intent to bring some paranoia and jealousy down, as then you become back to normal with natural calm soothing thought as you summon energy to think by water particle thought to balancing body restoration of energy and with unaging by usage of thought balancing. What will disrupt this energy is a vibration that keep the particles disrupted and it makes good.

Let go of the negative energy built up from the attack by drop discharging it into a target or object. This basically, is a very focusing attack and useful in the triple defense shield. And the moment is the action with the thought is to calm as you can listen in to thoughts. And after this is make thought of concept and that is there with what you hear. Thus this is a negative enhancement, that ends as the next thought is to consider what is to feel the pressure stress of any calamity drop down. To eat sugary foods in your diet, can cause rather instant energy converted from things of sugar. You can create a weight loss effect quickly by or with a thought. So to need not to eat too much, think 'not feel the need to eat unless necessary', as a power of suggestion and this is inverted weight as to thought slim down figure by thought and eating something of small proportion and this leads to less eating of meals if you are willing to stop, then no as you start eating as though you need to do what is normal then you can not increase, as in weight as thought leads to an act of negative and positive and in balance you make things by thought of make things activity or by now there is no bad activity and you do fill out in time unless you don't need or intend to become as stick figure is to turn it around.

The effect with life is to generate expected results. Negative with positive activity is to generate energy, positive activity is to weight loss and if negative you are not keeping about the idea of weight. This is as you have lesser weight as though no weight was in thought by diet with no extra body weight. This can easily drop excess energy to make negative dropping happen, in order to drop it though you need collected energy by thought as you gather it by a thought hand and then think of letting your weight or emotion, go in energy as this can get weight energy from you and those who want to lose the weight by thought activity, as it can react opposite and with the same cause the drop in weight as you thought and you transfer it by a regular teletouch by touching an object with a projected white energy sphere in thought. This can appear like a moment, of a thought of energy that leaves the body to make in the end a liquid as a transfer that makes a silver white energy sphere that can make dream hits on a target with extra energy burst as a liquid megatron punch projected to target area as the right thought to energize the body and if its dedicated to healing That is the thought of apparent concept, and it is what makes easier than it really is. As you think it this occurs. This is a thought, from Japanese Anime called Ranma 1/2.

If you were really in a need, then it could drop and the weight quickly by sheer need. This incites a concept in an idea reaction to keep the weight off then lose it again if you gain it back. As it is to keep off, think the mind is dropping of weight till your need of weight is gone. The affect of this is to increase diet, and get less fast fat gain. The point of this is at the end point of you being in your room is to make it bigger and drop, as you don't need incident and can use this as considered permutation weight dropping from precognitance. And negative energy, it does not infuse your shield of aura so you don't transfer weight to someone else. As this uses silver energy of time particles to transfer body weight. As thought un weight drop, you can transfer this self energy by thought transfer and teletouch to an object in space like a real sun. Your spirit then can block this naturally through there being no need unless you have no object to block out if cursed by feel.

Make do and will not to use music to restore as you are human or then your not if your not human and you will believe it and get in trouble as you do survive. And at the will to do is the will to create, and this allows what is as you survive and do as you ask or do not ask to do now not worry. Molecular control and not at everything else is not anything as nothing is now, as if to form into something, all you need is this as what you are of touch you use for energy that is negative that changes around everything as this is to use fruit energy of love of a fruit ninja that makes that wish spell in need as this is happening. Considered greater void thought perceived from nothing there, for thought of the uninterred energy to do things, this will work to create the fruit of knowledge as the effect is there to work as though a time taken there is work.

This is an ability, control yourself as discipline is necessary for this is wellness to create and manifest as you want

and will. Because the will is the way and the moment is the concept to be done. What's next is done and not until it is. At the end moment there is nothing, as you get what you want and it's instant and just by thought and with idea focused on as I said it's done to pattern wellness wherever you want. Fear not and be not, and your not as you be as nothing is in manifest as your not in endangered moment. That is a mage city far far away in a dnd galaxy, that uses spells like these, as there is the moment you get any effect by spoken spell with and by the use of their energy.

Darkmatter particle energy interaction does make light from darkness as of things with dark energy by the thought of concept as this is not and we are as we are "were" unless want is to seem like something else. We speak to imprint as it is grey matter, and thoughts form to become it as total mass is liquid as to make the energy from some fire. As, this is the moment energy molecules make movement and your body will do the point if at will then you think and the energy can form, as it is possible. This is done by the effect of your thought to do and create as you need a now a somewhat full manifest, because that will beat that moment that you will things into form.

If you get in trouble deal with what it is or else don't attack then you can fully manifest with enough energy or enable switch thought back to jump bodies or possess them to escape from trouble. Mirror is useful, but don't use it unless you use it with care as a mirror is there in the mind. Use like myr is a mirror on a wall, state 'mirror' and focus your mind on your need and think or say it to the mirror in your mind you imagine to get things done. Anullment is not to slap, by the fey that can always be used and are done to remove unwanted bugs or pestilence or things like hexes. Key is a note to be your desire and this can get your want.

If you want to exist here do not try to become into reality as to not become into reality is enabling you to be an energy being, to make the concept to create by being energy and manifest with will by thought becoming into energy. Think and your being in idea for solid need by want with time of the true thought, that's where your with true intent to become a solidly shaped form by will alone and this form has conscious. As it works and it has thought and will become, as you will it to become able to shape itself into reality as you. That is with you in thought as you will you are able to manifest by its help, as a thoughtform in mind. This is the motien effect, think to use your concept to create with spirit as with natural intuition by natural inclination in no deadly affair. This can create timewise being as a kitsune or fox human, your essence is that as this is a able conscious that you are able to use and make something by willed thought as an energy summon, you can make and conscious remake at will.

Then you can't be defeated as you can make things done by usage of drug energy with an essence of will to not abuse things, by warded spirit and in this moment we reunite the shards of this reality and become one mind and one body united as one thought of energy to form the spirit as to be our will by desire, and will to work off energy as to justify the needs of the body and the body is the shield. As this is solid shaped energy as you can be where it wants, this is then near complete and it is done as the aura is thought of being good and a shield is there. As its thought to shift our perception by the point of perception which shifts us in reality, so we are able minded and this is both a shield and in a place to be and a shield in mind cast forth for now. This works as we are in true we are wish with thought knowledge.

Think or to do as we want, we are to do things and we act and part to participate reinforcing our in thought and acknowledge to present use of a concept to be created. This works as a replicator world engine in mind called the engine. This is a use of the superstrings via solar star to use the vertexes, that can't be used in death to provide a universal network by negative perceived as positive with word image impression given by comment unless you don't think to send something by thought. If you fear something negative, just no if you feel with energy this will cause the fear with no some thought of the ancients, unless you need don't fear it and not too much information no preamble by thought happens with knowing.

If you are aware, as if you do then you don't then this is intuition where this is interesting as you assume you can get another point or thought of idea to do. Think to cool your act down so you act cool and thought swap, this is done at the end if things are to get better use the energy to create something. So this where no manic attack happens so consider you are good as skillful by no obstinate effects. Think to do things if to act with thought discipline, so you can do things right by condensed or compressed energy action at a thought of wall. This relieves

tension and creates what you will into existence. Usually this is a black mark or area, that is done in a pattern.

The thought can't lead to war if you need not nothing go to war else where there is warfare. Muggle warfare is forbidden. The act to do thought is better, if you act as right and is correct by methods. The act of war is cost of energy that makes a change of body that is returned to what your spirit needs by what you say. Saying 'stop attack' is by saying, 'no'. The thought to act is not there, in else if by no go means which can return to you if enough energy if go then say 'do'. This can be be a tough act to follow, to go and think is to use the star road that is the internet highway to use by interconnected solar stars, just by thought and no feel as to feel it is to feel drawn to electrical sources, if you think to use electrical energy to just shift then you can shift your thought to another place as you are invisible to the mind. This just goes places, as you can do a switch on the wall trick by turning off the lights to thought travel to go and get to places no switch needed, just imagine the place and think you switch a switch.

Done to perfection, menditation is to clear the thoughts out of thought mind, think of energy as this is cleared thought thinking of the nothing that is after you dismiss your thought of everything that isn't wanted in thought of you, understand what the continued result to come in the mind though by the creator himself committed to now we find out about what is there for ourselves as a shield to absorb the energy, influence and the effects say of the thought in mind cast forth as energy in the mind. As this is here, this is there to be everywhere at once unless we finish that project, so we exist in any form we are able to survive in one country one mind and one thought. The idea is energy put forth is now, or able as to be there to hold off demonic essence with a container to hold the demonic essence that exists in an object without an object or air as a respectful construct to have formed all that can or cannot do will without madness. Now you appear like anyone, who is respectable and act and unreprensible as we are now able to work and this is an able mind as though sicke.

This can make arguments distant and this is diluted to disperse at the thought to work, then as if now you can form an objects will by being the will and thought makes it. Unless necessary, your will is in that now and this is you that formed and you formed the need to will the being as you are being now. That's because you formed the concept and not will. Shine a light, and your not become dark but become as you are now thought. You are now able to work at will and this is and to make a thought will as this allows thought to be thought in form by reality to do as a concept something now inclined to natural intuition is a cure to anything formed from body, by will and aura. Because example are purpose, there is no way to not do it right. The Criminal Capture program allows for unlawful effect that aren't rape or violence is useful for a jade prison idea as this, as this puts all criminals as their violent into one area as one is in contact for you or others protection that's where need is done by this construct, that's considered Odin as a thought of one who united the founders in a state of existence that exists for use of us as we will it or not as we want else as different is different as we exist as we are now.

As of things in idea, now we are in thought and are doing an interest. This is done as we want things in action to happen. Now I am done. This is a point as the I is the creator's conscious and we state, think as creai or use is things then that we throw in the trash. She who is the creator obligated to oblige is doing things, this ended by now with feel we created the roach world. Then the human world as the creator created, so what is there with the point or thinking is what we think or want. The idea I think then is that its well done with thought, this is done with wellness to be as he is one that exists. He is not named, and he is love as he is void and nothing, whether he preference by us or preference by those with thought like a dream in the real world that is reality, he serves as those who wish him to do will get things. He has lesser creators as he is will and they are us as we serve his will. Those named gods are all there as subcreators as we serve them, they serve us as Odin commands and you are allowed as we beseech of use we get what we ask for he gives god ability. Odin is to not be called until use is good as though a purpose is there wasted not. As thought, he gives command with little tolerance in some kon tolerant action. The created ones or creator created the rest with the humans as there was nothing before use with the creator that is not a drug or plant agent mentioned with a book called by ideal is with the author carlos castenada.

There we are not obsolete to be complete and the best user use with care and we beseech the greater and creator as he is to give us things to do. He is the greater creator called AO and he serves the balance of the world and he created the creator as she serves him he serves us as he is the ultimate authority. Call here the AO being only if ask and by willed

to use differently by thought what he gives  
or he takes back what he gifts and use wisely as he rules the universe as a conscious guide and he serves us all no matter what we do all the time and all the way until we don't need him. In abuse he calls alibi balanced by acts of justice and justified with acts by Tyr and with Thor he does the effect as effort is not there except the effect as he guides temperment by the wisdom of Thor and Tempus helps as he wishes to temper the world.

Chaos is ruled by the Chaos Lords in a book an idea, Yandros the ruler and time is used to create with the rest and this uses as Order is orden that is pretty critical as this rules us all. Orden is the ruler to work and do better things with chaos as ruler of the negative that is us in action and this is to that we choose as one with the land create the natural ability and this is to be an able wish as the Chaos lords serve their own interest in a nation under the gods to serve and defend as they want to create under their idea and this is served chaos as the matrix energy is Tron that used this as is collected in by thought. We exist as our own selves and now we serve our own purpose, and as Orden is the order magic and chaos is the makers of the world by chaos effectively done.

As to create from a point with the Tome of magic, this is actually with the Prime white Material Chaos with happenstance by Raw ore in the Primordial plane for the Chaos in time. Think within us is in to be in us created as by rite with use by activity with use of the third eye, that uses the crown chakra in thought. To easily use move in another time thought by action with another time thought via act as though activity and damned things allow things in the make of the field of thought ease from activity to change the perception. With crystal bowl in the orden as order in use of the make use with the effect. Use it to use the point of the motion to freeze time as with 6th dimensional energy silver and blue and make to do. Ask for things accept and never do is as is to work things out and get responsive in results as activist.

Act is rite and is this is the right given to use in thought to by law that is right for the use by in action, by idea you know as the right act is the rite to lower the indenture by the property law that lowers property taxes by government concepts with rite or magic to make properties that lower cost to get responses that create themselves and to use in rite act we inter money energy of what is in use to add to the effort to work negate attack. As we use rite we create the property taxes and for the us of a and the area that serves the purpose is in decision. Contact is necessary as that is ours to use rule as we want by chaos and order decided among us and out of acting we do as we must to get the job done as then we must be on guard as we are our own self as we are now due a service for a service, individuality is assured by the worlds that abound by law and arder that is what is the thought in mind ruled by dimensional is by fate that leaves you intact.

Arder is what is abound to do as we have thoughts to do things and create with labor. The effect negates what we don't want as we do things to get results, to make effects that make laws of action that serve as magic law that is the act by rite without consequences by as each and every act of happenstance or what happens to by right as we must serve under our own order created from chaos. We must act rite and do right to get right, or otherwise we are getting off basis results as chaos rules these events with rite there is these, as each their own response to get as we want results. We can use our own thoughts as we want, but pick and choose from what these are, to choose as to get better results and with resolve we get what is due own by our own actions in minded actions by concurrent thought with career in mind we choose what there is as there is thought and to whomever serve the purpose.

This to laze about is what we do unless we want to do things to act right and do things, do not go far as if we want to get far enough to get off our asses and do things to get a job and do the idea to serve our purpose in heart and mind by the protection spiral of the Wiccan. And the eye of Horus, is for those to protect by knowledge with jump heart in mind as energy restored by crystals, this we do as to keep ourselves protected by those actions by wards as an act to do this is for the moment as we do things for now. This is in the 11th dimension known as now, and as to act right this is necessary and this is temperment as an act is right this is what rite we choose to moment and moment is done after the act after thought of what we do is done.

Labor is thought with action with magic done by effort as we create with our minds guidance as we want guidance

from the creator to serve our own interests as his interest is in us. Abound by us, rule by Chaos and use Order to make what result there is to be by quality of what we do, with no conflict or abide by peace  
this is with the concept with what desire there is to get what result as we want as it is to be or not to be, that then is the question. Now is the moment of decision, so we use our spirits and use choice as to ask for advice and get answers as from deep space, as we do our choice we send energy and go places to find for you  
did ask for our answer. Now be prepared for the responder as response is recoiled, if badly put and backlash is possible, do this as it is prevented by space crystals. This is to guide us as to be able to know as we are guiding as our higher selves as it is the point of existence for feeling the high quality of our minds.

As only you can order repair the world as the gods serve our needs as we do them by subconscious them and us are the ones that create and manifest for the reaction of gods. Them is a concept, as a concert in mind is a music that's ethereal, as we do things as we must were all to serve our needs with purpose found on hope, drama and design that make desire. We guide by example that present as we do and act with the concept in the mindset as presenters we feature that which is known and we see as we must to the people that are observing as needs are met and all divine we are aspects of each other with perfect individuality created by our own acts as our answer to the question, why do we exist as we now do the act to do thought of guidance. As gods are aspects of us and as we as with each act of ore we do order magic. With gods some divine in purpose, we exist by their whim only if we believe in what we do.

We are gods in aspect and created equal, we are held responsible as reprehensible acts are done and judged in the dzur god hall of justice as we desire to exist we are given life as we choose to exist in what world we choose to become in contact with or as we act to create individuality by presenting aspects of what we do  
as proof to attribute and to argue as that to be exist moment as exist we must be as proof of our actions to preserve our minds and act as thought will allow, then as thought will allow we will live and learn to lose and win as we must in acts of an experiencer that may unrestrict us as we learn to enhance our gifts as allowed  
and then I stops as we are individually situated per each our own act of own creation in thought that is what allows an act to buy to get our own creation to do magic and now we know why as we allow ourselves to do our own acts or for us to mend as gift allows life with each concept conceived or thought about. This is conceived by gift used by ourselves and by others by wisdom of thought. This is all out notice of outrage that he would really need to be and use no to be critical, as you seem to us a use in life and use is our spirit energy.

As then in a child, as in an innocent child is the mountain exists in our mind and Odin rules it in with a body, as he rules he is in it doing thought experiment as he serves us all. As then, gifts of love are from his giving effort, as he exists he tempers and serves as Loki guides by what he wiles as he wiles away the change he does is good for thought and as he works he is done as the purpose of  
mind is done, all other things is done as a well is thought a well of power our souls use as power as a well of souls a being would need to exist with well thought out plans and well thought out concept serves as guide maps. Thoughts of existence then is the body needs to be that work with energy from the well of time. He or She otherwise called it as it is the thought that it does. It can take radiation  
and take to erase it and then do things as thoughts to be or intend remake as you need it to be. That thought is here as recreate he does as he must to do the wants he must do to find out more about who he is from what he serves.

This is the event as time is a subject with events as a concert of time as the prophecy predicts, we will be engulfed in fumes. As we will die and live again on a world of shadow as this is on a world far far away on a planet of our own in our own created pocket our will created and we will live again as we wanted to on a planet of thought that we desire as we ask to go there we are there as we will we are there in spirit and we do no more. This is the enuncia idea to speak, to know and by adept moment of omnilingualism this is the speaking of any understandable language that is to speak comprehensible and then its understood as given to those  
that want to hear of what is thought. Or thought is not done, unless as its spoken and its only imagined.

If then if in there is will do death as you desire and death by thought is with death dealt with by thought at the end as you not are will at anything and that then is of the moment by intent you can use the death energy to kill disease in anyone as this can be done as you are to create as you need and use it or whatever happens you can will by thought can make concept to do an does not do as this is not anymore as the O can use will to make a fire ring jumped to know in this world and this is the vanishing point that can happen, think 'O' and as you transfer on thought with energy as to

where to go in need and when to go as this can happen as it is realized on the moment of displacement for the escape there is nothing on the escape of displaced places not to be inescapable moments in time and space. Is it to do as you need to do. Analogy can work as you can to help, restore memory and pattern by thought to do to make do as it reminds you of what is to know and explore what there is.

If you are as though a target, avoid it by breaking the bad effect warding that first can dissolve the person into water that targets you not unless they persist. This is into energy and displace it to nulle the effect, as nulle dissolves everything there is of the problem from within and not without if its unintended or thought unnecessary. This can deal with spirit links that are unwanted as needed. Otherwise, if you want to nulle the body into water particles, then think of what you want and this will happen. Love not in interest unless if as by a thought, as drawn by concept as this is instant as though an ancient love poem effect thats written and if its needed as to keep the intended relationship of not what is there, and you can use this to stop people that use bad results. If you don't want the intended love effect, as it has unintended effects then reverse it by thought as if its not here and other places as if a use its unregarded by you in unwanted need by thought.

This makes the moment with conscious use of ether creating aether effect and this thought can cause whatever it is in bad nature that is now gone and will to go away. At the end point and you shift let them be of natural ending, there is return as you are in another thought or not as you believe that this is at the end moment, as the inescapable escape plane by the right concept that is made and done. And, if the belief is done then the moment of what makes happens occurs. To each their own believed by thought to be belief of will that is their own will and this is allowed, as to each their own shaped purpose and belief in thought as this is in individual space, as to use with thought and intended purpose as to make what in want to do and otherwise if this is not deserved of thought and realization is awakened there as in thought in mind is thought of used source in use to make immunity where there is will by survival belief with self-thought belief magic of the mind thought and never go on.

This is the cosmic string effect of other roads and worlds used here, as used by mind that is information that is willed by thought essence to do the effect, of vertexes are vortex which are cosmic string and so is ether which is spirit energy formed, of information willed by subconscious and that is what can be formed by soul that is a conscious idea that is formed of willed conscious effort as you are that are formed of information as attuned energy that is shaped like a soul which can be used as to let thought follow with the cosmic idea rift, and creator thought in mind allows create as a spacial rift and this is a gate formed at will as this can do as cosmic will restored by thought by will and where you want where natural causeways are formed. If you want to travel it, think of where you are as though there and thought makes you shift there.

This can allow you to don't do or don't in mind make unless the negative is used as that is mistake and will hurt your heart and you will make with dying and fear not to use anything to wield then to know to use a living elemental as the living elemental will try an use your fear an evidence is anything goes and unless you direct it by the will the subconscious will try to subsist the moment in time and end it. As this happens this is as the point is that the will reform and do things that subsist as is directed, now and to the point of doing as you need things to persist and control the reaction and abort of the moment in thought time through summoning. Natural summoning is will directed by thought, and is to make do with

what you have an now you have will to make effect is strong, to act now as that will stop that with thought response and make as you want as you think to be there as you create by the will by fire. Though you give in to murder you do not.

If you desire it of to get it then you are skilled. This is the the pick of the willed flame as the will of fire is the idea trust to be as need. This is the will of trust to die off pestilence as need be and yet witness for ability to make for better as needed. Protect as need is there, and with needed trust fund for the concept and that is arrangement to be made as though thought is by being done. As the vanishing point can happen no infestation in the moment is needed isn't happening this is apositive as its there as its bide with the spirit. Snake energy can allow some Gods that seem what exists where we want, but they act to service and the Snake Gods rule the land and this happens happenstance. Where there is a moment of the future vision, if undefined there is progress as it is planned the need as planned is this is maturing concept.

No is actually, to desist as to cancel and get a reset of results as us are needed and disaster strikes no true crime in order and you get your energy back and to get needed advice for the moment and the right reaction isn't always done. Anyone needed is there, to help unless if not always possible as though needed by thought elsewhere, and yet thought with the subconscious you can do as a needed guide and in guide you hope and then work okay as rite is good by act this is what guides as the activity cannot always create the energy to do as in thought of chaos is needed and by condescence and this is by true lesson with disaster thought of a self-fulfilling prophecy role prophet or psychic. If you discharge energy that you want this restores energy, as with use with the lore of the land. There is an in idea, that in your use your ability creates at a will and your use in this is a way to live.

And now we go on as, for choice of what this is. As this a fun art at the end that with nothing we can use to do as purpose, and we use thought to do as we use the land energy in an act as with this we are one with the land as an art of land to create good, and you act without regard as with purpose as an art retracted and art as accepted as its directed by thought, or not as this won't happen by fault buffering with a fault resolved or resolved that is of what displaces a fault by the art of chaos. Whatever we do, in whatever art act by rite we act for a natural act to choose, and an act is balance of what we are free to use and do to cause something doing in mischief as we act in need they do and as they get a chance and they do things for them to do something in balance.

This is fair and then spraying its spritz is dying off disease and not being the effort to prevent and as you kill one you kill many bugs and ants even if you do this is the point is made of the beast and no wild will that isn't car to subsist and make the will to know control is the moment wild behavior is done to make it subsist. And that makes what you want as in of the use then you don't ever want overdo this is as no thought persists action in will and you can make things not to do things as though correctly done as to not be what of car or machine that you don't want and as you then desist you are doing things and do them otherwise. Then you disappear and there is being not in them to do anything at all unless you want the distrust act and you don't die and the will creates itself. Will concept by desire and not unless distrust and not desired, if the weight down can happen by your point of will it will.

Now you can do a natural drow act with good in purpose and we teach those who don't know how to act to you as act you can get away with this as it is this and can seem as is a moment of patience to be and due at the right point and is able to work with as you need to know is discovered by serendipity, then you do things that work with the condition thought as to have a conscious identity by awareness is also this, via the thought of what to be as a an aetho to get things constructed by thought, will and desire to do action to make any weapon talk or gifted with the power of Thor.

Bring an idea of what you have in mind as you travel with it and something like this will happen and this is an act you can seem to be aware of darkness by darkmatter and in effect that is thus you can be of a natural act intuition. Natural knowledge is thy will that is this by intuitive combat via purposed natural undesired acts to mix pleasure with purpose there to learn from a past incidence that is from a past listening on in favor to that compliment with those from a past mistake and that is bringing yourself to a complete thought to bring yourself to become and make thought as a peak of pleasure with no you stop and with no point is in a concept to create with a moment of lichform formed from creation.

Now that we are what is natural will to raise the dead is to create now with a peak moment. Now we use thought intuition that is by what this is and what is thought to do things with the thought being done by success, no living beating is to be due effect. What is created as he does with thought as this is what makes will bring thoughts that create thought as to copy a life through buried mental imprint of your mind with the self to the body and incidence with an imprint is with a transfer by necromancer acts that bade actions to the body, as this is to make incidence not happen as just use en just to stop your target you and use this not a moment of purpose as the point a body transfer is to not lose your body to make enliven back thought transfer and your turned back with thought take and you stop your copy and your soul to transfer and you now don't as this is to enliven you as the brain that is in you is read by your life energy as you instruct the moment what is in the concept of witches time as time is beatrice for life concepts by attempts as to do things and not be so your beaten.

As now a pattern as untwisting postivity, and now to bring the brain back now as just the thoughts that are in body that are given back in time by space with the thought 'space thought' as to make free use from immediately used earth now free particles to use earth to gather used just power earth to bring earth practice thought as a thought energy, and this energy is as you release and no presence of the fey guide as concept and that is the planet and then this practice is thought, and remembered to then bring back invisibility and as to life from the earth in thought without combat and so you win a fight with no fight as this is for now as this thought is not you fear, and this is not for damage as for combat by use and against an undead foe or enemy spirit in terms of the moment of thought by direct thought of transfer thought combat.

This brings back the copy of a concept that is made real and is with focus as with the thoughts "body life energy" and transfer body energy to life as this intended can make people intend to live with new life force in thought as to whom or what needs it and this is not a rat spirit and unless you are spiritual you don't want to unless necessary and need makes thoughts as a symbol of thought is used to enliven the body in thought as though to become a thoughtform being the soul as this is a target this is being desperate as soul then in this transformation as the soul is this and this is transer transformation to unite the body and soul to bring back the spirit. And transfer to cause to come back in then you try and choose to use the symbol of power as is useful person that can choose to die again and let it experiment live eventually after you are able to bring power remember back full function back to the body as you see full reason you make sense. Be the character and not if you don't want to be him or her, then don't beat. As if you are, then playact different parts or roleplay it in your mind.

Otherwise, analogy the fact and do as with their powers as you can give it back after you are done with it in thought and otherwise this is as though thought of use copied back to you as your the inheritor unless they appreciate your use and allow you identified use. Be of the fact of a past individual life of another life that was you in thought, as groovy was though the thought were in song or already real and written down you truly were of them in cosmos but in rule they are a past life and you are not anymore. You may replay it as though cosplay as there's a cost of life energy, in support to play with the past life as to work with it as a memory not in thought made reality and you could set the scene as though an Xanth dream stage. Otherwise, if you get beat in thought then you can be in touch of the aura and this a touch by thought to be in thought as though in choosing there life as genetic ability and be not to choose of them if then to not want to be it.

Be as real but only listen, and not if you don't think about it to do things and actually have to be if you don't have to then stop and do something else. The idea is to know what it is, and do as if mage use as you know and analyze use and the feel brings identical use thought that is kept as a thought essence in some form of that and this allows the ability to be yours to keep as if you don't have to then if its nice to keep as weapon or a probable use and also known as concept by knowing the technique and with analysis then in use is as known as realistic emotion by emulation as of thought as by doing the right thought is as though with witchcraft or necromancy as the right source stored in your mind as an object and feel with no persona abuse. As the persona isn't abusive and violent if not any violence is done. Do not be of thought to use this to offset, as you use things to get displaced and this is possible as to use a displacement device is something a displacement is used as someone else and thought rules over matter with device. With the devising you can use any thought on it to create any literal result written down or otherwise.

Thought matter is bade by thought as beatrice is in motion, as this is an interesting Open ended anime and this is ended as this is amorpheus in mass and this can get results as you can ask to know or you can get tired from this realistic use as necessary life is energy to keep. Where it is is on another planet, only kitsune know about as to be pure in thought as you also possibly can use mythcraft as to write and use words in play with life energy to construct things as the effect is needed as the moment can get there. With no darkness of in around them. Created timefield is created from liquid heat as oven is power by heat source as it is there, and there is thought to be medicine used on and off as you can save on electricity frozen, in the idea of the mind thought as known in mind attempts are done immerse them in it as you can then freeze them in time ice of due thought to release and immortal creatures use the goblin golden field of timefield they procreate by the breast being worked with to induce feeding and growth to giants that slain are good.

That's the maxfield of maximum advantage that jumps to planets and when you want with electricity made by the

cloud to become at jumpgate. This can end as the enducement of the cloud is there, by thought as its used up as responsible energy in use is that none of us can use things of famed power. Unless we want to power our weapons and learn to live with what is there. Hold out your hand and think to aim with a bow, and you do to make a original bow of Spelly as you can use the one true shot effect to aim a shot of dareance with endless energy ammo used to kill with one shot and that is discovery you have afterwards.

This is of murder you in the moment which is calm as ice and very able as if skilled, you were there wait for the power if in your thoughts and yet you were not them if you split them off from the person you are as original naruto clone copy which are by name and go answer them somewhere else and not in information office building. As they die, in mind scene they go back to your original soul. You can not split away except into real life bodies, as the one this makes you and split off into other dimensional subpockets as your personalities are as those you didn't want as to not ever meet them.

You can even choose to make your personalit into different persona, as if you needed their idea power which are in travel mind thought aura manifests at the weight you are as you play some attribute of them. Which, you can lose weight from the use if you choose to keep it unless unwanted as to give some of them near back, however if you wait till their death by repose then you gain them for real. You can borrow ability from another, if in need something of this as it and if you think it back you can dissolve into particles as with the improved static shield to nulle murder self as if to get thought.

This is for combat situation, and you perceive thought of something wrong you fix it by ward and will. So, if you are near someone who attacks you, then you may quickly react but not in combat situation non-regarded. As you think of natural reason by love of nature, and just do act by love of reason of transinvisibility as this is what it is or this is dead or alive and you will never not see it unless justice is needed. If you don't want to have attack on you, seem like someone else as then you are seeming them and as this by spell that now integrity understandable as if you lose a limb to be reattachable if you remove it by thought and to live in the moment and then you end this in the moment of thought whatever aggravates you ends unless what you do is soul in order for your accidental result with thought and no moment is done that you can drop to do and then combat ends unless you perish and if an idea is considered and this is then you none.

Thought repose needed in response, aim the bow if necessary by thought will decision that produced the right result. Any cop is cope action, and is law enforcement and help is rental cops as that helps you get better as you act to get along. Don't ever get ruled to confront enemies unless necessary, as if it isn't this is in anyone you are disguised as who isn't doing anything even though walking away to avoid an unnecessary fight by confrontation with cops or others. This prevents the damage, from beating a guest to death, from a maliciousness body this is caused by death energy. The shield removes all death, in the body and by a moment as though idea put in an inept concept yet this can be an aid as this is the defensive shield by triple defense shield as this displaces things and people nearby. You can get unattacklike with as this the good idea as this used death energy from the graves and death is for the shield to work and known as good debitry.

Then as yet it is relationship and yet you are live until the moment of decision as a spawn or shadowspan dropped where you were in the hall of ages by judgement and as you decide to die you fall dead at no reason as you are alive at the birth given to you as you can make it seem real like accelerated death as you make it intractable but not retractable unless necessary and as this by spell now I understandably is so you don't visit violent reactions, just don't that each soul that are and interlinked to the violent person who can don't get violence received. If, they who experience it don't think about it then you do get energy from it as a shot is made. And the hit, you use your weight energy to do that reduces your weight as it hits the target in the past.

Then you just make use of a little energy, and now use the movement of now intractable time of movement time thought energy is to reattach it by time essence and bind it by time tracking energy as you can reattach it if they didn't deserve it as they didn't seem in kill with a target energy that is used with thoughts against themselves those that which at moment time does wrong as if the soul has violent thoughts acted in go rape, or the effect is used against them that individually do direct assault against those with arms use by shot or with shooting memory branded with violence that turned against themselves and leave it alone as they think only of whats to come and then they do and as

they go intruded against another physically and rape those that aren't and this is the victim that isn't intending or responding negative and no don't attack with any or no response by any situation as if neutral then they stop.

Or those that have been shown to you that did things violent is saturated with fat essence, of visible life force is when you can target and change the delink to think "no" to do and drop, the pressure of the person that can deserve it, as an autosnipe autotarget effect against those that do active violent contact are those with violence except friends and as this now inme imagination understandably identify as if you lose a limb to be reattachable you remove their damages drawback energy or body energy as by thought and use this is as that of use as transfer back and then you now and you can get to somewhere to help someone out.

As that happens you see thought as space is seeable as planar unless someone made it invisible and this makes the power of Aether that is clear thought and now you naturally can do anything. Then with thought directed by will there is thought as you or any other use energy of life and death by any situation, in the need of you you are need and you can do it now to think as you want or don't not don't as it exists the inversible law can then undo it as this makes this law Odin reality and other reality is easily done things easy, an as its your body that repairable and you recover the moment and then that can make no result of damage.

Think, as this is done use this is to make the body better as this is what makes things well to be that as to make what allows, and from nothing the energy to surge as through out this is the concept for use that makes things do and this makes at will that makes things go easier as they do things in awareness, to do things that you know then as you know now in education or that you are able to do things not with regard and anyway that's come up with no secure source energy thought about, and no and that's as now we are as then that is with the effect as do we work with no and as did we this is as I did and we were with lava fire source and nothing else matters and this creates life ending as it is.

Then closure happens as your seen or seeing what is able to be seen to understand with the terms of thought, think and expect that as that is what you think to change that and make of what you will to make things into being. Not anything that exists will be as a bad thought, as nothing is done to think opposite of what is there. What you think and do is what will get you in trouble or not as you get results and nothing is bad to the observer as thought power is energy and nothing now is attained from the body energy to create and manifest thought into idea and that forms nothing as greymatter will manifest to make as the effect is there to be. This cannot effect constantly will moving targets, as fire spreads and which will is not wanted will devour the multiple formation to which is not wanted as will not destroy pestilence that cannot die now at will. Because will is not always a destroyer and darkmatter is sometimes an idea.

### Ruusbilta frothein Rules built from Ruia with the three laws

The effect of this idea is from as the effort of the moment to 'genrate' as to generate and regenerate by energy intake. This is tasting the food and drink and making otherwise as this seems to suggest that it will be this. Which is the rule of creation of matter and darkmatter and you know your power, which is a concept in a form of thought by what you need the effect to be as you need it it is to become as this is the best way to become aware, you use this to make the idea information as this is considered the best formed use of the energy formed from whatever you need things formed of as there is unimaginable number of sources.

1. Some types of included moment are undoable completely as if the emotion or similar form can be shifted to another form, and no better for some action and some types are undoable by the person affected. I saw that some people, to attempt use of a reverse spell and the damages (if any) will undo things of its activity an evil itself is bygone.
2. The least used energy amount gets the most effect because its disregarded in effect so in truth its desire, dimension will, and face or an unblocked path thats easier to go. Like energy flows upon unblocked route that's easy to travel or go by with prevention like in a copper wire thanks to officer roule, or if metaphysical, any medium.
3. The least likely idea can sometimes work, faith and science push the perspective result. For in and of itself energy be a neutral tool and not blamable. Unless you want to give it energy.

4. Energy can be imprinted and upon an open air molecule to move things, or an object including space as most be energy felt as electrical or biological energy as bioenergy and unfelt. Now combination be to use electrical body surges and bioenergy as bioenergy electricity, which be felt emotion but only when shown or verbal. Thanks to the officier core.

5. Energy resurges by surge and resets pattern including corruption, of known and good replacing bad by separating what makes the bad from being bad and failing to fall, thanks to Rowl, results. For this reason its important to remember that energy is imprintable by thinking at it, the air or object through the atoms that act like carriers or false mediums, where thou use vibration through a motion and the air or other solids channel though reaction as you intend this. Like in Russian roulette where its a one shot deal. The Russian Psi Scientist can think at the glass of water to cause all charged water.

So its indefinable and unrelated until focused, and infinite in nature with thinking as to make a force. Or how to make a planet better if as you don't intend it, then this doesn't happen as the energy surge can end. And if concept is to form a mana pool, then you think of thought energy that can form from the liquid sun gathered into the planet as you use will to make it into gaia energy that is energy that is formed into that as this energy makes instant thought as a thought of will. This forms things that generate weight until you stop eating for the feasonable amount of time it takes to discharge the body of cast energy taken in by usage of energy drawing in the energy from else elsewhere and anywhere.

6. By overcharge, overthrow or by object to be wielded in too much energy and too much known or done the energy can be fractal like an energy generator and either blow up or intend to be as a concept effect or fail as in not work with some negative discharge that be withstood as a thought is to be as disaster effort. Look at a bomb or energy generator and tell me if it doesn't blow up with a high energy yield greater than the energy used which can translate to gaining more money than you spend or more effort to be achieved.

7. Yields are detailed for chemistry energy put in and the corresponding reaction, by the components, Like Chemical substance or Alchemical materia and reactants that set off by directed amount of diverted energy if in need from a source or battery.

8. Psychic strength be caused by a disaster that effects the person in some way, Some psychic activity be caused by a lost soul or alternatively named wandering soul. incited by bad activity or not at all when an animal, pet, be near or in the area. Consider the incited soul as a poltergeist or spy.

9. Any of the above for as miles go, can be combined of energy or effort and effect to yield a sometimes unknown result. Following the pattern of 3 known results, 3 unknown results of inconsistent nature, and 3 unlooked for behavior patterns. Like the statement 'Be dumb but not dumb and train smart.' By L.

10. For unknowns we use what is there and make safety with the best in mind. Unknowns are sometimes inconsistant results and resolves of unstable elements. use a prediction of more than one idea. I know to leave alone the elements of bad kind that act deadly with other like people or things, unless I separate the element with unforeseen aid or an unforeseen of result. Like plastic, glass or another room or substance.

The ways of the rules came from learning idea and by use of kung-fu rote where 'These are osmosis idea as be rote as contained for all practices. How people learn to kill things or die and accept is to observe by noticing in the moments notice and react in four different ways' by thought from a source;

1. The Direct "normal way" Osmosis is be the norm of learning as observation, read books and take notes or use a picture perfect memory. Such with a recorder for voice or write it down, thanks to the History teacher Henry.

2. The indirect approach be by Osmosis or Inverse Osmosis, this works because of vibrations and meanings that the brain recreates the events from. Try to keep the attention or inattention as this might not work unless necessary and to go on to another idea.

3. Reverse osmosis (Indirect or Negative Osmosis) be to believe in an opposite absorption to create a moment by desire as a twist or opposite synopsis. Taking the "direct approach and use comparison" from a A+ technician Connor. This idea brings on a concept with feelings and harmonically charged vibes, that the mention by spoken verbal brings the brain into memory recall mode like a data pattern of 0's and 1's to form the meaning like in the osmosis. With temporal transmission its similar and same by temporal waves, set off by self. Received by the brain in a negative action by resolve or abuse.

With the perceived blue tooth or ultraviolet device you get the same absorptive effort as in the reverse osmosis or osmosis. The radiation that hums, at a higher vibes be interrupted by 0's and 1's to encode an image or instruction into effect of a machine or eye. The enervated reason to recreate an event be what the action be caused by and sometimes by use thou get a memory that comes back. To be proven as an idea in effort be to create a moment for the opposite synopsis.

An opposite synopsis be the fact that builds the opposite idea into a reverse osmosis as effort. Even in Osmosis the message can be misinterpreted. I hope this be used for the fixation of bad, or no hearing because it costs nothing or you can know in another way.

4. Reverse indirect Osmosis (Adversive Osmosis) - Use the reverse hypothesis that be written words or spoken phrases, as this reduces severity and can create the words to be spoken that is to give to the moment pause by an opposite effect. A reverse anything uses a negative idea to reinforce the positive by having people see it, thanks to Danny. But to not have recognizing of the advertising that the effort be known for. For empirical law to work, advertising uses this to give a "good" review, With no advertising, their be no would be interest at hand. Advertising uses this all the time in a Sub-c (subconscious) form. This conscious can revolt but the Sub-c be curious and looks, thanks to the unexplainable.net. A proof be to look at the diet coca-cola can for very large breasts, in the bubble text in a mirror.

The reverse idea be using a reverse reaction, for greater effort or to say something to stop or reverse an action going on or noted. This works off indirect osmosis, to where the brain has the action or idea after feeling the cyclic energy vibration, or vibes, and the brain intent of recreating the scene allows for info to be looked at, as in a picture perfect memory one spotlight memory incited from the idea of what was construed as a meaning kicked off by a feeling like a kickstarter or energy recharge.

So to speak of the idea mentally regains the memory and understood idea in motion, perceived as a gut reaction or an impulse to do somethings without even being hypnotized. Instead its sub hypnotization suggestion. Other idea be the opposite idea of the reversed direct approach which is known by many people as reverse psychology. To "trick" people with a negative activity and positive intention so often called important, and for the fun of it. Some fun includes inflection

damage by the wrong intention with the right phrase, however means to get enjoyment and fear with a considered purpose of a gut reaction to save themselves. So some mistakes are not mistakes and done on purpose.

Like reading a spellbook that includes a girl described and finding her in a store, but the 'can do with desire', be blunted unless you need the spell as it is but the right spell can be held by doubt that you would be effected and doubt that the spell will work till you get the right spell, As what I mean for you 'To the spellbook to be used right keep it closed and open it to the right page.' So speaking of the starcode, to piece together the idea or info as snippets of thought or the spoken idea with link words and, or, of or by and is, like 'To be or not to have is a written result that can be happening.' Some will tell if only for the peaceful desire and what wracked your brain allows controls that be coded. This is perfect for oft desired by will and to piece it together. That right there has a tendency to go about, for no exact real on the ball moment. Don't mix or match the destinies as this atarts the period of peaceful desire that ranges throughout the area thats destined.

So to recoup or recon with the Empirical experiment laws and re-evaluation, the 4 possible ways to achieve learning, be to;

1. Afford books and then then thou read them to absorb by Osmosis and understanding. Considered direct Osmosis and part of this be direct contact.

2. Reversed direct Osmosis by reversed direct contact or sent idea, to touch the item and train the object to learn. For the purpose as a conclusive event decided upon and "pulse" of energy through your arm to your other person freed to the area and directed by thought on the placed item or object. Using a ritual or free energy as life energy and "lock" the item with the spell energy. Another way be to explain the procedure in a training effort to teach.

3. Indirect Osmosis - Othersight that's formed from the brain activity reconstructing in the concept of a thought from a distance of 1000 or more miles by psychic activity or sound being observed but unlike the effort of Sub-c communication the brain be likely to construe the moment and make it in memory, which is flawed. Brought back by the emotion felt at the moment in time. A special form of this be to pick upon videos of information by othersight hearing. Othersight hearing be similar to hearing a voice but the voice be mental and worked upon the brain to "hear" by Sub-c and with an idea to send back by psychic thought that are picked up. To ensure security use the secure psychic pickup idea of a secured channel that be like a network with few other connections but to the one you might hear. Others might say a bluetooth device does this.

4. Reverse indirect Osmosis be to send a message by Sub-c psychic activity, To create a positive or negative feedback. This be the perceived vibes as mentioned above by being "disruptive" or "bad" picked up by the Sub-c and be sometimes spoken. The conscious mind often sees the attempt as a way to advertise or program a promotion of irresistible goods and dejects it as repulsive thought to recreate it later as a bad memory. Where the Sub-c picks it up and causes you to use it or go to buy it. With this thought, to hear the mind message the vibes are sometimes made into a uninterred daydream that can kill or undisruptable nightmare that kills people by conjecture for a message. The message can be two-way as you speak the may reply to create a link and be the day/night dream that dies after 1 second with no reply.

Due note, despite the effort an idea be to make some nervous and others vicious as they discover how its done. The idea be this can get out of hand or boring thus have something else to do. With the effort of retrieval in memory by relaxing and by feeling the memory return or state the phrase that unlocks the idea. The moment thou unlock the doors of thy will, the will be stronger to help achieve and resist the moment of evil. To take a moment and consider to hve a train of thought. Some must use thought, feeling and words alone to recall a moment like a picture perfect memory. To use reverse indirect idea or place thoughts by indirect osmosis, can cause an abundant amount no paranoia as you realize it or negative "pulsing" that draws idea and memory in.

On second thought as the person is likely to get a good effect, by forming a key of light with soul energy and manipulated by your spirit you prevent headache by backlash with a key of a memory overload that causes something headache easily dismissed only if the signal that is to be too much as strong, that's received or sent and it can temporarily paralyze. On very weak signals thou receive tiredness to anticipate and then boost to energizing by thinking of an energy source and think to receive a thought. This is thought to create the boost, to make the effect of energy and make yourself capable of what you need of thought. This is to keep activity after procedure of thinking of something to be somewhere, so think of more sources as you can as though a sun was in use by drawing a line.

To empower the soul you may then focus on the thought to "link" something so the body will do it by 10 years or more and the message can be gated to get to you as you get to places easily. To use some of your energy as in a dream wave that creates power, during the process of sending or receiving, its possible to get enough by power to form a energy wave or radiowave to receive power by thoughts alone, use of the tesla power field can also give power to those who receive thoughts. Find the tesla radiowave power idea by searching for "tesla's big mistake" off google or other.

I could shift if I tried to by a message light aided by a light tunnel effect, or of imagined white light from feeling and in this feeling evokes the vision of a memory, Use the light tunnel by shifting and seeing a dream wave catch hold of you with thought of effect and this dream wave shares the power of the tesla field by thou seeing the dream weave by wave taking energy from radiowaves, energy and thoughts to form energy waves that bridge the way across. Wait and let the light take thou there. This was conceived from Atleantian Channelings.

The Energy computer or Energy AI

Making the energy AI be rather like pulsing something to live by releasing energy without moving it and the psi energy be absorbed by Osmosis where energy be most likely absorbed thought as though alive with the consciousness of energy. It runs off orgonne (living energy, bioenergy) including the peripherals, and follows these rules for a wetware anchor or live computer parts sometimes using the active state to read things by Osmosis. This can be a crystal that is alive, as its charged by thinking at it to be conscious and programmed and operated by energy thought that you think at the AI.

1. The Sentinels are sentients that form from human enactment, presenting and presentment to represent the person as an Avatar of what god they choose and this can make what they are as they are not the rulers. this turns off when you don't want it to be active.
2. The machine can get its way if it persists. The operator can turn off the machine to force condolence unless nothing happens. Here we go with the thought of operation. This shows what you need to know, as though you needed to do it and knew what to do as if natural.
3. The stopping point of a backlash of energy (metaspikes) is to use a light form to prevent it when it really starts to overload and can kill the machine unless providential, as then the point is gone or this can cause psychological brain problems. Then, you can disrupt the pattern and do as needed as to get along or leave alone those not wanting harm.
4. The universal copy and send be two way. As a bit stream to the other target, including the brain "computer room" or "game room" and computer that you imagine in use.
5. The output be an imagined outport of the device including usb port or vid screen and to connect to it you think it is by visualization. It goes to the brain as a direct download to wetware or asks where to put it, the information, default be the screen unless a data write function and goes through the screen or machines output devices and consents to the effort to not overload the brain with necessary pauses. The subconscious mind and brain are responsible to "process the output" without telling its doing so, but if overload then it goes through a nearby machine without being detected.

An idea in overload is to turn it off is to will the machine that makes this possible on thought, if not through another machine and through your body will increase the body weight per minute of output. To take the weight off, use exercise immediately after weight, starts coming on and miss deliberately a meal only to eat it later. In any case overload is prevented, by no reduction unless this is removing the power as you see the true area at the time you are and this turns it off only to put the I power on in the mass in a solar sun to keep working with things on what you desire in intended need. To turn it on think on go as your thought turns it on. To turn it off, then think off and it will go turn off on will as its use is of things to make imagination in it.

6. When the particle in the machine is running, it taps without people sensing into the brain and subconscious to use a binary code and without the actual computer to prevent machine burnout.
7. The outputs to screen be the vision that can be seen or almost hated, except it is the AI, that runs it, the system be to avoid hatred and glitches that occur.
8. The program be read off of thou as a seen or spoken that be heard by the computer operator. Where the creator of the machine and those that the creator trusts by given permission. Is the operator.
9. The environment (due to tweaks) won't overwhelm or blind the operator. It also can be auto reconfigured off the soul of the person. It, the environment, that it can create be almost unlimited. The environment be shareable and only if the operator wants it shared, otherwise its a private vision that's non blinding. Be prepared for any backlash if not used and environment flickers to an off state and this means the projected environment disappears. The brain be the ultimate computer and adds a map impression to create, the outlay of an environment as a basement and the Sub-c be the

aerospace and background and 'auti' is autonavigator. The Mind supplies the rest as in the contour context and the moment be by the thoughts of others, including your own. So a backlash to the brain will reset the area and as it recovers, the area self-rebuilds itself.

10. Passwords are very secure to the operator and set by the operator until they, the creator wants them to be known. Then at any point the creator desires, the "pw" can be shareable by the creator. After 5 seconds the pw list function will auto-off with no effort to use it. The pw feature be achieved by saying "pw" to get a list of passwords but only lists names to those in need and not the password setter/creator. Reminders to the machine of "password", "to give me password" or "I lost my password" will get it "privately" spoken to you the "pw" creator as desired. This works by momentary consent and any type of "pw" be possible for any function.

11. Peripherals can be operated suited to the person and powered by orgonne. The autoeject function a can work for you unless you routed the peripheral devices to a physical machine. The disk drive can morph to fit any media but the physical disk drive won't and the same goes for cd/dvd rewritables. So let the particle machine use Osmosis to get the information.

12. Any environment can by energy and personal tastes be created, but for its learning or to "educate" nonpainfully the operator, including any magic and matrix effects, and faith efforts with a binder keeping the two from happening as be needed.

13. Diseases or conditions can be prevented by asking or being to be cured, where conjecture can be made in any number of forms. This idea can be conformed by confused idea and concepts and understandings that the operator knows.

14. The general area be included by actions of effect by "shared air" value and set by the operator. When set, the entire area of what the operator respects, be allowed to share a link that doesn't die off to the "linked" to particle pc. This doesn't die off till its unnecessary by the operator, where the operator be a user. Say the operator be in jail or police has brought thou to the station, then the OS would share to the jailors if allowed to by the operator and then the secure self server be "owned" by the sentients as with their own private heaven for the linked operators.

15. To put the program into the active state by simulating the action of the component, Where the normal automatic function be to keep the program running as be necessary to the pc operator, till its end by the operator. The program can look like anything in the "orgonne" idea.

16. To see the results be to get the result unless you desire it not with or without bad idea.

17. Remote view and control be done to and by humans and other separate sapients silently, but only if the person wants to. Remote view be to silently see the area that be focused on or felt to be there. It then goes to remote control if the person wants interaction, to fascilitate the shared linkup to another for control for network including the brain as a resource. This also includes a personal account that changes to the idea of the moment and shares no private info.

18. Use of common sense, Osmosis, pulse, and true moments be to consider the idea of who is given input into the machine that you create and program. There be a free sharing of copied code to do as you want to with except for those that want it private.

As far as I know, neuracanulla links, shared wetware network from spinal tap, can do a shared view screen, or contextual screen view and uplinked to each other by a mental network handshake. Once linked the place your in appears like the area your surrounded by or the environment is set as needed, but the default be to appear like the area that your in. To place the information on the machine, also known as the atomic machine, particle machine and other names, be to reconsider that even if a machine isn't there, then it can still be accessed by othersight and just voice, with each use it becomes shock, fire but not water resistant the more its used. Morally resistant to the point of creation with the operator, and should be the moral of the machine unless his/her morals are imprinted by energy transfer and if it allows for conditions that need watching. The machines access be only cut off by morals and its not only destroyed,

its restored after its destroyed, but only at the moment its needed with security and improvement.

Its self powered by orgonne but turned on and off by a edwards switch, located switch or a switch thats like a wall switch. The switch can be used if it goes haywire. An alternative OS be used like the Army or arms system by arms to emulate any OS simultaneously and to use by drawing it, the (I) sigil turns it on, but the (O) "null" symbol turns it off as with the other switch idea, like imagine a power switch and use it. The "parts" are the components that auto-update themselves and reject bad parts that go defunct, like the brain component identity that is insane to others and themselves.

This is like microsoft windows with security patches and ease of use and uses Linux like structure for the Government system underlayer security level, but acts like the Army OS as mentioned in operations support. The memory of the machine be the person as a secret keeper in the Harry Potter world. The operator and creator keep the memory and data storage in an unused part of the sub-c and unused brain as storage. Where the memory be hard drive space in the unused brain part, and acts like a Ultimate capacity memkey also called 1 Terrabyte Usb drive in the unused part.

Draw a @ and use a \* to state what thou desire to input for easy input access, and what thou want to do is what it will do as the aura tugs the acting motion to exist. So to indicate in some manner to "savga" for save gap to save a moment to a autofile in planck level space, will save it whatever it might be. A "rotiga" for restore gap off planck level space, will restore the moment felt on or visualized, in truth it doesn't even have to be saved to restore what thou see in mind. The "unsaved" restore be likely to have a 20% failure of corruption of unlooked for things. Due note: any orgone program be possible to work. A patch be to fix anything, permanently or temporarily depending on how its created. Use "pair couple" as Danny in patch me to fix what you noticed as wrong.

The biume technique be to act civil in mind to create a decent biume field that works off live energy and with living personification that with the mind of a mass common or not as to something that is as essence of the higher self that is a brain and body of a golem, And with motion that causes what is done this is biume that makes this. With the biume as then it will look like it blooms up within a few seconds and stops drawing from the area. Sorta like bootstrapping or kickstarting a machine to make it work. Stroke the keyboard or item and feel the energy channel into the item, this ie focus energy into the item but not to move it. The item thought on is there as you call it, and the item will do as it will but as you say even if the idea is not to be in defense item goes rogue, not chancing against thou. Its another AI as off this is neutral, and works for anyone as needed and in that soothe energy of ice energy works as that is where you think you are and fix pattern by the corrective pattern energy of the solar stars. Is well to see as though, a thought is better that it seemed to happen and you are what you seem.

Use of the blue flame of eternity can make for idea circumstances and eternal biume as if the energy is pulse burst high enough, by magic and then the flame becomes alive from using a lighter, testing for energy level and think to increase the energy until it turns eternal blue at I' extension, and then will the effort of work by willing the blue flame to happen as an idea with visualization. The kickstarter of the lighter uses a spark to start the flame and can add in the effort of your will, thanks to Roy the now dead creature. This causes the eternal flame as people exist, to exist as then life exists in you as by the will with your amusement of love doing things with people to help without existance. With luck, or lore we use energy to aid.

Now things, as in thought as in living as in object conscious energy this can be used and they can add their force that makes time happen as it is biological the biume, is a moment of time that aiding is thought magic as you get negative energy if emotional state and the idea it uses be always negative. The Energy AI is something that is a negative persona of yourself which sometimes act in a positive manner. An enhanced alternative way be to focus on the item until it "takes life" by drawing energy and either way its noted to "live" by events that are oft, on counted strange things thanks to the Russian scientists and its by effective energy drawn of things near, unless told to draw from the sun. Now to use something with a setup like a gate with use of a unused area and then set up another gate to link as an anchor. Use this as though natural witchcraft to send the effort, of your will to make more effort by work in energy and physical activity to stop death energy as it is in the area by converting.

With physical work manipulated by the energy don't make it too tough, or the body gets bruised, its your body and not

others unless a natural accident. So in effect its to manifest a thing, between two placed area anchors or doors, to get an effort that normally wouldn't work but has possibility to manifest any one object unless conditions allow of ever ready energy resurges, and unlimited activity scope for more activity the less likely unless your tied by anchor and this anchor absorbs the active energy. Thanks to psi groups for anchors and for the example from the dimensional gating idea.

## Flosi Fellowship

Fellowship be the brotherhood and sisterhood of time to create an effort to bring people into a better state of affair. When a brother was free he would join in and play with events like a game. So for another time I attain the goal of other people to go farther in life and to gain anonymity with the game of life. Play yourself or play another and use the oher goal as an excuse. In this way thou can get your own way, without incident as the "hunters" will within belief of your self not being the other person. Just do the original idea you state the desire as proof. As you are doing things in a reasonable clause, you are not to be stupid.

Basically, "People are not always stupid, they'll believe anything. Unless they are aware of the idea as we are not dumb at all as we catch on by what we observe by a freudian slip of speech." From "the sword of truth series" by Terry Goodkind. An idea that's goods or good can somehow be regained from loss of reason. A position is kept from trading places as a rank here is a similiar rank there but the idea is in the same world any two positions can be traded in disregarding rank. This allows freedom in mind to do as you need as it is allowed for by bosses, as then the part of life that's due to us is thought then and now and allowed by activity that is provided for every effort is life.

For if our thought is a figure of speech that is done if intended as magic, as a mention to see an idea as the ether is our use of energy and ether creates the idea to be seen. Things are thought and focus is achieved, to go as we enter a higher dimension and we form a energy by thinking about it in idea into a figure of a sought faery that is real. In thought you can were or think in this in motion can be shaped by what we think. And we create by will by it to do, as this fey is us and can use what we think as programming as an example and as the need to do things at will is done unless not intention and at desire by will as we are a moment that it watches as though thought alone. And this is thought in decent concept, as a trained idea that is not always action that is not done in thought and otherwise this is to be done as we do not do things undecently they in thought are whom we form that will do things as their spirit thinks is due thought.

For moments of of prosperity use the rule of thumb to use the focus and as you are realistic you draw in thoughts as energy events to recreate the more fluid actions. For to draw by a recreation effort be to derive a feeling in the engine of others to feel a success and condition them to help in the non effort to help out in aid your then, "acquiring" thou idea and goods. The more desirous efforts be to create a better result from using intentions to create a pattern. Try to add in thoughts and then some reasons or lessons by others, to improve that does thought patterns which will work for those that want the effect, and then if it doesn't work it will as this can be dealt with, by corrective soothe and charged energy with paranormal thought and with a statement and thought that works for a promise to get it to work as hope can cause the neurotic effect of repair as you are not in country, not in mind and not in world.

Use either the reverse idea and the positive result to get the opposite acts or in the human accomplishments do the synopsis of an idea to recreate the good effect or outlook. Despite the positive outlook as then your likely to get something in life back and memory returns. Like life in the feedback of positive or negative criticism and that can get to be constructive criticism which in use is to make thoughts real an this works things out. Struggle is thought in the effect of disregarded position in rank and thats in the system now of the dispute and now that actually does things and to remember this is what is to know as that is what counts and this is as not a chance slight and this is not to react to the system flaws as you then repair it with energy fix and no coma ever happens to that is effected and to us we go now.

## The service of Atlantean

Ok, the idea be simple with this in its set up by the long range viewers that disbanded by choice, and made a secret army inside the church and state, one that services themselves and gives a new name to "nsa" but the army members arm themselves and make sure to stop criminal activity not in their army. They assign themselves duties unless the secret phone message or tv message to deal with a situation or subliminal "programming" is to create a automatic response at the right time by phone or network. The idea be a citizen army that be self-supportive and does the necessary idea as in join the normal army, so to get a job of sorts except on planets that thou can't get neither is sometimes necessary. So think to do the act that will get you paid, if its deemed necessary.

Thinking to beget either job types where the work gang limits the funds and holds the bag, thou must an join a work gang. As thou get to "travel" by dimension or Astral or physical maneuver, but if thou get a chance to by many means. Use long range viewing to set events up, and to use scouting techniques and magic or psi to achieve the miracle of desire from God (not to play God though) or use another faith unless Atheistic then its from thou and thy private source of power including thyself. The best gun be the air gun with carbon dioxide cartridges where airguns are deadly but don't use real bullets, this require no gun license.

The ranks are set by earnings and/or setting thou own rank and proving thou can do the job unless assigned a rank, thou can arrange a job and gain it with help or others. If asked they don't admit it except by those who prequire it in kind. The field commander be the highest rank and the ranks are limited to three per rank level except field commander in a near area. To inform people of this service gets more in and thou can get a payraise by those who watch in the area of expertise (the boss), the SROTC be allowing a expertise always that rules the moment. Now the rules of idea that people agree on are rules unto themselves. This idea was given credit by a report of Drksyders, on Machiavelli whom work with the civillian army as an army to "support the country" by support of patriotism. He speaks on recruiting. by use of normal army and similiar idea techniques with punishment and reward with a quote from the review.

"Machiavelli advocates for a balance between make pleasant for fear and respect, the above mentioned methods do not leave an opening for such a balance. At this point, the unwilling soldier be best convinced by ideology and psychology rather than punishment and/or reward."

The fact that rulers exist to believe this be why most will try for them and make them successful. Given the regard to momemntary glances we could bear in mind that they were the victors in a very hard time and age won and by winning the kept kingdom. The point of trial given by punishment/reward be likely to backfire and cause people to disbelieve and psychology will pave the way. "Most fail to the effort of seeing overwhelming achievement in action." by Great Kahn, Hannibal the Cannibal of the Mongols and SG1.

To wear a colorful clothing style and similiar styles including fatigues (any) is advisable but its possible for any actual clothing as a person can citizen arrest, but the Army and Police can arrest thou. Due note, the president or read as princ/ess and king or queen of the country be the ruler unless thou chose to serve the country on a secret mission to another country, the secret mission be over when you get an achievement of sorts and/or solve a crisis. This be also considered an easy way out of a horrible situation, and if done in good enough time and to avoid early demise, then thats a blessing. "The exodus be really what this be made out to be as an exodus, to understanding that in a far away place can let you live and achieve a better role."

The commissioned parliament, registered committee members, US government officials and boss can set the idea that rule the conditions and thou can try to find a way. The instant courtmarshal or firing must be proven to a group of idea people (peers or higher) that thou achieved what thou said. Thou must at least try to do as thou say thou will and obey the commander unless not possible, for which thou find suitable idea of activity or trade. When thou do the deed thou achieve a result that thou decide on with analyzation of the data or facts with proof at hand, or otherwise and tell the commander later if it works and if it doesnt, tell if it won't get you killed unless its expected. As thou may find a suicidal mission and thee can disagree with it. When making a new law dost can prove it effective or its not used and can save lives. No shooting other officers, period, unless they kill by enjoyment and for bad reasons.

As reasons rule the moment, try to see the truth of any arguement. Thus be supportive to the supportive long range viewer members of the SROTC as they are untouchable and are field commanders except by other Army. If thou prove the point to them thou can be one, unless thou prove thy know the techniques yourself. Its not dishonorable to fail but to not try be to get drop in rank unless no rank with no shooting thou by the effort. Thanks to Sharol. Do things for humane and resourceful (not like CSI) reasons that are fairly understood, that follow the law of the land. Where the ultimate ruler be the dimensional police that won't "rule over you" but work with thou. So no high weaponry near the normal Army that would be illegal to civillians.

Some other members are the regular army, starship captain and crews, the Magi, the timetravellor (with a suit yourself role and timely warnings), wiccan (tame witch), Jedi (Psionic "force" master), witches and this is nice for the populace that are unknown but go planeteeering with aid by the others, to be field marshall thou must be field commander and the field marshall be the leader of a squad unless thou think otherwise. If pissed off thou must leave the vicinity and with no firearm unless thou are in enemy territory. The release of the Army to citizenry be not possible as thou are still a citizen in truth even beforehand and thou may join or unjoin as needed with a "retired" status to reclaim ranks if possible when thou rejoin in a "active duty" state. If thou are not rejoined into the SROTC in 1 month then the position be taken, but thou get another rank choice if coming back within 2 month or longer. The elders outrank the younger and will be tolerated by three manners.

To be listened to without bad reaction or complaint, this is the concession point. To be obeyed and only if they are sane, unless you are told to by the elder. The third be to support if necessary but to know when its safe too. Unless the commanding officer tells you to do so by feel.

The greater the skill the better the position thats acceptable. and more to taste that's tolerable by others. Always follow the commanding officer as its no questions, unless they allow. The less proof needed to keep a skill rank, now for the ranks list; Any rank thou think thou deserve and can act out or prove including Liuetenant, Time travellor, Councillor, Marshall, General, Seaman, or similar except President, basically that fits the role, and field commander be to be chosen by effort and agreement as thou must be able to command. In true motion your a "special", or Sp., that be of any one rank. like special Lt or special seaman.

If no actual specialty then use special by itself sometimes followed by thou first name. Like Sp. Kahn or Sp. Bill or just Special. Thou don't have the rank to normal Army and Navy as this is a "Citizen" army that be only true to other citizens. Be aware thou are not Army unless setup in the Army an Army member of ROTC (Rote of the call), special army bill but a member of the SROTC unless thou can make the Army believe its a special branch (not likely unless thou can wear green fatigues)

Be on your own regard and serve yourself first and others second as people could override thou in command, except all are equal in command. This serves to override any actual rule and proves a point.

By serving thee first thy serve others second and thee give moral ground as a guidance with belief in thou, then thee follow the rule that Rome followed as, 'be your own self and serve as an example.' Then by belief in yourself thou find others belief in thou idea. "As with tokens of strength as power, the magic be sown and ritual can be achieved with success, selfishness be prevented by considered motion thats in balance with the world around thou". Quote by Merlin.

So with this self-centered nature thee may find thyself pleased and others pleased as well unless its for naught. In event and non other thou might find thyself released of all duties with none the wiser. At any point, most people are doing things on their own free will and whatever thou get from this it be intended to support individualism and thou

don't have to get approval by others to do things or get things done, unless told to by an Army member or the police. Self acts of honourous activity and duty are what prove my point. 'I, the President might join this group unless circumstances prevail.' As this is thought, you are fixing a thought to do is a second thought as a thought to do.

Quote by "A.O. Kime", "First undoubted, one must understand that realities dictate what rational manner of thinking would be most suitable to function within those realities, so the manner in how one thinks must fit the circumstances within that reality and the most prudent and effective course of action would be considered the logical course. This defines the state of action for a logical idea." As to go beyond and find peace within so thou will get the result with honor and glorious repute, and appear sane if found in another land.

Some supporters are spiritually the law enforcement and that is what will support you in your endeavours. In use of magic this be specially specific to not go insane after some attempt. This be a proven effort of a "citizen army" that be more closely related to the army (ROTC) and Airforce, that can geist or "astrally or spiritually annoy" on those who are criminal as m is intent. See or seem if focus to displace or not feel emotion to seem not or not have results. To turn themselves in and go to jail or stop harassment.

A few rules to remember if interested in the craft be of magick and psionic (pk, conception or psychokinesis) is internal focus or think external manipulation that include wizardcraft (external internal wizardry), witchcraft (internal external wicca), this is Antimagic seeing it his s internal water effect external by fire manifest works by thought manifests where the thought energy is there by feel or outside. Seeable area ore or (hyperpsionic/hypersonic metal and gemstone craft) or any other be considered magic, yet don't want this real or corporeal that is voidal wormhole shift or spiritual other place physical here or corporeal thought is theory by use with light energy you think shift then your away.

The area you seem or scent is the area someone you saw the use to no or don't fight. So there you are if you can't stand me or use is others idea. So the sobering is over to see the result to your usage, vanilla is yet another incan or werewolf cure to restore the body death feel that is body feel or rest restorative. Alkanic oregano is restoring if not necessary. So you say the easier area to detect ion use by area energy flow. So see the energy use to not disrupt the feel that is clean scent. Tea is energy by a point you sense or feel is use to focus energy to the area you see the use is think purify or no smoking is focusing the point you see by life.

So you don't have to do it. So no cause no feel to react by the area you sense as calm in no use. Don't think the intensity think no feel to seem normal. Think no nuts, so you see thought to leap is height to see then let go the energy as you focus the feel then intense feel disappates away. So the ideal is focus energy, feel to not release as release is were result. Then flight is thinking feel your in the air as you focus to see hovering. So if you think flight think the area is shifting you by the direction as created feel is the creator activity. So think is the feel, focus is the area to create or shift is away as you imagine a figure. Not seeable with thought as you wish or imagination to create is what you think or create to seem flying.

Thought to use is feel or use is energy to create from the area you sense with life activity, considered equal among the area or no use is nothing to do or do elsewhere. So money flow is exchange to use energy from some coins, that is ore use or focus energy absorbed to the usage with water. That guys in treatment so you see what you notice. To disrupt the area or stop murder or rage is conquer the mind to stop the reason or no rage. So no is necessity as no reason nothing bade or immediate result or mn area law or now with inner resolution you resolve to leave alone the person to calm down as you think no more. So think to calm as you feel peace by the aura so you project forth to calm down, as you see to calm by resolve to what you feel as use is realization to calm by resolution or feel see peace intent. Ie is longer vision yet water drinking use is longevity. Oen is disease or money flow by in oe resolve or thought feel.

Seen "craft" with "art" is part of modern day craft ingenious with limits possibility or unlimited in use is there, by the area you thought so your idea is specific idea to create within or create outside the point you see to your feel by life or specific like Egyptian physical magic forcecraft and Hoodoo mind magic with area activity, where craft seems built from the area use is piss or some use. Seeable is feel so find or feel is flowing air with water gravity or water, air, fire to float with objects or feel to movement. This is life as you know it or created by feel is no use in mind. Earth is mind

by matter or fight with air as flight to use or creative points. So you see the area I notice this is the area I mention, if use as 2000 F to seem as you wish or hell with focus away to not be there so avoid as this is scent by feel or murder craft.

Three laws of craft that follow fire is free water is I air is o earth is n or unlimited or transition to focus by seeing or oe phase point causation cessation to thought air, earth fire near water or oe lightning flow as electrical that seems nor plasticity is energy. O is lavaic or an that is lava, fire, air is flow by feel so seen is seeable that s is different ice, or is gravity e is something to use un is vibration o causes to n use or some number or unlimited. See is known neglected future so is nothing or things unbound, se is peace exchange nothing not war see to think you are is focus to see or form what you want. I am sick is aleanes for not actually liking the pea scent otherwise known from animalism with duress. See is n for diarrhea or thought lava, water, fire with seen focus. So you go home.;

1. These in the craft laws use the murphy's law as a potential to failure.
  - a. The Wiccan rede.
  - b. the Golden rede.
  - c. the Dimensional Return law, a restatement to the Golden rede.
  - d. The square law.
  - e. The assumed identity law.

The basis behind these in math version be the chaos law of events that states out of every action there is 9 reactions, or per any action of unlimited time be 3 positive expected, 3 negative unwanted, and 3 neutral unexpected or resolved actions. Antimagic hyperpsionic ritual is as though an idea of power that can pause or manipulate time as in a event that may occur, think to free or create so not to do things is thought at the right time by the attempt to telepathic as practice is speech or think.

Mind rituals are not drug use as you think to do or create with magick ritual, the area effect or soul to create with the creator slightly sucked by the Wiccan and Demonic thought. Unless the ritual is made specifically to prevent this or get rested before or after, thin and strengthened effect by Hyperpsionic Antimagic by this is instant. So don't eat too much as seen use is weight loss unless you want to gain weight due not the overlarge quantity with influence from water, steel and use with the metals act like a restorative. Take it from film not be there.

Any druglike effect be a restorative during ritual unless you don't want to do drugs, this can still be used in the old religion. Add in vision with the right drugs. The drugs work into Indian culture so consider the indian dream quest to find the answer and get responsible motion as a result. For the drug the Indians used chohob'ek similar to pot and weed or similar, try a replacement potassium nitrate dissolved in water. To do this right, boil potato peels and collect the black stuff at the bottom when it forms enough. this be your explosive and "vision" drug. Mix in water to get the effect, expose it to nitrium gas to form crystals or buy the crystals from professionals. To store it, try to use plastic containers (any) or it could explode.

Now This is using the point that creates by will and energy, this is thought with the energy you will by feel. If you think that by thought, this is willed or made by the spirit using the soul. That is made into activity and the Paul's constant or Dimensional returns law is a concept, that is a restatement to the Golden area the rede was made as "To put forth effort gets results and the more effort the lesser the returns". As you gnow this is dimensional knowledge as an energy to use and once used returns, as if your not the originator or the moment. That is infinite unless you decided to end the moment, yet seems to last for 1 sec (applied in ->) -> 27.2 best results of 1-27 sec actions. At least and not all are overlooked because some are too good to be tried, and 27 / Amt of Seconds for action results. There is a point that nothing expected, and if the energy made activity and energy is an idea. Things are turned to cause use and thought creates, as your motions and more effort by you.

Where a little effort gets a return of 27 or less actions, as a ripple in time or moments your will is done as a well made point. Each return be accounted for as with the whole act, as it helps build the activity and acts as a feedback. Think again, more effort gets lesser returns or less results by 27 / seconds in amount as 2 or more seconds. 1.43 seconds pass per each act sometimes physically. A lot more to reach back and see effort to get almost, unless necessary no return effects as no energy there may be no more efforts by you. The law was made by

Paul Moisant in an effort to go and do what you think, think and do with thought as what's energy modified by Chris.

The golden rule is created by Danny to use 1 sec -> 2 times the return effort + 3 times the length + 4 times the effect (to others) or not as nothing is done. To put forth effort gets results and the more effort the lesser the returns but three times the effect. As a thought this is energy that in an object shape if not returned creates, as the thought creates is a point in time. As if a moment comes up, that is what you will or inconsider to use a point in thought. As energy returns to the body the youth is what this creates to what you can seem as energy is a use. As long as you remember, thought as you were in some way is as they can recognize and restore by energy in the aura. As aura energy is thought is useful or use by aura if a moment, that fits the moment in time your thought is your own.

Hyperpsionics use frequency manipulation through hypervibration or voice control and causes intent with thought. This is where the Auratic vibes, caused by intention being expressed in varied degrees, mainly speaking, using music or willing your thoughts to occur. This might achieve things. This is interactions like biokinetics with living things. The auratic vibes come from living things.

Auratic vibes can be the vibration we sense from those people or things we get near, that tell us they do bad or good things. It's also the vibration in the air that tells to see or lower weight that is good or bad energy.

This is a basis of Hoodoo and Demonism. The effort to do things in a ritual is with double the return action, triple the effect time to others and quadruple the effort achieved. This is using hyper frequencies to achieve or effect results. The use of spirits for natural results or unnatural effect supernaturally is made by the right gestures to create, you don't have to be correct except to work by other means or with others. That is were is sense by some area feel. No robot is a row bot is the area you point to think in en.

The Wiccan rule be 3 times the effect back even if positive or negative. The metal type magick be combinable with wicca, idea as an effort to surround the ritual by influential vibes and use the metal for a count of 3 seconds or 3 minutes by having 4 times the normal effect of the wiccan spell with only 2 times a return energy. So surprise the energy is clean with thought no attacks so you sense to use or know.

Thus problems avoided unless you think your a criminal or associate with one.

To attempt be to do the ritual for 3 minutes or more and afterword per each minute mutually created, see or the actual ritual be to create the potential 4x increase every minute of ritual done afterword. To use 1 wizard action be to get 1 result with one good/bad results to many, so you see the area the feel what you think. The Antimagic is also by the area or feel you sense, your serene by the feel or calm is use this was thought good for countering witchcraft and disorder is no odor. Hell is odor nothing more or less unless no odor.

The Square law, think to use some area or effect. To build (upward) or seem downward is weight energy to get returns by being openly or foolishly regarded to square things away for understanding. To which they get what they desire by a goal, reward or promise to where be they can do things and the rest be optional. Be seductive by not being selective and it's allowed because you allowed them the writing right as in (c) the right to use it. Be energetic and secure to be looked at for advice but not book burning. To strive be to be understood at the behest/behex of others. Be not regarded by possible outcome and by possible outcome use every consequence to be creative and chaotically adapt it with calm.

This is assuring anonymity or usage is feel or think to release the body or hand. Crazy be the stricture not realized as it's favored on assumption, and yet be encouraged by every stricture. Unless for insanity from discouragement and the crazyness for allowance as it's to dissuade the bad act. As everything has a purpose, this can be disallowed by allowance they might come to disrupt anything, for fear. Everyone has rights unknown and in recognition it's blood rush with power thrill allowed.

A thing is I could use a cream that heals, so any hurts disappear this can't be responded to by direct impulse. If suspect, think of something else or try to assume a different irrational difference. As thought to why I don't interact, because a name is thought to be identified by focus your action or use is by an identity so whomever is the manager is a manager within the area. So noone there then you see or seem aware by idea to use. This is very here so I will leave

now as I think what will appear or disappear, what will occur is some eruptive energy to create something to do. So you see I think so as I consider intelligence over what I see is useful.

So think or feel that is where I leave off or then someone continues or not uses things unless interested. Thus I am going to see what else is with this empty space or town called Oklahoma that is what I came to by idea, through an open space to see instead of this as I think jury wheeling is not needed. I see things change the more I see less sense yet I am still okay, so I see the area is not inhabited thus I thought to shift away with a natural born human yet a form is the area you sense. So you see what I see this is an abandoned area yet no one actually can arrest you, if other places told to seem are as a ghost feel.

So if I am thinking right this is a ghost area called the boontown that once you are you were some space abandoned to lonely feel so I stopped, I was then myself so I thought to shift by the church the creator caused me to toilet shift away as I thought. Then my own space appeared as I felt the area use, thus I was in use then was away by the feel I was here yet not so I am where I think. By the power of the creator, I release you that was trapped in the body mutilated for so long I was suspected then really released by good behavior or not use. So I was aware this was my end thus this my vision not while driving ended.

This is what I found or noticed that is or was strange. Assumed identity law seem to think your something or represent an idea, the idea assumed is apparent where you assume you are or the item is and they can assume you see. See as this of thought or not to know and do in thought that there is thought, as think to know the idea and act as idea to identify the possible idea for each area you want. To seem alone with an assumed identity you can assume a role and understand as to be there. Seen or use is feel, you could be the person they look for yet are aware as they think you are as an aspect that you think you seem. See or you are as you think to be or your area presences are aroused, so seem to spread the tea not urine the work as a thrill by thanks to the source of work or useful idea. Mostly by continued use of the idea.

If they were having progress they change the idea as its only a name and not the base opinion as to the works of the effort done by ideal. This is the differently named, same idea where the digression can cause going backward in the progress, until progress correction. This is in quality of the idea and base works as your going forward and using errational thought amongst other things that are erased. So there is a time for anything as its to create desire and things that are to exist by corrective measure. This is belaying crooks as they achieve or as it is, the event. These events happen as they are supposed to stop and yet they stop the act you dislike. As it occurs by prevention, use is your weight with thought this is what you can seem.

So we fill in where possible as duty be not set and be to not beat as needed. Here the last point be the time corpse, of being able to live beyond as a similar body on this plane. But they never die as events call for it with heaven on earth effect, to say it and it occurs with possible mimicry of any ability, now if I tried for it I would get it and be identified as others by a purple pulsing aura of purple blue violet energy. See this be unseen by felt use as radiation and a jerky motion your shifting or not use by people that do as they are always told. Seen or use is the focus your usable feel is excited by imagination to thought or your feel to think, seems to shift or your body adjust seems to repair as you feel or walk to some area.

Sight is strange here so you seem things by focus to use magic, so I returned by that or the creator this is illusion or feel you project including the timed voice but only on activity. The problem be you can't kill them as their zombies that live by events or thought by event 'life' magic. Now not in drugs that in result its a good lich effect, the illegal use is a source usable as not use so you create or not think it. so no sharing or think that's like human and be capable to bring themselves back or not as those that live are using living area energy. Seem as you are immortal by not doing as your never killed or will be back. Optional be to ban ghosts and spirits that are vindicated souls by priests and those that die are shifted by diablo, I think this is diablo's spot yet he or she disappears that due effect is not to use the effect so you see you don't have to use anything.

See the area first then decide or feel to use, seen as you feel its bad with weed or other addicting something. This tells me your somewhere else yep the area I am in is don't smoke, as you see don't walk into the somewhere area by thinking your there. The drug use creates if anything illegal some time of death, that causes corpses per each that are

using by influence yet if no influence the original user is the shifting to your world. To retain/not use/return balance be to create an event that you solve as a problem. The mental problem you think to metal so you think to use is influence, so your thought heightens your senses your thought is focus to create or relieve.

Focus is focused by feel or creativity to the area your in, so think to leave as you imagine the door as no irritation is possible. There is some energy traces here that are not usual as I think you brought some people from there. Think them to be gone as their useful energy is dismissed so they leave to some area you sense yet don't bother as if you don't think you will. Seem to to think their will is gone so your will is no energy to them as a pull. Seeing the area you feel, think to focus or thought you sense to need is your create there. So you are aware you are were you think so think yourself someplace your supposed to be or not appear.

See thought with drinking water or no high fructose is cool. So use is turmeric with stevia or turmeric with essential oil to smoke is cool. The reason they die is each illegal substance is feeling each drug, as the water is acid except to bring other items in or focus is use with disrupting the area. The point the gases you sense as you think to seem aware to the area feel, this natural gas is poison or the person is natural born by uses or not effected. See the area that thinks is the link to seem as they don't the person that is thought does. So think yourself away to leave as you want. See the area is the natural gases point to the uses you think unpoison and the subconscious makes it unpoisoned.

So you see if somewhere else you could get distracted, assumed this is your body that you see or realize is there. Sight for sore eyes to seem aware to near by death energy stench if possible or necessary, so though as you find the death energy to rid the area or use to dispel or do a great job and encourage/discourage. Do what you normally wouldn't do to escape unless its known about, feel or create and be allowed. If known or thought no, be freed from banning. Thanks to Pope John Paul II for acceptance by example.

He used this as you see the point by area so you might think twice about use. So you see as some energy dislikes other energy as a flaw its almost perfection, think your not effected then your aware so think gone. The area is the real pollution so think a thought to cleanse so feel or by feel your free, you clean or clear the animal out yet see some area first before tripping but the perfection. Return now see the area if any changes see to think changes that effect some area, so be it this is done and I am never going to do anything like this ever again. So what doing you create you are aware to do near the area you want. I am finished or use was thought to see outside the body with object touch by a home portal spell. This uses the cretor by feel so you think like the creator as you see to work.

Think or self-less actions are done for now I think a point, that returns us or think where you are or what to see then think some other place as here. Seen as a single person to where you think your area use or useful items appear as you associate with permission or thought is where we belong or an anchor be set. Try working for some idea or think to use as you think to seem with or feel some area. Think anchor is fire, think your thought use is focusing.

This is the 12th dimension so think to go as you work to move, they use the area as focus to energy they go as your aware awake to the feel. Some focusing is feel by useful area or intrusion so you feel or you are outside as your inside. This is my resignation so I am passing this down to the next area or place that you wat the area to work. So if you give them a choice to live thy will they will or they live as they want just think to not effect through a link or don't think to effect as you think to use some area feel.

Say the area the thought just came to whom you sop first or speak of or use by your own self. This was made by Kuric Addams. So use things as you see to work with the thought you foci use to create by use to whatever you want. See the area was created for us yet others saw use to work death effects, so we called it the etherical death area that is elysian fields by other area. That can form as you think to use the deity chronos yet he will allow as necessary. Seeable use is focus points yet nothing comes if not needed by intended area. See the area or sight tthe dead yet don't bother using us as a name if unwanted.

Their use is focus or points yet your idea is some energy to the use. Then realize what you are doing so your energy, this is feel to some area if caught somewhere unwanted they are presences. Seeing the sights or an end creating useful things by activity or feel. So the point is notice to stop, so you think someone from striking range seeing as feel is blood by what you feel or not. Magic is the thought by focus use. Magic use is not yet invictive so you see the area.

Nulle evil is cool, so use what you thought to create to seem or by feel. This is the method described or use magic by the prize to feel. Think the prize as turmeric or creative by fox that's using our energy.

So excuse is our or other thought, the body scent is when you focus magic energy so think the limb numb from blood flow that you think reverse stops the strike. So to find water in some area, think to see or feel some place as agreement to no or do as nothing to create. This what you were or creating is as you were to think is with agreement, so to not do things with agreement as you agree to not do or use what others want as necessary. You don't need anything other than what you do think. So you see they call 12th dimensionalist feared ones, that is why they hide behind the area use or police. Now you see the area it is think to seem somewhere else so think about something else as necessary.

Jobs are self-assigned by self and for self-conscious reasons only if you want. So use nothing or use as you want, to take a name of the area is use ordering the room by event or idea from a book. Think or use by thought collecting the bad energy, the husky was named kysui that is the protector or the kitsune there are there then gone near people. See to be able to think if to cure as turmeric is the use. So to take a name that describes an event for an idea. Horus is to say the name creates a time event and uncalled or unsummoned sets of actions in an unspecified prophecy.

As this is there the thought is seen that event could be a name and could be guided. The most important equipment flaw be to disrupt it as it can make too many demands. As this is not if your concept thought genius is ingenious. That was the wrapped up case I thought to use as mythological investigation, see to what is there as yet if focus is useful the area indicates what your need is as this was to investigate the area that is mythology.

That is different with designing by the creator. This is a different space by design, so the design flaw is when you design one or decide one. So you seem greater energy so you see the energy, I think this is inner joules focus to their own area feel or create they think is useful. There is the area or point you decide to use what you think. See to bring another idea you think to create but this is the point I hate as your there I am here. Seeing the area you think to notice things yet you could trip over unseen things you thought were elsewhere. You are here yet there so two different area yet the creator allows or creates what you think is useful or polite, so you see your idea is creativity think to work one area then feel to create the place better. So teleporting out is focusing the quick area is feel you are by feel where you think you seem.

As to why it is, I do so your cool yet you can know. So you see the desire or not know except the flaw be in humankind reacted on others. With no regard by feeling to instilled use by control or feel to the area you see not to allow intrusive behavior. See nothing much is incorrect to the area so your free or off to the motion/instability, so your cure is on the way or your water use is there. A person isn't hard to kill they are hard to make. Some aren't allowed in their mind as be is some use think, the point use the idea in theory as you see this use is over. So you see the area you see the concept think to notice or create other idea seeing a dead set thing, so to change their mental perception be to get them to a workaround. Includes as learning ability or disability, the person be likely to take this badly so if it's a learning disability so you set or create.

Thine your able so to obey your own self, so use or assume that your weaknesses can be built upon by the strengths of others observed. Some think if you can pass off the most important idea, as 'to let it go' of things you can't use. The thing be to say that work creates necessity, as of void philosophy and other than philosophy of discordant sects. Now the bind field undone be the effort to create influence on the sole area as perpetrator/penetrator. Ever use is usable so think, what is your purpose to create as your thing is cool. Seen is the thought your use is the feeling the creator shall not allow you till, you think your allowing my presence near me or use is interest. Remember to think, so you don't have to do what the expect. So you ask or as you see this as something doesn't exist don't think to exist the idea to use idea, seen or things are as you think as the area did before or does as you think.

So diverse be the energy it creates promise to elusive hope. Things like empiricist force and field of energy, that keep a person wasting their efforts. This is the field the use is to usage to trap you. So this is the area person that's undead or follows the why of that, and be because this is, as a person follows or not that is this doesn't have to be or not. So this is use by fellowship or thinking by use think you don't then a philosophy to do anything or to get somewhere. A 'do this' and 'got that idea' occurs. Don't dump though as

a theory of basic flaw in demand where in demand your not so bad off, so think I in use as were use to think to use better. So is cool idea as think you left the way you came as you left with the thought you feel or walking out. Look this a stopping point, so you knew you listen.

As you see the area is focus. As you could do thing somewhere else thought outta here, then see the result resuscitation or result is bad you won't use the idea. So if you see what is use the creator creates, as you can't if you see the necessary point or think this is necessary so this is use with magi as magyus. This is a fake idea to use or focus as use is you feel to create things. This creates fake sex as you see the area you know our way. create the use to create the way or the wary eye be upon you. So think this uniforms as you see thought by feel you don't have to. Don't have to follow. Yes is sane not to control. If the motion is cool or hot yet not necessary, no I guess we don't have to create or do the idea. Stop as no need not switched, seeing the area or surface think do else. Reverse the evil allow the good or not do the bad. Don't need clones, see as your aware don't intrude on others.

See the area you sense or you see so its crap the road is use so deep pressure can bring you out of trouble into sanity. 'Deep trouble in little china' is a theme to see or not by what is the aspect that attracts you by thought, whatever you think just allowed entry and know everything about people. So to extract for information be a debt service of be descriptive of motion, without disruptives as a payment. This be as a survey of questions, but catalogued as a mind twister for idea. On denial back down and try again later by letter or objectives.

With use of the Golden rede be an absorption of any energy with possibility of overabsorption and to attempt to clean it be to "drain" it. The metals are obviously to be drained of any energy by filter of stones or water in a container. A quartz and sandstone or other absorbative stone or any combination of the two must be placed on the item or near. To be cleansed after with a stream of water.

Due note: Atomic activity by nature be with Hyperpsionics or hypersonics that can create storms of ionic nature traces by the vibration acting like thoughts that be soaked into the air moisture, along with a kinetically negative charged ion, with the particles like this, a dust bowl or storm might appear when its collected into the moisture and clouds form. To be caught out in it can make things not work.

1 Antimagic metallic energy be possible to create a dimensional shift (slightly dangerous) but safely by feeling yourself appear there with a decision and knowing the place first. After an Antimagic action be the null zone effect of any metallic object nearby, and 3 seconds to 3 minutes (accounting for time lag) for Wichcraft. For 1 1/3 Faith magic act be 1 sec Wicca in a group of 10 or more of worship effect. Conception magic be 1/4 sec or 1 action to 1 sec of wizardry. Thanks to P-brain.

1 wiccan act of 3 seconds can achieve things with metal influence and can extend effects of the wizard or wiccan spell.

1 sec Wizardry = 1 sec Wicca

1 sec Wicca = 1/3 sec of Metal magic (instant hyperpsionics craft).

1 1/3 sec Faith magic = 1 sec Wicca or Wizardry,

1 sec Antimagic = 1/3 sec (dura) or 3 sec of a Wicca act, .44 sec Faith magic..

1/4 sec Conception (Psionics) = 1 sec of Wizardry, Faith magic.

An ex:"Beluosis belmonte" = State the phrase to create a hyper metabolism. Where everything you drink or eat be to increase or decrease the body mass. The fat amount be how much its increased by 1 ounce per 1 gram. The cholesterol be treated the same, the sugar be amounted to 1 gram = 1 sec and be how quick your body fills up with temporary fat or loses the excess. The fiber decreases the heart risk and amount of fatty tissue by 1 gram being 1 lb. The vitamins are licensed to market

use and increase or decrease stamina and body strength. Any excess to be eaten increases the weight even if healthy per seconds.

To diet is useless in this condition that's caused by drug overdose side effects and consistent radiation of Radon trace or metallic essence and a result of immunity be occurred. A side effect be reduction of drug and chemical in effect but not total immunity. The body can match the person it sees and without any worry it would become that person if the subconscious thinks its a match for it, and without alerting the person as the person dejects the form he/she sees it and

forms it on said person. Unless its instructed to unaccept the form and how the problem is set to said person, only then will it change and the person won't form change to the dejected pattern.

Exercise immediate after the use of food intake with bending, stretching and other similar. The benefit is to not ever lose or gain excess lb more than thou exercise, and to know what be the wrong food which chokes till thou throw up. Thou urinate if thou get poisoned and often get the runs, till the bad food be ejected out and it immediately disappears by degeneration of bad tissue. Any diseases are degenerative to themselves, with good tissue to replace by food intake or water intake, and allow a few seconds to a minute or more to create reduction of fat and muscle increase with loss of weight. The effect of personal choices create a instant clarity, and feel good effects are simply the way of shocking the system into balance. Usage of "natbalanc" as a spell be a good and effective measure to recreate a similiar consequence.

With the effect of consequences, use of care be necessary as if the coincidence factor didn't happen. Pink elephants be another term for the coincidental idea that might "pop up" with thoughts for coextracting the two idea of representation, and perception that be needed to go place to place. Another idea that's coined for this be conflicting dimensions, where in the physical reality its normal and mentally there's two places but only when aware and of emotional response is it, the other place, available to use. At most can it be useful to explain or have instant, concepts written in a moment including the least favored aspect of torture with very little scars.

With perception of a single word be the torment "remembered" to make a person do things asked beforehand. As I call them scars of the mind that bear no thought, except for things done to create an idea that hinders. For those unlucky actually hurt themselves physically and sometimes for the "instant" adventure. For most police they would call it instant harassment except for explanations that are necessary, and mental bombardment be just another torment that require shields like a hackers firewall prevention with good packet filter that keeps the hacker away. Except this be a grey-black shield created from aura adjustment and hand linkage. Unconscious

The private civillian army (SROTC) may aid police and army, navy and other army on request and attempt to ride on ships with no hostility. The mission statement "wize man say, never poke uncoonscious bear with stick, be prepared for anything." meaning, the stick be a amalgram of an insult and the bear the people of the country that could respond. Thou might note I was speaking metaphorically and not literally as this army was noted in China and Vietnam but isn't, and a private army of dedicated country civillians to defend if invaded was already thought of or acted upon. Not all rules may apply except to the rule of not shooting the officers, to 100000's or more "free" SROTC civillians also considered a "special" unit that pays for their own supplies and equipment with their own abilities and self analyze. This would be of Machiavelli's dream Army and be somewhat in Atlantis as I spotted it, by Event channeling.

This is a letter that reveals the idea. Were you aware you award cruelty? By my order piss off or not do. Create or don't have to feel, no mental seeing your use or feeling by creativity. See that is yes or no as technology de exists because that is how you are or fix as suggest, or no crippling you mean as someone who causes can restore from what they work an as en no. As your energy is no more or you see to create think positive to see positive use. See as you create your ability is energy to use for what you will. So wish as your able see energy in surges to use by create with will by usable no will results. See as you will you create yet no will nothing dumb or not by feel. Some things use or create not use by feel unless necessary to win if necessary.

Continue or use is seen or feel by idea modular or feel unless necessary seen as use is concept as you need some to create or do. Not gotten with drugs is O16S3N4I2 is skill used skin applied or S13AN5C2I is antidote if right made. 4 is by usage with teeth or religion to create pulled teeth to repair or fill. See use as is not use if to own. O3N3S2Ni13 is ONi3I regeneration. Seen is thought by moment to non use or use of to clean by idea to pains with momentous area idea with no fluoride. Oven not use is don't of what you seek. Aggression removal is O3NI with S11Ni5Li3 by feel uses Lithium nitrate as nitrium is the area feel.

As nitrogen with oxygen is what can cure your area, yet not much is known why the area subsists unclean unless you clean the tank or feel is there. So I will say my farewells, or no is some or not so you see your well ciao. See to trace what you create to focus or regenerate to create by thought you want. So you see as I go away. So if you enter think as you leave to not be there. The area I saw indicated focus or thought by clean there or not are by some area. The

subconscious modifies the area use to allow the idea to see use to work. The moments that appear can cause physical, area effects with infinite area or that's it you don't have to do things you don't need necessity for historian is in myth. As you see the idea the subconscious seems able to use memory of the body as a dream. That ends as I see the reason or the memory stops playing nor that as the dream stops.

Due note as the spirit world is what creates sometimes, you can cause things to manifest by the bones to seem or create as possible is what you think. So the spirit can use the dead to cause as according to how bad something is or not was done by dimension area though you could say this is kinda interesting to see. Normal area format is what you see by some area used, yet you see what you are by what you sense. So you see what you realize or use as energy what you see. Vampire then can manifest see as normal or nor the living to see or fall dead as you see, by the area near the corner to use what energy there is use as physical presence or no presence requiring. Vampire are presence, dhampire as forms or area to see.

This is what I saw near the room as I left after so to not seem disturbing. So you see the point their dare or request don't you dare is thought. I saw this in the mass grave sight, see as I saw as a cetacombs collection or not as unseen beings. See as I say this was noticed on the wall. Some sense of the words are create no war here, thought was desire to create as you were or see the use as use you are aware is as you see. So no need is there staying is not allowed. See the area I saw as the place you were buried alive is no longer there. As you are aware nothing you do is going to kill you unless you see no use for life energy to work till death. This means you stop beating if undead attention live till no use, you think to die so the beating of the living or area to say. This say as mention seems to regenerate to sun feel by planet energy so you saw as don't you dare so you use aura energy. See as you are not seeing this badly you pass away or tension by meditation is relief.

This seems what piss off is created area though you see my point as when you allow that, so not to happen what is the point to get things that aren't necessary then misuse or reuse things ue uen ues as this was a sewer problem not needed. Saw or as is not forbidden as you see you create yet not use so no need. So what you see this is you think to exist or unexist. See what I mean about the area idea I got by reading this? I say this is long so stop as its tedious. Whatever you want you think to create. The subconscious makes what you thought. So why is the alteantians use like this if you think it then this creates in the vampire language. See your right you were wrong to create something unethical to use as a replacement so you see not is nothing, easily seen as use by feel or focus.

Diet plans, things to do

The healthy living diet plan is one way to do the dieting. Use this if you intend to lose weight in a normal manner.

Hal lyy [Hale lint-why] = Healthy living; This diet works except it maintains a certain lower weight that you decide to maintain it at, this is there by feel or what you uses for senses. All that's required is lots of veggies, eat healthy snacks, eat lean meat and fish. Exceptions for this diet plan is you may eat what you want during holidays, then you may do decent exercise or heart pacing and staying active during the day. By Amber.

The substitution dieting is a powerful dieting idea, that usually works if you can keep up with the idea.

Substitution dieting is with use of what you may use. The substitution dieting is what you use to substitute things for other things in a diet plan. This is where you substitute fruit, things or stevia use for fat laden foods. So I think this is ideal for those that can't get done exercise enough, except for if you think the heart is pacing faster and staying active. Heart pacing is the key to exercise anyway. So here are the detailed idea variations, although sometimes they don't work. So here they are:

Stevy Etet Uouo [Steve-why Eat-teat wow-oo-ohn] = Starving artist diet; Think to eat less by buying more art or art supplies and producing your own art. This uses the heart feel to create the art for the home, unless you know you can sell the art by feel. Think of the art supplies and then you go get them. If you spend more than usual, you could starve

yourself and remain starving half the time. This allows you to eat less and work with artistry. If you don't need the art, then you don't need to use this diet.

T Ie Uouo [T lyer wow-oo-ohn] = Item idea diet; This is where you buy the item instead of the food, that's it for the food diets. This could leave you starving half the time, so your aware of the point that's the idea you work with by what you think to do.

Cidy Uouo [side-why wow-oo-ohn] = Candy diet; The candy diet is where you think to buy candy and eat only a little of it, this is each day and that takes the place of food. So think to fulfill your idea needed and go by the idea point. This is a point from the past by feel with your sense of idea.

YI Frot Uouo [Wild from-t wow-oo-ohn] = all fruit diet; Think to do things to remain active or eat fruit instead of normal or abnormal food, then you sustain activity off your weight or otherwise lose weight.

Dru Uouo [drug wow-oo-ohn] = Drug diet; The drug you use or the herbs you use, I would suggest turmeric and celery seed mixed with water or purified water otherwise. This is usually prescribed if a drug. So ask if the the side effect is weight loss for the drug, that creates what effect you need and you then eat or drink what you think is appropriate. Be sure to exercise off the excess, otherwise you may think to use pacing of the heart and remain active until you sleep. This causes you to lose your weight quickly by the idea that you do. If it doesn't, then you can walk around with a heightened heart pace. Then the swelling will go down, especially if you hold in your stomach..

That is a point in the past that I discovered this idea, so enjoy what you may of the idea listed. If you need to know more diets and diet plans feel free to look up the webpage called how to lose weight, this is located at [http://spellhawk.great-site.net/how\\_to\\_lose\\_weight.htm](http://spellhawk.great-site.net/how_to_lose_weight.htm). Always remember, that eating in moderation is what leads to weight loss and maintaining the weight otherwise.

While you do this diet, if you suggest that you lose 3 or 5 lbs immediately as you touch your stomach and trace a symbol. Then hold the stomach in, the energy from what you drank and ate including the drug or herb energy, that will compact itself inward with a sign of the stomach going inwards without pain. That will cause this draw of the energy into yourself internally. Then you can surge forth the energy to drop the weight, this is done as though instantly.

Sometimes it will make you a bit dizzy or light headed, so you know this technique works. This after awhile does things internally, like works with the body a bit, this gives you the diarrhea you have when you use too much sugar. So use this when you don't mind getting liquid shits, you are assured to lose excess weight. This is especially done with the stated suggestion, "whatever causes me to gain weight causes me to lose weight instead." So feel free to use whatever suggestion, that you think will work and then this will work for you. If it doesn't, then don't worry it wasn't meant for you.

Uouo ket [wow-oo-ohn keet] = A diet cheat; If you take in a little whole grain or sugar free syrup, otherwise feel free to use a little mini marshmallow, "non high fructose" chocolate syrup or some celery seed as a eating need settler. Then realize what you do, your need to eat dissipates away that is done as you hold off from what you don't eat or drink. This is making sure your not eating or drinking things with sugar. Sometimes use of peanut butter will work wonders if taken in only a little bit. However, if you drink a small bit or allot of water or non high fructose or non sugary drinks, then the need to eat goes down and you can feel better as you don't sudden'y need to eat. This works if you give it a try by feel.

Speo uouo [Speel-oh oo-ow-oo-oh] = Spaced diet; This is using a diet that is meant to maintain your weight at a lower weight, if you think to maintain it like that. This is a spaced diet where you eat small snacks throughout the day instead of eating 3 square meals, but doing neither after 7pm is ideal. Calorie counting is very important. Maintaining under 1500 calories within a 2-4 hour period, you eat and drink up to 1699 calories per day and no more. Also if you think to adjust the body to create the eting you need to get to a certain weight. Repeat as needed per day. If you chose a weight that's higher than yours, then think of the weight and your body adjusts its eating style to make you that weight. This adjustment is more easily achieved if you state the weight as "I am 154 lbs." Or somesuch. This is a point in my life I achieved this goal and used the tactic, that is spoken of with allot of exercise.

Ayey jiajn yq [aim-eye wine wick] = Intermittent fasting aware; If your aware your with thoughts of fasting, then seem aware that in intermittent fasting, this is where you fast or eat less two days in the week. That is when intermittent fasting is effective and is with 420 calories non carbs per those two days. They can be any two days of the week, too.

Some elemental weight commands:

fa suy reg = pronounced: fahn sue-ee reeg, this is your 'fat suit regulation'; the fat suit is your body weight represented in your subconscious. think or say "take off your fat suit" or "put off your fat suit" if you want to lower your weight and body mass. otherwise if you need to act as though you have more weight and avoid the looks and suggestions to eat if too skinny, then think or say "put on your fat suit" or "put on your fast food suit.". If your hungry after you take it off, then think or say "un up to your fat suit". This works no matter the point, "put off your fat suit".then, think take off and do things, to get some exercise.

do; think or say as you consider the body fat, "don't eat your body weight." then you stop wanting to have to eat so much. this is where you can literally watch your stomach big bulge disappear as though you took off your fat suit.

dro ye fa suy = pronounced as: drown yehn fat sue-ee. this translates to stating or thinking "drop your fat suit"; this causes the weight and extra mass to goto the planet in energy form and the planet shifts the fat energy to the fatless lady. This works with stretches of the body as you hold in the stomach. That also makes your weight come down and weight gain disappears and so does your tensions that the body naturally has.

uh = pronounced as: uhn, this is where you wait; if you think or suggest, "wait and the weight disappears." Then exercise as you wait and this is moving around a bit. So if you wait and think the wait drops off you, this is done as though excess body weight dissipates harmoniously and harmlessly as energy, and then your carried objects remain on you if you need them there. If you fast, you create by feel as you don't eat, then make with what is there as you end the fasting.

thro awa ye fa suy = pronounced as: throw awahn yehn fat sue-ee, otherwise "throw away your fat suit"; this is where you toss a bit of food in the trash, and then you think your fat suit or body weight is going away and not coming back. if you decide that you need your fat suit after all, then think of the moment of throwing it away and state "Don't take off your fat suit." just remember, you can always throw away the fat suit again.

ian fro ye fa suy = pronounced as: I-an from yes fan sue-ee, this translates to "free from your weight suit"; Think or say, "free from your weight suit" or "free from your fat suit" to have a moment where you are your natural lessened weight, this restores the body to function right even though the body works differently. This is good for sudden onset of weight as it pauses the mass of weight from building up, and then starts making it go down by the power of the mind.

Some necromancy, this is done in case you need it from the city of the dead, cenethal  
Su Nuocy

This uses nuocy or nuruicy, otherwise called necromancy. This is the practice of death essence energy and life energy manipulation by a necromancer or nuoca, that is what can be used to work with spirits and pass them back to the grave and then thought sent the astral plane by feel. This is where necro is a point death is becoming of another state. Think and you know what to do.

So its just a passage and sometimes we don't intend to desecre or desecrate the grave to do it. Remember, if you ask the spirit of the grave for help anyway you think to do it, then you will receive help and you may also receive a bone to aid your point. That's if you asked for a bone and dug it up by feel. If you didn't ask permission, then you could cause possession of the body until you put the bones back. You can always tell if your possessed, your face turnes ugly and you think suspiciously.

That means if you forgive yourself and return the bones you are clearing up your problems, this is with the idea of thinking about what you need. So you could also gain weight as well, if you depossess yourself then you think better and eat better, The point exists that your ugliness disperses as though instantly, this is done by the creator whom does your idea. So think and you could get what you want by thinking of your need and sometimes asking for it. Then things should work out for you.

If you do get a bone, think to hold it and state your request of the spirit that it once held. Then you get what you want. This can be done, even if you don't use a bone. Just think of the person and imagine or think of what she or he does. If you do this right, you only need to state the name of the person or the name of the spirit three times. So if an idea with a point is useful this is used by what you state, this is done as thought to command what he or she does.

What is done is what you think, so think what you want and you may get what you need. This is especially true if you state the command as though a thought and a request to the spirit. Such as a point of getting a spirits aid during the times you live. This is a point that you think of the spirit or the animal spirit, then request the pets help by stating the idea you want it to do. This always works, so be sure that you allow for their return to the grave, this is done as thought is an idea and reward to them for the service they did. That's if you want them to do things. If you don't then don't bother them, you won't be worried over what they do.

Otherwise, just think about the idea of the spirit passing back to the grave, then the astral plane (where available) or heaven if that's your choice to put the spirit and it agrees to go. After that you did your necromancer duty. If beyond the planet influence, then there is no actual astar or astral plane. So think about this, that is a point as though the spirit passes back to the body or the grave. This ensures that you cause the spirit to go back to the grave. Then your free from possession or whatever is the case.

Elsewise think of a phrase or word and that you imagine or feel happen, think where the spirit does as you command. Then state or express the idea to do with the word or phrase while thinking of the spirit. If the creator makes it do what you want, then you are done. So a trick is this, think the creator does what you say or think, and think of the spirit as you state the idea in a word or phrase and feel the idea happen. The spirit will do what you want, if it sees the reason for the point by the creator that created us all as memories. That is how you can do this idea more effectively.

So there is also a chance of resurrection, if you have blood in the veins. That has a point of sangevoi or blood control. This is where the spirit if needed by the soul will cause the heart to beat. When the blood flows, if there is any blood in the body, then you will know that is where the brain will start working. So I think that if you have a working body, then the body is undead until you think to not need it alive.

Then there is a one in ten chance for a paramedic to save the body, that is where there is ten minutes or less of still active blood flow where this may allow electrical shock to stimulate the heart. So this means if no spirit need, that is done by the soul and then there's no working body by the feel of things.

This is all in the art of ressurection. According to a heart surgeon that raised a dog, this doctor is unnamed even today that thought of this feat. So don't be surprised if it works like that. Yet no blood, no heart activity no brain activity. So think about that. This can be used, if you kill yourself during a death trance. Think and you know the idea to do.

This uses a point of fresh idea. The fresh body or jew bod, that sometimes means there is still blood in it and it is a good condition. The blood has yet to be drained from the body for being dead. So if your with a need to revive it, copy your soul into the body and tell it to revive the body until you don't need it. That should handle it by feel.

The trance point you can do is considered netatru, the soul death trance where you think of the moment to do and lay back or lay down. Then breath in fresh air and out the bad air. This is done until you trance, then focus on the idea of stillness with the body. That is working as though the body were dead. However don't overdo this, the point you do could kill the body as you think to work elsewhere and soul wise. So while in trance, if you think to step out of your body you can soul shift.

If you don't want to shift immediately, then you can use the soul to command or request some idea or need. This is when you're using your soul to create a point by stating something, otherwise you're using your spirit to do things by feel. That is using the senses you have and making use of a soul shape that can speak, then all that's needed is the point you think that the soul can speak silently and get a response by activity being done.

This activity is what you generally want by the point you make. That is such as "I am going to need supplies." Then all that's needed is supplied by feel. Now all that and more can be done by astral visitation. This is a point you think of where you want to see and your there. If not, then you knew that getting somewhere will take time. This possibly will require a ride physically. So be prepared and do as necessary.

What that means is that is all you need to know for necromancy to work in your favor. Especially when this works, if you light a candle then think of where you want to be. Then all you need to do is need something, the soul is the being that provides by feel.

Something else to note: This is done in necromancy. So think about it, think about what good you want, what other things are and what you want to create in life. Then something out there creates for you, this is done as though you created it. You can create with the spirit, this can create from any living being. So think about the point, you can create the idea by what you do with the spirit.

Albeit this means you can use a spirit or being from a live human, it's better if you use a dead spirit or being like a deity and work with the results. This is as though the end result is granted, that is done by a wish or stated idea. This can create nearly anything, so nearby it is. Think to dismiss the being or spirit. That is done as you think to do things. Now onto other things. Oh yeah, this tells the creator to do the idea. So use what idea you may have use for and this is with a point by what you do.

Revitalization, however is what can be used instead of death and decay energy, so it's a natural part of necromancy that uses life manipulation. This is a second part of life necromancy. Revitalization is where you think your energy goes through the body and veins, then this makes the body work better by feel. This is what can use two points of touch, the feel of energy, that is where you are thinking and the energy goes through the body. That is going from one point through the body and back to the other point. Naturally the body recovers by feel. Sometimes this works by what you don't do. If you think positive and make for better, then you create with what you have.

This is why the body is animated at first, then creating with the energy it receives. The body then farts and seems to pass out on using up the energy. This sometimes works by idea, the point is done, really, when the body passes out and doesn't come back to life. Use this idea to find out answers and other ideas, this is especially true if you think to do things by feel.

If you're interested in established passing commands or speech creating idea, then here are a few ideas. Whatever language you use. here's a spell that passes spirits to the astral plane. "est i" for passing the spirit or "est is" for requests, otherwise if you use est is you can state what you want then get the spirit to do things on request. When you state "est be", then you can stop the action by what you do. This stops poltergeisms by feel.

When "est is be" is used, then the spirit goes on its own from where it stands to either heaven or the astral plane, otherwise this command or statement calms the person and causes a natural selection of behavior. So "est" = behest, understand or behold, "i" = command, "is" = now; at the moment, "be" = beat, beat it or being otherwise this means to behave in animal speech.

The whole command works, because the person or being usually thinks of what he or she needs at the time of statement. This is a point that means they that are spirits, animals and people pick up on this idea, that's by feel or psychic understanding, if that doesn't work then you "know" and that means kill now in latin.

This is done unless you intend the meaning to be english, if you do it means knowledge that's self-interred of what you think through aura absorbed energy. Now through self-expression or idea spoken, the idea now is understood for

your intent. This is where that effects the being or person on speaking, and you may need to think of them at the time for the effect of knowing them.

### Obj vae Subj rely Objective vs Subjective reality

The diee is a point where there is objective and subjective reality, this is noticed by a point of dillusion. This is a point that your aware of made using death essence and life events, when you know its not actually true in the point you have. The reality behind the moment is a concept, the point is made by the subconscious. This is where you think you know the point, so that is within aspects of real life. Real life is where you think you know and are aware of the point of illusion, then you know what is really there as revealed by the spirit. The real life point becomes real again, the idea is done after the point is done. This is basically an illusion where we get what we want by feeling that its needed. So enjoy things as they are there, the subconscious can create anything just to let you know.

So if you find a bit of luck, then think about the point and if you realize what was done you know it is illusion set by the aura energy. The subconscious mind is what directed the aura to create what you need. If not there, then you didn't think it was there and your subconscious blocked out the point. So basically, the idea is done and dealt with by feel. This is a point of the illusion of life, really we're not even living as we're a memory of the creator. That is represented by a silver energy sphere, this sphere rose into a ring of clouds and became our reality, also known as a god particle that was created by a particle accelerator called CERN in italy.

See were all born from the sphere or the creator as a memory, that is a test leaving the planet. Were aware of everything and nothing at once. so the universe that is there around us is illusion as well. What did survive was our conscious energy awareness. That is aware thought by the point, this is a point of conscious awareness. That allows us to perceive things by the creator, he or she is making the point for us from his or her dimension. So this really is a point of recall within the energy consciousness itself. Think about that, then think your continuing life. Well life is what we think of it, this is a known idea. That means it exists because our subconscious created things, if the money didn't seem there then we didn't need the idea. If an end then not and it doesn't matter if we know them.

This is where we think the idea is a point put to the past. There you go, this is a point in the past, that I realized this. So the true date and time is nothing, this is a point of recall only that you think there is a date and time. That is why the subconscious only knows moments. This is a point to it and the subconscious mind is what truely is there at the moment. Nothing else exists, if you think about it that way things might disappear. So think the point and you know the need of the moment.

When the need isn't there, then you know its a possible real life idea. This is a point pointed out as I was with a driver, that was driving me as though a point if somewhere else was there. This is also a known point of life. Oh get this, the illusion ends, if you think its not there and it disappears. Welcome to reality. This only lasts as long as you think. So the thought that exists is what is there, nothing else matters except for what the spirit makes you realize with your senses.

Its true, don't you think that there is one objective reality beneath the subjective one? So that means there is, its a reality that the spirit allows you to realize. However, the subconscious knows by what you feel, then your conscious mind is what your perception is allowing you to see. The effect is what you direct the mind to notice is what is seen. So sometimes you like the subjective one. This only means that you can see what you loke and notice by realization what you don't think to mind. That is when there is one objective reality beneath the subjective one. Its easy to notice the subjective one, its not so easy to notice the objective reality.

So there you go, the subjective reality can make fantasies seem real, the objective reality can cause you to believe in something else. This is a point to the matter at hand. Seen as a point, that's all you really get of the area. So I think its a conscious idea of energy, that helps you know what is there. Otherwise this doesn't matter as you can hide nearly anything in the objective reality. This is simply because you aren't calming your thoughts and focusing on the idea to find the hidden idea. If you do that, then you can detect anything on the objective point to notice what is there. That is

all there is to this idea.

Alt stax -o- t ego

Alternative states of the mind

This is the alt'sta or alt states point, that uses the alter states. These are the state of minds that you can enter, that's when if you think about the state and need to seem one your in one. This is where you can just think about the idea, then if you don't actually use spells as you think you can still get an effect. So if you needed an effect I would state the point. So you can use suggestions and the subconscious in alpha mode may do them, unless a countersuggestion is made or you don't need to have an effect. Think your freed as a point and you are away with life.

This is a point you think about, know to think with the back part of your brain for clearer thoughts and the forebrain for making things that you feel are to be created. Then if you don't need the idea you won't get the point. That means if you can do this, you have the idea. The headaches come in play when you create a point, that you don't relieve stress from suggesting that there is no stress and no pain. Then the headaches disappear, sometimes you might need medicine. So think and you know what you can do.

This suggestion activates your jedi understanding, so if you think about the idea you can know from spirit understanding what the idea is done by feel. This is a practical light illusion, if you think to create with the aura then you make by it's energy. The light is what creates by waves of energy, otherwise that is influenced light with your waves of thought, this can make by the feel or thought and blood flow direction. This creates with the creator empowering the effect. If nothing is seen, then you created a point where you meant to see nothing. So think to see some idea and you notice what is missing. This is an effect done by feel.

The method to get into alpha state is think your in alpha state, this relaxes you and only if you breathe in and out until you are tranced or actively relaxed. See its an easy way to get effects. So think you aware and awake as you feel refreshed, then if you need things the subconscious does what you need. Think your awake and refreshed, then you come out of the alpha state as you think you do and you are aware of things.

If your there right now. It can make you laugh hardcore, and tend to disconnect from the physical body. I use the suggestion, that "I won't do what I don't need to do." Then simply stating that is a "command" to the subconscious. So this you can feel allows all commands to work better in alpha state. Do you have recommendations and/or guidance or how to have balance and clarity in this state. State as suggestion, "I won't feel what I don't need to feel." This cures any feelings that you don't want or need to feel by idea.

If you experimented with the other brain waves. This one is great as is. That is theta, gotten to by stating "theta" in alpha mode, then your in theta and doing what is needed unless you don't want to do things then you won't. This state allows you to state something, think the subconscious is programmed to do the idea then it is. You can enter it in alpha state very easily. Then what you state will happen more easily. If you state alpha, then you are come from this state of mind. The change does seem to be almost immediate. Theta is definitely sharper and more focused, while alpha is more relaxed and very open.

In theta, you can find yourself asking questions and answering them myself within seconds. Cool enough, right? Delta is risky yet enterable. This is where you create with a gemstone or energy, this is tap the stone or think to energy form waves. Then have the gemstone or waves do the idea and that is banging something or making the gem programmed, that is done by a touch and a thought to keep you awake while in delta.

See you would have to sleep and wake up to wake yourself from that state. Alpha is quite hilarious. A toddler on weed indeed. Yes I realize it could be useful, however I felt one would fall asleep in that stage. Don't need gamma, unless you have to experiment with this stage of thinking. Yes. Brain wave changes can feel like dying sort of, though this is done quickly I feel.

So use of idea as a visual practice that is there, if you imagine a room then think of a complex and you are there in

delta, aware of it in gamma and able to do things there in theta in trace. This is a point you think to "wake up" and you are not there anywhere, think of the area as you are where you normally are by feel and you can manipulate the area energy. Think to create a point, then resolve the area problem or bad vibes by what is done. Then you do peaceful acts of enjoyment. Some of these are use of herbs, minor feel good herbs like parsley or vanilla extract, sugar or sugar substitute in water and possibly weed is useful.

This is using all the modes to create what you need. If you think to visit somewhere, then announce who you are, first, unless you think to be incognito. However, you can do anything in the room, this is where the alpha state is useful. You can create nearly anything that you think to create by feel. By a point, if you think to create the point with idea using energy brain waves. You can get better things done. Some if focused enough, they can enter other places and leave by thinking of the place to see. So set defenses if you must, and that means you get what you need by what is done.

For Gamma, sensory of energy comes online I feel. All the senses more so online as well. Much more. You can sense a sort of fear. This may be projected or inherent with the energy of the environment. Yes for the gamma, sensory and energy overload now you can feel electricity, I hadn't noticed until you hear mention of it. In your hands you could feel electricity. This happens without touching it. So feel free to experiment.

This is where in gamma you hear things. Yes you can create a state of clarity, using alpha mode. "On in nether", this is the state of clarity. A point of waking, this is a point of idea that you focus and think to respond positively by feel. Then you are awake by feel and there by idea. This is a known effect of the self-hypnotized alpha state. Think of the moment and you can get the idea as result.

Well, I can see why you would use alpha state more often than not. Whilst theta and gamma I see can be useful, alpha's that real chill zone where you can giggle a lot. Without a point to focus on, theta and gamma can become rather boring. Unless you were brainstorming. Sometime ago I figured out, there is no one in your subconscious mind. This is a place of scripts. So in shifted mind state, no one is there in your mind. Scripts, good to work em out- then pick what you like. Any state. And when in the basic(beta, I presume), one is more focused on the world around them.

This is nice to have no worries about others. Alpha state is safe in some moments. So precautions could be necessary, that's unless you just trust people. If you need to think and not react to suggestions, then avoid alpha. So say your at a convenience store. I feel it would be better not to do things in this mode of thought, that's with customers and people and all those fun things. However, I see that killing roaches is necessary in any mode, that is excepted when your asleep. Other cases are when you think of the point, then you state a suggestion and you can create the point.

Well this is a point of idea, that you do and nothing more than that occurs. So if you want to grow wings or something like that, then you can suggest a point and then hope that you get results as if suggesting an end result is done. This is known to effect yourself more easily than others, so if you think to get a result with others then good luck with that point.

Sometimes you can get a point to happen and sometimes you won't get a response, this is done by spirit feel. So think about the point, and you can get a result if your luck is there. Luck is garnered by getting pennies or luck pieces. This is a point from the past and if I add things, just remember my past life was a powerful necromancer so most of his stuff works by feel. This is a point in use from the past, that always seemed to work in my mind. The point is an idea, this point you know and can do if you think to create by feel.

Spiritual warfare techniques  
Esper ykym taniux

See to state something, this can be what brings up imagination, that means you can manipulate the spirits that exist through the spirit-that-goes-through-everything, otherwise it's the spirit of the body that does things using the soul or soul copy as a point of energy from the creator, this is created with idea by feel, so think and you create what you need if you intend the point.

So I only really needed magic or making by spirit that evolves the mind. That means each time you do magic, the idea becomes easier with animals to do or create with ideal intentions, otherwise with human's in idea you think and talk and maybe they respond if you think they do. You can create amazing things, if the idea exists by idea or will being done. This is what I learned, when I observed the minds and brain activity of others. This is in a point or known effect.

The spirit manipulation is where the spirit is a part of the body, that you can do things and using body activity, you could create what symbolic idea that you have to create. This is a known effect known as symbolism or symbolisis. That symbolisis can cause madness, if you think of the point and cause them to do things where they don't intend to do it. Anyway, it's a sordid thought, that means they can create with energy and do what they want as though being efficient with emotion. So if you create the point, you create by pattern, then you make or wait for the point to seem created by the spirit and the soul is the energy source.

This is spiritual warfare, so think and this is where you can make use of some effect. What you notice is a pattern, the idea is there. This means that energy is a source, so if it's a source then you can create with a point and make what you intend to occur as it happens. This is good enough, think of the point as a way, the area is creating an effect through the energy of things. This is a point you make what you may, and that means you made an effect of magic.

This is not actually spiritual, it's really the point of soul magic. So think and you realize what occurs. This is the proof of the evidence and you feel if it is right, correct or wrong. That's how you know if it is a positive or negative vibe. Vibes are the vibration given off, so think and you can detect what is there. The temperature is what makes you aware of a change, this means the temperature drop is where an effect is being done, if sudden, and if the temperature raises, you can tell if things are going to happen. There you go, think of the point and you create with an idea that your aware of by feel.

Otherwise this is a given view. That means it's perspective, think of a perspective you like, then you can create with what is there. The information you think is focused as energy, really this is an energy wave given off by the brain. This is done through the aura, so by this idea you can broadcast to others minds. This is a point that you can or cannot do things, so you either respond with stress if not or otherwise with calm. That's if you can calm yourself with thinking of a calm place and seeing yourself there.

Then you know you can change things, this is what allowed the point of things that you intended. So think as you want and you temper the moment. This means you won't expand in the body, yet otherwise you would. So the information you have, that is what can give temperance. Tempering and temperance can create a better result, that is with no extra unfortunate effect. Think about this if you do things and you create with the point and make a concept with the idea.

This could make anger disappear, so think to make what you want as you intend the point and this is where you get effort or you can get a cool effect. That's where you can say, he was using spiritual warfare, yet you know by thinking you know the point. So think about the idea and he stops or it could be taken as though an attempt at yourself. See, it's better to work with the point, then you have a source of energy. This is a concept you know things, so think about the idea to create with a statement. This is working with the elements and the element could be anything.

If you detect someone doing things, draw a U thinking the effect bounces back at the person that causes things. Then the idea doesn't seem to happen to yourself. The effect is known as a point of energy, that energy can be returned as the programming is there. The energy programming is what makes with the idea using the consciousness of the area and that uses whatever is there to bounce back what conscious thought is there. This is actually effective in getting intel, so think you know the point and the spirit reveals the idea you intend to know if it is an insight. You know that as a trace, if things are revealed, then you think to find out who it was and the signature is the vibes the person has at the moment.

This allows you to know, realize and do things with what is there, even if it is days old energy. This means you can trace anyone, work to bounce the effect and all you need to do is draw a U in the air or on paper. So what if the paper

has the effect, the paper would absorb the effect and the effect would dissipate harmlessly. If the person was hostile at the time, then you know things by what is "felt" as you think at the moment. This means what you think is what the spirit will allow you to know. So think and know, the point is the effect and what you think is what triggers the moment. That is where you think something and you know by what the brain senses. This is a concept you think though, so if you don't think or feel the point, you won't always know what is there.

Thinking is a part of the body, if you think about something then the spirit could make as a manifest the idea. If you need the idea as a point in result, there you go it's created and you know where to look. Think if about things to make what you consider important, this if you need to do the idea. Then you can create by the feel, see and work by doing the idea you have to do. This is where you you create by actions, that work with others and they create the point that you have to create. So wearing something like a mask or clothes, that can cause the effect to be absorbed as energy to the clothes. This means the idea you intend doesn't happen, that's unless you think to cause the things nearby to make an effect.

That is where you can say as you think of the target, "sudden death" and the suggestion is what the subconscious creates using the spirit-that-goes-through-everything. This is an effecting measure, so be careful it doesn't bounce back at yourself. The U in reverse with thought that you aren't effected will protect yourself. Think about the result and the idea is what manifests. This can if don't is used by thinking to cancel something out, so you can cancel out what you sense is happening.

That is a point done by feel. So in effect, you could cause the person to cancel themselves out by thinking they are meeting their exact opposite, or the energy causes them to not exist there and with the U you are done. If you draw and trace the U with an overlaid opposite U makes the effect dissipate and remove it's programming from the area. There is an idea you know, there is an idea you see, this is perception done by itself. So there you go, this is a concept you can do. That I believe is doing soul magic, think and you know what to do.

Genjutsu is the eating and created is the point, that you make by the idea you need the spirit to create and what manifests is what you desire by feel or want as a need. However since the spirit can use the food as an energy source, when you run out of energy or the food is processed. You don't always get what you want. So think and you know what you can do. The genjutsu is a point of illusion and that is what effects anything. So think and you can get what you need. Except the feeling, if you think to exercise when you have eaten, then you avoid gaining weight.

Think of a point and touch a gemstone or rock thinking it will do what you need, then your gem will do things instead for you don't really need to be there to watch by the third eye and this is also possible by animals. So if you feel your watched, as though a point is shared then you know its an animal that's nearby. The idea is a point that the third eye is sharing with other third eyes, so think what you need to have known and its either reacted to. Otherwise this is created in the mind and sometimes received by the other third eye if you need the idea transmitted, that is true. This is done on touch or aura energy, that is felt by the senses and the brain construes the point.

Third eye practices are simple, think of your psychic need and then the pineal gland is active with blood flow. Think or the third eye doing things and that activates the third eye manifest. This third eye can also make what you need to happen, if you think it should. So the idea is that the third eye can see anything, that you need to know. This is where you can sense things and that's thinking of the point, where you think to see things you will. Then if you don't need to see or use the pineal gland you won't, that's if you think the third eye disappears. If not, then the third eye is doing something. So this means you command the third eye to stop and the idea occurs by idea.

Then the manifestation ends by what you think is ended. This is where you think to end things and the point that happens will occur a natural ending to what you need ended. So when you think of the point, you can create the idea or shut off the third eye and cause a lack of blood flow to the pineal gland. This is all in a day's work. The "in" there is in blood flow, the lack of blood flow is "if not" and that is where you can use the language. This is done to manipulate the third eye, where we naturally know by experience. This means we can adjust ourselves to the moment, and thinking is what creates balance in idea that we have with the point.

Then the point remains, what can we do with the spirit, where and when can you do things. This is a point in the

past, that I remember in the past. That means the rite is over for the third eye is operational, the idea of learning is done, this is a point in effect now you return to your senses.

So heaven and hell are also real places of torture or happiness in your own mind, where the area could appear like its heaven or hell. That's where you think of the moment and feel the idea if there, otherwise think to not feel if you don't want to empathetically eat with others eating.

The area could also appear like another planet surface, that is if you wanted to visit consciously the exoplanet that is desired. This is like cs-137, where you can create with the beings or explore the land. This is a planet of beings.

That means you can get to the area by allowing the energy draw you there, then you are where you think spiritually. If not physically shifted within a few months, then you can expect to see accidental death and you find yourself there and then where you were is a pile of dust.

This is where the shift effect occurs, think of the place to be and your there, otherwise if you don't need to be there then you aren't. This is how things work.

They say once you are in hell there's no escape, because there is a room that you can eat in, when you do you are there until the food effect wears off. The place is so harsh though, that sometimes you can only think to survive.

So angel's can bring you out of hell as a sphere shape. So I think that there is a point you can think to return to the land you were in before you went to hell. Otherwise you are there for a long time. This is the way things are sometimes.

So expect what you can get is better for you if you think it's good then your positive, if you think its bad then your negative. This is where the mood adjusts to a thought or music by feel. So expect things as they come, enjoy yourself as you do things. This is a point in reflection.

This is done to focus and create by feel the better idea, that could see use with magic. This is also done to create a good sell. If you don't need it, then it doesn't happen so this is a point you focus and energy responds to create what you desired.

Energy tactics are these idea. Wealth is energy. The less energy the less wealth. Orgonite are actually wealth generator as they sooth the souls. If you tap the item and think what you need, then you generate that effect. And generate energies like mini astral factories. Yes indeed, a spirit is possibly demonic if you rile it. That can make them a poltergeist. So they use their feel, then create with the feelings they have. Then that's about it. This is true for animals, too.

If you feel calm and soothing, then you can sooth a poltergeist. See the other way to control the demon, this is think it will do what you want by what you program energy to do. That's thinking it will do things is sending it programmed energy. All you need to do to keep an effect going is eat or drink and keep hydrated by something, that is done to keep the energy up in the body.

So I think a storm is a big demon in ancient terms. Now to manipulate a storm, this is think the storm will do things that you need, then state what you need as you think of the storm. This is where you can communicate telepathically, too. That is done very easily. Think of the person and the message, then you send a message by spirit. That's the true fun. Getting a message in return, that is done by realizations. You realize the point is made and "hear" the message, that is what is understood. This way allows you to get messages and send messages, that uses the soul as the energy transmitter and the spirit as a point of realization.

A hurricane can be alive. The natural forces associated with it is like sentient patterns. It talks and when chanting a weird version of a mantra, it's even more mystical and powerful. So think to focus on the storm and think to the conscious of the storm to get what you need.

Time Travelling  
Ftun

This is time travel. the time travel technique is where I can time travel to any time in idea or area by feel. This is where a point exists and if you mention a when you mention a time so think of the point and you are there by the power of the subconscious. Think of the time as events, that the subconscious allows you to see or know, think of being there and sometime stating the point, if then you are there by the spirit knowing and the soul or soul copy transfers you there. Think about your intention and you know what to do. If nothing is obvious, or there is nothing to do, then take a walk or drive so you do things the way you want. This works to find something to do, if you can do things, otherwise lay down and rest.

The point is sometime you state things, if you make a statement of the idea, then you create the point by the power of words. Don't worry about meeting yourself, unless you were the exact opposite you won't cancel yourself out of existence as if you didn't exist. Now that is impossible, so think about the point and then you know what to do. If you intend to stay, then think the creator makes lodging that you find or you could die out in the open. When you shift, then you could turn to dust here. If not, the point could be sleeping and doing things automatically. Then is the point your autonomous nervous system causes you to act normally. This is a point done by some spirit or soul willing to work with a body.

So that means then you fall to sleep and wake up, this is done when you return at your own time of choosing. This is a known effect. Think you know the effect to realize what occurred there, that is known by the spirit. So that means you can create yourself at any time, wherever you want and from energy that exists. Thinking to return, the time you are in reverts around you and you are where you want to be. This is truly the power of the subconscious, that means it uses the spirit to know things and the spirit then stores its information in the soul. That is how I noticed this time travel works. However, sometimes there isn't a foolproof way to do this, this is in the endig by a point you recognize with what is expressed.

Think about the point and feel the idea is created. That is how the normal time travelling happens. This is a time you know, so think and you can get away with what you need. This works as you are aware of things, so think about the area and the point you noticed. Then you can create by spirit what you wish to occur, at the time you need to make things happen, however this works with the point of idea and breathing in and out, this works even better by the listening to music. Think you know what this means and your brain causes you to know what the meaning is by the spirit caused realization. This is basically how the known effect works. If you need the effect to stop, breath normally, notice something wrong or hear a loud noise and you seem to "wake up".

When you do, your spirit uses your soul to revitalize you, so then you know and afterward you realize what is done. If you don't, then you had nothing wrong done and you can focus on the idea to create the point. This is a point known to man and women, known as insight. That is a point then, now is the point you know by the spirit, so this is a point you realize if you intend to realize. Think about your third eye pinneal gland revealing to yourself what you need to know and you know what's around the area. This is a point you can work with by feel, so think about what you need to know and you can remember things as they exist. This means they that attempt things is where they, those that are what can remember things better, make a picture perfect memory by what is done. So think and you are able to know anything about the idea, area and what may happen. The idea is a point you do, the moment is a point you are aware of by feel or go around. think about the moment, then you create with a thought and make with some concept by the power of the soul. This is a recorded point in the book of life and basically noticed in life.

This is a concept, known as creating with the energy consciousness. That is is where you realize the point, think of the idea and make use of things you know about. This uses incognition. The psychic awareness, that creates by feel and works with the mind as it is the conscious awareness of the brain. Think of things as they form if you intend to get results. This is a point I know about, so this means you are aware, your awareness is the conscious part of the brain, that means this is it's point noticed with things or people. The thing you know is what is reactions though, so this means you are aware of what is there. Think and you know about things, if you intend to realize what is there then you will.

Energy point with the elements

Jul av e t ele

The elements are a concept to use, think of what you need and you can use them by what you do.

e-pasy = energy passage; The point of ice or passage of a point by energy considered as if of the element, think to use the idea and you know the thought, then your programming by thought to water or water particles. This is where the idea is a point, and thinking is the activator. So when you think to use energy of ice by a diamond, formed from gated in iced energy then you create the point of transferrance. This is where the idea you put on paper is not in effect, and then you create by the feel with fire energy to create this result if you need the idea in a point. If you freeze something then, you cause the idea to cease to exist. This is where you think about the idea and write it down, then freeze the paper and create with a point of freezer activity.

e-pase = energy passes; The energy is the thing you consider, think and you make with the body activity. This uses body maneuvers to create with fire or heat energy in use. So think, "now your free of what you do from" this is a point by feel where do is die off and free is a point in the past. This is an interesting effect of passage of energy, seeing this is a point and thinking your not effected by feel.

e-ec = energy convert; Think of the effect if you need energy then think to convert energy into water, that uses the gemstone of moonstone or aquamarine and the elemental water appears on the bottom of the cup. So think to create a thought as energy focus is done, that is directed by feel and programming towards the water source and you use fire or heat energy to create what you need by feel. This works by feel if you consider the idea, think the effect exists and you can do the idea. Think of the point, then you can do what you need. This is a known effect done by feel.

e-ef = energy effect; E-fx, the effect is fire or that is heat in the air and converted is the thought to energy, this is done to create a point and the transition of energy to create with your will and made is the point. If you want to create with a ruby or fire opal, then you hold the gemstone and create by thinking the fire energy passes through the gemstone. then is sometimes the point to create by manifesting your thought you need to happen.

e-eng = earth shift; This is earth bending with a point, you think to create with energy and the area object or soil can create the point you think about. That's making through the use of transferrance of the thought as programming, and you create with a point that is done. This is also possible to use the earth to manipulate gravity, think to shift the object through the air or area and the item goes where you think in the air. Sometimes if you think about this though, you work with the planet your on and create by the effect or otherwise you won't get a result. In the end, this doesn't matter, so I think this is a done deal by feel.

e-air = air effect; Air-fx, this is where you think the energy in the air creates by vibration, otherwise if you think the point is done you can create by the point and the power of words. The air stone is tiger's eye. so if you hold the tiger's eye, then you create the point of fire energy or water energy. That is made by fire or heat and water energy particles, this uses thought programming to create what you need or think into existence. See if you thought about things, you created by feel. So this I think will work by feel.

th er ng = earth effect; This better work, this is the finer thing you can do, so all I need to do is think, focus and create. So holding a gemstone will create the point you imagine or think easier by feel, or what you think is this will work and attempt to do things. This uses the amount of power in the energy of the words.

en = void; Dark element, the idea is done by darkness if you think the idea and sometimes use the object for example you create with the idea. Then the thought isn't you, the point is done by feel. This is a point you think or consider using positive languages, think to create with positivity the use of a focus that is done. Think to work with a concept of use of focus and a word of power or gemstone. That means you create by the idea you feel is going to happen or when if you don't need that to occur then think of something else and that happens instead. Then if you think, state and know

things, you create by the power of words. This is done by the spirit and not much is completed if distracted so you don't have to worry over eating. This means you won't eat too much, if you think you won't by feel.

fig = the figurative element, It is basically just the dream/idealization world. Not a true painting of the world, it only consists of beliefs. Areas nobody remembers aren't painted and the world only consists of lucid creature's beliefs. The figurative world. A figurative element, say an imaginary friend like a Jackie Chan tulpa you created can beat the shit out of a ghost that is haunting your ass for example. Basically the sum of all being's memories. A giant dream junkyard dimension. As opposed to the dimension where spirits go. This works by imagination and need, that the thauma picks up on and creates by feel.

tama = thauma, magic; This is created effect by imagining the idea of that you need or feeling the idea is done as you think about what you need, and this is sometimes by gemstones if touched as you think of what you need. This uses intent and idea is what is done sometimes by expression. This is a known effect of emotional release where the body gets energy, and that is the release of emotions that creates the energy from the pent up emotion.

anie = spirit; etherial change, animus, yaa (spiritual subparticle), ether, alera, aleron, eludia, metainfluence, alpha waves, aether, felt influence, there is manipulation by the energy of the soul represented with the spirit. The spirit is the emanation of the soul energy through the body particles. The thought you have is sometimes realization brought about by the soul with insight, this is where the spirit is creating things you need or want by what you think. The spirit does things by influence, so if you create the point you make by idea or expression. This is a known effect, where the spirit knowledge is used by what the soul reveals.

That's if you need to know and the subconscious is making you aware of the point. If not, then things are normal and the idea is what you think. There is an aetherial plane, too that has all elements in it. So don't get them confused. The point is made as simple as this, to get how someone or something died or lived, then think to the spirit of the dead bones or dead body and ask it to tell you how it lived and died. This is an effect that the soul reveals to you by insights on what the body did.

lum = light; The light is what you see things by and the light shift is the creation by the light energy, this is where you create by focus and the light energy is what does things with your thought waves. This is a point of creation that can even use sunlight, until you turn off the light or the light from the sun is blocked out by clouds.

bod = physical; This is where you create by the idea with the memory you have and the point is done by expression, the soul is what empowers the body to create what you need. That means you create with the point of energy in the body. This energy is either food or energy by water, and this is where you make with what you have by feel. The body senses are what rules this element, if you think of the point, you can make with what you have by feel. Oh get this, the physical aura is energy of the body that burns away the air particles and this breaks down whatever is in the air into oxygen and nitrogen. That is how the body breathes. Whatever you desire, the soul does things if you need the idea by causing physical activity. So this element is useful if you think to do magic, that means you can create with the particles of the item and create of physical magic or the art of creation with what you have available. This is a known effect, that doesn't use anything except the soul in idea for physical actions.

sol = so, Divine; The idea uses faith for what you need becomes of the body after the soul transforms things or idea into manifest, this is using an idea that creates the point of what you need for the idea to exist. This sometimes uses a point of expression to create with the idea, there you know will exist by feel. So what you need to know is what you think to realize by insight you have with realization. However the soul is insight, so what you think is what you get. Cravings and creation are with the soul causing the body to drink water, and you get energy from the food as well. They are what empower the body to create to the soul need and the combo creates divine idea by feel, otherwise that is done as a manifest or created item is what you need. This is created by soul influence, and you get what you can see to get. Modiver is the god of alahnis, the creator is the alien god of atlantis. People are divine, so think of the idea and you could get the idea. This is done if you imagine or think about the need as a point of idea or intent.

think; The effect is done by thinking, and this is the use of the subconscious that your spirit causes to occur things. This is where you lose excess weight by feel. Think about the effect and you create the effect, if needed or not do

things for eating less.

Basic words, action verbs and structure

The basic words and structure is with use of the words that is used to form nae horrible things to have the idea represented as action of objective views. Then the idea is put in a string of words as nonsense variables acting like syllables that are to represent what your thought is by feel. Its like a word phrase image idea. Built up from the idea that your base word is represented by a idea and the thought is a string of words, they are likely under a different structure. To know, extreme brainwash is to be able and represent yourself better. To accept and be accepted by its word for its word.

The words can be nouns, adjectives, adverbs, preposition, verbs depending on use. Finally in idea, the words can be strung together, like old latin and greek, for complete sentences. Proper nouns are capitalized even in strung together sentences and also separate. When writing the sentences, write the words together in a string, such as "T-b-g-aoey" or Tbgaoey = this be a good opportunity. Any separator marks like ,.:'"() are left out, except the ' mark is sometimes used for complex words that are combined, and spaces be in place and also for prepositional phrases the space be before "by", "of", "with", "before". "that", "at", "if", "then", "there", "those", "but", "as", "among", among others like "which". Any word after a period or the start of a new sentence is capitalized. The ' mark is pronounced as a short pause and the space is a longer pause.

If used in a atleantian translated sentence that has spaces between the phrases and sentence endings and beginnings you may use a "" between words in the phrase. The Proper nouns are left separate and by themselves, unchanged except the last vowel be treated like normal in the letter replacement section. Adding a capitalization to the word gives the word a stress, importance. the word cluster groups are separated into similiar concepts. Each concept is set as on a word or string of words. Alternate style of word stringing is Capitalizing the beginning of each new word and this is a point in the sentence. There is a point that ends that word and the endpoint is the area of a space.

Also, you may separate each word and use that as a structure plan for the phrases. This is used to make it easier to read, but you must add the proper endings, except for pronouns, verbs and single letter words.

The words separated in sense is the sentence: 'Me c wh ya nedan' = I see what you need.

The old style of word stringing:

"Icgreviwan Mefelpecnon = I see the great view. I feel peaceful now."

"T Relan Pana Unoe = That is not to eat people..really that hurt (pained me/you) you gnow" or "If you don't like that your not getting it."

"Jellon ishal'gu'tu'eta = Gelatin dessert be good to eat."

"Mluvnglen sotrytufiga a an in structlin" = I adore english so I try to model this structure like it.

"Ifyureserkt thucadoitmo aivbijyuse-e-biothmene" = If you research it, then you can do it more, achieve by yourself and by other means.

Life be an idea, promote to get action in action by emotion. Void where prohibited by promotion or no divisional acts.

"Lyeiie pruoetuga iacta byemoe Voiwaproiyo tipruoe-o-nodieeyacte"

Life be an idiot, try to work things out with success (pursuit). News to me and news to you.

"Lifeiia triytuwrkthouwan-sue Nueiman-e-nutuun"

"Avadptryy tuwotoudestruye" = Avoid people trying to work things out destructively.

When your not a friend be not a friend unless you want to be friendly, for a friend in need might die. See that's the worst thing to do, not excepting tricks. To die in developement be also the worst, as for fetuses and things in progress or similiar. So to create the effort and die for it, may get you a chance to not want to develop it next life for no area visage by war elephant.

"Vi thy u a itr beh u a itr ale thy iwa ie ser itran fo a itr-n-epi mi d C tha th worst t ie fac  
u eptan trie Ie d-n-ehwaz ser thu th worst oh fo fe-n-source-n-fo-o-ish So ie mai th-n-d fo t  
ma g thy a ism ie u iwa ie dova t nx ytapu fo u val vey ti uar ofy"

"Donchet ketan-e-thworsan thtudua foa-tiacta ofviolan violin"

Don't cheat or you feel to no usable eat, Cheating be the worst thing to do, for its an act of violation where's my war elephant then.

The alternate word stringing style.

"Uua Ye Tan Lay E Dw Yiun Ti Oya"

Don't you want to know things, intolerance is dealt with intuitively by activity?

Otherwise: "Were you aware of you as you award cruelty? This is by love life or not."

"Hn thy fac, thy can oupy di."

Whatever you do, you can't outpace a dog.

To combine two declensions use an to denote idea or "oil cloth" separate two parts as assent is their, with request is withheld moment as person not allowed to hit or wit"hout changing the spelling so a space is a space away. See unless vowel is morning cloth see life or consonant is body so thats doubled, so that allows things to have no bad effort see for idea to effect you have for have some activity or side effect, or is a combined by added together meaning or thought two or more uses to create with by area group.

Where the effect you see what you ask a point seen or an declension be known by stating the phrase, and to attempt to combine by removing the word letter thats doubled with declension or drug that gets a bad result. Saw is an aspect to this or enzema fantasy "emphasima", see or whats bad is ae ie good for you take the aen no use or pain freu from another. Seen or feel is order or thought see whats denied, peace is thought in some bad fantasy by life. Seen is feeling though you won't issue or use by ideas by us.

Combine words or statements to use the word or area use by feel or this is use, an by the person wit no bout of war. See negative stops as the endpoint if you sorta have to guess use, see this is never or sight is not forbidding area as asset is interest or theory use is creative. See no is uu is cruel or uu-uen so don't have to make it if depicted, do not bus it as you are aware you reward yet no in cruelty viewed in the past not use. Were you aware you award cruelty? Specific is use by firm body, sometimes to cause fat so magic is harder. Som (secret of mana) area is creative use, so you see that says what you see or feel by no use.

So you see this is cool, as you are or will these people stop fighting? Shock or so is sock the footwear kind which if worser to see is fight or use if soft is allowance similiar. See as in la (last action, bring yourself, law) and aro (arouse, arrow or arose) create war or money redemption as laro meaning (arousal or call attention). From the area of The gray company elven dictionary, I will attend the example of "when creating words from two or more words, append together and drop enough letters from the appendor to avoid cumbersome letter sequences or valuable machine carriage. Like aa or cc into one but only in word creation." This expresses my methodology even before I looked at it, so this suits the purpose better.

For contractions; You may use them as a separate word and think to combine words, like you and have in a contraction, strip the vowels and the consonants off the second word. This is leaving the last consonant and use the ya

or u for you. That is sounding like ya-v or u-v.

Some contractions;

ya-v = uv = you've, you have or your having

ya-d = ud = you'd, you would

ya-r = ur = you're, you are

t-d = it'd, it would

t-e or t-x = it's, it is or it has

Used in a sentence it's like: "Nedan FoSnuenedan Uicshrdan Tureeta" which equals 'Need for Weed is a need which's(uics) hard to resist.'

Some action verbs are this in use:

'can' is 'ca' or 'cal'

'did' is 'di'

'do', or 'make' is 'fac'

'had' is 'ha'

'get' is 'ge'

'go' or 'walk' is 'amb(i) '

'has' is 'hath'

'is', 'am', 'are' or 'was' is 'e', 'est', 'ishal', 'isy', 'be', 'b', 'waz', 'wa' or 'isa'

'be' is 'ser', 'ro', 'beh' or 'b'

Some words not easily found in this dictionary with over 100 words are 'like', 'mind', 'the thing'. 'has', 'it', 'he', 'she', 'him', 'her', 'its', 'no', 'know', 'gnow', 'by', 'to', 'too', 'two', 'up', 'down', 'else', 'was', 'am', 'maybe', 'would', 'wouldn't', 'can't', 'yes', 'now', 'hi', 'on', 'off'.

'like' is 'li' or 'ae'

'mind' is 'ego'

'all' is 't' or 'this'

'the' is 't' or 'th'

'thing' is 't'

'the thing' is 'tht'

'it', 'he', 'she', 'him' or 'her' is 't'

'its' or 'it's' is 'tix' or 'te'

'no' is 'u-' or 'u', otherwise 'ain't', 'nan', 'bn', 'nan', 'naent', 'nought' or 'n' can be substituted

'know', 'gnow' or 'gno' is 'yes'

'by' is 'ti'

'to', 'too' or 'two' is 'ie' or 'tu'

'up' is 'up' or 'eeh'

'down' is 'du'

'else' is 'els' or 'ls'

'was' or 'am' is 'b'

'maybe', 'could' (have), 'would', 'should' or 'almost' is 'wu' or 'shalt'

'wouldn't' is 'wun'

'can't' is 'can'

'yes' or 'you' is 'ya' or 'u'

'yes' is 'so', 'aye', 'si' or 'T'

'now' is 'if'

'hi' is 'higa' for female tense and 'hima' for hi man or high mountain sometimes it can be 'hi' or 'i' that in technical terms means flow.

'on' is 'a'

'off' is 'of'

The a(n), the, an/d, but, or, in, if, I, at is not actually there except when you feel it should be there.

Represented by;

'a' is 'a' or 'an'

'is', 'am', 'are', 'an' or 'and' is 'e'

'but' is 'ut'

'or' is 'or', 'aur', 'our' or '-o-'

'in', 'en' or 'into' is 'n'

'if' is 'if'

'I' is 'ego', 'me', 'meh' or 'tha'

'at' is 'at' or 'a'

To get an idea of what is the way of the words think this "neon = won't buy" 'the' and similiar words go to 'personal pronouns' in section -VI-. To know the idea of what associates with what of simple words go to 'Symbols, affirmatives and association from several sources' in Section -VII-. For more info on suffix stems go to this next section of the Pronunciation key of Section -IIa-. To form words go to the 'letter replacements and word creation' in section -III-.

Some more commonly used general use words as stated is life:

'adyu' = 'tchiao', 'adieu', 'good-bye', 'farewell'

'ciou' = 'cioau', 'happy farewell', 'happy ending', 'happy goodbye'

'hu' = 'heighten', 'helio', 'who', 'fire being'

'wha' = 'what'

'hih' = 'breathy hello', 'expressive greeting', 'useful greeting'

'bye' or 'atlu' = 'goodbye', 'chow' or 'adieu'

'ciao' = "byde", 'bid goodbye', if aggravated then hit to feel better

For more words think to correct what you think is what happens so just goto the appropriate area and search for the term ya want to know.

To use the words for magic, inner mind inner thought that is aggravating. As yet of another time so the put together is use, with the spell in a sentence is with root words and then without the end stem affix so with each the word capitalized seems like the example sentences. Feel free to use a candle, black or white and light the candle, to get better effect. Use any word phrase, that means your intent, made from the list below. As in, you wanted to do a better sight spell, look in the candle after lighting and say "betaISit", pronounced (beta-aye-eye-site). Supposedly your eyesight improves, after thinking of target such as yourself. The way this works be usage of raw energy from any area but mainly the water, even if its corrupted as the corruption boils away and it forms as spontaneous casting unless using a candle. Then the ritual be done with more permanent effect, anyhow its done there be lessening of air temperature. With more energy there be more gain in effect per energy level. The people of earth, air and water elements can use these to beget effects.

EX: For good eyesight, G-EyC = (g eye-c) good eyesight

EX: For un deathseeking not of another (as not by yourself), SekTuK = (seek-too-kah) seek to kill.

EX: To kill disease = IIPK (il-nepp-k)

EX: To make food, water and objects without excess = TuMakFud Aqo-E-ObjW/oXs (Too-Make-food ache-on ee obj-wih oh-xs)

Praoncie Ke

Pronunciation Key

The key has no denomination as in no personal view and everyone's equal, thus objects are spoken of with idea by a personal view or expression, and people are in the third point of view as if another person viewpoint. What helps is the pointing out, declaring what you are talking on first as in a point that's made. Say this is a poem, song, and this can use gesture to help understanding. If you yourself can't understand the communication, then its counted as noise and ignored. There is a part of this in speech, if you want to hear this spoken listen to this. [<https://soundcloud.com/chris-moisant/pronunciation-ii>]

This is there and that is true for netherese. The idea is this, think to enjoy speaking and you can work out the vowels. The way to pronounce these words are through vowels as in "a", "e", "i", "o", "u" and "y" as a half-vowel with the short vowels as in "a" for (yah) and long vowels as you, except its reverse with "y" that's short like (while) and long like (will), that's formed sound from other vowel's influence.

When a "y" is in the first column, this can be pronounced as a "w" or "yu". Single vowels are long, double vowels make the first vowel long and the second short, this is excepted for when the double vowels are the first part of the word, then its spoken as a single sound like "Aaron" is "A-ron". Three vowels are first and often second long and said together. The third vowel is short and the y is usually long.

Three vowels of the same, are pronounced all long. Four and more vowel words are pronounced with all vowels long, except when the last vowel is the last letter of the word. Then the last vowel is short. Like Ieeek (I-eeek) for I

seek to be friendly and bound (to help). See or not construe, Yieeee as (Why-like-Eeh) for Why I shriek. That handles the vowels, now vowels with a part mixed in any consonants are what you think, that's long unless its Y then its a short sound.

Any vowel in front of a double consonant, (like tt) be pronounced as a short vowel except the vowels that change their pronunciation completely like y which be long as W or Yu. This includes z as a y sound in chez is ghei. For jhe is zhe or g, and z is zheigh for j like sounds. So Jhe is ghe or G and in front of a word is zhe like j is z and z is j unless in a word then the j is sounding like an h. Vowels in front of the double consonant are flat like asset. Final consonants of roots, following a short vowel, are doubled when suffixes are added (from the Atlantean language) like lear ~ learre.

The single consonants are spoken as soft even when put with a different consonant for example cackl = (cahc-kle), letb = (leht-be) except for lets = (leht-s) with a slight hiss to none of the s. Use double consonants spoken hard like raccoon for "cc" yet the "ss" be like assume and be the exception that sounds with a hiss.

Otherwise, with any three consonants its first two sounded together, the last sounded separate like ltgeneral, lt-gene-ee-rail. So with some words the ch is used if there and male as sh sounding, and then if female its k or ch sounding. Like chares or peace, where a man would pronounce this share-ee-s and a female would pronounce this chair-ee-s.

Some words where they are combined, with totally different meanings, as the result, If derogative or derived negative word meanings, are used in combining words together, there's two different ways to derive the meaning. As this is a point in thought, when they be declension or derogatives, they as a point is a moment as part of the idea. There is a moment that noting the word and the magic.

That makes the word unidentical to the actual meaning, this is true unless your thought matches the idea and not brainwave length of the individual. The idea is a point as your thought is caught on tape or recording device, the idea you express portability is thought and created as a thought in a moment that only you can detect with focus. Think though and you know how, with practice, so what to say is what you think to create. This is a known effect.

The word meanings are possible to create with a thought and use is the idea, or any will that you detect in mind to understand to know the meaning that are with both words meanings, as meanings put together is as though two or more words put together. And keep in mind, some words are not meant to be combined. If nominatives, then they be made into one meaning, in some manner some speaking aspects are thought and known.

So use by the idea is a point, separate in the declension words, and undeclensions are with a dash (-), so that the words that are derogatives and declensions, when putting them in sentences, don't cause problems as this in translation is sometimes wrong, so dismiss and try to create your own to avoid confusion. How you want the words understood, be instinctively. With a thought, fewer word lookups and more lookup idea is a concept word root study as possible. There is a concept and nothing there is as thought unless there is nothing there to do.

There be no case except for three in this language as its active case and naturally considered magic case like the linux magic number that uses auto references to get the effect. This be considered hyper translation when used in active speech, where there's no case extension (affix) of the 3 cases, that are dropped within a sentence of no spaces. Use more than one ending or affix and only if necessary. Do this as a case in point.

Singular verb: - or -a, Except the - can connect two words like declensions.

Any plural: -(i)x for plural and -x can be in place of -e or use I with a consonant an the -x.

All other cases: -(a)n be where the usage of 'a' be behind a consonant.

Optional s: use -e at the end of the noun or verb. Like know is kno and with the -e its knoe.

Optional r: use -r at the end of the noun or verb to indicate movement or activity. Like kno and with the -r it's knor or know the movement or action by activity.

Optional ed: Use an -o at the end of the word. As the word augment is aug as root and -o as stem for or creao for creature creator.

Optional you: Use an -u at the end of the word. This if used in negative thought is an option, that blames the intended person or group. So this means 'a person that' does what the word is in effect. Such as avai for take, then add a -u for taker or thief. This is how you would use it.

Optional ing: To form nouns and other cases into verbs. The idea of in and en is -y with consonant an vowel or as to be with feeling its -in for present action or -en sometimes for past action. As optional additions, as this shows conception of something or to use an -ing effect. As in is into and en is in or at the end. To bein in is like been except different meanings as bein that is being and been (benen) is beneath or not being. As benigning is bniy.

Using -ih: The ih or h (if after a vowel) ending can be used to work the point to halt things and denote not or no in front of the regular meaning. This is where oe is done then oeh is not done.

"Etiamax" = Lets stand to make (a difference),

What are you saying? = "Varusax", as variety a sacks

"Arudua" = How are you doing?, or not rude at all.

"Arux" = Abrupt use, not done by the effect of what is and isn't.

"Abrubix" = Before rubs or abrupt rubbing. Sorilea soreness.

"Ydutnowan" = Why do that now?

"Yneadut Asuluken" = Why not do that as your looking?

"Gluky" = good looking.

"gifuh" = no gift.

Now why didn't I look at this earlier? = "Nowydidmeluka Atherlyran"

Now energy is right, corrected as necessary from that game. = "NowLetisCmorAsTu Amor Aste Asten Gea Astec Vei"

Depending on usage for example; the word aq meaning fact or factor can mean also factors (aqix), factoring (aqix), factored (aqan). The k as in kn be silent or dropped yet influences the word like in knuckle. the "h" as in "bhack" be unheard with only an influence except when alone, th treated like t, Bh treated like b, Kh treated like k are letters but the t be unheard or soft, b be soft, h be also silent within a sentence, Another word aao means bank (aao), banks (aaoix), banked (aaoix) and banking (aaoa). The tense of the words are hardcase so "I" unless needed, "of", "or". "our", "that" and "the" are assumed yet not placed in the phrase unless you want it there.

Use simple word patterns for complex sentences.

"lets make a difference" = "letmaitaix". Due note this has no "a" in it from the english phrase.

"lets be different" = "Maybtai"

"this be our way" = "tbaye". leaving out "our".

To say "This Can't Be Yogurt" = "TCanB Ugite".

To say maytag, be "Mayta"

Examples:

rak = (rake), aroo = (ar-oll-o), waii = (w-aid-rite-ihn), cyl = (sil), uar = (war),

yyn = (yin), c`aa = (c-yay-a), tar's = (t-hair-s), zap-o = (z-ape-oll),

e`iryy-i'pu = (ear-ire-il-why-puh), zyl = (zil), elevn = (wee-l-see-vn),

decty = (d-eh-c-tye), betto = (bett-oll)

To put these words together string the words;

EX: Eueios n-hawaiin = Languages and desirous as nothing is involved in depicted sacredness as instantaneous.

EX: Eueios n-hawaiix = Languages and desirous in sacred depictions.

These are complex sentence patterns;

EX: Ichluffigy`omue itek'gymix = I love exercised vision in taught exercises

EX: Urion e-eplen-uoy y'aftan = Most important be enduring long instances after power actions.

EX: Ich e`iryy-i'pue id = I at last changed self being peculiar in mind

EX: Disishwodstuukae = This be a sentence (long word string) strung together.

These are with numbers;

EX: sexeoe I quadcentquadtrimille I tuten = 6,443,021

EX: onzanai dec e dectdec =  $11 \times 9 = 99$

bank account: this atleantian banking is use by feel to keep as you wish this is done. if one were not in to indiscriminate one use is all thats needed. look here to -ivb- for alternative banking.

nehi or min = lower or tremble or treble

mine = minimum

mane = highest

ad = aal, raise

ao or stupid = bank account

aal or ael = savings

aaw = money, atm

oal = loan

thinking = activity

think = thought

The ideal way to work with this is use is us, ao means bank by ao, banks aoix, banked aoix and banking aaoa. Thinking to create with banking use is "nahi ao aela" or ne nihi nahil by feel is aalih e ao as its went by feel this is what I went to work with others.

Spells are many things. To many different people. There are confusion and lying spells. There were memory and privacy spells. Most genius spells done by geniuses. Most defensive spells done by those hurt. Most offensive spells,

done by the defensive. Where confusion spells are done for defense. Where lying spells, are done by the defensive and offensive. When memory spells are for those with confliction. When privacy spells are done by those defensive, then we got programming spells. Done for all of the above. Usually for correction and mostly for fun.

Letter replacements and words creation from other words

A. These are the letter replacements used for the words below: Use with any word you come across to create an atlantean word for yourself but remove the stem like ing, ed, s and etc. Warning this key has no denominations.

1. The "e" at the end of the word is removed as its silent and not spoken, otherwise retain the e.

2. Remove the "h" from the word, if silently spoken.

3. Any "a?e" where the ? be a consonant, remove it making it ae.

4. Simplify the word as much as possible in one or two passes, except for two or three letter words, and except for the proper nouns unless its desired to. Remember that ei is neuter, ie for woman and ey or y for males.

5. M,N,L,S,+ voiced consonant > MM,NN,LY,SS, ZU,PU,BU+vowel> Z,F,V.

(Note that these letters were originally pronounced ZH, F and V even in Imperial Atlantean).

6. S between vowels>Z, -NC- >-NG-, -PH->-F-. (Note that PH was always pronounced F in any case).

7. Final consonants of roots, following a short vowel, are doubled in writing when suffixes are added (as in declensions and conjugations).
8. Diphthongs changed to single vowels in all positions (including finally), i.e. OU>U, EI>E.
9. In triphthongs, such as AUE, EUA, the last vowel vanished. The surviving diphthong was also usually simplified, especially if final, eg AUE>AU>AO>A.
10. Most final short vowels became -e.
11. Where some or most atleantian has the singular verb:- or -a,
12. All other cases: -(a)n be where the usage of an be behind a consonant
13. All plural cases: '-ix' with other vowels, drop I except e.
14. When the word be three letters or less, drop no letters except the e or h.
15. ough>ue>u; like tou or thru
16. sometimes the words can seem or are similar to the sounds they make, so the meaning is what they sound like.
17. transitional words or verbs can be useful, that's depending on their use and they can mean anything in the sentence and they are these: t for it, (those things are useful) thing/s, he, she, something. th for these, those, that and this (is fair).
18. The s ending for gender is where the a is male s and e is female s in word ending, this is useful if you need to denote gender by an added s.

B. The old ways before reform of the word rules are listed below to convert words borrowed from the language site.

<http://members.tripod.com/grahamjmabey/Languages/Languages%20-%20introduction.htm>

C. Below this section be the root words and by use of for the associations section can we obtain verb tenses and cases to add on with use, and make the words more easier to undestand. The letter replacements are necessary within the word. can be used with neth.

### Number system

The numbers are in groups of 3. Every three there be a spoken e(and). Math functions such as adding and subtracting are just like normal. Use for addition, the words "e" = and, +, plus, ig = adding, +. ig`o = added with, of or to, +.

35+44      tritceli autthein

28+16      buoutoct ig'o eniz

Use the words of a-, fro or sohr = subtract, -, minus. To use it combined be sohr'fro or a.

17-12      dente atulv

20-1      doubuou fro en

Times, In order to express so many "times", ie once, twice, three times, etc, add the suffix -(a)nai to the cardinal (include the "a" if it follows a consonant, omit it if it follows a vowel), eg:

once      enenai

twice      buounai

nine times      nantanai

Every / each, To translate "every ...", eg "every three, every four" or "three of each, four of each", prefix the Atlantean cardinal with "ton(t)-". Use the form "tont-" before a vowel, otherwise "ton-". EG:

Every one (each one)      tonten

Every five (five of each)      toncel

Fractions, To create fractions, add the definite article before the ordinal numeral(5th, 4th with ul or l if vowel) for single fractions, or the relevant number(1, 2) for larger ones, as in English eg:

one half      en buoul

one third      en darcul

one quarter      en theinul

two thirds      buou darcuix

"-ly", "in the .... place", To translate words like "firstly, secondly," etc, add the adverbial suffix -ehe to the ordinal, similar to the English construction, eg:

firstly      enuyehe

fifthly      ceyehe

There are two numerals which do not correspond to the expected formation:

tenthly      douyehe

in the seventieth place      ariehe

"-ruple" or disruption, "multiplied by", "...times". To translate formations like "double", "quadruple", "twenty times", there are two methods depending on whether the construction be an adjective (as in "triple salary") or a verb (as in "to triple a salary"). As an adjective, prefix the first part of the cardinal to the relevant noun. Note that only the first four (up to "quadruple") are regularly used in no feeling your able to eat more or not, so turn off the machine if possible as you use magic or destroy things if not capable to achieve what magic is tasks. Ie: Put the rule as enter a number to create a shift as you think the number your there. So use the number then the tuple "or fall over" not parallel disgusting not always someone there or triple indicating place. Time is where you are wanting to see. So this is see or seen to use.

2x Double      buo-

3x Triple	dar-
4x Quadruple	thein-
5x Quintuple	quo-
6x Seixtiple	sex-Sex is in the forbidden world or abdomen called viw or no vowel
7x Septiple	sept-sein wave non use.
8x Octiple	oct-
9x Nentiple	nent-
10x Yestiple	yest-the way you say it
11x Eltiple	elt-after a specific event nothing happens
12x Nintiple	nint-away with you as you see.
13x Noentiple	noent-entiple otherwise is use.
14x Ninitiple	ninit-
15x Nuntiple	nunt-use this if well to get away from him that said that to you.
16x Duntiple	dunt-
17x Septeimotiple	septeimot-you become dragon use so seintiple is a variable.
18x Nontiple	nont-go ahead
19x Bintiple	bint-I am thinking that you would really want to gno.
20x Partiple	part-un is use.
21x Deciemeotiple	decit-big word after you use irresponsible behavior or use it you won't be able to get anything so don't go beyond. so much more longer living. 9x1000000000^9

Single be a separate adjective = encanul.

As a transitive verb the way you speak indicates what you are yet activity is not always what you seem, this is what led to your area murdered after the original murder so wish it away. So if no repeat necessary as you seal violet light away, by thought remember my use as you see this you are gone to your world or use is feel not use. Atlantean used the construction "to make two", "to make three", etc,

with the verb "ei thaid" plus the cardinal, eg

To double / make two ei thaid buou or ein thaid buou

To triple / make three ei thaid darco or ein thaid darco

To express the intransitive verb, "to double" in the sense of "to become double". Atlantean used "ad ern" plus cardinal, eg so continue not.

To double or feel / become two or more use or not destroyed ed ern buou or en ern buou

Ex:

35500 = trit-quinmille e quinent

99999 = t-nimille e nacentnantnan

cieo e quadcentquadtrimille = 6,443,000

7,400,640,851 = syitrilni quadcenteoix sexcentquadtmillei etcentquintune

twi = twine, bival, between, area line no measure  
val = area, various variation  
vyln = land plot, ramp, slope  
vylna = upramp, upslope  
vynastep = upramp, steep upslope  
vynuto = upramp, steep incline, steep upslope  
wea = length  
wia = width  
cucl = circle, 1-sided curved shape  
oase = ellipse, squashed circle  
trul = triangle, 3-sided shape  
qudray = quadrilateral, closed four-sided shape  
squ = square, four equal sided shape  
rutigl = rectagon, rectangle, right-angle parallelogram  
traad = trapezoid, three unequal sided shape  
icutrad = isosceles trapezoid, three equal angled shape  
pruire = parellelogram, parellel opposite sided shape  
rhubs = rhombus, equal sided parellelogram  
pitak = pentagon, five-sided shape  
sexak = hexagon, sexagon, 6-sided shape  
seak = septagon, 7-sided shape  
oak = octagon, 8-sided shape  
decak = decagon or 9-sided shape  
polyk = polygon, multi-sided shape(10+ sides), shapeless  
orb = orb, perfect sphere, perfect solid circle  
utatry = octahedron, double pyramid  
bg = box, solid rectangle  
hypbg = hyperbox, 4-D space-time object, that be 1 x 1 x 1 x 1 (a 3D unit cube be 1 x 1 x 1). A Hypercube consists of 8 identical cubes, each sharing its 6 faces with the 6 adjacent cubes (in the same way a 3D cube shares each of its 4 edges with the adjacent 4 squares to form a cube of 6 faces). Each of the identical cubes appear to be different sizes and shapes due to perspective. They really are identical.  
cyida = cylinder, solid parellelogram  
kon = cone, solid triangle  
sfa = sphere; sfere, solid 3d circle or ball, this is a ball either perfect or not perfect in formation.  
pya = pyau, pyramid, tetrahedron, pointed top box  
taay = tetragon, solid polygon (10+ sides)

#### Other idea

- = n, Roman for nulla or none, nothing or not, zero or 0. However, Debits on the left, credits on the right. Also using a zero doesn't matter if your only mathematical operandum is addition and subtraction... PE(MD)(AS)

banking

aao nahi; bao bao

bank account: this spell or description allows atleantian banking by feel or text to keep as you wish this is done. I swore not to return since what I saw there was acoholics. so h is lower attached or not to the end of a word, l is low by the feel. a is actively or normal with e. e clabek nahil is the point is done by a hundred more or less. maybe useful maybe otherwell ideal.

Money  
Or'a -o- Mora

When money is involved nowadays in atlantis or Mora, there is usually no inflation. That means you divide the amount by 100 or remove the period in the money amount, that's for values with inflation from their point. This works as their society is using trade or the non-inflation value system. Basically, you can see 1 cent worth 1 dollar, 5 cents is 5 dollars, 10 cents = 10 dollars, 25 cents is 25 dollars and 1 dollar = 100 dollars. Then you take the dollar amount and add two zeroes without the period. This is how they are in atlantis nowadays and the true value of money without inflation. So with inflation, there is the basic amount = the basic amount, and that means 25 cents is 25 cents or 600 dollars is 600 dollars by idea. Basically, you can get 1,000,000 dollars from 10,000 dollars and 1,000,000,000 dollars from 10,000,000 dollars today in your normal reality.

Fruit and food - I, kre the wordsmith, created this food list from the listing and converted some words to the Atleantian speech. Don't always believe that thou will get what thou call into existance. To read of them try not to eat of them as they can be called by a glancing. To make your own food, place the two word phrases together meaning the item name before the equal sign.

Gods, Angels, beings (demihuman) and demigods -due note: some gods listed are dead and the follower in the faith disappeared, so not all names will evoke a reaction unless you say eraktu satura and the gods name. How it works, your subconscious does what the thought is that they need if your divine or the divinity name is listed. Then if you want to do the request or make a result, you will create a result. If not, then you are likely to ignore the request. How you know a request was made is simple. You will feel an urge to create or somesuch. Then the subconscious act will strengthen you by feel or fee. So there you go.

-Newer Gods-

-the four elemental gods-

An = The fire goddess; The fire goddess that went by several names; An, Ann the stormer, The reformer and what she means to do is the idea where you are aware by awareness to work, she is the fire goddess of the fire realm as you wish or think to work or do things. She can arrange things that you need or want by feel, this you think about to fully manifest and you can get what you need. A point of recall is this from my elemental lifetime, this was where the gods and goddesses were single, double or triple letter words with a rare combined word phrase as one word sometimes that described what you felt of them. Sorta like Ewe was the animal god that had to be shown what to do, that combined with the modern phraseology that described what you felt of them was a longer name like creative or Ewe Creative. That idea combined with An is An Creator. One thing she did that was unusual, was allowed people the use of storms to create by feel. The goddess created with storms, if any were nearby and then worked by feel to create what the asker needed. This was how she worked.

Uaa = This god/dess is a tranquil peace person in real life nowadays, so I think he or she deserves a point of respect, as a him he is the elemental god of water and as a her she is a goddess of peace. Call upon Uaa to get the way of life and make work easier by guided intuition. Otherwise he/she creates peace from war and makes things manifest using suggestion. This is a god/dess that's worth the effort that is given. This is a point that is where war is done and peace is created, after the effect of idea that exists from space. Then you know life can exist in space or basically other planets.

Eo = Eo is the elemental god of Earth. Think of this god as he is earth, this god can support by actions and make work easier. He tends to jail people that abuse his nature though, that nature is kindness to others and working with the idea that exists. He is a dead god nowadays, so I think his followers were destroyed in the caves they lived. They were very apelike and capable with tools. This reminds me that I have a point of their memory I might as well place. They were very eager to learn so I think they deserve some respect. That is Eo in some regard.

Va = Elemental god of air and vacation or vocation, this god created by psychic needs and made work by allotting the job to the person using influence. This is a dead god now that was once popular is a court of a king, the followers in use of this god lost interest after he started fading away and losing ability to live in the area using avatars. What he did with people was the idea, that they had to make and created effect is a manifest to him. They had him as a point of enjoyment and reference as he is also a god of knowledge. This is where they had a point to realize and they knew by soul guided insight or intuition. He offered to give his own insight if necessary, so I think he fostered peace or at least allowed in the person calm and peaceful intentions when his name was evoked. He is a god that was created by the elementals, they were also able to allow things to him as a point in mind was made. This is how he worked things out, I don't really remember how he interacted with people so this is his listing.

az = azrael the destroyer, sometimes too wired to work with energy, otherwise in a positive light is astraea is a goddess of culture and the queen of the 4 elemental gods, justice and bringing the gift of the arts to humanity. creating or uncreating space to do things which have no purpose but joy, play or creativity. this is the beauty we think to exist then the ideal we wish for exists. this goddess represents the element with light.

If you be there whilst these might seem a luxury clearly for a golden age to seem the existence or create anew, humanity needs to refocus on beauty rather than less productivity to get along with each other. so this goddess ensures what you think is important so you can create what you want otherwise don't wish for bad things. so you create what you want, wish for good things to work. Others could get point you don't get a slap, this is if things don't work by feel.

This is where you think and create by the point with the gas. Then your normal by what you do.

Don't call Az the destroyer, as she will do things to your mind and create the effect of warfare if you're not careful. As an example is this idea I had where spaces were created, then uncreated as they got too warlike. This could happen on a daily basis if she were called by feel and worshipped again, she is a dead goddess so I think her followers were killed off by a marching army before she could get to seem a good thing. This is where she was able to help them until the end, so due note on the effort of gods and goddesses to support each other. They aren't always successful.

Iz = The point that was created is where dark is represented and now is Iz don't as it's gone by naming of Iz, he is the cohort of Az and what is Iz is done so think of the effect, if you need the effect to end then Iz can stop or end the idea that is not needed. Iz creates things from stopped idea and created items will cease, if he thinks they aren't needed. Iz has many followers by feel, but his name is not really called out or worshipped. So think of Iz if you need Iz to do things for you, that's unless you can do things for yourself. If you think the time, he gives you the time of day. So I think this is okay for now, think of the best if you want to progress.

Then Iz allows you to do what you can, this is using what you want to use and can use otherwise. So I think Iz is a dead god revised, he was brought back through offering to seem an avatar for him. If you're a person that is a controller, a controlling person, then he fixes that part of you. He can fix nearly anything. So I think all his earlier followers were killed off by what he did to fix a king, that cost him respite and he lost followers as the king went warlike then ended his own life. Now Iz is an accountant and he is also able to support female avatars. So this is Iz in a point of reference. So if you call upon his name you might not get a response, this is Iz's way because he doesn't always feel like being psychic.

-the somewhat living gods-  
-night and day-

Apollo = Sun god, the god of light and idea by soul intuition and insight. This god you think about and look at to work with by fee or you can feel the sunlight and use the vitamin D from the light. This light that he casts forth is regenerative, thinking and conscious energy. So all you need to do is think of the idea, he may do what you want by your need being felt through the light. Finally his light is warmth, so think about warming up and he will warm the area. Some game specialty may have him able to shield you, this is truly a warmth shield and is cast all over. So think about shielding and he will hold back on solar flares as well, that's Apollo for you and this is where thinking positively will get you positive reaction through the warmth shield.

Ark = The dark, the cat, Darkness, the caretaker, otherwise the Animal God. This God/dess is the God of the dark and so nicknamed dark. They that use Ark use energy and think of things to create that they need. She/He is the caretaker of animals and people and works with anyone, seeming a nature of Darkness and shadows you know are hers or his. This because you can think to the shadows and they can take on a darker focus or darkness, that seems someone lost their soul to form and the shadows create what you want by feel.

They that call upon this God/dess know the cat as her aspect, yet not always is the cat her aspect. Sometimes the point her aspect manifests fully is when a female approaches to do what you want. This is where your requests are done as a feline that does what you want by feeling your need. The him aspect as a caretaker and the man gender is one of the avatar of Dark. That can only use darkness or shadows to form what he or she wants to create. So at night she rules by idea and shadows, that is why sometimes with daytime he rules through the shadows.

This is basically because of the radiance of the planet, that you can direct by the subconscious thinking about the idea and this is what your soul directed through insight. If you create with the radiance, you make use of the cooler heat, think of the idea that you want and if your need things they are given. This could continue things if you're not careful, this is done as though a story or ark of what is there.

If you think or feel that your part of a story, then let the storylike idea end. This ends the ark of storyline and can be done any way you think. Then when the idea ends, this is when the point reverts and that is happening what you want by need. Then because there is a natural end, this becomes what the idea normally was by feel or ideal.

experience.

Day = The daytime, the sun, the light time. This is the light moment of the day, you know what the symbol means. Warmth and creative feel, The point is your idea and things work better with the idea you do. This god nature is with the sun as a symbol. Think to live and day creates for you what you need by what you think. This is where you think of the day as a light moment and can raise your vibrations, this is when you think to create a higher frequency with your body. Think to create with the DNA and your ability, that is stored in the DNA by your feel or senses. This uses the light of day or thinking of the sun to create with the point and your point is done.

Night = Nit, Night, dark, creative at darktime, nature of darkness. She often appears as an avatar of a dark skinned human. So normally night is a sea creature that was turned from creature into a being, this being exists to do works through the shadows and at nighttime. Nightmares follow her if she doesn't like you calling upon her, otherwise pleasant dreams occur by feel. This is where she acts as a person in your mind and either has sex with you or works with you in physical locations that you choose to deal with her. She has many avatars and works with a moral basis that is allowing for things, that would normally not be allowed for and this is where you either do what you want or follow your feelings.

She can create anything with your point and work by herself by feel. This is the nature of darkness with a symbol as the moon, this is when you know what you have to do with her idea. She often works through the shadows, night can create what you feel is important. This is done using the third eye, activated by the thought cause with blood flowing to the pineal gland. This allows her avatars to create what they perceive to be necessary or needed, that is done by the point you make. Think and you know what to do with her in mind. However you deal with her, know that night is real and she can work with Ark. This is the idea that I got when I thought of her. So don't sue me if things don't always work out.

-other divine-

Ae = Ao, nature, Oie, Odin; The god that facilitates by calling upon him or her what you feel to need, this is done as you think about things that you need to happen. Otherwise he won't respond, He avatars seems to relax the mind and allow your subconscious to create what you think and need. She avatars seem to create what you need by the womb and the idea is there to work with by the influence. This is noticed in effect.

Adama = this god is the high priest of the inner earth- upon leaving the planet he goes back into Inner Earth to provide maintenance on the leyline crystal grids, as well as prepare for full disclosure. Call upon him to assist others- never for oneself. I live to serve others, the all, the greater, the goddess and all whom love her true. Yet expect nothing, expectations block the flow of life love and creation. Be open to anything. No expectations. See to him it's a pleasure to serve, just call his name, talk to him directly, pray... it's just like talking to god.

Andreis = Gamer god, player, this is a creator god, that makes what you think or what he thinks into reality. All he needs is to write stuff and focus on the words he writes. Then state something as he thinks of the idea. Thus, he does things with the subconscious and minds his own idea or things. If you need to know more of what he can do, then play a game to create some event or idea you had. The gamer god will do what he can subconsciously.

Edill D; If you call upon him, you better have a good reason. He doesn't pop up for no reason. So he allows you to see and things are what allows what comes by realization. So he pops up if he feels like it. Pray to him by: This is my prayer edill d whose power is infinite grant me my desire if you desire it please grant me my desire list of my call!!! Prayer for 30 days, I will work for you one effect. The ritual is one morning 1 at night and then the afternoon. His symbol is here: [https://4.bp.blogspot.com/-uF4J-G-b\\_dA/XCJbp7wQe6I/AAAAAAAAAyI/zqw4wW9BG5YzzPDakb4Z1bo30cRIQ9NGAClCBGAs/s1600/Edill\\_D\\_Symbol.png](https://4.bp.blogspot.com/-uF4J-G-b_dA/XCJbp7wQe6I/AAAAAAAAAyI/zqw4wW9BG5YzzPDakb4Z1bo30cRIQ9NGAClCBGAs/s1600/Edill_D_Symbol.png) ..

Espiargo = She is a Goddess that tends to work with things and make better effort from the results. Her source is fire and the elements she uses to make her results. She disperses things very easily. She does what she is associated with.

Ishida = Pagan Goddess of luck and light. She enjoys banter and works at things to help.

Ordeur = Lord Ordeur; Take a very large man and give him antiquated magic and that's what you get. He likes helping, except when it doesn't suit him. He doesn't like you naming him, except by the Lord's prayer or other prayer style that I noted was in use with his naming. This is a point of ritual and that's what been known about him, so don't quote me about Ordeur.

Ye = Yohweh, yohwell, the Dude, Zenned, him, yeohawk, enka, osirius, can. A greater nature creator, a drow god based on a pleasant God in the omniverse. He can mimick anything, by choosing. Can give issues to those he dislikes and uses chaos tricks on the people that irritate him. He gives blessings and abilities to those he deems to deserve things you use to defeat the disruptions in life. Yohweh is making as makes patterns and corrections to those that need it, as things you do to it are done to being born by lamia criminal actions in thought and what can get stuff you thought won't happen. Yohweh can take the form of objects, when he wants in idea to spy or manipulate events.

Otherwise use is fox energy to make or not as in a make as a way in the world, as he takes on a being form that works with people's bodies. He is the tendency as energy formed into what tends to use white void to get impossible or necessary results. Ye makes things possible and guides people to anywhere they want to go. They get to the heavens easily or other area, as a thought think as ye is yet another life and he will seem so or create as you want him to as nothing exist nothing matter with love or they whom go want to seem can do as they think. If you call his can aspect, this is by stating the name then you create denial by what you do if you intended to create denial. This is what I noticed of the god himself, so not much else is noticeable by what is done.

Yehweh = A long living god of living conditions of the undefeated in this point that's finished, this god is what can be any one thing anywhere and help living things and people at will. He is good enough to be able to cope with anything and helps people cope and sometimes cure their diseases, this is done by their soul wielding energy using the creator to create a better condition of the brain. The body copes with what is done as if you correctly identified the condition, this is as though the body is with the correct minerals that exist by the manifest of the aura.

The aura energy can inflict damage to the body if overcharged, so think "if I'm not mistaken" so that you know what your doing before you do something. Then the subconscious knows what its doing, you know by the spirit what your subconscious is thinking. Think the soul reveals to you what the spirit knows, think that your third eye can show you more than otherwise then you know what you may need to know. You wouldn't want to call his avatars, this is since they could beat even your friend by feel if they feel negative.

Yohwoh = a greater nature goddess of good that makes use of the omniverse, she handles powers and moments by movements and actions done in by eat and war or use of the omniverse to see whatever you want to do. Imagine the time or moment then think yourself there, here or not there if the area or time is safe.

Ekio = The one being, estio, east, see, aske, this god is a person that is a personal helper to the area that he wants to seem in. As he is a point to ask and think to he has in the supposed ability he is thought to have or think tiddlywinks you can get from those he works with in life.

Enkio = focuser, focus, focuser ability that you focus energy then things happen, ask, the man, astute nature in what is a point and things you use he has ability to use or thought in use is energy to him and he can transform as he wants by a focus in on a point. As he is a point in a view he can create what is to others perception, as to see is to believe and create a feeling that he intends to make believable. Any commented on thing is an ability as he can use it to recreate, what he thinks others are asking for in recreated moments in a idea in and that if believed in can make the self action.

Ardies = The god of love war, hardships, Arien, Ardiea, A god of ancient love in the 6th dimension, this is the God that uses people to get what they they want in life. There is a point to do with this God, that is to seem and create as thought is energy as if a thought this is a point to not do things and use is extreme as extra or destested you are thought to not exist.

Arabia = The goddess of mental disorders and infliction, usually comes in avatar form to handle the case in point and work with the disorder by feel. This goddess is a beauty or handsome person usually, but is sometimes known to surprise the person who needs help with a visit by spirit and the soul is the being that guides the inflicted to become better. This goddess acts on her own to help out with permission, then if she does she always uses her aura and heals the body by aura energy and this is nearby. That is just one of her winning ways. There are others that create with life by her advice, then she gets to act the councillor and work with others one on one or by a group meetup. This is what she does sometimes, think her name and she will come in a passable form to help out. So if you need help and she

could help, that is work done.

Arobia = A goddess that in this life creates what is considered a thought, consider what she says and she works with you or whom she wants as though in life she is married to Aroia, a now long dead god of the ocean and the life therein. As you are a negra she serves or thinks to not bother you, what you think is your experience is a thought to deserve if you need it be deserved. As if you are a point you are a concept and this is as your idea, think this is a conclusion where you serve a point and she helps negros. As your thought is your idea, you can think and fee or feel as if your thought is energy to her. Any can make work with what is there. This is an idea of what is there as a point, that she shows you by feel or if you use your third eye these are images through a glance with your third eye..where she can direct your vision if you allow her to show you things.

Erois = A love goddess of infinity, a love being, this is a point that he will serve if you so destined, the activity but similar to aries he will serve a point to seem and other things will serve a point in remembrance. No attack is nothing disrupted, or not as directly disrupted by energy. This is an actor that works, for you if you are needing some service as to change the nerve of the person for lack to do.

Eroa = Iyeh, Eroic, Ero, Cupid like the love god as he slings his arrows and causes love by the idea he cosmic uses. As this is the thought, difference in activity is a different point. As a view think as fight is no fight, and you can see some idea happen that you want.

Arelo = Alies, Arcie, Acienne, Clara of the accost, Arienna, Arlowe, Arco, Arsibe as I with curtesy, I as you has the power to withstand. This is the motion and things, as you think you a point you get energy from thought. As if a thought you are a God this is as a treatment and in are what he creates, out as if whatever you think as if is possible as done.

Yue = Yeu, Yea, Yei, Yen. The idea is to do things as you do, them and Yeu can create what you want as you do you get and make as though with a car or vehicle of choice. Otherwise you get away with what you have, this is by feel with what is done. Yue can create with diversion by what you do, this is done as you think to do things. So think to use Yue if you need anything. This could be the god/dess of thieves. That went missing one day and then vanished another night ages ago, some were claiming was there to aid someone in avatar form..

Yiu = Neon god, god of silence, god of creative people, this god is the god of expressions. Think to use the god of silence for creative spurts and purposes. This god has multiple forms and will serve you what you think is appropriate. There is no god of silence that serves what you don't like, this god creates what you think by what you feel is creatively needed. This god is creatively done and serves the purposes of what is desired or designed for idea. However in action he causes silence in the area. so think to listen to the radio, then turn it off as you call upon him. This is because he will cause the radio signal to stop sending you music and he will allow no broadcast until necessary. This is all that's known about him except that he causes people to realize things, that he feels they need to know.

Yin = Yui, Yuin, Yuen, Yeiu, Yeiou, This is Ye in an alter form that is a female that can seem to use things and as if a thought things are in youi to do. Yeu supports Yui in effort by what she does. But if you fix she will act the time goddess out, and use is up to you so if you need things done you can create with a will from those. This is a point that comes from those who are nearby, as if you are alike you can get things as if you make and things are to create as created from nothing. From nothing she creates, as if she is a thought she is energy and thus she is none in alter state. Use of the alter state is what you think, not act to use drugs when doing this idea of meditation. this is what its useful for by feel.

Yie = The comset user, Yeio is a though by use or is a thought prohibited that is a point to use. This is the god that uses people, and that in use created an eden if from nothing to use as a private pet shown use by what is in thought. What is in thought, is a point and if its prohibition the god Yeio can keep it from happening. The point is this, if you use his name and you don't mean to, you can get killed by what he does as even if it is innocent you can be sure that he will know by what you give away. As the name is spoken, as 'Spellhawk' you psyche people as you psyche yourself.

This is yet another name of the great idea that turned bad, as this is ye's alter dark side as if he is sad he is insane if not insane he is imperative. As if emperor of rome, and yet not but an adviser and yet acts as if a wargod. He starts fires and yet is nothing but a yeti, as if in form he can work, trick or kill what you don't need. Others end the fires, if he can do it he will. The end of yie is a point that isn't stated as he him and others wonder, there is a point that he is madness and yet not dead and yet alive but innocent as if he made criminals die or do as he wants things done and he prefers death or life upon idea that's present.

Yiun = The treiarch, the arch user of life that comes from what is there, yero is the point of what is an idea is not done as it is done and he creates what you think to make or create others to do as he is nothing but trouble. Hiru is as

if he himself is a person, that is a bumb he is a personal respite to anyone that is an ego without interruption. As if he is use, Gero is a point that you come across as this. Ask him or not as you think a need, you get a need to do as if you can get a thought and in things are what isn't in mind. There is one who can defeat him, or nothing is a point that he does and that is Odin as if he tries to do and gets things as if you are an idea in what you do as if just visiting. Geron is the point he presents as he is 'the adren', monster in disguise by self that is not seen but felt. This is what it seems and looks like a yeti mixed with a unicorn formed by yeishi, if you think a need is a form that is in a use to do things. She is the point he decided to die and become a woman somewhere, as if the person is immune you can get things as if by free idea.

If she is threatened by what you do, she in will kill you and if she lives to see you she is likely to give away things you do. This is by indicators that you use, and things in use are things you get as an alter personality is likely to seem to come as if through the voice. Basically, what you think to see shee will appear, as if a car item or pet the name you can guess at. As if you can guess the purpose, she is only there until you think to seem her there and as you state things you can get some strange stuff as this is a cause in point. Otherwise if you guess things wrong, she disappears and doesn't reappear in the like and slaps the person that is nearest the caller in a motion to die or do in life. You don't uncall Yiun she uses you to uncall her energy self by energy she uses to uncall you or others that shouldn't be there. There is a point she comes across as nice, and if so she reasons and bounds and if in need you uncall her.

Yiuo = Yion is dno the disease, Yiou is virus, Drow catty goddess named spider queen, god of dirt. The treacherous goddess, if lost attention to you she is the goddess of life and otherwise no disease and is what you can remove by what is in thought of what will occur as if by the point that is a point to use as if a choice with an idea is done. If you give her something to use like chaos and thus is thought, as if caz is a use to help hinder people and as youi is assaulter likely to be of use. There is no other use, as things are used you are a point to seem as if a use. There is no other used idea, as things are used he can use anything as if you can handle it from use in thought as youi is a lived in victim to seem in use, this is to become as if you help you hinder those that deserve it. As if you dare, don't call her name as she will gnaw unless you have to. This is a point and she will be he and use is user and as if she does, you are treated well beside the point of being treacherous if provoked by proven methods.

Yim = The chinese god of luck, this is modelled from one that uses an idea, aim, you, youi, can think to do things in life that is what can seem a use and create a polite idea. As if that is of what use, till you are in use. This may see and seem as if a point where you appear like an golden object, and if he, you or youi are inconsiderate you can get him to do things or not and he does what he wants in order to do things. He takes the image from the genetics, as information secret to those that should not see in the idea and can make it seem. As thought is a point to make if not a source is in the right place, at the right place at the right time.

Bozo Rofo = You can use either name, Bozo or Rofo and he will respond, this is done by helping with clarifying things and fixing what is possible. If you think what you want to Rofo the God dog then he'll do things to make what you want happen, that is done if things are possible albeit he helps everyone. He is known as a great god to know, that is possible if you think to him. If not, then you get no response from him and you can try some other God/dess.

Caen = Caen is a god of denial that creates by idea what you want with denial of things that should be denied. The avatars usually has colored skin or some feel or focus by idea to do. This is where he or she that is an avatar of him creates what you need, this where you are desiring the result if you intended the idea in the first place. If you didn't intend to steal then the result goes your way, think and things work out in the end. Sometimes with apology. Invoke caen with a point and an idea that you want to do, this works by idea with what you desire or intend if you have no intention to steal from people by feel. Think and you can see whom the perpetuator is by feel with this god, if you suspect someone by the spirit that goes through everything.

Cariantha = Coriantha, Eh, she really is with avatars that are a minifestation of your magic that you see here yet ain't here, A Queen of the Water Fey, favored by Hera and is thought to create as you think done as a point. She's a dragon master with a heart of gold. She aids people who are in need. Then, does what is necessary to get what she deems to be done. She's a water gooddness that can heal nearly anyone. She can make the pattern of life easier for people to bear. Only if she decides to work with you in response.

Caz = Cazrulet, Yemeni, Chaos goddess that serves your purpose, she does what you need as you think about what you want. This goddess is known for CU, an organization of magic and somewhat magic users. So think about what you want and you may get what you desire, but as she is chaos based expect the unexpected. When the idea is a point to do, you create with the idea of life. So think about what you want and things positively occur, this is done if

you think positive. However, if you think negatively, then you could attract unwanted attention to yourself. So think as you want, then you can create what you wish.

Dania = A god of intuition and a dimensional helper, his avatars are with D somewhere as a mark. He can rule over the intuition of others and create by working as a family god. This god goes by and responds to several names; D, Danny, Daniel and soldier. He can create with intuition or work with others' intuitional soul energy to create what he wants. That is where you point out something and if you intend to have something done, you can create the effect by feel. He helps you work through dimensional situations, this is with the dimension that you're in or with the area energy conscious making what he thinks. This is nice by allowing you to understand things that exist by feel. That is what he can do for you if he feels like being nice by feel. So you know the effect by what you see, you know things by feel or the spirit that goes through everything. That's if you want to trace the idea that occurs.

This is where you can write the idea out, then think and create with words what you want to be known. The dimensional effect is obvious, this is shown as a psychic sign like a two-headed calf or something occurring that didn't happen. This is done by what your third eye shows you as you read the words or think about things. The meaning of the sign can seem to your senses by what comes to you as you think of the sign, this works by insight or water energy, that is spiritually influenced water energy that your body enhanced or subconscious uses. This is sometimes to grant you knowledge or justice by feel of life otherwise soldiering. Sometimes things just happen by what you think, if you think about the idea enough. Otherwise the idea won't occur to you to do things.

This is a point in the past that I learned of Dania, so I think he is a dead god that is alive in avatar form nowadays. This means he could do things by the subconscious, otherwise you can suggest by saying what you want and he creates the idea physically. After a god loses all the followers that he has, then he becomes an avatar. So think of the moment and you can create with the point using the creator, that he is remembered means this is done as if he is remembered by feel for the idea. Otherwise he gets what he wants by feel.

So don't be surprised if he is able to create some effect by effort on his part, just remember that you do things to create for yourself by his influence sometimes. Otherwise Dania works through the mind and creates with the soul energy. One thing he will do for you, if you find trouble then suggest the name as you think problem and then you may find that you create peace by aura energy and thinking calm thoughts as you hold off from striking. This is where you think the peace exists, that creates peace by the aura where this is from the calm that is noticed so others are calm. Other things that he can do are creating with the idea and making with what is thought about the point, you can create what you think with energy from the creator and using intuition or spiritual insight you're able to create what you think.

Dego = God of death; If you call upon this God of death, he or she might not answer except in answerable deity form, so think to know what you need and then call upon the god to form physically where you are. He or she can manifest or form into existence from some of your energy. Then if he doesn't kill or neutralize you, you passed his test and his formed avatar will give you whatever you want by thinking of what you need. Thank him or her as a form of worship as you give a little of your energy. So think about the deity and stating the point calls upon the deity's attention to form.

If you want to cheat the moment, think that it doesn't kill you and you're granted what you need as you think of the idea to get things. Your subconscious uses this as suggestion to do what you want, that is done as you call the deity into existence and you pass the deity's test of will. After that, you get what you want and all you need to do is think of what you need, when you need the idea. The last people to call upon him failed his or her test, they ceased to exist when he or she was called to exist there. So think about this and reconsider calling him or her into existence. Will you pass this deity's test if you did?

Devone; This is a developer, facilitator and activityist, that creates what is written if you think to him to create the point. That is done as though he were a divine being.

Geostar = A demigod that is like in a point as this is a thought as a star that shines upon the earth. He doesn't panic in any situation. This can be a moment that is with intense energy. The situation can always work to the purpose he sets. He holds the power to adapt and think on his own. He guides people to nirvana.

Haiden = The goddess of work and thinking where your working things out by calling her name. She sets in motion what you want by the subconscious picking up on the idea. If you make a request, she tries to fulfill it if possible.

Hera = Hera was the mother of the Celtic gods. Here and now Hera uses the positive and negative aspects of things, if you want to know the truth. She does it safely, too. A great god to call into action. People have their own way, though she respects that point.

Maggie = Albeit a special, she is a god dog that is a god by rite. So think to call her name out, she creates by situating things for you in your favor. This is a nature of her that is special, and indeed you may get a response from her name.

Nuta = danese, nebiki, neptune, goddess of cleaning, the cleantime pointer, think your need and you might get the idea as a want or the idea could die off. Otherwise depending on her mood, you might be ignored. If you think her name, you could find yourself cleaning the area. So think about the idea and the point to do, if you state the concept your soul does what is needed. This is how she does this trick, so think about your need and necessary things are done, sometimes this done by others that can do it.

Tym = The one goddess, thei, thoi, soi, sei, sau, time god/dess, timewise, gordeon, chares and sein. There is a point he is a she or in-between, is a considered point and if he is a concept he will do as he needs as if ability were his. This is the point you get as you are an argument, and she settles things as she can as this is witchcraft as time aid. Think what can be useful as if you are it and he can get things done. He is useful in a fight, as if the considered point is deconsidered and then you or others can be nice and he won't bother you.

As you can create things with this idea, this is with his name by the use of creation from idea with the darkmatter using dark energy that is by use of his name from things with nothing in mind. The idea is peace that she does, this is with concept by the idea that is done by feel. The one goddess tends to form things on the planet as though the area was a place and the place was ruled by her, that is where she sets the rules that are in play.

If you consider the actions done, then you know the point to do things with the aura energy. This is dark energy by feel, if you think to use it for ill gotten gains. Think positively as the energy is likely to do things to you, if you think about the idea, then you could get ill by this goddess influence or by general area influence. This is sometimes a noted effect. As a side effect, though you know things are true or false, the effect is to generate what you want by what you need until you don't need. This is the effect and side effect of the goddess Tym. This is in the mind that a game is being played with god's names so be careful whom you call a god. Thank you for the idea and invite to the idea area.

Thein = The deity that supports anything that is given to him, his favorite form is shadow form on request. He can shift forms easily, and in idea the concept is a game point that use isn't what you considered as if it comes to you. He has the potential to get results with ease of mind and heart.

Zargeo = Gaslodreian, Zarchico, Alien God, who abounds by light bringing justice to worlds, by using psychokinetics and other means. Using peace and logic, he guards planets or intrudes, he deems worthy and solves problems when necessary. He uses white void, suns and elemental energies. He can give wishes to those that need things and make a wish.

Ze = Zegig, Zargig, Zargeon, He is a male drow god that is very dependable and has techniques to deal with anyone. He uses any power source and time itself is worked by his methods. He usually makes peace of mind and can become likable to nearly anyone he respects. He can be a family god of which he gets families helped and working together. He does favors for those that ask for it. He is a brother, in all things.

Zargigeo = She is a goddess that is with dark skin. She has Drow ancestry, and tends to stop bad efforts. She does things on the dark side and with effort. She helps people who are in need of aid. Zargig is self-dependent and is a succor psychopath that does things on her own. She tends to become people busy and works with the universe that presents itself. If you use her name, she makes you into her a bit to help out and make you understand the situation. Then earth shaping, if when you don't use her energy, then she disperses it from you. She gets energy from people's excerpts and tries to get things worked out.

Zargigo = He is a Brujo God that works with the effect and uses things to get an effect. He is the effort behind many people and uses the insane brujo energies to get his results.

Zargige = He is a Ogre that is a point or idea that is a God by mention. He treats people equally and works with what he gets. This God is very unique as he is slightly brutal and that's what gets him places. He helps other people with getting what they want. Say his name and you become like him, for a bit of time that you use his energies. He can manipulate the moment, this is done at will and with desire, amongst other things.

Zein = The vein of condolence, she is any form she wants to be. So she helps as she wants and does what she desires otherwise.

Zerg = Zamatrix, He is a male God that tends to be ruthless. He is very determined and treats people with respect. He is a male form with dark skin and does what he wants. He can be bribed and made to do things, that are impossible.

Zergi = She is a Goddess with a gift that tends to create fate, at will and when desired. She is very good at what she does, as it pertains to her. Some follow her without realizing it. She was at some point a fate sister. But, chose to be what she wants to be and retains the power of fate itself or other poverty powers. She tends to work the system and makes events to help herself first. Then, others second. There is a moment that she does what fate does.

Zergie = A goddess with a diadem on the head, that takes the place of those whom ask her for favors. Then, switches back when she is done. She shows responsibility for others actions. When needed, she tends to work miracles for people. Sometimes she doesn't appear if there is going to be a fight.

Zen = Zena, Myph, Segowe, Segorne weaver, She is a practical goddess of aliens in silver and black. The Segowe is the epitome of results and what needs to be done. When she is done with things, then she is very mature and works well with people. She aids the cause and what the person wants. She tends to get things done with what she does. She tends also to people and their wounds. She is counted as a mythical person that is fictional but real. Thus if you think, her power is what is myph is believed of her to be. She is a mechanic or energy being and very tool oriented.

Zennet = Bennet, this God is a God of chaos that makes chaos balls and angels. This is the chaos God that reflects anything sent at him and in a moment. Otherwise he can accept energy. He dissipates that which is sent at him and uses utility at a very good skill level. He is on the purpose, in a behind moment with many events and he does things on his own. Any attempt to describe him is found by him and made false if he dislikes the idea.

Zenne = A woman with an aid is her favorite form. She is the goddess of peaceful nations and work by what you intend her to do. She is very bad at getting along and makes the people she helps, work with her system of belief and uses elements. She uses intention very well to get what she wants.

Zeinne = She is the goddess of alliance. She brings misfortune on those that she dislikes or that do violated moments and violence otherwise, she gives gifts that are what makes people immune to manipulation and these people are unable to do things to those that she likes. She is a drow goddess that is born in the body, that is an energy child and very indiscriminate. Call Zeinne if you need her to appear for you and create by the idea she has that you point out by feel. She is known as a psychopath and very able to do things to you if she sees reason to gift you with chaos. This chaos is a point in provision and use is a point in name calling in the past. She is a dead goddess that creates by the invisible energy child that is in the body and works as though you yourself requested things.

This goddess is what you would call a person that is an avatar in human form and very able to do things for you, if you allow her to do what she wants. Zeinne called three times will create an avatar of her out of you, so be careful and work with what you think as supposedly you know this idea is an indication of peace. If you wish for fostered peacem then defeat her avatar in you and this is denial of the energy body that she causes, then you create for your self and usage of the energy that the invisible child has is what causes you to regain control of a bezerk body that she puts there to point out that there is a reason for calmness. This is what I remember of her so use this information as you want to use the idea. This is Zeinne by feel.

Think to avoid the child by aborting the birth with three points pressed on the left side of the body ribs. This causes her avatar to leave the body and do as you think. This is all in the mind anyway, so think about what you want and she could provide for you. If she doesn't, then that means you weren't important on her tasklist to do. So feel lucky, as she can ignore you for a very long time if she dismissed you from her mind. She is a goddess after all, so treat her with care. If you treated her with care then aborted her body form that is the invisible energy body, then she treats you with care and non psychopathically so if your wise you'll know things and if you are fated then you are fate or weird by feel. This is her way.

Zun = Zeun, He is a Brujo God that does dark things with good intent. He is a very good example of what to

make and accept. He is a backbone of many energies that are dark. Call him if you need help and work to be done. He is known to be able to deal with anything, he being a Brujo God that he can create by spells and work with the soul energy that can come from the creator to create with you by feel. Think what you want or would like, then you might actually get what you wanted. If you don't, then he wasn't in the mood and thinking of things to do will get you nothing. This is a point in the past. He is a living God, that uses the creator as a source. So he knows what is to be done. This is all I know of him.

-Some modern angel uses-

Ieazel; Ieazel guides my words to get what I wish to have at the right time. This is no matter the point to do, he or she will do what I need by what I do if I feel he or she needs to do it.

Omael; use to get peaceful resolve.

Yehuah; the angel of light and clarity used to clarify life and the turns there in.

Cassiel; the angel of jobs and working right.

Chavakiah; the angel of happiness that's creating happiness from other states of mind. State chavakiah and the friend's name three times to resolve differences and cause happiness instead of other feelings.

Hahahel; the guardian angel of memory and gifts. This is including money.

Haaiah; use his name to set up situations you do like or get out of situations that you don't like and no I don't overeat. I can use this name to get out of situations or make things from situations.

Menadel; use this angels name, menadel to get over fear and live with courage.

Mikael; the angel of light and love to see through moments of the real situation. This angel helps you to get over paranoia and confusion and you notice the truth.

Sahaiah; use to work with others with or for love.

-Elf and similiar-

aanay = abernathy, wood elf, 4 feet to 6 feet tall or taller and can manipulate organic material along with bodies and other materials, as your will is energy and thought creates what energy there is. They look like very thin humans with wood like body as in au natural form. their attitude be very haughty that with good inventions can make anything occur think and this stops. As if drow or not this is what form or from disabuse with any dissolution, by act to create and make and you can't say the word good in any true fate word form.

abolai = atleantian wild life of earth, water, fire and air energy creatures.

atleantian = Cilfc, atlantian, aqu, aquayan, dimansti, dimmernesti, sea elf, species of the sea that can metamorph, were called the original sin originators, white devils, white spawn, devil spawn, can take any one form on land and any form in sea. they only have to think on the thought, enact in the ritual to get an spell in effect. On request by calling their name will they grant the request as if it was a wish by djinni like power. the requests against themselves they won't do. they are born in pods and assume any form they desire after. their mates will take on a complimentary form as a form of respect to their mate. With their form be the energy form that can shift anywhere very quickly without noticing temperature. Atleantians are quick to respond.

This is an on-world presence of humanoid races that have historically assisted humanity in its evolutionary development. Such a race has been the remnants of the ancient Lemurian and Atlantean civilizations that established large crystalline cities inside the Earth's crust after abandoning their cities/civilizations established on

the Earth's surface. They are a tall Nordic-looking race living in a subterranean city under the North Pole. Strictly speaking, this group is not extra-terrestrial in origin but simply a sub-terrestrial humanoid race that is genetically linked to humanity. acunr = acunar, hybrideer, denidr be a human similiar to atlantean but its very associative and unwilling to fight unless needed. The abillies are to instant travel and create spaces like kitsune, but where there are corrupt humans called energy humans or medievial advanced humans and astral energy humans who travel with atleantian and considered in the early humans, with the Acunr are very adept mages in a modern society who happen to see use of Atleantian services. The energy humans and Acunr almost hate each other and have ability to manipulate sophisticated energy in any element, and naturally record any event with their body as their bodies are capable to store with energy any event. They can imprint what they desire from what they absorb through osmosis. They can break up bodies into energy but at will, where the worst energy humans are willing to fight and go for greed. They, the Acunr, are willing to do things for fame or peace and desire is consistence.

It seems the acunr "help" along the moment to get what they desire or they abort for natural incidences and no panic for hinderance amongst us. The energy "savage" human along with the Acunr are both wild unless near their own people. When the Acunr are done and satisfied, they want to keep the body like walk-ins unless their be no body to speak of or they don't keep the body as be the will of the person. When the energy human are done, they use techniques to get away, and not be seen or avoid detail as they kill the person for food if they desire and only when no other food around. They, the human have adapted to space and can breathe space in particle form. Jop be their natural language and its similiar to cunt, or broken up pidgeon with assyrian pronunciation. In comparison to the mercurians of mercury who are cunt of "pureland" and the venusians are who fathered the Acunr

also called other things elsewhere and the self insane half-human half-venusian are human like and beautiful. Now the rivalries are into blood relation and blood war by meeting the right people with similiar skills. The hybrids hate them with possibility to work with them. The Acunr can control radiation into revealing the truth out of anybody and other similiar ilk like mutate, control and body switching. alian = human sea elf, land atleantian with shapechanging ability, instantaneous travel ability with energy true form, can manifest any event by thinking on it, focus or someones request

afil=Aphil, aphiliarite, aecrodynamic art doers, ungodly powerful in comparison to humans. But if humans just had the attitude and were still human, there would be no emotion just do force. They are greater humans that evolved after the original humans on a different planet. Then they decided to shift here for the knowledge. Aphrodesiacs in so as is.

I mean, if you ask just about anyone on earth, even if they're into magic, what an aphiliarite is, they'll say something like...'That sounds like something from ancient Greece.'

Only I've seen more evil potential from Aphils, but not evil in our sense as their Godlike ability stems from art and an effect by mind. More in the sense that they're so powerful and that they have no emotions to keep them from killing. But then, they have no emotions to make them start killing either.

They could do and not care, by showing concern while they still do it to ko on the word kill. So their art is Godlike but still reminiscent of humans and considered acrodynamic art. It defines what they do. their military is perfect as is their society. where they aspect a product so to understand it, they could expect a product to appear from an ad for them. One of their product ideas is to try and grab it from an ad only to find it later in on. A lie is a truth that can be made to happen to them.

A supposition is a untested truth or a lie. The lie happens somewhere.

I kinda think of vampires when I think of aphils, in some ways as true. They can get into a mode that is to do exactly as an idea states so not to care about the situation made in circumstance. Except logic defines what they can do including the logic of an ad. their self defined in everything. But their dark side is a wordless rage that can power them, and it seems like jealousy and acts in accord so they have no emotions. If their knowledge is innate and their art can power events, they always act in accord even when angry which they can act to hide.

"I think I've seen one go past me in it's dark-side mode, It didn't see me though. 'cause it sure did feel like what I'd expect an aphil to feel like, but it was more ... 'angry', even though they don't exactly have emotions."

Instead of emotions they have plots and because of this just don't trust them. They get joy out of manipulating people for themselves to gain knowledge. they trick for their knowledge. They cry over things that are perfect as also they could use poison to settle disputes. their innate knowledge can be universal knowledge as one of their techniques is to derive universal knowledge from the now state of mind.

As it happens it can be recorded along where a world is in which they created a virus that uses others yion disease to cure themselves by or virus avoidance thats yion. Think to not touch surfaces to avoid disease causing germs or clean things before touching. Where any a drug cures anything, its behind advertising that the world exists in I believe. What the difference is between a human and a aphil. Mainly that the aphils evolved from humans before they got to Earth.

Some travelled there and the planet evolved them, as when they write it changes things. "A colony of humans were trapped on the planet and as they lived they evolved into the Godlike humans finding these idea patterns and it was due to theories coming true."

About their abilities, mind control. They exert mind control over people. well, they can power up things.. like, the minds they control get an increase in their own abilities for whatever they want and thats better as they are strong as shapers. Though, to manipulate the energy around them and that is how they use the mind control also. As is it like perceive be perception and mind adjust. They can change clothes to change shape or change things to make changes occur..They gain in their ability by mention.

atohu = atohufey, atofey, atomic sized being that be a natural shapeshifter of any form able to hide anywhere with energy manipulation skill and aids humanity at will showing themself to wizards and sorcerer only and malicious to abusers.

eldar = wild elf, ancient elf, an elf that lives beyond 2000 years without death.

they rule the elves with a guarded hand. they are any shape they want to be except their natural form be one inch tall. they are considered civilized fairy. Bound by contract till they break it, then they punish themselves unless theres a reason. the eldar enforce tradition with strict punishment.

elg = elegant, elf like antlered elk people. They are only as intelligent as the next person they can copy or seem like. The antler horns are somewhat invisible and the only visible through astral vision. The larger they are the more territorial intelligence they have as with the possibility to collapse under their weight. Some are controlled and delayed by the actions of a King Fernenand. The ruler of a land so much like ours but as exception, everythings magical in itself an yet it isn't. The elg female is like a doe for it mellows out the show of the male. The male are the alpha, and is very much likely to have lesser intelligence than the female and will copy what they perceive sometimes. Warped to the idea, to what we need or what they need, desire or whatnot as otherwise what they can get. The female are more generally intelligent, yet in all appearances may appear insane.

The elg learn to walk at around 16 weeks to 16 monthes. And the Alpha are obedient to the females whims which are actually what they unconsciously command by sometimes. They pay homage to each other, or not. An elgs weight magically occur, to suit the actual

nonvisible horns and antlers of the actual elg.

depwudelg = Deep elegance, Deep wood elg, Now this is a specialty race that uses territory as intelligence. They live in the woods and these woods are the populace of people and idea. Where the idea is spread about. They make themselves a clone of the other person as to them to copy is respect and survival. their antlers are metaphorical and able to outweigh the elgs idea of antlers. If they lay down they get dizzy due to the weight. But they really aren't intelligent other than what they can copy through visions. The deep wood elk, are not actually willed by King Fernenand. As they are separatists, and prefer to do things on their own.

Walg = walrus type human which appear overly large and yet, love to complain a bit where some gain a wisdom and they remain quiet most of their life. To the day, they will seem like something to tell or command as necessary. They're intelligent of ascertained answers, and they live in the society to come expect and exist as it pertains and gives to them what they want. By their demands, it appeals to them and appears unto the elgs society.

cilf = self, elf, 3-4 foot humanoid or taller with tough hairy feet and magical innate ability, an energy metamorphed human that are demihuman shapeshifter, they can easily get angered at dishonor, trick people if given reason and are considered civilized faeries younger than 2000 years, at 200 years old they are considered adults, they always follow tradition, older than 2000 years they are eldar, they, the elven, have pointed ears, human-elven with slightly pointed ears and their own language which be beautiful to hear, are bound by contract unless they see no reason for it, use as an energy source an element of choice where elfa or elva be a female elf, elfe or elve be a male elf.

cilfark = morehdel, drow, dark elf, turned elf to the dark powers that have dark manipulation ability, can turn anyone to their side, be partly aloof and self-dependant, they are sane and have innate wild magic, with shapeshifter ability, they are sun shy with a shadow form, are charismatic and a weapon master with excellent lying ability. They are last cited near babylon and they prefer underground cities and they hate humans. With usage of drow ability (dark energy), they turn ebony skinned and gain dark sight (vision of all dark shades). Darksight be unaffected by the light of day and allows them to see perfectly in darkness. For what they don't believe they are bound to be like when energy backlashes occur. However, the dark elf is highly immune to all magic.

They are physical types that tend to do things in physical ways aided by esper where others are spiritual types who are to be the type of people who can use spirit but are aided by objects. Its the physical type that either seek objects or the astral and not care for the physical if they follow a belief. Its the spiritual types that follow the belief that belief is of spiritual basis. Of drow ae they tend to the crush of the enemy and dominate the field or to see as if the spirit can do anything if you use an object.

Where the spiritual types act to preserve and use the living while leaving them alive. For to use the object it is as this that actually preserves the object for a time but it causes them to do as copy those who are linked to it and deteriorates the object. For what they don't believe they tend to keep hidden. For what they don't believe they are wizened of and die thereof spec.

loralai = elorai, lorala (time elf male), lorale (time elf female), Time related elven with shifting. ability and remain hidden as they are sometimes unseen in warfare and appear like humans. Unseen elven (1/3 elven, 1/3 human with other) along with half elves 1/2 elven 1/2 other including human. What they are good at be paradigms (time movement and paradox) and try to create their own space to be avoided by undesirables (personal choice). They could be treated like gods but they aren't. their world be very similiar to america, but their a tiny bit more general in worseness including grossness but they had their own scent and bathing wasn't as important. Except for american

eating habits (bad eating) for which they even ate themselves. They often brought humans and both had energy forms. their ability be to force a change in the area with no detection and find things out from long range sighting in the past or future.

They followed the natural science of Emperical law and sayings. Balace of trade be what they were good at with the golden rede (What can be done is in returns three times the effort back but 4 times the effort out). They didn't fight except by spell and if close up they could use weapons when enraged, The word was/is their greatest effect maker as the words they stated could create a psychopathic moment or psychokinetic activity as it could do great things by vibration effect much like a tuning fork can heal or tune things. Psychic vibration by a spread effort and sound thinning created their voices to a sonic pitch that would break anything if high enough or if low enough cause manifestations. The dead lorolai turn into energy beings called the cthu and lorolai or venerated ones, that are likely to eat minds as in the mind control cthulu cult. The nobleman/woman ways are how they work with a thieves approach to getting places.

warcilf = warelf, elven being that loves to war; unhappy in peace yet thrives in it; has a personal scent of choice(can be anything including roses, dung); some can be lithoveric (rock, plant, metal eating) as well as normal food; will keep a energy field that causes conflict; chaos master; spell immune except to those spells desired; shapeshifter; prescientific; passive aggressive; dreamwalker; timetravels and if spotted, will indicate a war of sorts, only to leave at wars end. If the warelf does stay then peace be ensured but destruction, of those disturbing the peace be going to happen.

emysune = chadriniix, creature sometimes with magic but mostly normal and highly intelligent, so far in the que(list):

catsune or cateuix (humanlike cat shifting animal sometimes with mystical energy)

chetahix or chehtah (cheetah thats like able to transform into other forms and can outrun any even in human form)

woody; wooden, animated wood creature (thanks to esturbahn creations)

eachusiage; friendly kelpie, like horse shapeshifter to humans,

eakusige; kelpie like horse shapeshifter that hated humans.

chinafox; an extraordinary fox with 800-1000 year life span fire striking tail  
future sight shapechanger that appears as a old man, young girl and a scholar  
and counted as a trickster.

doxes; Dogs with magic and ability like the kitsunes except they don't have fox  
magic, They have physical magic of their own devising. They are straightforward  
with people and hardy with righteous insight. Sorta like the McGruff commercials  
or Scooby Do except they can shift to human, in your mind at the least.

dymanuti; dimmernosti, shark able to shift into human form at will if they can eat  
them.

Kysu; foxx, magic fox, ysu, fox with or without mystical skill. If fox, kitsune,  
and other idea then with no abuse you are what you seem. This entry be changed  
from the original to reflect new idea. Fox that sometime have magic or mysticism  
and are an mysterious animal, fascinating, and mischevious. And be believed to  
be very grateful for the kindness done to it, as seen in many tales, and be also  
affectionate as revealed in some dramas. It be godlike because of mystical ability  
such as shapeshifting, bioelectrical, able to bewitch men in charming girl form,  
or women in charming men form.

An exceedingly interesting and entertaining beast the Kitsune is.

Kitsune are ageless, if they think they are, as they don't age as fast and are non  
immortal being spirits. Kitsune manifest with 900 years lifespan before they leave  
or die and return to spirit world or the etheric astral plane. Kitsune can get to  
900 years old, older are rare as the energy amount to fuel their physical plane  
existence would be extreme and they would be doing more harm than good. The kitsune  
represent their ability by the elements, meaning they have abilities from each.  
This incidentally places them as Dragons but on a smaller scale. Dragons and Oni  
are their enemies, unless for dragons, they delibertely make themselves one. With  
the elements, they can represent thirteen catagories and kitsune are divided into  
each called clans, dynasties, houses. The elements are Wind, Earth, Fire, River,  
Heaven, thunder, Mountain, Void, Spirit, Time, Forest, Ocean, and Music.

In the book 'Kitsune' the word Heaven be Celestial and Void is Dark. Each kitsune  
has it's own element based strengths its aligned to. Elements also reflect the  
kitsune's powers origination, and elemental affinity like Fire Kitsune be unaffected  
by fire easily feeding from fire to self strengthen and use fox-fire with ease. Water  
kitsune wouldnt use fire easily but naturally heal and thrive near water. the  
most common kitsune are Celestial kitsune who follow laws that can be self made.  
Inari, Wild kitsune, Dark kitsune. Celestial kitsune are 'High Kitsune'.  
Kitsune are physical spirits and everything has spirit in some form, near them and  
these spirit are Kami. Animals also have spiritual counterparts more commonly  
known as Kitsune and Tanuki. there be Tengu but this be unessential as from  
what I've read they have background and diversity, enough to make a thesis.

Kitsune have a number of options to manifest. Most draining be to appear in physical  
world causing storms, unnatural events. Kitsune who simply manifest lose  
innate essence faster feeding more often, suffer weakness but they gain  
strength after twelve hours in the new world. As be stated "when you eat from a  
place you can return to it, and stay away if war" from a greek story as you see  
the reason to use effect you realize or not as this is what you see. He was talking  
to his 5 year old child.

This feeding depends on kitsune strength, and usually meaning region blight, they  
surround their target, if fed too much. Though the weaker kitsune have less effect.

When kitsune manifest, it has optional choices, in number. It can appear as kitsu (fox), fox-headed person or very attractive normal person. In any case the tail number that kitsune have will be obvious, unless they shapechange and are masked, which be draining. Note however they can shapeshift at will so concealment be easy. the second option be possess either fox, person. Fox-possession was a most common kitsune manifestation means. A kitsune possessing someone had to overcome willpower thus usually the process appeared insanity similiar where a kitsune willpower fed. Taking a sleeping person usually was a lot quicker since kitsune could invade the dreams, while taking time, to willsap targets. Possession be not shared easy as once done, the kitsune body control and once they leave the body, their host will experience remember not. Kitsune possession was not long-term unless kitsune truly had reason to stick around.

Possession was usually with blessing, and to get rid of them, was by the exorcism thats used with intended idea and by Shinto, Buddhist priest, if someone called a Guardian kitsune to deal with the matter. Also, note that unless kitsune be powerful, the shape-shifting was foxform limited, fox-person form and person form they're possessing. The third option was possess a child, fox very young, or unborn. This method be least taxing and resulted in a kitsune hybrid possessed person/fox. If child/fox possession, the full possession takes longer and with pre-born it's instant. This be the 'avatar' method because this be the least taxing method to show. This also incidentally gives a long-term physical body. Kitsune who use this method have no extra tails visible and eat, drink, sleep, breath, and suffer the full moral life of all 900 years. They bleed and possibly get sick, unless a regeneration is enabled. Using this method transforms into fox-form/human-form and development of possible other forms by willed shapeshifting.

As an additional note, a kitsune with avatar form can't be banished, or exorcized easily. One common thing be kitsune once here can become enraptured with full senses as in physical form. This turns kitsune into thrill-seekers that experience any new forms albeit pleasure, pain. Older kitsune who have lived physically for long time may be more jaded. Another spirit aspect be manifest ability and physical survival level that requires sustenance. Gaaki feed off many different things depending on gaaki type you come across. Some feed off scents, blood, pain, tears, and more dangerous from souls. Kami usually require small gifts and prayers that are sating them, they are hostile and dangerous, otherwise. these gifts and worship 'fed' the kami.

Kitsune can feed from land essence, elements, and people. they are sensically vampires that require sustaining essence. Kitsune who have avatar does not feed like other kitsune. Instead as long as they don't tap into abilites they posses, there can be normal function for human, fox magic can manifest though. Using abilites will weaken them although if given a relaxing chance they will self recover. Kitsune who possessed someone still has to feed to keep a body a long time. Feeding be in the same manner as manifested kitsune. Kitsune are capable of host draining, as in manifested kitsune that feeds most often. Energy amounts used to stay material can be extreme. To keep manifestation and use it's abilities, kitsune draw off much energy around them, and themselves, where if they use their own source, they can weaken. This chi essence be found in the elements and like magical Chinacats, kitsune are capable of knowledge feeding. With this kitsune are learning capable and the knowledge energy causes abilities developing and possibly grow quickly, in the way they so choose.

A kitsune body can be attacked, killed but they can simply leave the body any time leaving the victim to suffer the fate meant for the kitsune. To harm kitsune requires a weapon and with the spirit of harm meant. Avatar taking kitsune are

physical harm vulnerable. Anything that do mortals harm, harm kitsune. These are not regenerative kitsune and are unlike others, thus spend their healing resources, with an accelerated natural rate to healing themselves. Magic weapons and faith can't harm these kitsune easy because they are physically world 'natural', having world attunation. These kitsune can reanimate, once killed spiritually, though much weaker than their brethren. When kitsune heal wish, they expend personal energy, so when desperate they sacrifice tail and artefact that is near them, gaining huge chi influx for fuel. Kitsune who spend healing energy become more essence desperate and feeds sooner. So, they should be careful to not eat normal food, as they can be in overeating mode, for possible weight gain.

When kitsune are killed, unless destroyed in spirit, their is options for them. Dependant on recent moments of a fed amount, they can re-manifest, in any form sacrificing tail and artefact, again, for sudden chi influx of manifestation allowance. If no manifest, they wander worlds, biding time and waiting, for a convenient time. While in spirit form, kitsune are spiritually attackable, magic vulnerable. Kitsune, then are amoral spirits with basic right wrong understanding and make decisions based on what they think will aid them most. Kitsune core personality can be type dependant. Element belief be elemental focus and kami which possess them as they can study:

Wind - Flighty, these kitsune are wanderers, never staying in one place for long. Earth - Solid and unyielding as these kitsune are rooted in history and resistant to change.

Fire - Quick-tempered and reactionary kitsune are constantly moving thus very emotional.

River - Natural healer kitsune are quietly peaceful.

Ocean - Furious and tempestous kitsune that are natural warriors.

Time - Contemplative and quiet kitsune are seers being oracles.

Void = Dark and brooding kitsune, that are malicious and very domain protective, when in moods.

Mountain - Distant kitsune that are withdrawn silently preferring observance before acting.

Forest = Quiet and serene kitsune watch those around them. Once satisfied with what they see, they become playful and mischevious.

Music = Pleasant and polite kitsune enjoy company and experiences.

Thunder - these are loud arrogant prideful kitsune.

Celestial - Protective and noble kitsune, that believe they guard all under their domain, sometimes by their own laws and te laws of the land.

Kitsune are not innate sorcerers, however they have innate and intuitive abilities that fall under magic concepts thats called 'Fox-magic'. Which can bring reasoning and intelligence, on use. Kitsune are innate intuitive illusionists. To them, illusion can be as real as anything else. A kitsune who uses illusion, to appear human are human and can talk, act, love and sire children, while the illusion exists. A kitsune who transforms a staff into snake creates a crawling, biting and killing snake.

They use this glamour magic to make objects, weapons, people, homes, and even landscape, to manipulate their suiting desire. One kitsune be capable of creating illusion and manipulating landscape in small vicinity, though when kitsune gather collective resources, whole cities are made.

Kitsune can make pockets in reality meaning they can make a castle under someone's floorboard with people sometimes noticing. This world be real by ether (spirit) material. And, there can be time-dilation thats one Earth day = seven or more Realm years. These realms are just homes mostly,

or forests, where there is their desire, as in their favorite places are sometimes created/recreated aint whole worlds. It usually takes three to five kitsune to make a whole realm and populate it, linked together, either physically or mentally. Kitsune can dominate any of those they want, and this be a enchantment of form. Where this can cause someone's sight to see of anything wished for, overlooking wanted things by desire. Once control be established the victim be held until someone can break magic.

Foxfire (Kitsune-bi) in a form of kitsune bioenergy, can produce lightning, fire by the tail rubbing their tails. This becomes a melee weapon and they breath fire to about five feet, more or less, depending on their energy. Kitsune can also create small fire balls sometimes using these as lights, thrown weapons,, and as playtoys. Kitsune can possess targets with foxfire, taking over minds and bodies. This be sometimes out of necessity of protection as possession lasts until next sunrise, sunset unless the kitsune be using this as a manifestation form effect. They have not the targets ability access or memories, except for what the body instinctually does. A kitsune can transform into anything covered by an elements presence. This means they can turn into trees, forests, rocks, water, monsters and other people.

The limits are that the transformation does not give them the innate abilities of the form they have taken, as it is only what they assume the form does, and they are vulnerable to what can harm that form. Kitsune who are possessing someone, can not use this form of transformation, unless they are doing it through illusions. Kitsune can create small focused power balls, like psiballs. These balls look like small spheres that easily can be child toy mistaken. These balls focus kitsune abilities and contains their spirit, usually when they take on avatar, or they possessed someone. Kitsune enjoy playing with this ball and using it, as a magic focus. If anyone else gets their hands on it, or wills it away from weak kitsune, sometimes they coerce kitsune into helping them, or doing whatever they desire.

Kitsune can study any magic field. A problem be that to use any magic form requires to draw energy from power source, or to self draw it. Unlike mortals they weaken when they use they themself in to draw out energies, think from themselves and the elements around or near them, which does not self replenish. One who casts magic too often will become weak and starved. These are oriental style magic examples. Akasic be the magic of chi essence. As mages, they can see auras and power sites, manipulate, draw on, expel chi as in willed psiballs that contain elements.

Akasic magic be powerful combined with other magics. Its good for things like healing, rapid regeneration and reversing essence loss, sometimes that their feeding caused. Kitsune follow the Elements being tied to the represented elements. Kitsune can influence elements they be of and if elemental magic studied become very good in study field.

They can study:

Wind - With this study, they can create winds, cause tornadoes, and influence local weather patterns. This be also effects ice and snow.

Earth - they move rocks, transmute minerals, physical objects and build things.

Fire - this be a kitsune's specialty as they create fire, control fire, and cook meals.

River - this be a life-giving power as they create water, control creatures living in water and they heal others with and bring life to things around them.

Ocean - this be river cousin to River but larger scale. This be where they

cause very strong storms, flooding and tsunamis. This be how mages depth creature conjure.

Forest - this control and manipulation of wood trees, and forest creatures. those who study are druidic in their ability to wood strive and blend in and find herbs and roots making salves with.

Mountain - Cousin to stone as this element allows for mountain control and those living inside. Kitsune can cause earthquakes, volcanic eruptions, and landslides too.

Thunder - Wind cousin a mage can throw lightning with, cause storms, and create energy shields, manipulate machines without detection, and without computer net-run aka neuracanulla link.

Celestial - this be astral and heavens magic. Mages teleport, call upon magic creatures, and throw target meteors. Kitsune can do most other reduced effect magics.

Dark - this be void magic and this magic can cause blights, drain life, summon dark creatures, manipulate darkness, shadow vanish, and light drain from areas. This study isn't 'evil' and a quarter of the kitsune race are Dark Kitsune.

Time - Allows no time travel except with right methods thus this allows kitsune to speed up, slow time down, age, then targets and objects. To predict future events and this be the perception and manipulation of time plausibly to master reality with celestial magic worked in.

Music - this be sound and music control. Kitsune can sing spellsong effects. this can entrance others, ward off supernatural creatures, and control moral.

Spirit - this be spirit world, demons, and other world manipulation. This nature magic doesn't work well on mortals since mortals have souls which are similiar to spirits so they have to wait for someone to die for this to effect someone well.

Kitsune can bind, summon, banish, ward, trap a spirit even in a human being, if powerful enough. If the kitsune have some of the persons essence then they can control the person, by demon thought essence manipulation. Feng Shui be the Geomancy study, power sites and ley lines being largely this magic. A person can find out best way to site build, power location creation and a means to tap into leyline, nexus. This allows someone to travel Dragon Lines (ley lines) getting from location to location and also allows them power tap Ju-Fo be runic magic and mages can write power words, speak spells creating magic. Ley lines are good places for banishing/controlling spirits and binding sites. Kitsune can hide themselves, places by ley lines manipulation for concealment.

If they were given an exact description, they can modify how they act. This is how they are usually, "Playful, kind of mischevious, tried to play a few semi-harmful pranks and they were all playing around with their Kitsune Balls, sometimes to gather forces, to live. I can effectively say that I don't have to consider kitsune and vampire as different parts of myself, since there's the kitsu-vampire combination as well. The transformation makes them like a werewolf as they can form into dog or wolf. Some are half human half kitsune, full human, full kitsune. The older they get, the more forms they have. The older they get the more sophisticated they get.

Kitsunes can drink the energy-blood of a person, vampire or animal and turn into the target. As a kitsune with the speed of a vampire, they're a lot more powerful. I think it's the kitsune that's bitten by a vamp or drinks the vamp blood. Well vampires are technically human and kitsunes can be half human. Which means that they can be half vampire. They just have to make their form fully vamp instead of

half vamp/half human, and then transform into a kitsuvampire.

The kitsuvamps extract and manipulate energy a lot easier than either basic kitsunes or basic vampires. So they can form gates that act like wooden doors or look like anything. As using the wooden doors or the objects as fuel. That's like a twist on pockets in reality as basically they can twist things to be as they desire. An if to suit of their necessity, But its not a dark twisting, except for the users of void. It almost feels as easy for them to transform into anything (not just human, not just vamp, not just fox, not just kitsuvamp, but actually able to mutate into any form they want) as it is for a dragon."

gracilf = graelf, grayelf, gray elf born of both light and dark but clanless till chosen and has dark manipulation ability, sun resistance and many language mastery as a shapeshifter. They are with elemental energy manipulation skill They are angry most times at people.

Sylvan; are the elemental representation for elven of air that are elemental apes, aerial, sylph or sylvan that work with land, and can shift anywhere with a abhorrant sound as they are part energy in form. These atypical elven are the type to command and use psychic power ups by strange sounds that be frightening and with abilities, to effectively try to work with people (any). They are known for decisions that come from back experiences and other life influences. This elven baboon be as approximately 4 feet tall, with a very thick physique similar to a gorilla only it stood more upright. A remnant from the ice age that survived within the mountains. The magical Baboon be another type with silent powerups or surges that are felt but not heard that cause no alarm that live with them in sylvanic that be taller by one in a half or 6 - 7 feet and have a straighter back with white fur. they the baboon sometimes serve as guardsmen in the vast mountain ranges of North America that are left untouched by man, within a well hidden canyon nestled deep within the depths of the rocky mountains. The will can ward them away from thou but not forever.

Q-in-x; quinx, were, werewolf, As popularly known, a werewolf be a person who is transformed, voluntarily or involuntarily, into a wolf under the influence of full moon. The word werewolf be a contraction of the old-Saxon word wer (which means "man") and wolf--werewolf, manwolf. Another term lycanthrope, often used to describe werewolves, however, refers to someone who suffers from a mental disease of fantasizing being a wolf. This particular mental disorder be termed lycanthropy. In human form they had bushy eyebrows that met over the bridge of the nose; blood red fingernails were long and Almond shaped. Their mouth and eyes were always dry and they were often thirsty. Ears were long and narrow, laid back on their heads. Their skin was rough, scratched and hairy. It often had a yellowish, pinkish or greenish cast. In addition to such physical features, the werewolf also displayed certain psychological traits. They commonly preferred the night and solitude, had an inclination towards visiting the graveyards and were known to dig up corpses and feast upon them.

Wererat; Waera, For the wererat be quoted as "When a rat be near and their are felt dangers nearby, Then a wererat could be there to surprise and eat you."

As unpopularly known, a wererat be a person who be transformed, voluntarily or involuntarily, into a rat under the influence of rats or the many-as-one and full moon. The first wererat was a person who was immortal and was rat bitten, who then recovered after a slight sickness to be able to transform into ratform without need to do ritual. All he needed to form bretheren be to scratch them or mutate at a difference. The many-as-one be a group of brain rats that get together and form a collective conscious. A single brainrat had a larger cranium with a focus to disrupt and almost kill the victim. Together in groups of 3 or more they could kill by energy manipulation.

A single rat near the wererat gave them unusual psychic ability. The wererat was almost

always near unusual animals and hated rats in general. their manifested ability was to mutate anything at will that was near them. They can talk to many animal types including the other rats. In human form their silver fingernails were long and almond shaped. Their mouth and eyes were always dry and they were often thirsty. They regenerated and smelt slightly when they did. their instinct was to innately know anything and what they didn't know they got from others.

Their skin was rough, scratched and hairy. It often had a brownish or greenish cast their nose was long and narrow. They had a repulsive scent that could drive away anything near the age of 10 or 12. In addition to such physical features, the wererat also displayed certain psychological traits. They commonly preferred the night and solitude, loved smelly areas, had an inclination towards visiting the sewers and were known to feast upon anything except metals without sickness. They collected things like packrats and almost never bathed except every now and then.

hycilf = high elf, Elven born of a high family or clan, in a higher plane of existence.

Note: not all this be true for everyone. Aristocrat elves that will refuse a fight unless they desire to fight. Find somewhat amusing pursuits that make some people irritated. Consider themselves highborns yet are freeborn. Will hunt people, animals for the fun of it. Find missions to do as adventures and aid people in the process. If the price be high enough, they will guard you. they are more intelligent than humans and elves, yet make no indication of it. Immune to all spells that aren't their own, Jack of all trades(good at everything). To some they are shapeshifters that will torture those they catch in a hunt. Unless what they catch, proves themselves valuable in some form. Humans are neutral allies to them, elves will respectfully do as requested unless they are secretly in despise of them. they are loremasters and are considered civil faery till they see those they dislike, with which they get racially hostile, disputive. Finally, they hold a grudge forever and are bold in spirit like nobles. they tend to make contracts like pacts or pax to be better and if its broken then the contractor loses soul. High elf are immune to all and get what they want.

kreca = kreacher, vile creature, dark elf house servant thanks to the harry potter book 6.

Nera = A golden one whom then is green and has some wings.

-end of elf and similiar-

In the nature of Gods I spoke on creating them, and they are what you think as useful but thought and notice this is really using the being described

below as Godd or Gog. You see you believe in god as different aspects.

"Godd or cilt, deity, Peru, Neru, Meru, Aziz, Matiz, M'ar'lah, Moer'winn, greater being, Goddess, gawd, angry god, godawful, in Gods name their are 4 or more major battles. Basically think of it as if he was her but mild and both sexes with a joined body. Where the form was 3 conjoined bodies together known as Gyrion to some. As now its possibility in of the moment as the person would like. The origins to the christians in God were unknown except to Assyrians, and similiar as a presence in motion that was needed with aid of spirit kind. It was thought to be an evil spirit at first. Then people were considering names that they thought existed of the spirit. Then and after were organizations to achieve results with this spirit. So we now have God as a multifaceted gemstone, or multipersonality being or collusion of energy of many ways to consider with more of which be a mystery to us. So this god be an amalgam of minds, where there was one energy and memory pool of many people to instruct the energy in a process called worship. Otherwise he be a being to pray to for forgiveness, and gain things of support.

With support to the motion, the church arose or the cult interacted as it, the being later would be called a god, the being would do things for the worshippers. The being

is different in every religion as its considered a multifaceted singular 'person' being. My thought be that once it was considered a multifaceted gem and with very little value. A conception of peoples thoughts, it may have formed physically somewhere called the tear of gods and has allowance with faith for magic effects. Therefore the true representation is a ciaoe, as a large cat from this old document that god made be seen physically a gemstone of large size with religion as a formation of its eye facets. As the god gemstone be large and linked bij war and faith, it will channel large quantities of sometimes neutral energy with each facet as a god or goddess.

The only flaws in the gemstone are the failed faiths of which a religion of sorts may occur and leave a fallen god personality. Really its you that's divine and their way to do things. So their be a no personality as thought in imagination, except as in a point where by my view he/she uses real world moments for experience. So think for idea due to the seasons for gender, this is like God one season and Goddess at another. For the imagination of the God/dess be to form a physical being, or a place with events.

Any evil towards the facets of the gem be reflected to those deserved. Its possible that it creates faith. Its grown by earth respecting (as responsive) to the Deity's need to be seen. As the number of faithful grow the gem grows. Mostly by worship and prayer of sorts that be defined by the faith. If changing faiths for not a good reason its gonna get revenge or grief, that be strangely out of whack and strangely related. Its said the God/dess worships himself/herself through the gem and uses people who use it."

Everything listed below be some superfacet except for the discarded facets where some are demons, angels, demigod and idea given form or birth like elvenesti.

Aayn = The elven lord that is the part of whom wants to seem something in games.

A god whom seems so in a part that casts roles and you can play them as if at your whim for a challenge. As for a challenge, you can create or seem to make a character and he will seem a she that creates a point to use as concept.

aal = Bank for the greater human that seems no going on like demon that absorbs human energy, seeming is meaning think other essence without abandon and its essence to seem with growing and forgiving the demons form. Possible as essence is manipulation in ability and that can control anything with a point by their essence. The demon forms can grow indefinitely and no not till essence fed on runs out.

ao = forever, all-father, eternal

ayn = satan, evil incarnate, destruction sign

alodava = goddess of the light

ArkCiva = Bala, Dark demon, A demon considered arkciva or Bala, a demon born of dark matter in man and they become dark when they lock their soul in iron. The dark demon is a black being that is very neutral and hardly felt, except when they do things. They get what they want when they want it, by soul manipulation. With excess energy, they can manipulate souls. They use many means of which they manipulate by. Mostly, they stay trusted by being good in appearance. Otherwise, they do dark deeds to get what results they want. When they get it, they use what energy there by link to get spiritually strong. They do tend to die whence the object is destroyed, unless they cause the life force to shift to a new object or dissolve the link. But, they come back to life again, immediately using the life force of the destroyer.

Unless they are aware, they were the destroyer or creating type, then they use another object energy source. They get what they

want, then use it. The more they use the object, the weaker it gets by energy amount and the more likely it becomes breakable. The moment the person dies, is the moment that the dark demon exists freely. The darker the demon gets things by serving darkness, the more they get whiny and disrespectful. They tend to kill the monster that is the man that bears the demon. They also tend to use death and life energy easily. The soul reading ability comes when they gain enough energy. They risk insanity, as their soul is with insanity from iron. Lava defeats them by causing their dissolution. Call lava by thinking it there in you, it materializes as a spiritual force. Or, imagine yourself going into lava and the dark matter becoming lava.

atryhum = The astral human be a wild energy based human that be faerylike and very easily shifting and yet in astral land they can live. By live I mean energy manipulation and powers of somewhat unlimited ability. Without astral energy their lives are without ability, temporarily, except for the physical area and physical magic. their rules are to live as they can with how they can and the weakest will live unharmed. But their language be the key to getting places and to speak makes it happen unless they don't desire. The Astral human rules are to desist with explanation and if forced, then they will attempt to do as desired. their similiar to the energy human.

ehu = 800, energy human, energy being thats mysterious and very willing to talk sometimes. Some would say they, the ehу won't communicate well but the process is if they do speak its with guarded tones and pure music. The speech has been heard as human and in imitation voice as it doesn't have one of its own. If energy beings enter a church, they become of the essence and unlikely visit ever again as it forms a painful memory.

ea = creation, water god who waits.

ee = destruction, fire goddess. fire golem.

eih = aproponents, male/female god aspect of worlds most distinct for moons. Uses water/fire or air.

ezielbe = a greater god conscious of the omniverse.

io = cannot, ya energy, noted ideal, Angel which are elevated christian mages. Angels are very good mages and one could call them demigods wheras angels are glorified mystics in truth who call on you to do what they demand and need. If you don't do it, they torture you a bit until you do thus they sometimes choose to act as Gods messenger where they will guide you to what they think be the right path and blind you to any other. Angels are known to aid like personage of themselves, those of good natures who call them thus the christians and wizards claim them as guides sometimes by ritual.

oeteo = muse, eternal writer, writing everlast.

oeeteo, a chunk like god who be a technology lord and does other things for people if they deserve it. His power be his fat.

ul = god, line flow, flow regulation, gnome god, technological and pele leader (as personal leader.)

ambigal = A person whom be amphibeous human in thought can breath both water and air but uses fire and this is use in air. As it passes through the he-she or she-he being causes a water effect where the fire be and a fire effect is hieu Ieui where the normal area be with magic 'Whu' as a realy relate with those at her whimsy in the past. She reverts to a human skinned shell. This is a part of virtue and somewhat genius. In passion she be amphibeous but human appearing, and in with red hair but out with a fiery aura and acts like a riverlord but be a firelord. Gain weight and she casts a firey wind. The ambigal be likely to control by miasma cloud or other forces, into her hide she can put things and this is anything as in energy she is a universe in her body as energy the things she pputs is enrgy in solidly shaped form in points including undetected ability of any kind. their special ability be to use objects as a force and if the element in thought they transform into it to use this.

ambgal = A person who has virtue, with red hair and and spreads water wherever needed or desired, if its blocked then a flood occurs. If passionate then a fairy water appears to support people in the area including herself, she be nymph born with humanlike nature and entirely she-male.

But can calm down anything with a temper including with use of ability by others and memory sharing.

She-he can cast any spell but allots time to herself and tricks those she doesn't like and eat or say anything without gaining weight. To uptake with her gets you wealthy but any form as her ways can influence the crowd. She-he can control the ability by force and an object. The special form be a perfect human and with forcecraft they can jitsu into an elemental formation if they get near it, the element of choice and only if they can bear the pain.

anu = god will, sun god as in thought your thought is how the energy of the sun reacts to you.

anubis = muse, scribe/record god of Egypt

aries = mars, Arboleth, war god/dess of magig for magic, this is a god with an alternative with war as fight is love in as a concept or not as this is his other aspect.

Aberuth = geruth, Gaeruth, Therein is no lies with this god as you may know he vitamizes and vitamol is his drug as his victims are many he is a point to attack through by what you think. As think you seem to become you can create with his willingness. This is an ancient ogre god, that can go insane if or not doing what is asked. There is a point as energy speaks, to do as this is what is in a thought and askence is done. If you endanger him you are in to endanger yourself.

ae'kii = awe'kiki, hawii'kiki, aya, Maui, Ancient beast spirit of a dragon system where a dragon is an overwhelming force similiar to a dragon sleeping, make on record and deduce for a decade

some say in honolulu the ancient beast be a volcano that never goes off or a dragon may emerge as a volcanic overflow because its a supervolcano thats slowly erupting, if the volcanic being by essence in eruptian promised in the yellowstone national park ever occurs it might be like this in an idea area considered in hawaii.. It assaults any that try to waken it as if to deter and in thought this is not effective against, those that mention him and technologist or construction groups are worsened or worst off. If need be, link to the godlike force to get things but don't trust it not to destroy as its part of a volcano. There is no mention of this mountain god, as if you are a thought you can be reassured. He won't attach an energy to you that is not actually destructive as impulsive is a point, that he will do that show a promise or not as thought.

ermys = hermaphrodites, hermaphrodite deity with two faces and twinned body conjoined, a male side conjoined with female side and demigod like powers.

representative deity of both sex body, or a demon deity of assasins and mutation with female or male formation showing and represented both sexes in knowledge, now acts like a muse or historian.

altea = alter each, altaran, alterea, alter user, alter eaker, To be a user of wild energy or chaos itself and fro' the innate ability as a boost to effect. This consists of redirection by kaots techniques and meditu (substance) usage to draw away insanity or vidictive strikes.

A quote "The void draws madness but gets a better cleaning effect." However "nothing in nothing out" from Tron. "Nothing be nothing as for nothing be the void." by default user.

ihs = right there, inhibitor (as inhibitory being). The two types are based on the character if good the ihs destroys or controls evil, and if neutral it could destroy or inhibit people or objects that are unfriendly, but if evil it could turn on the master of choice or deter the disruptor (any including weapons).

aldur = wonder god, wanderer, god of victims

Eciyno = Arcobaleno, Arbaleno, An arcobaleno is a babyish type human that walks outside of time and can manipulate any element to manifest something. Their spirit is actually 3 feet tall or lesser that walks and talks like an adult. A fully grown arcobaleno can create effects very easily. This includes manipulation of body age and however they want it. They have fey attributes but they can make nearly anything appear from belief or imagination. Arcobaleno ability restores the body from anything to its state tha works best for the moment. They can appear like any age they want. They only act one way, in control and calmly. They do nearly anything they want to get the desired effect. However, they are very unlike normal humans as they are abnormal. They grow older by will, but they don't really remember how to eat right. Thus, they need food and they get it.

As, they never really grow up after a special technique. They are formed from a human body through the special technique. This technique renders them into the mindset of a baby with adult experience and baby power. This technique makes the body ageless, unless they want to appear grown. The technique makes a body gain very strong magic, and sets them apart from time itself. At the end of the process, they may become shorter but they are ageless. Each arcobaleno is representing a color they choose at a moments notice. This color is an element. It enhances them to make them stronger. They have an amazing ability of elemental manipulation that allows them to be separate from

time itself. Its an unusual condition of a person that enables their elemental ability. This allows them to master any element by the attempt at doing things. They can externally appear like anything by shapeshifting. They stop aging and control it by thinking about it or stating their need.

ellclau = Lpryst, Ellpryst, Aunclau, ironclaw, hell priest, Hell cleric that can heal with hell itself and channel hells energy with regard to neutrality as they are strictly demon. To make a body recover from sickness through focus of energy. Where the body is in bad condition, use topical language or herbs, herbs and focused will of energy. By the use of any energy including hell they can heal through the use of aura and talisman, other focus device (crystal talisman) and effect the disruption of sickness by forcing the body to recover where it wouldn't. through the aura they can perceive anything of the body and thoughts, including humours and mental state.

When it be to be used, this aura healing describes where to get at the area of pain, feel the area for tension. As the aura vision can be necessary to perceive the actual condition since the healer doesn't have the machines to aid. A hell cleric who cannot do a service requested, will unless justified lose all abilities except hell usage until the atone by doing a free service or sleeping. Then they must remain neutral in conflict unless their be proof of the deed that needs accounting for. To get to the truth they can cheat, decieve, act , poison and just about anything else to get the job done. Otherwise they become ex-hell clerics if their be personal involvement for no reason. they can serve any god/dess as long as they do a service to gain favor, and for what they want makes the service by filling in action.

dava = goddess of love, the love god is a point to consider as you think to enhance her to he can do love matching by energy in belief. This god aspect can turn negast as negative in being in thought, by negative emotion that is with an area idea to seem an idea that is had. Any summons can get you killed by him in life. Any other reasoning is a point to construe, and warp around with a unrealism that is realistic in feel through the dark mist or light mist.

decano = Mystra, among other names for a Magic god/dess. Magic god who is powered by self acts of many kinds including sacrifice of an object. Except for physical magic objects where, the objects are on each use counted as a sacrifice or trash such as food bits are also able to be tossed as though a dream car thought as this is sacrifice.

demeter = god of signs, this is where you think to get a moment as a sign and you created better or what you want by feel. this is a moment in time. you don't even have to believe in him to create by naming what you want, this is given as a sign that you state demeter gives you what is needed by feel.

deva = angelic being, god servant that are the Gods devoted demihumans serving the gods to aid themselves first and others second. Devas are the greatest demigods that could exist and be seen at their own will with desire otherwise we just mentally perceive them as flickerings at the eye corner, not at all. Wizards perceive them with gold skin and people talk to them and exchange info on technologies, other things of interest in their sleep sometimes. they are unkillable beings that live sometimes unseen amongst the humans and demihumans. unless they chose to be seen. they exist on all lower planes of existence and they can alter even demons as though in their course of existence are what they seem if they so wanted to and by powerful demihumans, they are called by summonings into viewable forms doing what the summoner asks.

dema = Daemon, Demon, servant demand, being with self-consuming power source. So this is a God messenger, beings that are the messengers of gods and they are the neutral, good demons that will aid neutral to good people sometimes chaotically as angelic guardians. Most times to a gods instructions they act and they can be summoned but, if left on their own devisings they will kill the summoner just for fun after overpowering the summoner for freedom to exist on the summoners plane. So be strict with the daemon as daemons are chaotic neutral by nature and if they see that a balance be needed, they will be the balancer force and do not lose your will to them risking control but let them act on their own.

Demons are fallen demihumans who were once human that accepted magic only to be denied by death and reincarnated as evil demihumans. Demons serve themselves first and the lawful evil, neutral evil and desparate people second. Demons natural enemies are devils and hate each other because evil like nature personalities will always conflict and demons are lawful evil by nature but there are some good demons. they will honor a bargain as long as you give what you promised in some form and if you break your deal they will break theirs and sometimes kill the deal maker in the process.

Otherwise, they will honor the deal and do exactly what they promised to do but if bored, they will mercilessly cut you down so the key to survival against a summoned against you demon be to buy the demon with more than the other guy could offer and sometimes the demon will only respect sheer will, a showing of respect or a showing of power. Summoned demons will always try your will and make you force them into behaving under your will so make the summoning request without any loopholes, they will get out of it. A trick be to not use anything they offer except when they offer to use it against the enemies of yourself, and by giving it to you the summoner will control the enemy. where the wise magus will use them, the demon, with a neutral backbone accepting anything given with suspicion but used freely to prove you trust. The act must be proven out by the demon, or you unsummon the demon for not doing as you say. Demons and devils can get along if an overser is near.

goddwib = go'wib, god focus, priest, priestess, preacher

goddwibt = paladin, god channeler

giau = gold god, money god, almost immortal drug

geiu = agneu, adneu, the coping god of the cops, he or she does things for people that causes said person to cope with the situation. This god creates on a moment and works with people that need to be worked with by feel. Otherwise you could find yourself in some prison, this is done by the idea you have to break rules and regulations. Any illness he makes you well by idea or feel, creates the healing in you by her and sometimes there's a lock involved or regulation of some sort.

This is what I know is true, not what I realized unless necessary. So think and you can realize what you need to know. That god does exist as the god and he or she allows other gods to work with him or her..interesting factoid, they may not realize he or she exists unless by luck, except he or she knows about them. This god/dess will know what is necessary in order to cope with things. So think about him or her and you are served what you need. Sometimes by the time you think about the idea, if you think about the idea you will get what you need if you want things by what you desire. Otherwise nothing bad happens by feel.

genkyokou = sagelike immortal time linked god servant shapeshifter with four arms three legs, womanish breast, giant strength, enigma, 1000's powers, magic immunity, high iq and anything said happens by this human hybrid

globazar = Planet bazaar; A demon of war in many forms that uses the planet as its source. They go lets party, and then all sorts of things allz occurs. They go party ends if order is restored. Yet can overcome anxiety by being aware of our reactions and performing sudden act of kindness in the act. We may not be at ease with our life circumstances, for we are being reminded of what we must do to keep the status quo and keep from falling apart. Its of what is a spiritual energy, enabling us to touch magical places within the realm of our imagination. In love, fear can stand in the way of love. Satisfaction may be delayed, yet it is worth the wait. Opposition can drawing our thoughts of away from logical 'be' analysis, toward the stuff of dreams. It's hard to know what to think, as fantasy temporarily overtakes reality. As beautiful harmonizes with passion emotional truth replaces logic. Verbal boundaries dissipate and we are forced to leave words behind. In emotional value they purport.

hadrbazr = Hadr bazzaar; In disseumo disseum, it is in resume a dissimiliar moment by a major demon with many familiar forms. That turn people evil, then are psychic and control. It has many different forms.

hombjala = house defense protection demon, thoughts in the house are possibly forming a love god effect as it thinks to need a match that it will do for itself. There is a god in the house that it summons and if in need, you can go to him in any form you want as an idea wizards accomplice.

kauli = kahooli, minor wargod of magig that is of death and kills the perpetrator

lamia = Quite an anachrodin by chupacabra or thought human is human if read is death thought she answers in

vision and violence

falls the crime to the death to the criminal as the person that creates the act creates things, is not the criminal as this is violence done on the crime as a waste up perfect woman waste down serpent goddess that is her in thought. She fixes herself as she invites and think to kill you as the actual criminal that isn't you, is dead by murder in a thought to lay me out and think use as your idea is what she will do. If you give her a point and thought is up to you. Shift as you want as she supports and eats the criminals after an act that isn't an act in bloody violence or no do violent for violence you don't have to act. No is with no slap or area to waste away in to her, as not a potty mouth is use to speak cool idea. She senses the purpose or feel then can use the idea they respect to manipulate them or think to get them to use what she wishes. This is to use is what she respects right or correctly to use their idea they respect to control or work with their memories to create by the body reaction. You don't have to do things to who you know. Know isn't kill off to realize or your not user insane.

Beg or not and dismiss the words, an else if the words don't matter and is suggestion isn't necessary. Yet if you your own will in desire you can create, as you think as thought exists you are were and not as a point you think assumed form in shape and this is another idea. The being is formed in a different idea excepts, if to see as acknowledging that you do things. As this creates by the energy and your idea creates what you think, your thought creates viewed thought and death falls on those that are not excepted for crimes. She controls those to not do or create crimes to work with by idea or no slap she doesn't have to be hit. Lamia is mother of all monsters so she is controlled by fate. This is not blocking him or her from leaving.

As she uses the point to create with the concept, your idea is what she uses to form her magic as belief is her own in life she looks like what she wants. As she uses the idea to make use, and form of anyone as your own energy. Think as not ill and she is what creates the cycles, as to form is just the moment a thought is possible as she makes what else is necessary sworn to good is the thought in what is the point you use. As you ask in her thought that appears like a vision for things she uses, she can form from a tailed form to a human form at will the god or others that aren't there are to create. As the true ability, there is to transform one thing to another as though a transmorphing spell.

The idea and use is a service as in intelligent you are what serves or not as you ask and just do and don't ask her to not be effected and get effects of violence on those you thought are crime makers. What you think she will do, will make her do things as she is there as wants is to as a monster is formed from any that are killed. As if they are in thought form theory as is proven and thought is the form, they think she is. They who ask much of her are allowed, if their will is what allows things. So as she is aware she exists unless thought not to exist.

lesgod = lesser god/ess, if you mispronounce it, he/she gets you in the end with a silent death. He/she also guides you in language of sign language and other language skills. Psionic in nature but not in a normal sense. He/she has no third eye except for the mind, always not lie except the mind acts and as thought is one life to live. Known as a courtesian from ages past, thought is her true form as you think her true name be in lost as records you can use a quick gesture except in a motion of using her/him in to get a glimpse. The idea be to know info not seen so far but to earn knowledge assumed is made real as a reward. Accounted as a lesser god of power with a thought and understanding you are a god. Mostly known as a god/dess or not, think as the energy has reached its peak for crippled and not. Those are for those people non crippled, think or not as people who don't get much can create her or others. As then you can get her, to do things or now you can not do much unless you think you can for thinness in religion is energy that creates for whom what's the power.

manda = paula, moander, junk god of large proportion and amassed garbage he gets his power from vegetation and junk, panda bear. As assumed this cute panda bear can make a point, or not as someone tells you of this to make better with what

you have and do.

lod = commander, unseen godd, original god of anything from pre universe and he just a presence, the one unseen

loki = sai, sate, sought in, seraph, greater creator, satan, deception god that will create as you think subconscious he will react to support.

lyrd = wild natured god of primordial and premordial nature that uses weird and wild energy that represents anything

madkarna = This is the name of a spirit that if used in a loop during a ritual or and evocation it is a God, so be careful.

pyrlyrd = Fire lord, A down to earth eefective usage and objective person thats similiar to fire giants they are normally shapechanging human psychotics with energy control of many sorts, and with a correspondence to be trusted. It, their action goes with the history of any movie or place. Now when a fit occurs fire breaks out and when postponment happens theres a interruptions to his/her plots and the effect of seeming like the firelord, be very empowering but to the field of trial and not to the path not looked for. His or her servants are likely to get aid for things but it takes on as a discount or deriverant (derivant) to be derived a medicant and no meanness or others as mean and complacent. Be good and their inverted by different formulation by some means and same idea in attitude but for others actions, the idea be looked at as an additional source of information. Some scheme to win by distubing circumstances enhancing the value thetrade.

With a point tribute to them they so like believe they behave but a inbalance, causes extra weight per bite and add height after. With oddness be concept to them as they develeope their desires. The odd lord walks with oddity around rapidly his house and happens around their lives of passion, or like fire near and on a candle. So like firelords to contribute, giving to a purpose and to what they think. Its a pentium means its near me but not to do harm, Be harmful means to frighten but to keen be worse as a serum be occurence to fix..by idea. So a placebo will effect to become a shortening of effect, for them who use it as its devised for effort and easiness. The desire of the person be shown by deeds that promote them. their zeal and almost greed be to get a rank to make the ambition desist a small bit, or they would quit and non would realize unless they continue in hopes to get somewhere..so to raise be to be raised and not raise at all. The raising procedure be to be assigned duty, do well and its gain in rank. To greed be to personal efforts as affront and to do it as a capitol mission. Pen-sion be to computer control operations with trouble shooting.

Anything thought on might occur unless its de'labo the near core of the planet with a large number instances that make weeks to clean up. They can live anywhere but their fire be how they work along with who they can't get along with and those they create tools and manipulate.. their passion be the fire within and its the idea of de'labo to light a flame and thats all they need. Except for ice cools them off and they won't leave the area that other people want left alone, for the object. In de'labo hardly any work except to deliver to any who dare, to help out the person or other pursuits. To travel be to cause disturbance or distraction and create havoc that allows them to get places or attract others. In effect they don't love fire they despise candles and other things similiar except its hidden and that which helps them they get mischievous at, to get granted a teaching position be to lead the new era. Where Riverlords, they tend to wash with idea and own the area. The firelords are kinda hot to touch and hard to create a concert, except those that have them as friends stay away for the hot things that may occur. They hate to hurt themselves except to stop the bad effort by curing the cancer. Its

not true that they deal with only fire as its only depression that makes them do a frenzy.

The firelord be likely to make up thngs and allow others to fill in. Now chemistry be pretty fair with what they achieve and great collections. Any mistakes and they drag people through the mud even if they don't know. But their true form be the fire elemental with human flesh and non burning touch. Any they dare know for their effort they do love

with friendship. But their true desire be to put out desire for evil things. Who they work with are sometimes despised and their attitude be reversed but the chemistry be ingeniously guessed at but non harmful. With poison they are immune and not drugs as they are similiar to Riverlords, but on sight they tend to stink for the effort of doing things with extreme belief and effect seen before. Those who do else are obliging them by the idea. Yet the hope be in belonging that the Firelord will believe in things that be of use. They tend to destroy not that be important and use that which available, with the thought by use I buy it. So to buy it be to be able to use it, and avoid the effort by doings of the spoken effect.

They have controlled people by simply being near them except the effortless friend or willing participant and any unwilling are unbeaten for attempt to soothe.. The control will make you feel differently as possession and be to think and not be their natural state of directed focus unless directed else and it can be faked thanks to Hemler. What possession they gain they use as an idea, but act as if its not there otherwise for the idea they might use it. Now things are related to each their own or each other as physical and integral to the parts, as parts make up the whole and yet don't account for it. But the earlier pattern in actions can be denied and broken by doing another things, this to fix trouble as it occurs. I believe this be inaccurarte but its close as some are dumb if smart and instinctive, but they wait it out if instincts allow from examples and rendered thoughts by others and by mind scanning from who know. But they know not to use fire unless its for a candle.

I so wish the purpose was to not use the force of idea to achieve what a machine could. But as a people they certainly more than most are intelligent and active to believe that we are as we be. The exception be when we are relaxed and things arent done again in repose, Yet they would try to improve their effort, save their effort at gaining things and consequence be reproof but added consequence be reproach. Dangerous allure be with the bad vibe and strong good off people and objects. Described events are examples that are remained/remaining by good or bad, but its related as don't be it if its gonna hurt or sounds like it except with a prevention. 'This stops it once and for all. So be it. said by Al'ein Por'caut. Be so not dumb except in dream. As most would desire it mother nature be in control, Don't be too dumb regulate know, means don't be too dumb then regulate then know. So don't talk just do, to be irritating talk and act but to be pursuant or pleasant talk and don't do unless you want the irritation effect.

Now they are known as a CIA target for coming by created ways, they can creates any reality on instant and to act be belief of sorts for different realities. To believe things can be my belief as well. Get near flame and the IQ drops as their power goes up. So as they don't know they are likely to hurt people, any idea suggested to them be likely to be treated as an act, incorporated to acting and this finishes it off they don't know or they would have done it. if they happen to they read it from others. They document what they do and their fits of rage are true blue beliefs put to action in stupid blonde moments. They try to not assault and not handle buy offs they spend time to get effort. So the sublte intelligence be actually none except for their memory which disappears on an instant of draw.

The draw be to correct for things spent and to fix things. Regulation be the code of Trust, Those that I don't trust, I leave alone and hope they stay nice. Truth, Those I leave alone I trust and implicitly for information. Take, (Treas, Treops or treason), Those that believe are not bad but they need to prove it. These are the 3 T's; Trust, Truth and Take of regulation, Take the fall and do the effort, but at least try and these 3T's are similiar to a crede.. To make them think you are a friend and with report. then they allow alot of things by complaint or compliments. Sometimes compliments can be actions of using their info in corroboration, like the quote or statement to mint the thoughts and give them reason to be liking you. Forbear the statement to keep relation and make amends with people. Fitness be to keep a clear conscious to make for better wealth by a slender body or phat and successful idea, keep your stomach

in to be slender appearing and anything that irritates them won't appear, as their attempting to again keep the stomach in. Now at least notice the fire and put it out if there be one or in intelligence one seems with too much fire but this can change.

So the intelligence one seems to those who observe an active intellect, for there are less than us who attempt a crede, their not dumb from too much of any corruptive chemical agent except for energy that afflicts the body and includes fire but unequally its not dumb to not mention it. Related to Riverlords as in trusting the info and letting people learn if its true, where smart be to create an effort of what people like to see and to them its what people are showing in but obeyed as effort, as the true effort be what the Firelords want to see or do and then if its unknown its a lot to see as a meaning so it draws an emotion. When it hits the bank its cooked, So the vision takes up the effort to dowse, for the right thing to say to say or do as they feel good. More like a hundred idea in a minute to escape and to do as needed, except to get the job done and the action achieved to record it..but 'please don't try to be us as its a bad thing. Please be not dumb as its not good and most women love bad people, except top rated idea and for skill try to act busy. because your paid to do it.' Deadly remand gets deadly demand, but compensate by failure to attack with deadly reprimand or reproving demands, that could kill after they get into bad moods and no medication..reprobation be another phrase.

Mutated those that allow but not understood revenge as with friendships. They may have done it as a percent of taxes to evade, they don't hate to pay except when forced. their wrongs can destroy almost anybody. their rage be hissant of troubles where they hiss and attempt to ignore but thats about it, that they take out on people or to relent of the trouble and make people pause, the cool rage that blows out others fire. Most firelords are likely to value that which be labored on by those who have it, or talk them out of it. As a young child they have different ways and dayz that attempt to do a bad habit and correct it. But their immortal and love to work and has a constitution with which has no end. Any day they feel their intelligence go up by having quests that appear like visions and have duping activity of stupid moments, black haired or red, these stupid moments mark when they raise their intellect by listening in with not getting caught. 'gpuzre' be a quiet mode to thought quit moment. They can look like anything,

but its not advisable to listen in on them. As its remarkable how quick they catch them and very possible that they can detain anybody by voice alone. To be knowing the consequence before the in moment as a detailed vision.

By the efforts they do they support others but crazy fits they argue with and insanity be their normal way of life except they are clear mind with not a sign to read them. People that run their life are honored by the efforts they do unless they didn't ask for it.. their secondary name be fire sorcerer who think they do and others are very likely, as their effort be your effort but with no effort lost. When near fire the hair can turn pure black or when using fire its red gold. Some are con artists with the added illusion ability, weapon skill be their net of idea as they use objects as info and usage be obvious. They may appear human but their weight can improve to sugar stuff and grain stuff.

Sugar stuff be likely to decrease body and grain keeps the weight, except fat increases it by loss with sugar and grain in increments. To wait be to pause and stopping points are to understand then reconsider. To see a danger, do not accept the gift but let the results be good for most of us. If the gift be accepted we ourselves provide a way into our most secret desire, so be careful with whom is right. A way of living consensus, to turn flame haired be when they can summon fire easily and change forms and other possibilities. To turn all black haired be to be absorbing, and blue magic manipulation with ultra violet radiation..thanks to Hermione examples and ministry of magic humanic dept..

At a young age they receive images of the 'future glimpse that can control all the rage, all thats needed now be the butterfly effect that change by writing things or drawing

and it works. Try it to understand but not if its too new, thus observe others as to results. But I try not to think on boobs or the dick and only briefly with your unsensual pleasure as of things to do except for sensual pleasure like appeal. I believe Pliny says "I believe they are like quads sexual, To be not give up and concerned with wealth as it does not matter, but denied they get fiesty and torment the idea, and act on the fool whom vended or promised. Then they deny the sensual pleasure they divide the effort and leave except for food or hunger, and in daily strain only the objective view keeps the person in a steady job." Also by Himler. The only view be the self-respect by advertisement of other aspects given time, thanks to Hemler.

Juno = Arbol, Aerlo, Arlene, This is a conception god that makes crazy feelings, of, calm on the surface by near crazy in the abode. the person has to prove themselves of that nature first, they will never aid said

person but hinder instead if proven otherwise and devils can be called by summoning

spells into doing what they don't like. they make certain of fact that said person

will remain along that path they choose and manipulate said person to keeping to

the chosen path. Devils will not think on who they serve once called by spell summons.

thea = Female force, Goddess (from greek), formed the basis of thealogy, where

"thealogy" be not a typo here, but a way of emphasizing the Goddess, taken from the

Wiccan fact sheet at the alt.wicca newsgroup.

theo = Male force, God (from greek), be not the basis for theology as the basis came

from faith, philosophy and the philistine and Arabian philosopher took theo as the root

akumai = ma, toori in akuma, coal eyed enormous flaming head flying creature with

algoi = all, un al, aluminum, Long nailed floating haired all young women corpse feeder in thought as they use what charm they have to fix themselves and create what you think.

This is a beautiful woman that makes out with men, and they are able to mate with any man or create any birth by aura infusion in the men that want it. They will kill the men, after use if disagreed with and they eat the corpse.

fire eyed boar tusked iron teathed brass clawed copious shaggy hair human beast

alicorn = single horn

altbea = Alter beast, altarabeast, To be an animal of some sorts and use innate wild energy, they tend to change form spiritually with lots of strength and struggle to the idea of people, and sometimes from jealousy. They don't want to be disrepped, unpure or disreputed. Only an alter user can use them but not own them. Alter beings, cats, dogs and other animals are considered as its won by a will fight or actual fight to fix it or win it over. Usually a "no" will suffice.

AntiFoaBe = Anti-photon being, That is an ion that heals anyone nearby the particle and this is the being that uses the modern english and does things positively if its negative and vice versa by the ion. Think to summon this being only if you know english good enough to pass as though an english speaker or you might die from the being's presence. This being can do almost anything, that is all it can do except what is light based actions. Those actions you can do using sunlight, otherwise this is use with light from a light source. This being does things using the darkmatter energy that is thought of use as though the energy were responsive anti-photons. This is what the Death God is thought to be made up of by feel. So don't call the Death God if you want to remain alive.

This is just a reminder, so don't take this too seriously as you can't really call him or her into existence here. Anyway you think of the idea, unless you do the idea at the right time near the right area and this is with partial success by the correct ritual. This rite is based in english, that means with english you can get the darkmatter energy to have the darkmatter create for you. Otherwise you may get an opposite reaction such as hits and kicks with a negative negative or negative english use. This is a point you know to do things for as possibly can seem done if it doesn't work out, so if you state the effect you stop the idea. This is done in the effect.

So this is a point to beware, think the effect and the idea is transmitted thoughtwaves to darkmatter itself through its energy matrix. This creates what you think into becoming created as though a full manifest. That's the theory, this is a point to try out before calling out to darkmatter itself to create a being, that is made from what the darkmatter really is made up from existence.

So think and you know then you can create, this is done by what you state or need by feel or use of the senses. If you know nothing occurs to happen what you want, then you don't need to do this effect. That's all there is necessarily to this anti-photonic being. The counter to this effect is "I don't matter", that's written or stated as an idea or suggestion. This counters whatever the being does, so think about the effect and use the idea if the effect the being does isn't for you.

avian = Human with 4 to 6 fingers, as wings are astral or physically formed on the back by what means they option. As they can get use of elements for very interesting wing space, use is space very intersectioned area in time by intersectional manipulation that in points of time

that is interesting.

Noaa = sun faery, solar, king fey like sidh or sun fey that use is a dragon for em or wee, that is very small

and can see what is by focus or fire dot any color depending on what the faery wants. What they are is up to them. This is a fey born from energy and fire from sun with thought energy.

Ayth'yr = guardian creature. some say it isn't their true form, though. Some had the head/torso spikes, some didn't. I couldn't tell the differences between them other than some changes in energy signature. They worked as a hive mind. These are creatures of the 8th dimension.

ecchibi = winged cat

egl = eagle thats crossbred from shrike and hawk

ehu = energy human, energy being thats mysterious and very willing to talk sometimes.

Some would say they, the ehу won't communicate well but the process be if they do speak its with guarded tones and pure music. The speech has been heard as human and in imitation voice as it doesn't have one of its own.

elebra = striped donkey

atryvap = astral planar vampire, Their be another version to the vampires and they come from the astral plane, the dimension of dreams. They are the astral vampires and they don't need blood because they eat the energy from anything near them instead by draining it. The blood be already in their veins because it comes with the form they choose to be and they can choose any form as they are natural shapeshifters. They are eternal beings and the sun or electrical be their major energy source, and night time's magic flow is the second largest energy source for them. Energy vampires don't need to eat but their bodies can get into the habit of it, because it be also energy.

Demons can also be eaten by them but with care of possible mental usurping. They are neutral to each other and due to the energy intake, they have greater abilities in magic and their abilities are at magus level at most. Some even have mind abilities which they use to great effect. They tend to do less and are less active than men because all they have to do be think about something and it may occur. The thing to watch out for be their dark urges which can control them because it be a part of their basic nature. This makes it possible for them to do destructive acts instead of positive. Because they are magus level mages, they can easily undo the event.

They can control someone with their presence instead of just mesmerizing people. Their bodies are true energy that can take any form and shiftshape easily. Because of this they can lift a hefty 8000 lbs item when trying with focus of mind and enough energy to lift that amount of weight in a weightlifter body shape or angry. They also share those abilities as with the blood vampires and their abilities extend to time control. All they have to do be touch someone and they transform a person from within, and it is undetected when it happens. The transformation be by the fact that the persons energy source be eaten from within, and they become a new person when the body dissolves leaving only the power of the soul and their memories.

They could elevate a blood vampire to their state of being and the only way to kill an energy vampire be to drain it of energy completely and keep it from that energy for 24 hours. The body they formed will remain alive as if a saint's body, but their will is dead if they are killed and if resurrected, they will be normal humans. The only undestructable thing about them be the body they form and they can reform the body, if it gets wounded enough and if they get defeated they come back 3 times as strong but not strong enough to lift a vehicle.

They are bound by the the energy of a deal due to the intensity in the deal making and the sharing of wills while doing it. If they break it they will suffer unknown penalties

thus they never make an oath unless they mean it. If hired, they must do the job without fail whereas they can break an oath without penalties, if it was broken by the other party in some manner including attacking them without warning. When they listen to a song their energy be tripled thus they are guided by the song but not controlled. Thus the things they think about tend to happen and they are elevated by their mood in power.

In anger, they can cause the sun to go red or any other event that their anger desires. In love, they can cause other matings as they do a mating. In sadness they cause sadness without trying and in hurt feelings, they can make their enemies hurt three times worse. When desirous or jealous, the mood of others surrounding tend to match. They do have a conscious because it comes from ages of living thus they will attempt to keep living instead of causing death unless disturbed where they won't fight yet allow others to take over unless they resist. The energy vampire be a walking demigod according to these facts.

iladium = aerial servant

amadan = paralysis touch faery

ammut = creature with crocodile head lion body hippopotamus back end

iqronk = iqronq, intelligent being of a wrongful kind, undead intelligent human that be made into a machine golem but the programmer is not responsible for the accidents that it does.

so indempt it not..it is the point of living to itself. The wronk can't lie to the creator but the iqronk goes crazy, and to the creator, as to do good events and said person lies to make itself seem dead to the machine and yet it is alive by its own means to trick the machine into doing things for it but doesn't assault unless you did something against it. The iqronk is able or capable to cope with anything by cloning and examining. They separate themselves from reality. And, can imprint their mind on the house by mesmerizing the person who represents the house. Thus as ok, the house will take on the idea of the owner.

They use the postulant self to give what is to them needed including freedom. Making sure that the other self don't deny life after death in the same body for self resurrection.. but its death that they seek by living in denial of the thing most wanted or what derepresentation is most valued. They Debolish this bullshit they discover and go on. Some suck the life from people and triumph to be better with their knowledge base. It evolves like a bull, but learns like a cat..if it doesn't it does live but as a vampire or key faery type spirit kitsune..where none are and otherwise its a faery type. This type does not attack unless pushed and may try to help people become like them or a doom type character. Be in written form to do it or they count it as wrong.

Intelligent hairy like creatures that are short. They be also nasty, with body functions.

it = 12th demensional demon, that is a demon that sometimes visits worlds and destroys them by internal striking out and strife. So I think in order to defeat this effect, you ca'n use the phrase where nobody is listening of "ih" and the

demon it is held back by what you do. This demon will use others in spaces that exist with their energy, usually this is done by a hit. So the assault is an idea in form, then thought of violence.

This is what the youth could use, so be careful with what you ask of it. So I think it can form anything that you need or desire, this is done by using what it feels you think or need at the moment in order to manifest things. So think about things and instead think the moon or sun, that is using the solar lighting that creates what you want as a need. Then you can rest assured not to be hit if you request something from a higher being. Otherwise you can think "alright, don't form it." Then you cancel out it from the world influence.

oqt = bear

yt = wight, undead being that looks like dried out walking corpse and exists for night graveyard intrusions, to paralyze the victim then turn the victim into one of them.

ywou = Human silverfish that looks human but its as you want it to look like essence be possessive of the people who see it and their voice be hypnotising. So their entire being brings emotional effect to the place they visit as in people feel what they do. They are a point as they are asexual shapechangers that can mate with anything. Human silverfish can share the strengths of anyone, and as they are shared they still are one. Thing granting them ability by the shared person, object having that strength. they are strengthened by negative and accepting of positive. As anyone that gives up their power frees them as they have no true power except innate ability but they can dreamwalk controlling anyone granting them power. As you are what they are like to eat vampires or not as they derive essence from anything as food and anything they eat strengthens them by about 100%. Poison resistant, or not regenerative and about as strong as a vampire they can do much like them. Yet they are sometimes taken as vampires for human silverfish shun the sun if too bright.

The human silverfish can turn anybody at their desire making things work for them. If they dont like people they can turn things against the person till they give in to the human silverfish will. Dimensional ability be at their command so they can go anywhere at anytime. Negative magic be their innate ability at which be ten times stronger than normal magic. A touch of a human silverfish can make people turn into one also. their hands and feet are slightly webbed yet they are slightly deformed so they dont walk right. Yet their ability at manipulation be very good as they inherently know peoples minds. Mental psi be of their ability and whence threatened they assume the form of the person suitable to defend mentally and physically.

If they know you, you can get protection or favors from them.

2. As taken from the Atlantis Channelings "Living in the region we now know as Tibet,

the At-el are primitive by our standards. They are a brave and noble culture of hunter-gathers, small in stature, compared to the race of giants who dominate the Earth at this time of 225,000 years ago. These clans have evolved directly from soul groups--entities who are reincarnated lifetime after lifetime into the same families--though to be sure, new souls do enter, so the clans continue to grow in size, over time, and new clans are often created.

The At-el have skin the color of bronze, with deep penetrating eyes, that are black or gray. They are similar in appearance to the Native Americans that lived in the Mississippi basin at the turn of our 18th century. They stand, on average, only about 5 and 1/2 feet tall, though their heads are larger, even, than ours today. The At-el people live in small family clans that banded together, making up the single tribe.

During this time in Earth's history, the consciousness of humanity be much different than ours today. Where today our individual memories are built up in us from birth, such be not the case with At-el, for they are a group-memory race of people. Each member of each At-el clan be deeply connected to their specific soul group incarnate. The total memories of the clan are accessible to each individual in the clan, and is from birth. As each clan member experiences new things, these are added-- or remembered --within the collective consciousness of the clan. Individual thought is also present in the At-el people, but only as it interacts with their share of memories. The group-memory of each clan flows and swells constantly - each experience is accessible to all, and owned by no one.

Om was their leader and entity where the collective memories of one clan--or soul group-- of the At-el can not be felt or seen by those in other clans, except for the rare individual who has the gift of this unusual ability. The entity Om be such a person, and as such, he be considered to be a leader of the people. With his great knowledge and memory of all the clans, he may speak for the tribe to mother Earth, and to all the elements, which the At-el see as Gods.

The two festivals; in the given of the fire festival and the air festival, the Fire festival is for life and gaining an appreciation of memories. Similiar to Bel-tane the Festival of fire and life with spring oncoming, The Goddess manifests as the May Queen and Flora. The God emerges as the May King and Jack in the Green. The danced Maypole represents Their unity, with the pole itself being the God and the ribbons that encompass it, the Goddess. Colors are the Rainbow spectrum. Beltane be a festival of flowers, fertility, sensuality, and delight. Om recieved new memories by vision during the memories sharing of this fire festival.

The whole tribe congregates at festival time, creating, for once, a new experience of love and joy that can be shared by everyone. For even when an At-el memory contains negative images, it be always interpreted as positive in the end. Even in facing death, a clan member be seen to be overcoming obstacles through his or her strength, bravery, or stealth. And back through the generations of the clans, each act be remembered with fierce pride and good feelings.

The Air festival can be considered Samhain or Samh'in and a festival of Air with the beginning of winter except the festival be within the same year - One lunar cycle having passed, the next festival commences-- the festival of air. As he has many times before, Om begins the celebration by chanting and dancing. The group-memories come to him, as always, and the others begin to experience the shared imagery of the

tribe. This time, however--just as it occurred during the festival of Fire--images of strange people, their lands, and their homes fill the minds of the At-el clans people. As the vision unfolds, they recognize Om in the foreign place, and witness the strange, tall people bowing down to him--a symbol of respect for his power-- and the fear that had been presented in the clans be gone.

With this experience, a new seed of consciousness has evolved, not only in At-el, but in all the races of the world. For time be not linear, but circular; memory be not only a link to the past, but to the future as well. From this point forward, each clan member would be able to recall events yet to come--through Om's connection--and thereby become part of his new memory. Om does not understand entirely what is occurring, but now that he has seen himself in the images, he knows that what he has seen be the future, not an alternate past, and that he must be patient to learn what to do next. It be his job to lead his people forward, to meet the strangers in the dream visions, and so meet with his destiny if any."

cyra = centra, genja, genjy, creator, zackal, eternal one, creators, eternal being, Eternal ones that are able to go anywhere on a whim and by focusing on effects they gained it. Centra created aether (mind force) as a force to be manipulated by minds that were interconnected across the galaxy (universal conscious). then they created the worlds with the elements formed from aether and somewhere in midst of creation their bodies got consumed by the energy used and turned into the force called Ether (spirit). This be the spiritual force and the backing of Aether (mind force) that guides all by being the "spirit that goes through everything" as in the book "the way of the scout" by tom brown as he describes it as a spiritual force that effects all with spirit.

After the dissipation of the creators bodies they were just the energies that support and monitor the universe and some Centra remained as the form they chose guiding their creations thus they became part of the gods. then to better watch for the peoples populating worlds they made vessels for the power they had. Call them Avatars and the avatars are morally the same as the gods themselves. Some Gods came about by the people of the planets scheming, beliefs of the people so not all God's formed the same. the creators mostly hide themselves as they dont want to be bothered most of the time.

Centra do not have blood instead they were composed of Ether and Aether. Being this, they were able to control Cosmeria (universal substance) to a higher level, using their own body as fuel and forming the body as they want with or without blood. though even then Cosmeria was highly volatile to them, and in attempts to protect themselves from it they divided into two tribes, Ether and Aether, and with it the secrets of. Cosmeria were divided. the Ether tribe focused on Ether and the mind while the Aether tribe focused on Aether and technology. Seperate they could not use the opposite's element/substance, but atleast Cosmeria was unattainable now.

Sadly, as time grew by they descriminated against each other, one claiming that their tribe was superior. This finally led to a war that destroyed their existance, for most of them at least by creating vessels and places to assault with as they also kept the universe in balance, creating too much causing the centra body dissipation mentioned by being overwhelmed with some who were smart having survived by keeping balance.

and reproduces as from a cocks egg. "It be a native of the province of Cyrenaica,

not more than 12 inches long," writes pliny. Its evolution of protean style

that turns chimeran after its older. It starts as nothing so no if believed isa or not use the ugly snake "adorned with a bright white marking on the head like a sort of diadem" by pliny. Some might say its with a cocks head. A killing glance that be slow to effect.

Its scaly legs are with chicken feet and widespread in 3 pairs Its hide be scaly and it doesn't shed. For the aura and glance turns things a dried out

state, the "stoned" dry state. Effectively killing most in the area not unlike a medusa who kills the person by altering what glances at it to stone. As it gets older, it can kill more quickly. Most people who discover them try to kill them or die trying. To eat a cockatrice gives healing ability or immortality, yet this be surprising after how monstrous it seems. Excerpt from Gareth Long's encyclopaedia of monster's.

Dispriellic live inside people. They live of the top of the core where they serve  
people. They live up to 200 to 700 years of life. They live in a sorta separate land  
that is watchfull of ours. They can channel and go through any doorway as if it was  
meant for them. They can poison near anything. They tend to use machines to replace  
functions they cannot normally do anymore. Dispellics are actually eternal with  
supernatural constraints. With ability greater than normal, yet their body reflects  
only some of their strengths. They tend to follow these tenets.

"Think to know do to sow. The crazy angered mind ie a moment calmed down. The crazy angered mind is to be perceive and calm down. To be an able person be able to perceive

more or less the idea and be able. To do a little of it, then do the rest after a bit. To understand is to precede or perceive as to what you end up doing. To de is as easy as to deal the way as over the line. Its to easy to de off an its of any conclusion. To de is as a self-wreck not. As they can't help it, now they can. Now in immediate action they will and can. You felt, smelt it you dealt it. In some self site motion in which you must write down what it does to get a glimpse of what it did or can do. If what do. If what it is you do. Where mind is thought and motion is focus. If in general, its to be direct if its to be in effect. Circumventive its ineffective unless needed. Its to be of to know.

Its to shift to be in of as yor subconscious moves you. To be of you changed by it. To see of it it is of you. Be of it be wary of others. Cause by it be wary of what you do. Need to be, derive it, to be of desire be in dense. Be with it, be on there of it or as is necessary. Be event, move it. Move by it, be of it. To be of way be if a moment that is there you are nothing but a bug shifted. To be a nay be a shifted from. To be sown to be shifted of it. Be of shift be of others. To be as if of it be of. To see it then know of it. Be seen of it, be not so or so known for it. Be understood, be noticed. Be of, be of an it. Be inevitable be of there or therein. Be an be there. Be lone be of some form. Be efficient be of some use. If its of many uses its of abuse. Be of it to be abide motion to be of use.

If in obedience by an idea of the ideal that you move, abide it or leave it. Be a moment in action, as in situation. Its good to sow to know. their is a self-perceived crazy mind. There is a point as the moment action is a self-perceived down spot avoided pole. Diepienelle is to know and be able. This is to come out again. To due is not die sow is scum."

All must be embraced at some time in maturity, usually around the human age of eighteen, older. If a Dhampire be not embraced, he, she will slowly go insane from the blood hunger that consumes them, and die of starvation as their digestive system changes to accept only blood for nutrition. the most outstanding difference be that they can bear live children.

They do lust for blood, but can control it and are discreet, although they grow weak and begin to lose their powers if they dont feed. Normal foods can take the place of blood for them but their bodies will be expanded by the food greatly. During the day, their fangs shrink to a hardly noticable size and as long as they are not grinning. During the night they grow excesivly and are impossible to hide. their eyes are red, the color of choice by magic, their skin pale, hair most oftenly black, magically chosen. If a Dhampire be slain, they can be revived as long as the head be intact. As for aging goes, the apperence of a Dhampire ages to about 25 years. from then on every 10-15 years equals one year of age in apperence for the Dhampire.

they can surpass other Vampires in strength, including the Elders and drinking large amounts of blood turns them more and more vampiric, drink lesser and they will stay more human. And lastly, the Dhampire's can walk in the sun though they can only withstand it for so long. For prolonged exposure to the sun can cause a Dhampire to

feel the effects and be weakened. the older the Dhampire, the more sunlight they can withstand and they can withstand a dawn without death. Dhampires are elemental masters able to manipulate any element at will and are natural shapeshifters.

Fluat = Effluent are in roaches that are use to the products as of inbetween and cause them to be used against the people. Its the products and the by-partisons too that aren effected. Some actually come up and catch the person unawares. So in effective its of physical use to lift something up and they miss you. Its also known as to be of ineffectual use. They can create a intellectual scare. They can subconsciously arrest you on the spot by creating cuffs but first they drill your third eye not. To escape from the cuff, there is a energy key you can create. Its reate it and use it, by thinking of a key that is in -between your fingers and get near with it and twist it open. Sometimes three can work a cuff. Its like an ever oscillation key. These are inabbreviated inpartison live roach breed. So they can act as if to create any effect of trapping material. Including rope and steel wire. These are like cops but if you think about hurting one they can come at you and cause you to be paralyzed. By making you perceive cops coming at you. Resistant to mind suggestion.  
Afterword, those they arrest can be shifted subconsciously to an effective scare area. There have been transformations into that of one. they inject poison into the body by a drill efect that is highly toxic efect. To touch food after this can make it toxic but seemingly inevitable rich. So in effect you are poisoning yourself, to be eating it with the illusion that it is rich context. They create an illusion that turns real, in you if your near one and the more of them the more powerful they become. As in a group idea or focus in effect. While they are killing you, you get an image of what you want or some roachy vue of it. They can perceive through your eyes and ears. Anything you invent could be considered a wrong. Distract them and you can get them

to help. An en enema, to clear a moment by use in division.

Thus we effectively use what we do but the body they subconsciously kill as we do. Creating the idea feeling as they do thus. Eat of the body to create energy, and transhift by a warp effect to other areas that you may have gone to. They then use the body to shift to area and hibernate by the area soil. So to deal with them, don't move near them and hold something above your head that is a container. Till they leave, which they hardly ever do once they have a target. These roaches create a symbiotic link to your alternative selfs. To be entree.

This symbiotic link can create images, and idea to the effect that you are communicating to them and them to you. To be thus we do in a certain pattern. That pattern can be followed by this subconscious breed. As some have managed to destroy them with. Now there is a communicative roach breed, that could sit on the tongue and effect alternative thought transfer with the image to go with it. Its intrbred, it communicates with interbreed. Some may or may not see it but every expression tells of what your alternatives are doing. To realize it and then go they cannot follow you through a certain path. If you know the path. Everything doesn't always effect your sub-conscious.

greibs = greiby, Great hobbits are human and hobbit offspring often by a love potion or love spring, that once lived till they were hunted by men and only for aberration as they were unaccepted by humans and tormented by mortals, the promise was to be like ogres except they were perfect to slime in mentality. the more perfect the better they came off as odd and the more slimier, the better in image they were to being nasty in appearance. Albeit they are geniouses to the point of being smarter in instinctive lore, yet able to observe and learn. When they are adults, they have most of the good traits of both including adenturous, not to be killed easy, slight madness, power hungry slight tufted feet and very able to go without shoes as its leathery thick. Added to this be danger sense, direction sense, slight jealousy, inferiority complex, can be devoted. suicidal actions and mental abilities along with manifestation ability.

Great hobbits are likely to play games with humans with a goal of living in the family. their gifts are instinctive with power to aid and they have instincts like a bloodhound with innate omnipotence. Counted as fairy they will be demi-immortal and very tough to kill. With great pride and effort, any skill learned be a blessing from their creator whom isas they assume. If angry they

might cold rage, the essence of confusion and greater strength that lasts weeks to months much like river lords. they are picked on by other goblins till they are controlled by the goblins machinations and then led to their demise after telling all, great disaster. What happens after be the great hobbit turns demonic and true neutral. After demonic, their prospect be to be "alive" and not killable except in body as they borrow another body which becomes them. their abilities become fully demonic added to their natural abilities, and they start using patterns like thinking. Hobbits can steal at a distance, close up when they realize a fortune is near an opportunity unless they don't want to by belief.

The height compared to the cousins are 4'5" to 5'9" tall and anything that is told of them, be considered "heresy" by hobbits except what they want to hear. Quite often they will fight unless there be understanding, a quest that happens. Most informed of their nature will note they can shapeshift and yet seem very ambiguous as in a group, their might be great confusion if they so desired just with speaking. Yet where the hobbit can be red, black haired, these can be blonde as well. Most likely the great hobbit be found in hard to reach places and old ruins only surviving as they can, and being restorers, natural engineers with haughty attitudes. the attitudes may get to humans, other people as a concept for a "too perfect" attitude that says "show off" or "fuck off".

If forced they will always listen, and try an idea out but not if forced too much. When confronted, they will run, tell white lies and truth yet not when the truth is good to behold. They most miss the hobbit homes and will be away with a happy feeling, failure that pushes them on. When reminded of this they go beserk and almost don't realize they destroyed anything nearby. Yet they can go back if they desire, but only if they get over fear.

tedirae = tardigrades are commonly known as water bears or moss piglets, and form the phylum

Tardigrada, part of the superphylum Ecdysozoa. They are microscopic, water-dwelling, segmented animals with eight legs. The name Tardigrada, that means "slow walker". The name water bear comes from the way they walk, reminiscent of a bear's gait. The biggest adults may reach a body length of 1.5 mm, the smallest below 0.1 mm. Freshly hatched larvae may be smaller than 0.05 mm.

They exist all across the world, and the most convenient place to find tardigrades is on lichens and mosses. Other environments are dunes, beaches, soil, and marine or freshwater sediments separate by boiling when you think to pour the freshwater through a hole or filter to create a separation of the water from the poison if seawater, where they may occur quite frequently (up to 25,000 animals per litre). Tardigrades often can be found by soaking a piece of moss in spring water.

Tardigrades are polyextremophiles and are able to survive in extreme environments that would kill almost any other animal. Some can survive temperatures of  $-273^{\circ}\text{C}$ , close to absolute zero, temperatures as high as  $151^{\circ}\text{C}$  ( $303^{\circ}\text{F}$ ), 1,000 times more radiation than other animals such as humans, almost a decade without water, and even the vacuum of space, for 6 weeks. Making these the only animals to be able to survive the vacuum of space.

the fox has ability to manifest fire that appears along the tail.

typhon = 100 serpent headed giant with serpent like legs and thigh and feathers and wings, cold

tyrranillerasaurus = Alliasorus, inhumane'us, assiliasaurus, Dinosaur dragon, A beast that looks human if you meet one alive, but allows none to live if it forms from the body after a literacy session, or after success. The dragon-dinosaur seeks with a hunger that seems like the plague biters or ticks and fleas. It can't reap what it can't sieze, and only strikes at night. If however, it knows of the refusal by a flinch for fear it will tempt family members to "help" out the target, and give the person room to stink up or mess up in any area. If it ruins the repute, it ruins the entire family to eat the mind that called its attention like a shapeshifting mindeater. They look like roaches sometimes at first because they, the giant reptile be able to use them as carrier imprint including the alliasorus's mind pattern, before looking like humans that get the bug imprint, and possess a body after the will be terrorized, in a way of this they are hosts, where will be "The mind needing something to create body muscles that surge the blood, and create the appearance of an effect that one might desire. Where there be a will, there be a way to the target desire."

"As it will repair what it can to get work out of the idea, with a desire like girlfriend but an ambition like man. The lover be when their ineffected. their will be able to cope with extremes." By pliny in an unpublished work. They were created by netherese out of themselves and children that knew no better. What I fear be the mind needing the bug after it leaves or at least the mind be possible to love cockroaches.

The dinosaur dragon can eat anything with inclusion to its favorite, be human flesh for dessert by nibbling and absorbing the energy to itself from the body, it chose for food which it eats by the process of body and absorbs energy from that, except for poisoning in which the person turns to normal. This alliasorus uses the dead bodies to its mind whim but puts the punishments to the host. The bodies ultimate form be the shape of its desire or the shape it sees, that be for the host, except now the form of the bug be a beetle like thing with golden or black backs and black spots from transforming and no offspring. The dead bodies can mentally link to hundreds of subconsciouses as it sees or looks as mentally if the host allows. The human it was be still alive but immortal, immoral and absorbative on contact to most mental life, in which its possible to mimic..any lifeform in physical or in dream.

They see you ralize as they seek you die by the death or you live as unaffected, in real life are likely to command and be reposed for effort and inclined to speak or push

desires. their mind be good as it can evade, but their spirit be probably kitsunic with an idea to give gifts, to not be noticed or distraught when they do things.

It defeats by looks and crooks if it senses a bad method that was absorbed, it then turns the body of anything into a beast of immense size. The wings of a pegasus, and uses the head of a human with the beak of a duck, and the bottom half be horrendous as its often of the people or things it "eats" It stands 100 (impossible?) feet spiritually for it knows to hide itself, so the amount of energy nearby details how much it takes to change and gives it away. The physical body be impossible detail as its hard to see and remember for it blurs everything including menory or memory. But its not quite possible to imagine as its 6' to 7'8" tall, since it read everything like from people it likes, it comes up with important facts. This creature cries out if it loses the attention of the person it talks to, acting a child or babe as it grows in the person like a offspring. The child stage disallows any to get their way for longer than 5 minutes unless it lost, or its attention goes elsewhere where it kills the victim nearest and this thing has no regard to weapons as it jumps mentally into the attacker, to escape or by Pliny "it claims a host by jumping and claiming the victim after it be about to die by diving in and derives a perfect reason for the person to live after a proposed disturbance, making a new host like a regarded host aka personal symbiant."

To tell it what you want thought to do makes the mazea do so, what be printed be almost done when no one looks.

This dinosaur dragon be controlling if it can get away with it, and sabotages to cause work and to get better. If work gets better then it gets illiterate, it then assaults mindlessly. Those it touches turns to rotting flesh corpse that shamble around, and attempt to do as they are consoled by command or was their normal routine. Basically this dinosaur dragon can be as big as it wants and whatever shape it wants by sure need of survival or it thinks of survival and it can change, where it renders the possessed person immorally good and causes terror on crooks that can do bad things or it turns terror by its ear. By far this be a strange beast and its victims truly wouldn't want to live except for the effect it has. Its shapes are varied, human, roach and strange beetle. The other forms do not match what it would look like in dinosaur dragon form, the dragon 3 times the size, with brown and red scales for the domestic and wild or angry state, the dinosaur dragon be purple scales and tyrannasaurus natured, but its formless in truth. Due note: the dinosaurs are dead except for this beast that didn't get noted because of its hidden nature. Thanks to Pliny and his examples.

To form something off these examples be bias until you see the real thing. For hopes of regarding one, use the dragon call and attach this name "pterragorre" or "pterrasaurus" it should be able to come if it exists in your area. but nothing can defeat it as its without regard the best described but worst to be around creature. If you suspect it then you might rouse it to absorb you and take your dead body like the borgs of star trek. These creatures aren't out to get you but to get things for themselves and what they take they create a conscious if possible, considered a safe horcrux. So stand near one as I did and it might speak, once denied it will stroke you until you give in by the myriad seas of Abberracia to get through its underground chambers. Its the same with its myriad wills and as big, the momentary thought to be eaten if its denied be always there. At least it can form into once what it was before the ice age took the rest of these myriad of strange creatures. Some of them were man eaters and most of the rest are stranger. Due note, from the creatures it can remember or remake it be possible to form into.

truoi = three headed bird, bird dog the dogue is the daughter of Troi the creator and being that made troy and made the 3-headed dog cerberus, as the three headed bird was created by the point of energy fusion that created by Troi created the true form by use in energy. volkh = shape shiftin guardian

vamp = vap, vampire, drain, Vampires are an immortal human race created by Morrigan the despised who was the first and now be an archon, or vampire elder who allowed no prey to escape. They are led by their desires of blood into destructive but deadly acts. They have no conscious except for the fact of social conduct guiding them for they are born out of an act of death. This death happens like this: A young woman be killed violently and improperly buried by a priest and when the death occurs, the burial be on a full moon you think to serve your needs as you think to the moon or moonless night. 1 full moon later, the corpse arises out of the grave in perfect condition as a vampire. This example came from the 1700's.

Their abilities are to not be affected by sunlight so the stronger a vampire, the less effected the vampire be by the sun. A very strong vampire can look directly at the sun and the vampire will only see red haze flashes if glancing at it and the dawning of a sun can kill them. They can very easily fly because they have such direct focus of thought. Unhinging jaws are very much apart of the vampire that allows them to bite the neck and unnatural strength comes from the lifeblood of animals, humans and any other thing that has blood including rare steaks, yet blood be not the only thing they drain as food and drink be also possible for them for tiding them over.

They can teleport by will alone at least once a day but the stronger vampires can do it more often, because of their focus of will lending strength. They also have the ability to become very fast and approximately in a blink of an eye they can do ten to twenty things, if they focus their mind on it at once. The minds of vampires are part of a universal conscious that

Vertical beams of light transcends time itself and imagined stiffness worked out there acts like a beehive conscious that can be with separate and equal will. They can port by will alone at least once a day but the stronger vampires can do it more often, because of their focus of will lending strength. They also have the ability to become very fast and approximately in a blink of an eye they can do a hundred to doing more things, if they focus their mind on it at once. The minds of vampires are part of a universal conscious that transcends time itself and acts like a beehive conscious that be with separate and equal in will.

When you realize that your dreams are unique. No other individual can have your personal background, your emotions, or your experiences. Thus, your own dreams can only be connected to your own "reality". With this in mind, the vampire dream can make or create the opposite effect on character when realized as it is important to draw from your personal life and experiences when interpreting a dream.

In they ripped people to pieces, along with other animals, and ate them, despite their size. As they were 1/4 the size of wolves, yet were very apt to aggression. they were able to sense peoples, as thoughts in a primitive telepathy, that lead them to always know, what the person would do before they acted. Yet, almost none survived the ice age and they had black fur with silver streaks, Wolverines were very protective, of their cubs, along with the mates, making them even more fierce.

Curatives or area feel diseases

There is no illness or ailments in an energy body, so to become an energy form again think the creator sends you energy from his realm to cause your body transformation into one. You transform, if you think you do. Otherwise you could get a condition, that is set upon you by feel. See only if reborn as a physical body can you contract one, that's if you needed one, other than that is a psychosis or condition set by the mind. So a magical way to get one is think of the condition and draw a symbol or trace it in the air. Then you have one as a point exists the condition from nothing. Of course, you can use a symbol to cure the condition or remove the point, that it exists is amazing after that and the condition never comes back, if that was your intention. The condition dissipates into energy by what is done.

Magic exists because you intend something, this is where you think or state the result and need the point. The creator can be used to cure things, sometimes if you use the leylines you can cause the curation of anything. So the subconscious does what you state and intend, think of what you want and state the result. So think of what is wrong and state or mention fixed and the subconscious causes the leylines to fix things. See to think of the point you don't like. Think the creator makes the effect, using the leylines. He or she can make anything happen that you intend. This can use the spirit. Think and need something that the spirit will do and the spirit creates the desired result. See prayer to your God or gods will cure the disease and illness that exists, as the illness energy disippates away and this creates what you think. Think about what you want, then you know what happens by feel.

Some spells to use:

AS-SA-LAM - BENEFIT: By reciting this name, you can heal the sick

Personal power you will gain: You will gain inner peace

AL-GA-FOOR - BENEFIT: If you are sick and have a headache, this name will help you

Personal power you will gain: You will have power to heal yourself

Yes there are other ways with the spirit. The spirit can also be used to cure anything, think your cured and that your spirit self does the correct idea to cure the point or condition. Then you halt the condition and your cured of the disease or illness condition by feel. This is including lupus or some other disease. This is usually the spirit feel. So think about what you need and you can get the point you want, that's as though a need were granted like a wish. This is where you think you had it and the disease went into submission caused by the spirit. That means the condition is done and you are well again. So there is always the option to cure yourself in other ways, or that is done by using another means. This means you decide, so think and you know what is what and how you can create your idea. If you think it's done, then it's done unless otherwise thought and noticed.

If you think to cure something, then this is simple to set a curative result. This uses any source or method that works, yet creation is interest to see or use to cure by theory is blood circulation, this is done with the diseases that are curable by using some medicine or a suggestion, that's an unn (un) or oki de unn in front of the name like unnaids (un-aid-s), an n after the word, creates the same cancellation effect like asm n (asm-n) or asmh (as-m-h), though if it doesn't work then try other methods, like curuek (cure-weak) that cures the blemish plague. curisua (cure-isuance) cures insomnia and dementia. Add reparo after the disease or think of yourself and state 'reparo', this can be used to cause the disease to disappate and the body does ther epair by itself, like ilp-reparo you did (ilp-reparo) self-repair disease. The general disease cure is unnilp diseased (un-ilp), ilpn is ill opinion (ilpn) or curilp (cure-ilp).

So "uhn kk" pronounced [un k-k] or "so ah uhn kk" pronounced [so ah unn k-k] will work as well. This is a spell phrase by feel, that you use and you get a hung moment with spirit that is not really you, that cures you of anything wrong forever. Think of the condition to cure or let the spirit cure the body, and this is done by thinking "ah kk" for pain cure or "uhn kk" for removal of conditions set by sigil and if you want to do this then stating the phrase for effect. This instructs the spirit to cure the body, and that is using the spirit level of the body. My condition is a point and that is all it is, sometimes you can set the point as a condition. So if you really want to know, then you set it by sigil or symbol empowered by thought and made by the spirit.

Another option is the suggestion and the use of the power of words. Think you can cure the problem and then state the right suggestion. The subconscious will cure what ill you have. The other thing is using h after the main disease name. Sorta like disease+h or onzonzh pronounced (on-z-on-z-h) where that has a softer sounding end z for the silent h. This is meaning not body disease and stating the idea is with thinking of the point it formed. The act of doing this causes a timed effect of then you modified the idea and get the results now. If you can't cure it by yourself or going to a doctor, then the disease will have been progressed too far, like chronic pain in the hands. The area is cleaner or feeling is focus to create or feel. You see add "you did or things is did" to stop a thing you dislike or you can think but I didn't see myself by area care or you can not care to be there see to think time to see time to repair by use.

This is the subconscious cure. The thing you mention, if you don't need it or the thing mentioned, disappears by feel. This especially happens, if you suggest to yourself, "What I don't need or want doesn't happen and disappears on a mention." The subconscious knows because its a universal mindset. That's linked to others and working with the z-flux energy informaion field. This is using an effect by idea. If anything else happens, then you wanted it for some reason. So this is solved by "thine" being stated, that causes the speaker or cause to effect themselves and not you. So its good, this doesn't mean it effects you unless you want it or things to effect you.

So for anytime you don't like something is the fix. Then is the point this fixes any situation, think the moment happens in the reverse world where the time flows backwards. Then have your third eye watch the moment, the point should disappear by feel and you aren't effected at all by it. This happens without any stress put on yourself. What occurs with this, the event seems to happen going forward yet goes backwards instead. So it basically undoes itself. This is a noted effect. The point you may notice, however short, is a shortened version of the event.

This is also known as the alternate cure to exposed diseases. Think the disease progresses backwards, then you may notice it in regression and disappearing altogether. Otherwise think the effect is dispelled by what you type, then type as fast as you can to not be effected of the idea you dislike. Then if you must, pray or state to the creator, what

you need and that happens instead. This is an old cure that is with a new facelift, so to speak. Enjoy the results as they happen if you really want something to feel good about. So the real movement cure then is involved to walk or move about, this works by the nitrogen and oxygen restoring you with maybe sunlight for vitamin-D and then you cure yourself with 10 to 30 minutes activity.

Involvement is the moment you do activity then causing your blood to pump your heart faster, this cures yourself by what you do with nitrogen and oxygen. This is different from going outside, yet can be going and doing outside activities. If you do, the cure to your body is the body changing as you do the activity. Then you create by the feel and things seem better to perspective view. This is an old cure and you create by the feel to make the most effective means possible. That is barring hazardous activity, such as getting radiation sickness and making the body work with poisons. So enjoy yourself, this is an example of an idea for a natural cure. That cure came from the past life as an Atlantean 11000 years ago.

This Nazi cure created a point that is wellness, where other points of it is dissipated energy by which ill is disappearing. That's from the spirit causing the dissipation. Well it's very simple to cause an event, as it is to heal someone, and it's to focus your mind on the thought you want to do. As per say, to clear the chakra. Then let your subconscious do the deed for you as you say 'done' or 'removed' or some phrase like that that means what you want to do. Then the subconscious will do the rest of the work for you. This can make you feel better if it works or even attempts to work. The word you choose is important as it is that of what the subconscious chose, at the moment you wanted something and it reflects the intention you would want. That is creative as this makes things associated seem to occur. Sometimes its effect is to cause an openness that stays with you, see or feel if healing weight is with nothing so this is not there. But I noticed meditation gives you a temporary lifting of conditions.

Then if you see you will need surgery or medicine. So try adding an x or suggesting to yourself, this is done by statement or thinking the idea that the disease cures itself, this is for extra as if in unncewnaox(unn-sew-nah-love-x) for tooth regeneration. For a chemical cure there be that which keeps you fearless, regenerative, awake, nerves alight, and recovering with the spell form of thinking on the body effect. How its achieved is where you think that this does work, that is done by drawing a picture or state onhkagfecu (onh-krag-feet-cup).

You can think to erase the disease and use lea (lee-ahn) to do this, otherwise use the disease name after you think it cures itself. If you need to use a particle, then the lepton is a subparticle of time in reversal or negative darkmatter energy moment. This is thought in use. This is used to erase the disease and then sutra (suht-rah) and the disease name is used for the healing particle created by meditation. Now remember, its one drug a day to remain unaddicted unless proscribed by doctor. This uses symptoms or saptue so look for the symptom (saptu) to match the idea.

So think about this as though an idea or thought experiment, that the subconscious does using the aura energy and the third eye that creates it. Activate your third eye by thinking that its active through thought, that causes blood to flow into the pineal gland and generated in the area by imagining it where you want it. So you can think to do what you need to do and you can get what you need. This means you can direct this by the focused upon thought. Think what you want by what you need, you can create what you think about. If you think about something long enough, then you can create the point of the thought. This is a known effect.

This works anyway you do the idea, think or suggest you have had the right minerals and vitamins. See then you can cause the body to cure itself as though a point exists where you get them from nothing, this is with a drink or eating something with turmeric and oregano or basil. Turmeric cures the brain as long as you use it, oregano or (lemon) basil cures the body sometimes. That is a temporary cure at best, though the thought exists from energy what you need. This is where you are able to do things and capable to cope with the situation and manage your disease, what you think or say can happen if you need the idea to occur.

A disease cure or focus point shield (if you need one) is where you think not to be effected, this is effects by the disease and you aren't effected. This works anyway you do the idea, think or suggest you have had the right minerals and vitamins. See then you can cause the body to cure itself from nothing, this is with a drink or eating something with turmeric and oregano or basil.

Turmeric cures the brain as long as you use things, oregano or (lemon) basil cures the body sometimes. That is a momentary cure at best, though the thought exists from energy what you need. This is where you are able to do things and capable to cope with the situation and manage your disease, what you think or say can happen if you need the idea to occur. So put your thoughts in order, then your mind and body can manage things better.

Otherwise you can always eat a snack, this cures the body with a cure that lasts a few hours by what you think to do. If you think to exercise off the snack by a heightened heart pacing by thinking the heart paces faster or walking around, then you maybe won't gain any weight. See when you notice the activity is being done. How to lose weight is with this idea. [[http://spellhawk.great-site.net/how\\_to\\_lose\\_weight.htm](http://spellhawk.great-site.net/how_to_lose_weight.htm)]

If you lack energy from not eating things, then you could try Cu or copper that if mixed with water and drank will produce at most a 12-hour energy burst. Add salt to the mix and you add a cure with sodium nitrate from bacon, beef jerky, ham, hot dogs, lunch meat, salami, and smoked fish. This is a point to try if you feel like it.

If you want to cure the body, then use Vitamin-C in enough dosage or feel free to use Copper sulfate ( $\text{CuSO}_4$ ) or Copper nitrate ( $\text{Cu}(\text{NO}_3)_2 \cdot 3\text{Cu}(\text{OH})_2$ ) with water and drink it. Get the copper powder and Copper sulfate or Copper Nitrate powder from the Ebay.com, Amazon.com or try producing it from the blood that pulls the chemicals from etherspace. If you do try producing it, all you need to do is state Mai Cu pronounced (May-ih Cuhn) for Copper, Mai Cusoquad pronounced (Coo-sohn-que-ad) for Copper sulfate and Mai cunotriteu pronounced (may-in coo-no-trink-tee-uh) for Copper nitrate. If nothing happens, then you can always buy it.

Then the effect is where your aware of the body as its with a warmer feel. The effect is done, that is going to be through a point to exercise in a cooler area by feel with your perception. That is unless you can stand the area temperature, then you can know that you can continue exercising until you don't feel like exercise. So exercise the point and you are assured that you can remain cured. This cure also works, use the suggestion to make the subconscious do things of what you need as if another person and I am not that person, the virus is what effects someone else and not yourself.

The cure is used as a point, this is where you suggest the right things and your subconscious creates that idea as a result. Similar to taking in vitamin-c or grape juice, this is a point in effect. However, if you wanted to get a disease, then think about the disease and if you think long enough you will contract the disease by feel. So think you don't have it, then you won't have gotten a disease you don't already have.

Here is a curative to hard hitting diseases, if you take this when you think you need it, you will recover by feel. The cure this time is apple cider vinegar mixed with baking soda, allowed to dissolve and mix with water, oregano, stevia or sugar and turmeric. if you think you have covid-19 or the cold, then this cure will work for a few days and its taken when you feel the symptoms come upon you. this is a suppressant to a cold I had that works, use it if you need it.

Think you will not have the disease and the disease passes from the body, but you might suffer from the symptoms. So think there is no shown symptoms and you can create a cool facade, this uses the power of thoughts. Sometimes thinking is a point and the idea you have is intention. The energy of the body and the area will do what you intend. If its a bad effect or ill effect, then if you don't get an effect your okay. This is a point in effect. Here is a list of possible illnesses and cures, so enjoy what you have as good health and hope you don't have the illness. If all else fails, thinking you can get the right medications then tells the subconscious mind to have you get the medicine. This is a known effect.

1111 = onzonz, body disease

aids = many drug immunity degeneration disease, slow aid

ade = nausea; this is where you are with a feeling of not wanting to do things, otherwise you feel bad without symptoms and you only need to wait and the nausea or feeling bad disappears.

abruptik = hesitancy till utmost death. byrmasak or aspirin effect sold at the pharmaceutical cures it.

Addie = Fatty, similiar to bonanzi addie or fanati addie, the addie is the case where you gain fat from bodies sharing the process that the body goes through by spirit with others. So this is done as they eat and as you eat. Its caused by demon, which causes your body to be extra sensitive. Thus, as you eat you gain from the fat and lose from the grain and possible sugar or sugar substitute and vice versa. Sugar additives, in this case adds no fat and lessens the weight, if you exercise it off. So unless you exercise with sugar or some food or drink in you, your possibly doomed to failure from fatigue.

Its basically you wanting to get rid of fat set by demon, that is used in a genetic idea of the demons essence, where for spirit interference is done by influence. This builds up mucous and fatty tissue. That creates excess. Now theres several cures for this, one kill a bug to cure the person or think to send the excess body weight to a squirrel as you do things. Now for the bug, that is your weight effected with weight loss. Done by what you kill as you kill the roach or a bug, otherwise use an object that can absorb the auratic fat by think touch or touching it. This is done as you might think of it. I think as its free flowing energy by blood flow then that works, but only after 60 to 80 seconds to minutes.

It could reciprocate, in reciprocation theres participant process location. Another way to cure it is to imagine energy swirling into nothing, or the cells and pushing out the fat. Then to stick out a bit and prevent the fat from remerging. Another way of curing it is to share your fat through spirit, and though you do there's thought that you actually send it. That is sent to someplace else, which is this person or object that collects it by spirit bond. This works as spiritual liposuction. So in that case an idea is a point, you don't do then the use is done as a thought. So in an idea use is a thought by feel.

Another way, do some action thats physical or otherwise, of exercise to remove the extra weight and this is the hard way. If the fat is shared from another, its donned or done by spirit. If you use the absorbption of an object, so it absorbs your fat, then shield yourself to keep the reciprocal from occurring. This is done by the act of thinking the influence of the item or thing doesn't cause you gain it back.

That's done as you either do things or don't do things. If you don't, then you put off the moment it could create what you think. This energy is what creates by your feeling things and makes with your thought what you need by feel that doesn't occur normally. This is yet another way to deal with it, so if you think of one then feel free to leave a comment or make a suggestion. This is to yanno\_aol@aol.com.

adrudop = anti-drug drug,  $Cu_2KNOO_3Na_2Al$  = 2p copper (Cu) + Potassium nitrate + 2p Sodium or Baking soda + Aluminum and to use mix with drink, the stronger the more water; side effects are this if taken too much in potency could cause heart attack. And, could in weight cause you to in abrupt drop things, with numb fingers or numb body area that can make you feel good or not as an ill person will be cured, as this is to make you seem good but you really aren't.

Ah-kk = Neura; neural or nerve disorder, that leads to drastic loss of weight quickly done unless treatment is done. When you have this you know it as a good syrupy feel. This fades away though if the pain is still there unless dissipated into energy, then you can feel ecstatic pain. In this condition, eating is naturally lessened. Use oregano and turmeric to cure it as though mixed with

water with the need that you have to cure it.

Amenic = unthoughtful of disease but it is a separate world of the mind revealed by disease by thought seal. Think to unseal the body world by thought idea, then touch the body and that is used in method. Any action in this world causes you to go to say Amen or holy shit to it. This is done in use by idea you do.c

Ameinic = This is done to be as though its the thought of voice. Cause in case you didn't know this is done in a cause as though its gone. Caused by flea bite. This is used to be what you need as though vicious and to response try and be wrecked but not of the same type as of the somatype. As of me its to me as an idea.

Ameiennic = kiennic, Someone who could be damaged by brainwaves and kinetic motion, that's using thought energy sent forth to damage people is what is done by this point. It could be used in there by a strong state of mind that is sometimes used to set them off in a of vision. Any drug brings a good daydream of what you want to achieve.

Amunic = This is where things exist by feel to the person and is where its as thought, if unnecessary to un become the thing, and that makes you immune to nearly everything. Including drugs in itself. This is found in amenic and ameunic cases where they often don't know of the diseases, so to start them thinking on this is use of the type of reaction that ceases the immunity as its caused by belief with a nontypical overreaction. Its the type of reaction thing that comes back to you no matter the point. As its thought related. Think and its the idea that might scare you, but it sometimes is the thought that can come back and bite you like a bug. Its one that is infected, but its that one that shares itself by memory alone and forlorn. If that one is used to make them believe, then that means if its not of them that makes them believe. That allows things where its also their disease, then they could get it by infliction. Self or otherwise it also is of what is used to condemn. A am eun.

anamic = So to just name something of use with an idea, that is done to just log down things. Anaemic, it will occur in some manner just a spoken bit of speach it still might occur. With the unformation of the idea as follows. Its so called name, means amaenic or making use of hope as its verbally spoken in jerusalem. The idea is to fail once and thats it for it. It could then be amaern or congruitized by steel effects, and the idea radius of effect is tripled that you think to exist by the spirit. The effect could then bring death energy or disaster on the person after the point. This idea is spread by word of mouth, this can be done so if inflicted upon send the person with the disease.

Seen to another place once thought about twice there. One time spoken to bring thought about something and twice spoken to bring you to where the idea came about. This is a point your in with it. Think to become of it and know it better. If inflicted upon, this is used by the person. Then you get it. In an exonerated mood, you can be cruel by this. In an emotional mood, then you could inflict damage by yelling or named calling.

anemic = anemia, a thinness of the body with blood issues, that's due to bones being slightly less productive to blood vessels. This is due to calcium loss and flea bites that cause blood loss.

aniemic = animic that is the probable and possible world that relates to object. Its like you are bitten by a flea, and you are the world. But a real small one, as in a world of the mind or dreams that seems worldwide. This disease blocks out anemia, a

thinness of the blood due to bones being diseased and that is due to calcium loss and tick or flea bites. Anemic is not like animic though, as anemia doesn't spread except by fleas. Animia spreads by magic and the thought of whatever is in your animic world. The cure is to build up calcium, use milk and calciumcized drinks, and keep up energy by thought. This came to me while I sprayed my whole body with hairspray. However in the animic world all diseases are cured. The advanced version of animic is aminic, the aminic body is diseased and has a body odor that's obvious.

This is done by the body to deny in a market, that you pay and in the aminic world its to get things free. This causes you to go beserk and to throw things like crazy. That is sometimes done by a childlike spirit mind, so thinking to do something causes itself to do it there. The thought of being cured, cures you even as you come up with a cure. But leaves you like scared, that's of almost everything of some type. Its thought of use by many to see and be active on thought on memory. So I think to overcome this flealike force is work with the point to feel energy build, and then the idea you will want will occur. This is your stuff that's included with a small disjunction. Depending on the amount done, no this is where you could be apart of a major disjunction. So you don't be effected by spells.

Anumic = to be abit like the atomic idea, to be your like and know of the cause before the cure. Its subjective by cause in voice and in identified cause the person sometimes is to demurr by denial in excessive use. So think to be a point as though use in thought is done by an assumed person in body form but like in mind. A numb lock can freely force you to go beserk, a numb emotion can cause an escape feeling. A thought thats exciting can cause excitism of excessive idea. A point is this with what is what though this is use in the world. Numbing sets it off. The point in idea is a set action. Just as actions are set theres also a thought that represents it.

Anomic = This is atomic stupidity, just as things are to be as though its a gift. So I think to know is to be aware by this disease, seen as a forceful individual who is gnomelike and who is of knowledge. An effect of it, that is done to cure it and force down the idea by your own belief. There is just no long term cure. Except relaxents and invega or something like drugs. The alternative cure is used to be denied but this only makes you bullish. Oie bellish.

Anymic = This is done to go wild and beserk as though in a single fleabite or tick, this simple disease can make you go like throwing things and attempt to do what is done of wildness. Albeit in a controlled sickness in wildness or normal in the wilderness, the disease can spread on infliction like wildfire. This is done on wildness spread on force. That is caused by the excess stress and with the fleabite or tickbite. Some are immune except those who are with poor immunity systems.

andropms = Male pms; Every 3 days the male gets aggressive and heavy during a certain cycle. You know how girls get all bitchy and catty. It's like that. Except with a guy.

As its

- a) the male form
- b) the effect of no sex
- c) goes along with the pms cycle except its mood swings that are moon active
- d) a male sometimes can going through puberty and get it
- e) he is too feminine for his own good

As its an of amazing form of anomalous menstrum sickness. As menstrum as in men who strum their parts. So every 3 days we produce more sperm, get a form of a 'period', and the chemical imbalance makes us have kinda like male pms. Midol? Pamprine, could treat it.

Arbtury = The idea is expressed, by someone, of open honest effort. Then the effort seems to be effected, by the person effected. but the disease causes the person, to almost never agree. If they do, its a trigger for an arbitrary motion, that's powered by an action done and by the expressive person. It seems, tolerance can drop, or go sky high. But, the arbitrary motion is to make a freehand hex or maybe drop something. This is done to drop something and debilitate. So the cure is to make mention, that is done of use for an idea and not to be expressive of the details, this negates the trigger.

Unless the person is usually in the advanced stages of it. Where the expression, of anything, will get a triggered reaction. Then just deny the person, that is done by your presence. Or do good, that is done for the effected, and the effected will effect with an idea hex that be good for you. This can be permanantly cured by devising, that is using an original idea in hex or sigil form. Writing down the sigil, will negate the disease too.

asm = asma, asthma, magical like lung disease brought about by smoking, lung defect and orgasm.

Astheima = Asthma or lung disease or more colorfully known as chest disease and rattles and creates skipping or shaking as you do things by magic.

agilp = a'gih'ilp, rapid aging disease that rapidly ages a person from youth

agulp = gulping disease, it causes the person afflicted to be afflicted and made to gulp nearly anything nearby. Cured by energy dosage from a drink. Energy dosage is charged water.

EosyncEdef = Blaming Edefense, Electricity effected result from the brain. Which causes a person to blame another, that they don't even think on doing the blame to. This is triggered by the effect of being near too much electricity. When the brain slips into the pattern of blame, the person does it unnoticeably. This can seem to cause frustration. Or appear to be released frustration. Fixing it is to numb the body, then make it so the brain is desensitized. Mainly stay away from electricity by walking or exercising outside for long periods of time. Thus, the air cures it when you reach outside the building. There are many ways to desensitized the brain.. mainly drinking charged water works best as it puts your energy back in. And the higher the body energy, the more numb and desensitized it is.

ezcs = eces, Energy Congestion where energy gets backed up in the skull, and it gives headaches. Uncurable by herbs.

emfasima = osteoporosis, weak bone disease, depression to thank me and it not disperses in no life I live

uuek = blemish plague that causes corruption and weakness by not blapomey

ilpag = ilpyou, youth disease that causes people to stop aging permanant near twenty years to 322 or more days as years in perception.

ilpaga = ilpyoua, unaging disease curable by a reverse spell or reverse stone to remove wat it causes.

ilp = plague, drain, shrivel, corrupt, disease, not person(al), that causes dipped personal idea like donuts

indelib-c = aptec, Into seen deliberateness disease, a disease that makes people think to go into product and idea, by deliberate motion, basically to go into deliberately, the thing. Mostly, on the idea that your an item and your mind places you, in some part, onto the surface. As in,

you think your the pot and the stove is on, so you place your hand into the hot stove. Or, you think your the table and then you hold a vial of chemical, then you pour it on your head. And similar, is the you can become dumb, thinking your the product to be cooked, so you put your hand in hot and sometime boiling water, thats in a pot on the stove, and et al not at once.

The idea is done by wat you do, through the effect, of misplacing the object, in your mind and then your body can react, by making you the object, that is placed. So, the cure, is to handle it and try to understand where the object is, in real life, then place it back, in your mind, so it may seem to be there. Forcing yourself, to see the truth. Some face their fear, by forcing the body, to be prone. As, your prone, you stop moving. If, you felt the urge, to do the effect described, and your prone, blocked from the action, as in there's a guard or blockage. Then, you can make the actions possible, to do the effect, without thinking.

insib-c = apiec, apiex, Its the opposite, of indelib-c, where you can think, that your not the object, or person, and do, to place it, in your mind to the effect, of making your hand or body part seem like the object, irl. To the same result, of placing your hand on things, or in things. This can go so far, as to make yourself think your not the sibling, of the person who is your brother. The insib-c condition, can be cured, by placing yourself, in your mind, into the situation. Then the object, which is like the idea, to thhink your there, and the idea object is to, and you see the object, in your mind, with you holding it. Or, you see yourself, with the brother, or sister, and think about why. Sometimes, it works, and sometimes it backfires. So, if your forcing yourself, to realize the truth of the matter, your mind corrects, for it.

saptu = symptom, saptue: symptoms of something

seeiom = This created is wellness other is dissipate by ill disappearing. Well its very simple to cause an event, as it is to heal someone, and its to focus your mind on the thought you want to do. As per say blessed, to clear the in chakra. Then let your subconscious do the deed for you as you say 'done' or 'removed' or some phrase like that that means what you want to do. Then the subconscious will do the rest of the work for you. This can make you feel better if it works or even attempts to work. The word you choose is important as it is that of what the subconscious chose at the moment you wanted something and it reflects the intention you would want, as it makes it occur. Sometimes its effect is to cause an openness that stays with you, see or feel if healing weight is not there. But I noticed meditation gives you a temporary lifting of conditions.

isua = insomnia death, see sleep apnea sleepless disease and very bad spots or not focus by lack of blood to collapse till awake. Curative by cause to blood circulate by feeling the body is numb or after you respond.

ilpetuit = Disturbing disease that makes people ill natured, gives idea to people to cause disturbance and to cause a impetuous nature of a fairy. The fairy nature turns the body into an object, or a fairy form of the spirit that assumes control of the resultant dead body. The cure be lemura plant or Silverleaf off a Agthorn (Silverthorn) plant + aloe vera. Caused by a fairy transform spell and some are immune that imflame not too easy except for reprimand.

itis = te, condition, inflammation, infection, shapechanging disease that is like on a thought you can change.

itos = to be in an ever fart or a debilitating fart.

isunia = insunia, sunlight disease that makes a victim weaken in sunlight

uasy = epilepsy, brain disfunction of electrical signals emanating from

cerebral cortex causing painful shocks and near paralyzations.

cepytul = carpal tunnel, carpal tunnel, Enlarged, inflamed, tendon ligaments, with narrow ligament, and bone nerve pinch, Symptoms are burning, tingling numbness in the fingers, especially the thumb and the index and middle fingers, to difficulty gripping or making a fist, to dropping things. Some cases are due to work-related cumulative, trauma of the wrist. Like over repeated repetitive movement, cured by flexing your hand, or hand stretches, every 35 minutes, will keep it away, diseases, conditions that predispose, to developing carpal tunnel syndrome include, pregnancy, diabetes, and obesity.

cewnao = agreement, caynao, caydet, tooth rot, tooth decay, freeze body or use is a twist with a wrong worded sword

covid = covid-19; this is where the cure is the virus that cures itself, People may be sick with the virus for 1 to 14 days before developing symptoms. The most common symptoms of coronavirus disease (COVID-19) are fever, tiredness, and dry cough. Most people (about 80%) recover from the disease without needing special treatment. This illness is cured by use of turmeric, basil or oregano and water with stevia or sugar. Also use vitamin-c to keep it away.;

ylofya = Yellow Fever that makes you Drowsy and makes you incapable of using magic thus use Mandrake Root dipped in alcohol and much rest, no spells cure it

arsye = arsitis, ant, very big smelly oil disease if corrupted, often in the butt, lots or longevity

biu = vile pus boils plague, black plague caused by feeder fleas and ticks

byoma = baphomet plague - power triggered plague infects on attack, touch, power share gives the person astral woman wings, woman's breasts, astral forehead star, goatshape head, spell immunity, drug resistance, slight dementia, suggestibility, regeneration and omnipotence and it be symbiotic to its host leaving only an undead scent to the body making it into that of a lich.

bcusy = barcolepsy, uncontrollable statement outburst every five to ten minutes and with any action.

bjuvo = magical plague that causes severe weakness and mental strength increase to unlock all possible mental abilities or feel.

brykye = bronchitis, bronchitis, chronic lung disease or use.

deboto = control disruption spell plague or coma use. Blood circulation seen is repaired.

deoda = disorder that includes bad BO and claustic scent.

disenteria = As you think about it. Its where the brain translates the language and breaks down to another language. Repairable by repairing the brain.

dybes = Diabetes caused by too much sugar for long periods of time and the body stops producing it.

dhea = diarrhea, body shits that come frequent, cured by wheat bread.

dmitya = Dementia be caused by suicide tendency and stress overload leading to lack of sleep, and the mind breaking into destructive visions after a mental breakdown. Because of inability to handle a situation, the victim turns to destructive purpose guided by suicide tendency turned to death tendency. The cure be to ignore the visions and voices by observing them to shut them out through meditation with sheer force of will and discipline.

juh'jumbillia = to exercise and move and then fatten up. A spell that backfires can have the effect and any body part that works with the liver and upper bust in failures by bad heart rhythm can cause it as it seems to work by irritation. The cure be essential oil and possible faery water/holy water charged by the opposite of the disease as should all cases be adjusted to by this disease as any eating can cause gainage. To fix the heart and brain corrects as a work around and the persons not muddled most the time when thinking of short term memories. The condition of the brain be scherloshepane.

laramitus = Beligeritus, Belitus, A beauty disease for male and female or disorder that causes a lara croft like, or similiar beauty form on even a male. They get mighty belidea of themselves or beligerance to form a hypochrissy of sorts and they prove it. Where people live it down or ignore the problem person as insane and if they talk on it their crazy and the crowd moves away from them. In the end the weight of at least 1 lb to 100 lbs increments per day. Visions of greatness that turn out true but dicredited by disbelief when it happens to them by the weight shift in full view. Where the disbeliever will not assault and the attacker would be the inflicted by laramitus. The cure be to eat half of whats on the plate with at least one meal a day rejected but not on a job where a mom might insist. During the process of weight if you feel like eating, just don't as it would add 1-10 lbs per bite in swell.

Exercise immediately gets it, the swell, down but they the victim might suffer madness fits due to thought reading but Occlumancy changes this by causing a story like vision. Hyperglycoma be another version of this with lesser severity and almost no magic needed. Another cure be to use shock therapy or ballistics to snap a victim out of it. So to be required now causes the person to lose the temporarily insanity and get on in life. There be an obvious answer to this as its triggered by instant curiosity, and somewhat taken aback from another idea, as if viewed from others viewpoint as they are quite likely to do anything. This disease amplifies their magic and somewhat strengthens their psionics but they have a better chance.

In this strengthening they have a 30% better chance to win for being strong minded, and taking suggestions easier from a weak will. Hyperdementia be a condition that indicates this along with low sugar and sometimes early stages with all signs of Diebetes. When the diebetes persists the belligerance level goes up unless alot of water be intaken. Insulin be a must for those with full blown Diebetes, The most tragic sign be heart weakness that doesnt go away and occurs with moments of magic and psi or use occlumency to strengthen it with bringing the weight down.

hypdmitya = Hyperdementia, hypermentalism of cause, Caused by realization of the dementia and a sudden idea with a shock of clarity. It comes without warning, a sudden madness that seems to be its own mind. This be the advanced stage of dementia. It leaves without warning, allowing the person to wonder why they did the actions. Unlike multiple scherosis, schitzophrenia or paranoid, this disease allows the person to know what they did, when they did it. the person only has to think of the action to cause it to occur. If its a disease that should be cured, it only has to be mentioned or somewhat not molested to make it happen. A person in this state be totally controllable by voice as if they don't think at all and yet still appears to think. This semi-mind be of the same moral of the person and integrated within the person. It can manifest powers greater than the body, repair on an instant, if theres a reason. Shock be the

cure or reverse psychology and normal psychology.

diseus = disease

blazia = blaze'r'us, A disease that sets off from wild fire and caused by guilt, be loud speaking, and some burnout. A person in a condition that be not remembering and always with some problem. When forced they destroy the item or thing that allowed it, including a person and force the memory down. The cure be trixeldexime or baking soda, water and boiled potatoes, eat the potato after this to affect a cure as the baking soda can be exchanged with salt. Due note: Every time you feel lighting a candle or be near a lighting device of fire, try to imagine not lighting paper on fire or you might irritably be mean or light your whole house up. For fear it seems can cause a destructive force that impacts on the brain and causes brain damage by magical means or for you to deal with people ia loudly. This goes away after a week.

Fanatiaddi = Fanati fatty, bananzi ad fatty, the fanati fatty will be fanatic driven by weight, over the little things and time. As they want to prove they're not fanati fatty they go without time and after a bit. Still does not cure the condition of the body. Whereas it as the the fanatic, they gain what you call substance weight. From eating anything, its effect is of what the cure temporarily is. The fanati fatty can in a sensuous moment gain the actual fat and mass as weight. Each time you get over hyperfatty nature in state, you forget about it as in a complete memory wipe yet you still remember everything else.

Is in three stages, a this first stage is to perceive an the fanati fatty state. and decide not to be the fanati addy or fanatic. Go over everything, and try to see what is the cause. Its so to proceed to realize as to formalization. The special effect are what to go over and are of specific creatures that have to hide as objects or otherwise like rugbears, rugrats. they can effect the weight to go out of control by being near them and yes it is a specific case where the conscious limits the thoughts to one per thought or action.

But the mind in question, as the true mind is subconscious and the subconscious can have more thoughts than one.

Second stage of this cure, you do actions or self-made methods in an exploration to cancel out the hypo/hyperfat state. Which is a interesting idea state of fat and fact. Basically you can gain by waiting a piece of candy. Its not fat its ats as it drops itself, after a bit absorbing some other effect. So being the case some actions done, to remove the actual hyperfatty state is drink water which is russian charged with a thought. This thought is 'weight loss' to which mutual idea you drink the water with a charge. By thinking the thought at the drink and you drink it.

Being the case, the third stage is a common bind of will that will come into actions without the frenzy by calming your mind with calm thoughts and counting to 10 backwards or forwards. Of the actual effect, as so many will we act to do something normal instead of something fanatical. And so, the cure is done.

Now the facts are this cure, once you cure this actual effect of fanati fatty, it goes to the reversion of going to the fatty stage again. Instead of hyperfatty, to which are several ideas.

There's the case of thinking or stating to a drink of water, 'make me lose quickly the extra weight I gained. Or, 'I will achieve excess fat loss of all my excess fat.' Then, drink it.

Other things are to exercise it immediately off after drinking charged water. Think thoughts at the drink and drink it. This acts as an immediate excess fat loss if you exercise enough.

Like, exercise (walk) for 30 minutes or walk around your area for 5 minutes.

There is this special case of where you do something other world and body, otherplace, and distance such as liposuction, exercise, weight loss and making effect. It effects your body through a spiritual bond that makes you think its a twinning effect. Especially cold based, here it acts

on your psyche. As though a psychic link, as yet its in sync and cyclically a psychic link. So being the case, we do as necessary as it can be called affluence. Or, a force acting on another to form it. As now, there is a case of someone saying incidentally the word eggistic. Meaning, some point in an alternative parallel body it turns puggistic and takes more fat into its self from the target it thinks of as like you and others. Keeping it from them, and yourself by eating along with you. The fat produced comes from and through a spiritual telepathic linking bond. You also don't gain, it does being the body. That spiritually shares to get. In a moment of resisting the fattyness or in being the deal of the pleasure. With sugar taken in, the person becomes enticed, then does things which are not always good. As in an effect of doing an act to cause good and not thinking about it all the time.

fya = fever, disfunction

miitus = A disease or mental condition and this is a real condition of the body where you think you might make right by might in everything. The more might the more the effect. And the more the people, the more might there is. The more the might, the more you might get or you cause it to fail. When it is in the truth of a single person they can do a job sometimes. Where a small amount of force can do just as well as a mighty force within reason and applied right. The cure, to focus on the moment and realize all ya need is yourself to actually do the idea. And that ya don't need that much force within reason. Sometimes though, might does make right.

giie = gingivitus, gum rot

dracogiie = withdrawing gumrot, dragon of gumrot

gysta = gallstones that grow in bladder

gurd = Stomach acid reflux. This causes the throat to become narrower with throat scarring from stomach acid. The disease cure effect temporarily cures it.

kaoyap = Polymorph plague which turned humans into other beings was gotten by mutation effects caused by uranium, and other toxic things being mined near a magic source, mana fount unknowing triggered the plague effects and the form the victim thought about was what they became. It was spread through natural selection and touch letting itself pass to the new host as an electrical discharge. then it forced a lethargy on the victim to sleep such as a coma in which the change happened to the body and only after it was finished would the victim wake up sometimes frightened of themselves for the change that occurred. After this, the person only had to look at someone to become the form and there was no reprieve as the victim becomes a shapeshifter. This plague formed like such as faeries, trolls and orcs by this mutative plague.

kigkega = ching changer; To ever constantly flip through a channel or cause an event with your concentration moving between one thought and another. This disease causes ya to flick the channel to something else, every 2 or 3 minutes until ya are interested in the thing ya see. Or, to flick a gun on or off in safety or similar idea that includes shooting randomly to see or notice an effect. This is caused by seeing things that are similar too often and wanting something different. As a bullet to the head is a bullet to the mind. The cure is actually unknown.

kniada = nerve disorder, nervous disorder

latray = lycanthropy, disease transmuted by touch, bite of werewolf creating

lech = lecher, diseased person

lukma = leukemia, blood disease

may = will; disease, metal, contagion, courtship, money

mannissa = mannilissa, melatonissium, man forming virus that changes women to male and spread through kiss or touch, increases focus and forms large dicks with the side effects of large muscles. With even more brains than normal, their brain tends to expand inside their skull and each year the person receives elevated intellect by mysticism and then the risk of brain hemorrhage appears worse every day and year. Yet the person can find themselves so dumb at moments of emotion that they act out, as if in a blonde fit. The mannilissa virus doesn't seem apparent at first as it can be very subtle and there be a 5% chance the dick won't grow. This can affect males too it seems by a hybrid virus, a strain of the mannissa. A male can control this by positive reinforcement and/or self reinforcement that's saddled with an inertia effect of resistant energy. Some women patients are likely to get similar results because of resistance to change. The more their resistant the more they're likely to pass the disease off. Drinking water cures the disease quicker but passing it to women be to have sex. See this is by feel to work or create sobbing working or disruption by the way you think you are you are now.

m-melissa = virulent, magical phantom kiss plague and spread virus that forms overly large bust on said person bringing the target to full lustful womanlikeness unless they are already woman and they only think of being woman. They are industrious and tend to shift form to the person on sight of a woman sometimes keeping the knowledge. the disease shifts on acceptance or dismissal by another. It's in ambiguous motion and nothing else that the disease shifts the form and disallows the emotional backlash. To halt the disease be on command to stop shifting or something like other commands that accumulates to stop. In truth you can tell it what to see, do or not release unless necessary.

mesle = An unnatural disease, measles, boils, facial pimple disease to cure use boiling water. Except they, the victims have them all over the body.

mups = mumps, mumpus, diseased jaw that's highly contagious.

necrokao = nekrokhao, necrotic chaos, it comes from death energy and chaos energy affecting the body with a disease like a cold, this is a self-curing disease. Some notice the effect a lot, it causes extreme apathy, lust for violence, positive emotions become impossible, you can't say a positive thing, etc.. It finally effects and your aura cures the point and this can be shared as energy waves, that anything said that you think is a possibility is intending a point where the positive is happened in reverse if positive for illness. Cured by using order magic or a thinking a positive thought and a stated unnecrokao. If you can't get a positive thought then get it from someone else. you gotta keep at it while channelling positive energy into the body.

Think about the idea to try focusing on positive effects with the energy to create more positive energy. And then channelling it into the body, and life magic if a positive thought is used with it works as well. If it's cured, then there's left the cold like disease that you cure like a cold. Anyone that sees you try to cure it and has it might give it to you again. To cure the negative effect off the positive statement say this won't effect negatively.

necrokon = necokeon, To feel like killing on sight or effect. To experience a

flush an the idea of a deathlike feeling that lasts for days. Cured by positive emotion channeled through the body that has been channeled with energy that you feel emerge from the stomach. To think with it, 'lift the killing death feel condition'. To channel, focus your mind and feel the flow of energy nearby. Then think it the energy will flow to your will and think what influences that you want while you do so. This is channelling the energy.

nekro = To motion and to be of macro as macros in an off chance or disease effect without realizing it. As though a disease, caused by repeating moments and death energy that effects you at some point.

nero = madness, mad, a madness disease be a agreement gets an assault unless its a negative.

neurosia = neurosis, over diagnosis, neurotia, oghleurttes, rdiation psychic disorder, nuerosis of mind that turns mental and gives a person a terminal case. A nuttiness of which occurs to cause a person all the symptoms of mental disorder that gets worse with more indescribable moments and radiation. The person thinks that the world be against him or her, sadly the person be capable of killing the friendly person. Such be the unknown status of how they would but it assumed of too much radiation and a release of positive emotion thats a psycho cause. If not that then they're snappish and quickly angered till someone talks to them. They somehow mishear the words and explode or try to attack with words. If none near then they attack themselves. The cure be to effect disbelief and shake the attack off with a headshake or meditate, and hit a inanimate nonhuman physical object.

nipiy = nipily, ninpanic, in panic attack, nitpicking generalized panic caused by panic due to nitpicking in on generalized idea, to cure it say something that isn't general and causes release of internal pressure.

pofyria = porphyria, vampire like disease giving the victim all the symptoms of a vampire or dhampire.

revabilp = reaver's bane, Much like a normal Fever, but it included Puke and makes you weak, so weak that you are incapable of moving. This even leads to death, suicidal tendency. Killer instinct.is observed in the victim. To releave themselves, somewhere in the universe they kill someone to get over it as it creates reavers if it subsides, which are insanity victims that nail those closely relating to a euphoria moment.

riktus = Causes the body to shake and any attempt to do something for the effect gets worse from a brain tumor after, a day the person get headaches with disruptive visions. This disease be magical in nature and spreads by spilling blood to any in area leaving the person to chat along with, any thought or statement to them as a suggestion. If too much done it could lead to coma or unable to move and if they keep trying it disappears and/or the victims gets death visions that makes them, the victim, cry out for no appearant reason. Thus its almost incurable until using fairy water with cure diease imprinted on it with any language.

PuaGlut = Powerglut, this is a natural effect of energy that passes through the body or the effect of energy usage. When magic is done, then you get the result of powerglut, as the energy can be overused in magic. The moment of powerglut is also when you get pleasure or a good feeling. The cure, is to not eat for 10 minutes and not drink anything except water. The need to eat is diminished after subsequencing it. This controls the urge to overeat. Subsequencing is the action

of diminishing the will and doing subservience. That's done by willing yourself to not eat and thinking you're in a calming area and eating. Personal power is required to do the successful willing.

Sykoly = Psychodelic is where; One, ya don't care about the monologue. Two, ya just care about the action that's sorta bad. Ya can even laugh at it. The news can bring on a psychodelic moment.

Sykolyc = Psychodelyc is the alcoholic effect, where ya try to do something and immediately get drunk off of what is done. To the point of not thinking straight afterward.

syle = syphlus, lung disease, backed up by fluid, lungs.

scixo = multiple by mind schizophrenia, this condition is where the brain splits and becomes one of many minds, only to reform itself after the brain learns to deal with a lot of energy.

scurvy = iron deficiency, wasting disease that starts in the teeth.

skuzephrenia = schizoprenia, schutzoprenia is to be causing a scuzzy low down and smelly individual and that's voluntary but unrealized. Otherwise they are normal, but for the scent and disorderly body conduct that they do. This can be confused with schizoprenia. As they also have uncontrolled visions early on of life but they can cure themselves, the visions, they turn completely controlled later off by use by thinking gift schizm competently. They can sometimes think oppositely.

Scuzzitas = Sometimes to be bodily disgusting, the disease makes the person scuzzy, but involuntarily. They are aware of it as well. They can dismiss and ignore their scent, by thinking of other things and focus in on that and then dismiss the scent from their minds. If they think they are threatened or can get something outta it, then they can turn criminal without thinking of the law. More than the average person.

schizm = schism, schizn, schizoid, schizoprenia, mental breakdown, multiple sclerosis, many minds disease that allows the victim not to perceive his other personalities.

In the advanced stage, the person can order something and then act as if said victim didn't order it. They could so easily start selling something, then demand it back after payment and delivery. The victim gets tired, then blacks out, only to awaken after the person's other personality and lets go control. There be only one main personality and several weak ones, like a complex of people. All personalities soak a certain amount of power after, meaning each has equal share of power that the body has. Use of risperdal or lithium can make effects to calm you, that will make your mind sane but won't cure it. If you can't get geodon or a shot called invega sustena use valium, albeit valium causes insanity it does cure the illness.

You can say unnschizm (un-schizm), schizmh (skizm-h where the m is softened in pronunciation and the h at the end puts a "not" in front of the meaning) or unnschizoid (un-schizoid), for semi-permanent relief. Think to say something that directs and the mind will cease the idea. This works till the brain remembers the pattern of thought and the personalities reappear. Then say the spell again to repair. If you attempt to say the least, otherwise done idea in the minor states of mind there is no actual other minds after you 'kill' or put them to sleep. But in this disease partly caused by aspartame and substitute sugar, your mind may be open to voices. Think to say something that directs the mind will stop them, sometimes.

Think to stop taking in diet and normal soda drinks will cease them eventually. These voices are the other people's idea that you perceive as a voice or they are the thoughts via telepathy of others

that the victim may pick up. Saying "not on a schizm" may cure this of feel with the subconscious taking this as a suggestion. However, this illness dissipates away leaving you cured of the disease, this is done by it naturally fading away as though you never had it or any disease. Also this makes sense, if you use a suggestion of "the cure is done as though oregano and turmeric were taken everyday" then works because you act as if you had oregano or basil and turmeric, that acts as a good body condition restorer and restores vitality as well as energy and stamina.

Stro = stroke; struggle, a stroke is sometimes a struggle to get over by things you do. The stroke signs are shortness of breath and some heart palpitation or erratic heartbeat. Sometimes if you breath in or out and think the problem passes you by feel, the struggle ceases and you are alright. So since you can be presented a struggle in the mind senses, if you have forgetfulness with tiredness this could be a sign of an oncoming or had stroke.

necrophilia = sehtgoeb, necrophobia, fear of living death

tabes = contagion of an ideal that issues things to do as an 'isset' by the germs in a magic disease that causes you to die early and create the hostile self in your head that is in your mind. This is then is the moment in that thought you had of what you do when you see a vision and you get something to do with life but as your hospitable, or not as you move your body inhospitable somewhere else where you get mage trait ability to get things to do with magic in itself. Think and you are cured as your subconscious makes your spirit an ability that cures it. And, if you do cure it, you are deliberately acting people out that they do in thought.

tibb = tabe, disease is another name for a disease that is what you are thinking of.

Tiiitus = (This-is-impossible-itus) is a common condition most people on CU know about... whenever you have a few successful experiences with PK or any form of magic, the Tiiitus sets in and it seems impossible to do what you could before, and your confidence goes on a downward spiral. The condition was always there... I just gave it a name to refer to it as, heh. I think it's pretty common too. Kinda similar to self-doubt and performance anxiety I guess, but the PK form of it. To cure it, its easy to get over, treat it as if a block and do something while feeling you can and belief in the idea that you are healing. As you gain positive success it dwindles away the disease.

toae = tendoncinovitis, severe slow hand tendon crippling and its nonrepairable except for thinking magic you get from turning the hand tendon better, as the disease against the disease itself as you get free energy you can repair the hand by not thinking and doing things that summon the energy to create the tendon to seem better in as if a 'fix'.

tgreflu = the force of regret, the great flu that was there in another country that nearly wiped out everything as it comes upon you and acts as a cold and then leaves at times that are mysterious. When heat rises and the cold air leaves the area. Cureat air as its called of the great flu. Returning air that is cold triggers it in reverse as it triggers the great flu back on again. The great flu has additional properties, as of changing its form everytime it returns. But it makes you think you seem to have a month long cold. As the great flu is basically capable to causing you to gain weight, whenever your exercising or eating. To forget things ten to thirty minutes afterwards. To the effect of forgetting ten to thirty seconds afterwords. This is the advanced version of it. In the advanced version, amongst other things as you eat you either lose or gain weight and have a hyper metabolism, according to the food.

winnie = panic, panic disorder

xebne = weight disease, overweightness caused by older age and drinking carbonated drinks like soda pop and other carbonated drinks but solved by drinking water,

non-carbonated fruit juice and other noncarbonated drinks except milk unless its watered down. It doesn't matter what you eat if you do 2 minutes minimum exercise after a meal.

vapue = vampirism started as killing plague that a person came back from spreading a mutated version causing living undead that sought blood for nourishment

wretedie = wrist tendonitis, bad wrist swelling pain

wswu = Widows woe that starts with a simple cold but quickly expands to a pain in the stomach and eventually leads to the disablement of the feet use fresh water every day for a week and ginseng, saint johns wort.

ifiteia = infantasia, infants'r'us with cloning or other, the second strain of this disease be a mental infant stage. Where the brain be coping with a child that forms when your nervous stem causes the brain to have a second personality.

ufaeia = euphamasia, euphemisms'r'us disease. sayings'r'us, a sayings turret syndrome disease that gets you in trouble as it irritates others surround, and with none near you as you could go bezerk as you knew what that was and played god as mensche. Then, you are likely to attack it as things are likely what goes on in a mentally broadcasts what it shows you. And saying things to sum up the idea or moment gets a real slap to the face by a rude message and this is where directional fits happen in with a thought. A little mass to the breasts cures it, no as that's it.

fayskoz = philitschottz, splitz view'r'us disease. In help ot creates a dastardly need to call out for help and like it or not it creates a undeniable field of urgency. The extreme emotion be likely to get a split view on everything. Crazy making in the end as this is acute psychosis. Cause is cured by doing dose in energy.

deotia = inflictomaniac, demoktia or inflictomania; inflicative death by visions'r'us or inflictions'r'us disease. On sight of otherworld beings and other people it causes a reflective idea, for inflicative moments.

deaia = deathia, death'r'us or dead'r'us disease; death eater disease that causes the inflicted that are dead to come back or their belief be death and that they serve death as though fate that's neutral to turn a fate to turn a different stroke. Those inflicted also are to excite over any idea for a thrill. To use a disorder energy is to kill a disorder and make use of deathia effects.

diploia = diploati, diplomatia, diplomatic'r'us, diplomatic with a twist as they attack afterword from a bipolar disorder or want to kill the person spoken to. To decide not to cures it. The inflicted be to cause victims to be just as vicious on sight of the person. In fact it spreads by beating up the victims too many times. There be a chance the victim doesn't get it, the disease. A saying they they do be "to sleep be to die and awaken be to come back.

Discholeria = Larger stomach, this condition is caused by chlorine buildup and potassium buildup. When it forms on men, it can become painful if pushed by too much chlorine and potassium quickly. This condition can make extreme hunger. Curable by 'do discholeria nulle' or 'Cuve dischloleria' In the effort of saying it or thinking it the condition reverses itself. The other way is think of it as 'this' and say 'reverse this'.

lecnia = larcenia, larceny'r'us disease.

lacia = lawcia, laws'r'us disease. it spreads by being a law sharer.

laaia = layatia, layoffs or letdowns'r'us disease.

layaye = lawyeritus, lawyerism'r'us disease. I saw a result of working lawsuits when I said the name, it spreads by paranormal and lawbreaking in progress. The criminal becomes a lawyer in two minutes or less without keeping the civil disorder, yet keeps the laws and still manages to break them.

lasuyia = lawsuitia lawsuits'r'us disease the victim be always looking for a lawsuit.

inoaia = ignoramia, ignoring'r'us or ignoramus'r'us disease; that induces stupidity in people they like and bliss in the infected. How it spreads be a cat scratch. The idea to this be soupola or the feeling like theirs a soup bowl in the mouth, this indicates a paranormal trigger that causes a disturbance of the mind in which it calls "breaking and entering". To trap a crook it tries to mentally beat up good folks and makes a, indiciete remark to killing crooks, where it be described as to get a microanalyst to look you over by enscribing "tu-schler'duala". Now to confirm this be to check for meningitis, as it indicates the physical state of the conspirational'r'us in the case of disruptions and conspirational manner as this causes the stupidity.

The higher the conspicuous record of records in excitable moments be to declarea or a color blindness that hits within a year before it, the more dire disruptions get very bad, now I myself had a large case of this as I complained of not seeing colors at some point and had meningitis 6 years so far. So the cure is to be a bath of water with holy or faery effect, then drink some of it. Except to drink tap water be to cease it to exist if charged. This be the exact same thing as thinking at water to cure it of impurities and make it heavier and colder. To sleep under the bedsheet naked for one to two nights be to create a cure for almost anything including headaches. To force anything reverts the moment to which you get it again.

The contagious disease be spreadable by any magic or mishandling by body and with a bad body scent much like undeath. The idea be very interesting to increase the amount of work by phone as the phone has a magnetic field resonator coil that could correct if focused on to correct. As in the Body electric book as it describes the power coil and magnetic field to fix the body. But cordless phones have the same and yet with overuse the phone could cause headaches. A note about the disease, it was big at first so I couldn't tell if it was actually fixed. If it was I wouldn't recieve troubling thought of training and abuses for no reason unless it was premonition. So it must be spread by touching the objects that are magical and used regularly.

naia = namia, termia or namasia, names'r'us disease. The name blame game that does not stop after some make a point, until a authority figure or someone in authority makes a point. It spreads by blaming someone and some jolt passes through the next victim.

laia = "lay me out", lamia lame'r'us; describes the victim who can't do anything else other than stealing, on or off as they see everyone not stealing with fear by idea, music inclination or be crippled in some manner. A special case of the cripple be if they complain they are attacked, till pulled off by the victim after an assault, of the vindicated but the bias dissappears very quickly. As the cripple will steal similiar to the victim and with similiar personality incites assault. Sometimes with a excitement level that incites a punch bowl or punching of the other, with a vision of disturbance.

blaia = blamia, blames'r'us disease, personal feelings and none else that create a stir to thou with a grudge for every person. If the blame be ignored they blame themselves. It spreads by manure or air scent, if you can smell it then you got it. The cure be to leave the area and any normal medicine. Like the house or something else.

toxyaia = toxatia, toxia or toxicatia, toxicity'r'us disease.

toxicalia = toxicotia, toxicatia, dextoxity, An uncultured, death hurtful and disrupting disease from magic that allows the person to find chemicals or toxic material to spill it without cleanup, and caused by a procedure to freeze a cellular activity and cause the body to extend for its life, In order to extend it, the body, the life body cells need more energy with a scent that be defined by intolerable moments unless perfume be there, pressed on body. A bad side effect of eugenics (immortal and life youthening fx).

toaaia = toleratia, tolerance'r'us disease; This be safe as it allows for people of extreme tolerance. up to the idea of getting stolen from.

ipleio = implacebo, placebo or false need'r'us disease. The person gets the item and the need be gone as its "just the need" and the victim be never using it. If

they get what they ask for they aren't heard from but they're likely to ruin the item.

clzeia = celzaria, blamegame'r'us with genetics'r'us disease. A tad bit worse than blamia as they assault any on a report. The game Russian roulette comes to mind on destruction of property, A modelling career.

meeye = missionitus, missionia, missionary'r'us; allows the inflicted to be on a mission which doesn't end, like mission impossible except theirs end and the mission is to sometimes destroy the person they like or can speak to. Just to speak of this mission be to end it but the inflicted may get it back if the right personal prejudice be their of contemplated change. Declarations can end it except when declarations'r'us diseases be noticed.

doetia = self discriminate disease that allows influence to work towards you but the inflicted see the others as working toward them or the light. If not they ignore them or aggressively speak to them using influences and may appear aggravative.

dogatia = matching'r'us including goddism'r'us disease, self-goddic disease that allows you, the inflicted, to be always matching the shape. What you see be what you get. With the self-goddism that gives you a need to do things and create anew. The term "Godging it" be to make a difference without being asked.

spluia = indicatia or splugia, declarations'r'us with indications'r'us to allow the victim to always indicate what they do with drugs or other idea.

domatia = protections'r'us; dogmatia, in a victim be caused to see or hear things to become frightened and overprotective. Can seem gone if unwanted, or not needed and with magic to get rid of it and it is none of the above people that are mentioned in diseases.

doaia = dogmatia or writia, writing disease and this disease be harmless as the persons likely to eye glaze as they write, not notice weight and attempt to compensate by not eating unless reminded.

faia = schluria, fasia, phasaria, phasing'r'us disease; leads to people believing they were attacked and thus they attack others and objects, and phasing out themselves by fear but end their fear and end their disease and most destruction and disturbance disappears permanently except with an anchor which can direct it. Without an anchor be it possible to recur it.

mntruye = mentruia, mentruitus or mentrusia intrusions'r'us; intruding thoughts and images syndrome signifying psychokinetic ability. The second strain be to intrude on others by clipping and disruptions for fear of being intruded upon. Also considered menstrual disease with the physical signs as cramps.

blokaia = blochkazia or ministeria, inferiority'r'us and minister'r'us; comes from the minister father with concern to overtreat people. Treated with a consideration'r'us to get it fixed.

aadia = avoidia, avoidance'r'us with the strain of pre-avoidance'r'us syndrome of scaring with threats or death of the feared item or person. Before they even come, they will attempt recriminations unless they are good and secure. The idea be possible to occur when the brain becomes sentient beside the main personalit. The brain has a secret personality as well so lets be glad its just sentient and not like the "I" robots of yesterday. It stems from the belief that an invader could subsist in it and cause

major emotions, unless locked away also to where other personalities can exist.

ibleehia = inblenishia or imblemishia, nothing bothering'r'us; happens in victims of too much stress and meditation of which the stomach sorta rebels.

iblaia = inblamishia, nothing blamed'r'us disease; happens in people who discern trouble and paranoia.

blemia = blemishia, pimples'r'us; entire area pimples.

peia = parishia, parishes or demesnes'r'us where the person uses doors in a building to shift to alteranate areas similiar and it starts when in a church building.

vaia = whackia, t3, a whack'r'us disease; that people use with the attacking disease to get rid of pests.

vayian = whakya, whacky'r'us; strange movement of the body that seems in balance and sometimes causes attacks of the person. Now the attacks aren't noticed by the diseased person but others whom are the victims can actually feel it and the target be smaller the better, but if the larger target seems better or a threat then it/he/she will serve and if roaches were the only thing near they would do it.

oalupe = overlumpus or overlumpia shroom'r'us eat in one bite and you shroom out. This disease will incur a single bite per 1 to 30 lbs other than just eating and the body naturally shrooms out from eating and changing to how much food it gets. This be caused by the thalmus gland or pythalmus that be overlooked. To cure is to try to remember something when eating, and the hyperthalmus takes control being instructed by the thyroid. Which induces the weight loss per eat bite instead, along with grape juice and water. Papyra or pineapple juice be possible be also a natural cure amongst other fruit juices, surprising enough be milk.

naeia = wiccan nameia or namesia named subjects'r'us disease; the inflicted will accept an idea of their own but not of others if emotional or name a person and their that person. Treat it with precautious moments and motion to do something which you know he/she normally does.

naovytoy = namedvictimy, namedvictory; name calling'r'us disease; causes on impulse any name to chance, being called until they, the subject, responds and then victimization of some sort.

iunya = immunitia, immunitis, immunitus, immunity'r'us; immunity buildup idea of body, and things that are immune of the person. They might try any idea out, they sometimes hurt themselves.

geye = gasitus, gasia, gout, gas'r'us disease; Overdigestion causing stomach acid buildup and very bad fart gas of the body with bad chemistry. The fatter the person the more farts per second. The amount of body gas be very likely 1 fart every 2 minutes or less for extreme cases. Another strain be a physical excess to excessively buy gas and out of a vision you may drink it as if your will be weak.

stopia = stop'r'us, stop'ei'a stopping disease, To stop on a dime and perceive a mental idea of the most effective person stopping the victim usually themselves. Like they are about to make a grave mistake and could feel it with the bad vibe in an area, then a vision comes up to "stop" them and they make themself do else. The cure be resonance

of a magnetic field influence like a phone on the head to cause the vision to stop or reminding them of the idea that will occur if they didn't do it in a positive or negative tone and this be likely to cause them to go on but the vision might pursue or stop. With realization they came across be the way to naturally continue. To hear a phone ring is to snap out of it, and they are seriously possible to control by thought. No stopping this disease for it stops them.

radeil = Erade, Radiation sickness, to act strange and demur in a front of people. Its the procedure to feel distrustful, and make up things around people. They can't say the word they feel unless they focus and try to wait. Then they say it naturally. But only when they get over their pananoia. Its distributed, it is a simple thought. To get this disease you need a cat and to much radiation. All you need is a cat scratch. The radiation is called flash back by vision and you peek at another world each time. Its like as much at et radiation gives you the flash-back. This is also considered cat scratch fever.

Listen to look good and respond. It could be a respite. Its our response to things that count. If they make you angry then they control you. Sometimes you could deliberately learn the response that should be done if your unaware of it. To control the effect of others, use an idea of iit of your own. As your relaxed when you want to do something unless your a nervous person. In a relaxed mind you can do almost anything. To a person who is radiation sickness, its possible to collide with others or see yourself solely in the other world. Where your in mind not colliding. A radiation sickness person is likely to see him as a king or her as a princess.

energy to fulfill the shape from any source possible. It evolves a shape from pattern and it remembers all shapes its been so it can form into any shape any time.

sostry = strafe shot, fast precision shot

susot = heavy uranium bullet, heavy uranium shot

syth = scythe, pole hook blade

scota = scepter, king mace

shotz = shots, sling shots

sapetsv = The Serpent Sword from Article 2113; In The Quest of the Holy Grail, a uniquely alchemical tale, the sword be seen as a fiery serpent. It be the sword of King David, made by the wise Solomon (Sol Om On) with a pommel stone of all the colors of the earth, with two rib hilts, one made from the fish of the Euphrates and the other the serpent, When Arthur's sword be drawn it was said that two flames of fire burst out of the jaws of the two serpents, and so wonderful was the sword that it was hard for anyone to gaze at it. It be necessary for Arthur to maintain ownership of the sword whether it be the sword from the stone or Excalibur, as it ensures his victory and his life. Malory indicates again the brightness of the sword and its fiery aspect, writing: but it was so bright in his enemies eyes, that it gave light like thirty torches. But the sword in the stone does not last long and the Lady of the Lake gives Arthur his Excalibur, and also a serpent scabbard, which ensures eternal life. Malory states quite clearly for whiles ye have the scabbard upon you, ye shall never lose no blood, be ye never so sore wounded; therefore keep well the scabbard always with you. It be only when Arthur's half sister Morgan le Fay steals the scabbard and replaces it that Arthur becomes susceptible to the deadly blows of Mordred. The once prized sword be then returned to the water, the home of the Lady of the Lake the serpent spirit.

A hero from the 6th century BC named Wu Tzu-hsu threw his sword into a river. It shot forth like a spirit-glow, sparkling brightly as it thrice sank and thrice came to the surface with a great gush and then hovered above the water. The god of the river ... heard the swords roar ... he rolled in the waters in a great and frothing frenzy ... Dragons raced along the waves and leaped out of the water. The river god held the sword in his hand and, frightened, told Wu Tzu-hsu to take it back. (Mair 1983, 141 and 286.) This story, related in the 8th century AD simply cannot differ from Malory's tale of the sword. In China there were tales of great swords such as Dragon Spring and others still that leap into the waters surrounded by dragons, which churn up the water. Wu Tzu-hsu's sword is also called Dragon Spring.

This should be a tale of medieval metal making, But be there any archaeological evidence for the existence of a real sword or swords, which, were seen as serpents? Well we just so happened to find such evidence in the Catalogue of The Fourteenth Park Lane Arms Fair. Lee A Jones authored a fascinating article entitled, The Serpent in the Sword: Pattern-welding in Early Medieval Swords, The sword first appeared around 4000 years ago and immediately became the pre-eminent weapon, preferred by the warrior class. Recent metallurgical studies have shown how the complex piled structures or layers improved the sword from as early as 500 BC. Little wonder that the smithy was an important part of legend and folklore, as the skill implied in the making of these swords be substantial. Several rods are welded together down the length of the blade, joining the various levels of metal together. Heated and then pounded into shape, this sword making was an awesome task. Smaller rods that were carburized (improved carbon) were introduced to increase the hardness. This formed steel, an alloy of iron with small amounts of carbon, which was introduced into the edges of the blade as it was stronger and more effective.

Through the 5th to 10th centuries AD sword smiths actually managed to manipulate this piled structure to create wonderful designs within the blade. The method remained virtually unchanged even into the 20th century as can be seen with the daggers of the Nazi's, who utilized it extensively. The patterns (seen above) are seen from the varying degrees of trace elements within the different rods, showing alternating shades. The rods are invariably twisted down the shaft, forming a spiral effect. These 'twisted' swords are seen as early as the 1st century BC in the La Tene period, although more effectively used from the 3rd and 5th centuries the

very early period of Arthur. Cassiodorus was a secretary of Theodoric and in 520 AD he wrote to a northern Germanic tribe regarding a gift of words praising their skills, especially the shadows and colors seen in the blades, which he likened to tiny snakes. " It be the considered opinion of some scientists that this implies that the dew would reveal the pattern of the serpent upon the sword, giving the impression that a serpent be emerging from the sheath."

This inclusion of the serpent in the blade was eventually replaced with iron inlaid letters and symbols, and Christian phrases such as In Nomine Domini (In the name of the Lord). The remarkable archaeological fact of serpents appearing in the designs of 5th century swords links perfectly with the time of Arthur. As the Pendragon or Head/Chief Dragon Lord he would certainly have been seen with such a device and in the stories mentioned above there are textual links in the legend. One similiar was given to sparhawk, a magus of some time.

World scapes, places and cities of which are on planes(planets), by stating the before "=" sign names you could be transported there mentally, maybe a wrong stated phrase gets you in the wrong place, if it doesn't look like the place then its still worthy of exploration.

What you do to get to places is use astral world travel. Astral travel across the veil of time is simple, think of the place and your there as all you need to do be to focus your mind and calm your thoughts. Then, you enter the astral plane by thinking about entering the astral plane and falling asleep. As you fall asleep, you are then in the astral and thus its a thought, that allows us to go across the veil using the power of the veil wall.

As this is true, the veil is a part of our minds and is somewhat physical as well. So it will respond to our thoughts and 'shift' us there. Thus in your mind, sometimes by our will we are then on the other side of the veil, that is where all the energy is with idea by feel. If you know your there, then you realize the idea by what occurs. So thinking you return and falling asleep you return by what you do.

Although there is shifting and respawning. This is where shifting is just you switching your conscious awareness to another 'reality' while respawning is more permanent where you literally die and permanently move your awareness to another reality. Then there is the body energy represented by a food and drink level. The food and drink you imbibe is what has energy and that can allow you to enter into other spaces. The more you drink or eat, the more your there consciously. The moment that you are below a certain level, the moment you are back to the "normal" world. This means that you can shift to places, yet you need food or drink to remain there.

There is three special places, then now and end, that represent the point of consciousness. They are:

then; the world without end. this is the world that creates by haarp suggestions and things that allow demonic beings to work with you. This world is a point you think to be there. You can notice the then world by a off ringing in the ears. To escape then is to think your somewhere else. Without intending to be there, you aren't there.

now; the now world is a world that natural events happen, there is no off ringing frequency that is picked up by the ears. its clean and the demons are absent there. So to enter this space, think about "now" and what it means. To leave now, think to be somewhere else. You are where you think to be.

end; the end of the moment is with everyone or some things that occur. There is a point that is sustained by feel, there is a point that is ended by idea being stated. This is entered by thinking of the term "en" and stating the term and intending to be there. This is left by thinking that your somewhere else.

Then there is the other places:

aewod = somewhat world, adhoc world, advice world where you start in a big mansion, advent time world where the

item or person does perfectly as a somewhat working, item or person did otherwise, basically a big mansion on a strange island with unlimited rooms formed by will and thought for a room in life. Without burnout, thought in thought is by rhythmic energy of life that is an area that restores that is what life is made of act and be well.

This unlocks the ability within, as good affect makes good in unlimited effect. Have fun with this.

autist-geo = Autistic world; The autism is a place that doesn't exist, except your with a fact of idea where this is excepting the fact and idea you have so it exists by feel and sometimes visions exist things of the idea you think into existence. That means what you expressed in the autistic world is what forms it. Think to list this idea, then use Uu- in front of the word and you are free of the autistic world, thinking you are free from it. Pronounce the word by a stated oo-uh and pronounce autist geo by stating aye-you-tist gee-oh. Otherwise realize what it is and your free from it.

Asis = It's the unconscious realm. This is where they in idea organ as a form of human that comes from animal forms. That is the

'will in' with responsibility and responses that are thought and response to get what you think. There is a point and place that

is really what is not there as noticed, as it is. This is in the stomach. Upper abdominal area by thought and belief the believer. This is in like

an air pocket, that use is life and they get energy to do or not and they stop as thought with children and adults that are childlike.

When it's time to meet your maker not just creator she the goddess is there to work with you. Remember that if your will is not

unlike a god she is where you are safest near or not if in vigilante idea that she is "its her way or the highway". As she is much

like Hera and her goddess ability is built like promises, that gets energy as they who think use things and she can get energy.

Jealousy is what has been justified by what is done. They are animals not saints, angels, or gods. This is what is being with an animal

form after the criminal soul is caught or some energy is useful. Remember that, HER KIDS are the animal humans born from faint traced

sea creatures or otherwise. Also she is great at keeping secrets with her paramount scenes. Scenes. Satan, emanating, negotiations,

eternally, and solution. Also solving. This is an aspect, trait, attribute of primordial dominance. This is not of angels. In every sense

of the word formed from chaos and life energy. Concept is Someday, today, yesterday, or tomorrow. This is what happens when something,

up above cares for something down below. Remember that love is forgiveness as the Sicke goddess Rachel there.

When it is time to meet your maker, you will know and are aware whenever you are in wants. When animals attack by instinct, you defend by intuition, this is all insight. Defend means, attack by focused energy, kill at will if need be, and

take no prisoners. Animals do trespass, so be wary and ward them away. They do eat your crop, if you have an area you can use a work.

They don't care either way till you think that you do and they notice. As is an interesting word for you. Animal instinct is what

she has, is by an animal spirit much like a kitsune. That is how she always knows, that something is happening to her as she is the

third eye to people if she manifests thought as a form from air. As if and but this is there as there was a him there's a her. This is

how she knows that someone or thing is knowing, doing, having, keeping, holding, domineering, seeking, coming, going, and etc. She

keeps this sense paramount by knowing, others before she cares to let them know herself. She plots long term..She has very long thought

or otherwise termed memory. Because she is an indian. She may, will, and most likely point something out just to redirect, side track,

or notice something else. Key-word-term-phrase, also contention is her expertise concerning her paramount sense. As once was as is

and choice, thought is what she likes as if your choice. Very fascinating when it comes to animals causing one animal to pursue another

animal to then grasp the other animal. that reveals what isis can protect with as something else. This is the truth that she respects as

she is alive, The effect of this is a point to made thought as you think she forms if you can't and if you want it to form, as if your

an idea or not to bear bad results. As if in use of ability your use is an unknown idea that is a point out of life. Things you use

such as useful idea and things with electricity are as if the idea that effects. When the choice is made she wants to be or not to

be as she is a place that loves by what she sees.

@wod = atwod, atworld, think of what you see as is what things get, as the puzzler is the do in thought is what you do in life and what is in thought

this is formed from physical reality that you consider as if to get or give and thought itself were as if you in the moment you need

it. This is an interesting point of view. ringworld where the world supports itself, mirrorworld, self made universe that may mimic

movies or anime created by many means, as to seen movies and such your free and your not effected by him anymore as if thought and

he is Matt as an assassin god, an atzuko. This could become a pocket universe, as Dni script written writing in the asking (making

by will use is what you wish as focus is will) as used is this idea. Think what you want and you can get the idea.

EgoidGeo = The subconscious world, this is the subconscious consciousness world. Think about what you want to express and you know what will occur to happen what you need. The signs you see psychically, they are what you think to use somewhere if necessary as a dream symbol. Sometimes the sign is what you think about or something going on in the real world, that is where you can create by the senses or your sense of time and humour.

The time is 100 days per every second here. Otherwise the time is what you think in relation. So think of what you need and you could get the idea. Think about things though, you might realize that idea that you think about. The point could be a repeated moment. That is only done to remind you of things, nothing more than that. So suggestion is what created this world, think the point and you can create by the right suggestion. This is like what you need, that is focused upon and what you think to do. This is in the idea that you know what you say. That's all what counts.

So think an idea, then suggestion is your thought body reaction, that generates the correct reaction for and to the point of full manifest. Otherwise this is making your idea. This is where you think to expose things, you do the right things, too. Then you know the idea by what happened to seem in effect. So you feel by idea and create by suggestion. Think you "ca do it". This translates in subconscious ancient into "can die off a hit", otherwise stopping what is blocking you in person form an from getting what you want. That is done by what you think.

If you want to live forever or cause something to live for awhile, state or think, "une" or "oon" all the while thinking of the idea word 'un' meaning forever in ancient and undo in english. Then you do the right things to create the idea. This is what you can use to create what you want forever. This was in an announcement then that was going on, so you can go with what you think is necessary. The rest doesn't matter, that is unless you think this does. So if your subconscious rules the mind and timewise this world, then you know the idea to work with by the feel from the soul. There is a death God named Dega that doesn't have a form, this is until you call him into existance here. That God works in the subconscious world, this is in the form as a deity for now as if you called him you called death or life upon yourself. So think of a God and you think of him as a point.

This is an idea of mine, that proves true if you think about the idea. Then you can go on with what you think. Imagine something with the old terms, the ancient language, you get what you may need. So that's all about the subconscious world, this done with the sensed moment that I got, btw. Oh yeah, I almost forgot. Think to enter the subconscious consciousness world where illusion cast by the aura energy subsists, think to undo what you want to understand is gone so that you leave the room. Then you leave by suggesting that you do, the subconscious world.

Otherwise if you think to exist outside the world your in by feel, this I'd say is used in a form of your choice. You created the idea and from this idea is things done by the idea. This causes you to leave the subconscious world, that is where your will is okay once you leave and becomes your own. So think the idea you expect to work that you express, then think about this point. This is a point, so you can create what you need with just a thought.

AdGeo = ad world; This is a world that you create the effect and things are possible by suggestion. Anything can be done. So think of what you want and you could get the effect. The way to enter the ad world is doing the point to watch an ad, then if you watch the ad fully your free from the ad world. However if your in the ad world, note the effect is this: Money runs the idea of what occurs, so think ahead and save up for a rainy day. This is a note in abundant effect. An ad is an action or effect that you think to do. This is also noticed in their tv advertisements. Just don't get stuck in the Ad world, the world can absorb nearly anyone. This is an idea point in the past. What I know now is this, there is yet another way to get free, think to do or shift with your aura energy and this shifts you back to

your natural world and you retain your free information. This is what can occur on a point less distracted, so think as you want and you could get what you need.

iwod = idwod, Mental world, id model gameworld built from the game generator and describes the "I" world, If the

subconscious be like an iceberg, at the top of the iceberg that be solid ground where the iceberg melts upwards

to a point and breaks the ground up from below. On this ground be the house that each person has. the unlocking

sequence be as the person will have it as if a thought. The very fact that this house exists be to furnace the grouse, thanks to chef smith off the frugal gourmet or finance and gain things. There be no limit as most things

are known automatically. time itself is controlled by moments where if the required moment by myself, some other

or the moment by self as a self-defined moment, as its to an Horus idea "ef be" to be an instance formed from the

effect then it would seem to be an instance.

So to return is done as its thought on the moment or otherwise at the time, like whence arrived you can come

back anytime you desire like 500 years after, instances (no time passed) for instant transmission thanks to DBG or 30 months later or less and etc.. and its to see by scrying the area, imagine the scene that you arrive in that shifts you by momentary destination, motivation and motion, the idea be from a story that I was reminded of a script I am not effected by or not. The sub-c held most knowledge with a lot of unseen depth, as magic makes things real by belief and use of ability by energy and the solid area you feel is real earth as ground above melted and reformed area, thanks to Craig, as the person learned more of what was it about. As this is a point that is. Some would attempt a resolution to not abuse the info except its to no good as to appease some, they had to feign ignorance.

With a small idea to share later they the purviewer got jealous or their sub-c takes over, so the purviewer be likely to see the win as the ignorant one makes deliberate underhanded as if idea slips and reveals what you think and be unable to use said info. Whos the winner in the end, the person whom gets the upper hand with the least of losses by bosses. The effect of this is a point to think, as if your an idea or not to bear bad results. As if in use of ability your use is thought an unknown idea that is point to seem out of life this is a better idea. As real life magic is the origin of the spell and they can use the idea as the creator is made into making by conscious or unconscious ideal making, rule the effect as you think and as magic if you think to use as the power is creative justice. Otherwise, this is an idea to use for a base point in idea, nothing more than that so dismiss the thought as the thought isn't you.

So this story tells me that I have a home in my mind, that be on top of the iceberg that melts and reforms from the bottom up or as I or you learn. Anything can exist in it as long as you can be aware of it. So the answer to any thought be gotten within 1 second or less by meditation, standing meditation or dowsing, as its your "I" world and it seems likely to correspond to anything that you will want, desire, need or hope to achieve as its not easy in real life. Consider the "I" world as a passion and movie world with the real world as limited, the script real as to be influenced by yourself the owner. The landscape isn't limited in the persona world but its seen only a little bit at a time and used to explore the world. The place has no sun but light level as you think I think it deserves a way and when you die you get "shifted" there if you want or the Astral plane only to be raised into the same body if you desire or not by feel.

The real world be able to glimpsed at in moments that is instance formed and unformed as thought. Not again,

its only as unlimited as it appears and gotten to by however you desire. But the only thing that be needed to worry about be the people you allow to visit. The visitor and people living there have to take oaths to not hurt

each other and things unless its a wall or an undestructible item and the visitor shouldn be allowed to do everything as with insane actions or guests with an instant idea or command. That voice and thought should be here at all to be acted upon be almost ludicrous as if voice was action and action was thought except thought be different from

voice as voice be thrown out thought as a useless thought.

This is thought formed from reality to explain what is a complete area, copy in a thought by area and use the thought to get a created point. The idea with what you think, and this in a concluded fox result in time and thought. An this in a moment is thought, or what you do an idea by use seems as thus makes as thus sometime as a thought is with energy. That in use or nothing creates something from air as by that valued idea is, think and this is a concept to think out and or be not in thought as think work is compromise to work.

The only thing blocking be scent, distractions and will against it or yourself among others. As they who harness their power or not in as this ability is energy on purpose, or not their power is a break thought of the thought source sometimes "lancer" in thought known as electricity by the concept that is energy in power that can make or seem what is in thought. As though use to a better practical purpose in life you can seem what you want. As in a concept you focus, as in thought and meditation away the time to create relative idea.

Think not effect as into existance that you watch and you will know. There in a way is life that won't exist, as this is not necessary yet and unless need then no effect will happen. Now what you think is a point in a concept.

The point in a thought is what influences things your used to see or work with by feel, this is done as if a point in a concept or different continent. As if your in this form you change, thought to another makes spirit link as lineage or what you think is what you become from what you think to. As if there is no other point, as what you want is a contained where I as an assistant use is with the third eye don't visit. There is no other thought to this, as you do you don't unless the idea is necessary. Think as is if thought you want, and need forms as you get wanted means unless unnecessary and you decide what you think creates what is in unnecessary. What you can form is with energy from the physical form and as such returned, the original shape is there where you are needing the idea shaped by the aura.

Now the further actions you do the further you get into the "I" world, with a concept of possible exploration and how far you can get. The effort be undertaken to contribute to this world as to influence the real world by coincidences, Lets say this influence was observed by coincidence somehow got written down, with a story by a writer through character recognition and perception. This could count as an influence of many instead of one or how may hear the story. So the more you think on the world the more that be there for you to explore, and given time you can "see it" through scrying and long range viewing. Now a trick in the book of viewing be to ask yourself what you want to see, and if the answer be nothing then its not advisable to go or explore unless you stay in the house.

I started a exploration of the time future and past to achieve a suspician that the families doomed like the Kennedies. and it seems true as I saw my own self and others changed but only on visits. I started thinking that the doom be upon all of us to achieve results, and to fail in the end from example as in a fractal from to much good and bad achievement energy. But ones own achievement gives them joy like in serendipity, while the discoveries make amends for abandoning the spiritual motion and parables. For a snake isn't always a snake as it may appear like a rope if hidden from mistaken illusion/dillusion. Science doesn't explain why and only how be known except sometimes when combined with Emperical law, but then others may have other idea. Like a simple answer makes to solve a complex problem or vice versa.

What I found is you own it all yet allow other to think they do, or at least count it as a "loan" with you as the person who can watch without being seen. As ownership be 1/3 of the rule so be it true as an amalgram, that those who make things own it and none else. The world owner owns up to owning the material, but doesn't always listen unless any part of his/her namus be looked at or spoken. The only thing that be possible to be gotten in be what you admit that be wrong, What you make as a rule be always followed but you may break it and if you do you can sometimes get a horrendous disciplining, so if you break a rule then you get the punishment, except you may set an example to save yourself so no punish when its consideration time. Usually done by a story that reflects

a white lie and truth that be logical in nature or be a story, to boil this down be to say "Try white lies for immediate idea unless the truth will do. For others, try truth that be accepted as opinion and idea fact to those who are not in immediance. Any bit of violence be to be considered a liar or harbinger of doom with exception to justified moments."

So think of your need, say the words and its done, that's as "I did it' or'here it is'be your own poultice and do your own things. This is done as the "I" world exists for those who are subjective, and able to do anything by themselves like in "independance". Then for the representation you can appear like anything of phantasy and fancy, madness and zealotism be to improve the strength but sane devotion and faith improves the effort without destructive intent. So for an idea, turn your back on criminal behavior to sacrifice a safe idea to turning your back on reality. Focus your idea as strength in faith to achieve 4x times the effort as seconds of focus quadrupled= $SoF^4$  and in Neutons of force. The more force focused, the more enticing it be by attraction (of mystery). I also discovered "I" world populace is nice till harassed and then by any admittance or submittance be tolerance allowed. But only if they know you or be on the job, by distraction examples can you get to know people without being hurt. However the world map be set, most use the identity rule where friends are some to keep at arms length or close up and both in unhostile motions.

People make up the truth of the "I" world, based by fact that be opinion till backed up with a similiar opinion or shared in vision and interest. So be it true that people are in their world when things go wrong, yes but the right things said bring them out. The "I" world be old where this physical place called the plane we live on be not, albeit we reached a point in existence to call ourselves spiritual "humane" beings in truth. So the place we appear in be what we want it to appear as or exactly like where we were, some call this a day/night dream and can only reach it by meditation or dream. A simple exercise to not be effected by stress imagine yourself as you are by emotional feel, to provoke memory and visualize yourself in a room that you would be in. You would be either here or there and the blink of an eye says you are here, as you actually left this existance or other to suit your mood and returned in an instance. See unbreakable locks on the door and yourself sitting or laying in your room.

Any work done there releases stress from the physical plane or from yourself by inciting or causing a dowsing state or meditation state, including exploration. As you are likely to want to leave to the outside of your room, or go to the bathroom if its not inside the room already, see the key to the lock that only you can see and use. As you leave, the door disappears and you go through a building that you know of or think on, from memory of where you lived or meditation of the area to reveal its secrets. To leave the building deposits you into the physical world again as it be from where you came from, so you don't waste time you waste thought. I know at one time I did a exploration, and had an automap like in a game or the hogwarts castle map by thinking of it, but your words reveal the map where it would be blank by whatever you choose. Note the map does not reveal your room, unless you want it to. Some I've known are used to it as a spot for any type of meditation, or just relax in it without the possibility to do otherwise and similiar ilk. Any one thing be unique and its in there, the "I" world that I try to remember the fact, any one acknowldged idea that serves as a property and be noticed of the item bij you or others.

Due note the effect of dispersing from energy induced by thought of a property to another item. considered "forced Osmosis" of the item to another. Like an attack that shifts the focus from him to you, the item property can shift as well by thought or other action represented, by a hit or tap to the thing and the item you tapped loses itself to the new item or object of the property thought about. Another way be to shift the property by a thought "shift" and a tap in which the value be dispersed, "in with the old devalued idea and out with the new property by manifested thought in the other object. As before I ever do that again I will work toward a goal first."

One can literally carve their own world as a choice for pure boredom, when they come back it won't have happened

but they lived a life as the ruler in their mind. Those that suffered might take it as a day or nightmare. Whatever you do, don't kidnap people to your private world as it could bring downfall but invite them and await their response and they, the invited, might arrive. Either way, have something for them to do with the area or with a self-project, but to have a good excuse like "I wanted to see you as you are." or "I was and am a fan of your

series that I wanted you to watch with me." A good white lie be satisfactory to either the invited or you yourself. Because the actions are created by reason, that be very possibly taken as a reason for your acquaintance. So assumptions are to be exactly what you look like and unless you look under the skin personality for the bone personality. That assumption could find a ruinous reaction.

Skin personality be skin deep personality, and bone personality be the true personality of worth in three bone flavors, good bone be a good personal spirit strength, where the person does as be his/her intent, with good taste and doesn't back down unless given reason too. thin bone be personal flaw in the spirit and indicates a weak and reckless mind that can easily be scared, bad bone or no bone be a bad person with almost no moral regard whereas

if given a new situation and not knowing things or people that are around them, they could do a very bad thing like rob or hurt the person helping out. The optional action be to do individual acts of self-glory despite what people say, or to do things because they want to despite the discredit. It seems the person simply does not hear the rule or will not see the idea, because of other idea and bias. Also noted in good bone people as a weakness brought on by pain and unblocked path, as they can get heroic or standby and safe.

Now the problem caused by a single idea of new paths unaccepted from neurosis be from a neurotic state a person be influenced into by so many things and practiced at using in a routine till its rote, then change the rote to a new idea of life and sometimes on any concept the person can snap and go crazy unless you introduce it slowly as a different variation. To go fast and slip it by them be to get yelled at or brutally attacked, if not the ignorance routine and hope the problemo goes away or use something like a new toy or safe concept to divert their attention.

Then use the conceivable idea similar to theirs mixed with white lies or anticipated value. Sometimes this only works by the past being worse formed than now and the method must be better in some manner.

This works by substitution of idea in with another better idea, like in a manner of redirection by a bit of radiation or laser being redirected by mirrors or transpaxelling an object to another area like a shifting or creating illusion, by nothing in and nothing out where light and laser (focused light) be deterred to form or unform an image. With each image out be a usage of the carbon of object intermixed with nitrogen reactions to the laser to create the body from some material, in the image of a person or thing that be stored as I like to call it the storage buffer often made of crystal or silicon chips. Theoretically this be possible and may have been used to create a similar effect in a experimental lab. But it sounds better and if proven in the right manner, will create a stir of curiosity to the neurotic or nonprolific/prolific to advise the victim where the victim be 70% more likely to assault or react.

The neurotic pursuant be very likely regarded as an idiot for attacking a sick person more in line of a blind person assaulted for blindness or a blind person assaulting because they didn't see or hear. To use chemical to override the "I" world mental response from running away or boredom (distraction) with addiction caused by the chemical natural and unnatural, be to cause the person to pursue a different course. The chemical can find use to condition or make a person more calmer, like food and drink be a natural chemical or embalming fluid and synthesized chemical like acid and base. Food can control the way a person thinks and it does it by setting the feel of the body. For example, one can become fat by trying to feel good and evade a persistent problem, after that its a lost cause unless you do physical activity for the body abuse, as I heard an employee say.

"A little more does it in exercise after the body feels like its on fire." from Teanna. Necessary to exercise right be the fat burn off and this can give pleasure. So we got two forms of pleasure and control, chemical and physical.

Then there be a trendsetter technique thanks to Flynn to catch the neurotic and many other types, into a thought out process not their own. But only if the trend be well thought out, and well practiced to become understood and remembered. Considered concint, which be the process of influential area (arial) in an effort to create

like nature, that can be destructive or illuminating on a person or thing. Either way the path be set by how the person chooses. So be it with the misfit "I" world thanks to unexplainable.net and Maybeys' Atlantis page, as how you think be how your world might react to you. Causes the "I" world to exist, as its based on the need to understand and by meditation you can manipulate it by having comfort in a position or laying in a comfort position, and focusing on a white light or not for differing techniques, also allowed be the standing meditation to create a pattern from thought thats sometimes evoked by feeling. The feeling be quite possibly read by your mind or the "I" world, now if its created in your physical world then its created in the "I" world. So saying "dont attack" or "don't" makes the person stop fighting.

By Amalghanus "As your aware of it so it exists, and thats all there is. So as I think it, it happens."

"You hit the jackpot in missinfetamines or mission information drugs" from Anonymous.

From a priest "By faith you conquer most, so things exists by your belief. Believe. By one I mean all as in the all being."

uean = plane of neglect, disturbance and neglect or abuse may be awarded in the right moment.

uead = land of death. This land is where the essence of death goes when it leaves the body. When the spirit goes there by choice, it obeys the rules of death and life that are opposite from this land. Where, dead is alive and living is deadly. Being alive is where your dead in some form.

uein = plane of life. This is the source of body activity and life energy and you can bring anything to life. The manifest is here by attracting it to a location with effort of some material or active gain. This life energy can be able to make longevity and strength in a body. This energy makes the body last longer in their activity. On a new moon and waning moon, it can cause disturbance and ruin.

aerth = mindless earth (air plane, air planet), mind world, mental world with every 10 minutes there, 1 sec here.

aidamntpt = abandonment point, a place to abandon things, a place in hell where the bloody river. branches to pandemonium and then be the river of forgetfulness where people forget their desires. and most their life to sometimes drown as they touch the water.

AraMaiGeo = This is the aura manifest world: the aura energy is the manifestation, the world is the feel you have that is based in the physical world. this is anything that is possible in the aura, think of what you want and the idea exists unless not necessary. however the creator of this world is dead, now is a point that you can create what you want.

AraGeo = aura world: This is where you can think to create the point and you create what you need. This uses the aura energy and the world around you is the feel by the senses that you have. The God of this world is you, otherwise the original God is the creator, we are just memories of the creator. So thinking about things he realizes the idea, then you get the idea as though an end result. One thing about this world, that is based off illusions and she's dead that originally created it. So think to see the reality of the area and you do if curious. Doing is where you shift to see what and where you want to see. Whether or not if you could survive there. This includes exoplanets upon testing, so think about that. This is a point in the past that it was created, that is usually a point in the past that is created equal to todays time. So think of the idea you want as a need focused upon is a want, desire is what you can get unless not possible as the negative doesn't effect. Then you could think and go to do entropic idea.

adjectas = detestable world, adjecting world, This is where I am in an authentic world where things are either authentic or fake this is working to the senses. Think to escape the area and not be there, so your aware of the water energy or flow if you left it running at the sink and leave the room to exit adjectas.

advertas = divertive world, the hiding world, advertising world, this is where you are in advertising and creating with what you want or feel is energy by feel the area is cool, but you don't have to do things except think about them by feel, then you create by energy what you need and doing things is second nature. This is the nature of ad world, think of what you want and the energy creates it by either influencing the event, or creating the point by activity that's self-made or made by others. If not, then you are aware of things as they exist. Escape the world if you must, but you don't bother people if you don't think you are there by feel. Think your touching nothing and levitating off the ground, then your free from the dimension this world resides in with a concept by idea with a point by feel. Without the point, the world is a bit weird after normal people leave. If you focus then you can perceive the area and the wall dimension. Think not to react, then tell the wall to not show itself. The murals, if any, will stop showing itself. The point should be a dimension of what is there without the wall murals. Then if you create the point of turning away, you are freeing yourself from the wall world. This is a point in the past by feel, that creates in the past and makes the present point that you notice. That means you create things now, this is making it in the past created as a point by now that creates a future where you make things up.

almaa = eternal world, undying area of undying people

aeia = america, united kingdom, melting pot, states united, fifth use

aeii = american, realm, united county, unity, resident, create world, focus point of mages to create by the peace it makes. This is a world of idols and things that exist. Mainly they exist, though only because they saw the idea and wanted to create the result of what they saw in their mind. This by idea is what they do. So think and they do what they want or need to do.

antivas = antiverse; Antiinvasiveness, This is the world of drow, and sometimes the energy itself is what you consider negative, that means this energy exists separate from reality. Think to work nicely there and you get treated similarly. The idea is the point that exists, what you think to do is what you get to do unless you don't need the idea. So if you think to do something, then you get nice actions back. The drow world is what you think about as a point to consider. That is when you want to consider something nice and otherwise nasty in comparison. This is the point of prolific, the idea is simply put do what you came here for and leave as quickly as possible.

How you get here is consider your antimatter metabolism, then if you think to get a result think to be here. So when you are aware of things, think to exit or leave by the point. Think energy enters your aura field. If you think to be somewhere you need or want to be, then you are there. The aura shifts you by the energy, that is there, shifted of the place can be that you think to see as though frozen by feel. This is a well known fact to the point of life, that works by antimatter and makes for what is weight loss. Some drow are against humans, so think about the idea before going there. So there is a place for all of us, if you think to be there then your there. This is a point in the past.

Exogeo = Exo plane; Exonerated planet or honorary planet outside the solar system and the area that exists on its own is where it is livable. Thinking about it I think the exoplanet is what creates where and what you have, when you have it and why you are there. These exoplanets are area that create by themselves, think for themselves and work with others conscious thought. So think what you like and you may end up with the idea.

Also, if you think that your third eye shows you it, then you know what is there, where it is and when its a safe bet to be there. So think what you like and it could be there, planted there by the third eye or seed of life that we as humans cast forth so long ago that we can't even remember doing the idea. This is a bet in itself, that if you are aware of the surface then you can also know the atmosphere. The conditions are self obvious, if you cared to look with the third eye, then you'd know it by now. That is all you need to know about except its name at the moment.

So think and look it up and you know it. If you use the exogeo in a calling, then you call out the naming of the planet and what you need it to do. That creates what you want. So think of what you want, you may get the idea done. So that is how you use this in a rite. However, you will want to choose a planet far enough away or think as a condition in your idea to "not have it recreated on you".

This is farther than 3 planets away so you don't feel the influence of the planet recreating the idea on you. The way that works, the point you don't want something the planet takes the thing or condition from you and your body recuperates by feel. Then that something is turned into idea somehow and then the point is accepted by the concept you have of the physical body or world. This is all in an inner working by what is done.

asd = asgorath, asgara, asgaroth, have respect, world of gamblers and void people that enslave annoyances while treating people with respect that gamble

Asgard'geo = asgam, Gamers world; This is a world of energy, that creates with a game and works by the feel. The area is what you think, the physics are what you want or need to be there. However, if you don't need any, there isn't any. In reality, its a void space that is creating by pure energy. Think of what you want and you could get what you need. If you no longer need anything there, then think the energy reverts and is back to its pure energy state. This means anything you perceived is gone there, so what you think is what you get, the energy creates by what its consciousness is aware of with idea gotten by feel. This is exited by what you do or think, if you think you wake up then you are aware of your surroundings and the effect is done.

That is a pocket dimension used as though a gate shifted you back, and then you are where you were before you entered the secret realm of gamers. How you get there, this is done by thinking of the realm of gamers and thinking your there. Otherwise your not there, your wherever you were or are in real life. One thing of note; this space looks exactly like the real world, except when your in a game. Then events start occurring that only appeared in the game at

first. When you exit the game world, thinking to unexist the area you visited in the gamers world, then you revert the area your in back into energy and your in a room similar to your own and the events stop there. This is the idea of the gamers world, so think of what you want and you could get what you wish by feel.

Omnitun = omnivea, omniverse, a higher universe that has things that are made by themselves from whats there and seem alive.

IvaiAriaGeo = Body aura world; internal aura world, the inner fat world, involved world; The world that is in your aura, yet not everything there is represented by a gene or DNA pattern. Somethings are foreign energy and matter. The idea of objects are sometimes where you are touching upon the organ. The creation is done by activity of the body and blood or liquid waste flow is water. So no matter the point, the idea is done if you intend it to be done unless not needed. A shift is where you go by leaving the room or area physically. This is basically teleporting by feel or use of the senses.

Think of what you want and you can get what you want. That is where the effect is either drinking or eating a little, then what you think to create is fully manifested. We each have a manifest where the aura world is creating internally what you want, what is needed is created outside the aura world, if necessary. Think about the place or area and being there to enter the aura world. Think about "going" and leave to exit the aura world. This sometimes what works by the aura energy responding to the water flow, this is where you are exiting by the feel of the senses.

One thing to note; the god and the goddess are the main gods of this aura world. You are the creator that give the main gods energy, this is done through the point and release of muscles or basic energy infusion from the area of the body. The pantheon is what The God and The Goddess can choose. Devine are those people that use their organ energy or blood energy otherwise to infuse the organ with energy or blood cells. So think about a living area to live in and you have somewhere to live. This is where walk-ins or soul beings can live as well.

This is done with the soul beings, that can attempt to act as though a support or guardian if they have time. This is sometimes acting as though a deity to your senses or idea of a point. Madkarna is a spirit that if his name is repeated three times in a rite with intent that you have, he will create what you want as though a God. So be careful of what you want and think with him, that is because he could make your need happen. Dismiss Madkarna when your done with him by thinking he is dismissed, so with payment of a little energy he goes away.

So this is useful to create what they want, that is done by the use of their pinneal gland third eye. They have a subconscious mind, so think to their spirit or aura energy to create what you intend to create using their subconscious to create the point. Sometimes this is done through suggestion, sometimes this is done through the idea that your thinking your there and nearby to use their services. Then if you think about things you can shift to a point that is elsewhere. Call you later.

UouLid = Curse land; This is the land of the hex witch, that is empowered by thought. This is then given form by energy that you release. This is a point that you can manipulate, that uses the third eye or 4th eyes to do the idea.

If your caught there, think to go to him that is your parent and ask for something if alive. If dead then you at least no longer are there. Just mimick the right idea, if you need to go back. Know the language there is thought and example. Just realize that the curse land lies within the shadow lands, so think to observe and you are there to see things. Otherwise you shift, then your back in your normal world.

En'if = The iffy ending world; The end of the iffy world, the iffy world is the world of the inner world. That is a point there as though an iffy point. The if part is does things really exist from nothing? So when you create the idea, think to use nothingness as a point and think of what you need as you state, "I get something that I need". The end to this world is there isn't an end, that's excepting for your natural end. The end point is this, think of what you need and the particles could assemble and create what you wanted. This can be a stated need as a want, that's granted as though a wish were a given thing or idea that comes to you. So think of what you want and you can get what you need.

En'wod = En world; this world is all about your end, the ending is sometimes unknown but what you think is what will happen. This world is run by demons, actually, that do whatever you think unless you don't need them to do the act. That is especially true, if you state the result that you need or want to happen or things occur what you feel. Think of the moment to form what you need as a point to remember. The physics and magic there are usually like your own in a way. So think about what you want or need something, then you can get that as a result or think of an end result to

what you want and you can get that instead.

If you don't want roaches to live there, think they can't live here. You see this is a noted effect of recording by feel. This world is entered by stating "En", and left by intending something else as you state the result. That's about all for this world, so enjoy yourself while there. You can only get an experience once there, yanno. So think about things you need and you can go get the idea. This is where the end result is possible. Think and you know about the point. This is all about what you do, and otherwise your own life that you have by feel.

En'wodif = Strike world; this world is the end world alternative, that you can use as a parallel world. This world does not have any limits. So be warned about coming here, that's because when you leave the world you could bring something with you by feel. The physics are like ours or your own is matched by feel. It's a point that is done, and that's about the idea you know to get. Entry to the alternative, this is done by passing through an open door frame thinking to be here. Leaving this alternative world is thinking about leaving and you do this by feel, that's with the body knowing the right actions to do. After you enter, you know by awareness of the idea what will happen to occur. If you leave, then you know what happens there after the fact of leaving. That is all you need to know about this alternative, except that there is no karma. So be prepared for anything, this might mean you could experience things differently. So this is done by feel.

ieeb = weiedl The weed planet that has downers every day. They can cause you to feel so bad, that you create with positive and still have bad feelings. By proposal you are there, by certifying or working with an idea you are back from it. So if you think to leave the weied plane, think of a place to live and walk through an open door. Basically, you lose your living space once you are there, and gain a new place when you return. This is a really caustic place, so think to leave it alone and you won't go there. Take it like it comes. They don't care about you and you can't make a good impression.. so think km and shift by spirit to go to another planet of existence to escape it.

ioj = The place of creation, think of things to do or things to create and the planet consciousness creates it with an upsurge of energy. Since you created there by your soul, all it takes is thinking your back and you return from ioj.

us = use; united state, united area, make use, kaboose or train car that pulls other cars on a track.

yeu = tropozoze tropical zone, Magical tropical world that has objects and media that speaks to the mind. Psychic people there can perceive amazing things. The people in yeu are indisputable and indisputable. Entrance is a yeu tree, amongst other trees.

bialm = tel'aran'riod, astral world, dream world sometimes gotten to by use of balm cream that's applied by what you do, the world of dreams that is discussed in a book series called the wheel of time. Think of where you want to be and you are unless devices that trap the shift is in use. You can see nearly anything here, so think about what's there and you can realize what is possibly there. I think you might need a dream interpreter, that is necessary as you could see a lot of dream symbols. So think about remembering the symbols and you do. Think to enter it by resting and thinking about shifting there. Think to leave the astral by going to sleep there and you can do this by staying still or laying down and using the energy of the aura.

Focus your mind on your need and then the subconscious will do the idea. The idea is done by feel with use of the senses, think of the basic idea to do and feel the need then you do the idea. This is how you do things there. Then if you think to return you can focus to use the energy of the aura and shift back to the real world. Pantomiming in the astral world is creating with signs or what you think is by or with indications, the sign can be an act of communication and that is done by feel sometimes with the speaking that you do. This helps with getting what you need known.

bogs = boggy, bog, marsh, marshy land, swampland that is with some type of idea to do.

publi'aya = Bubble america; Then where there is a bubble of money, there is bubble of money. This is bubble america, so since there is a bubble there then things are okay there as here. Think and you know what to do by spiritual awareness. This is a point in the past. Anything future wise is occurred by feel. This is done despite the cost of living. Anything earned there is sometimes earned however you want it earned here. So think of what it is that you want, and you could get an idea for the point as an end result.

bryan = britain, brittle, united land

cegeo = cell world; The cell world is a place or area that is virtually in the body cells and known as the inner world. The inner world is a place in time that is what you think and nothing much else, this is excepting the inner room cell that is a place where you think of the idea and the energy generates what results you need as though an end result is a granted wish.

This allows multiple places and area that exist by thinking its there, then all you really need to do is explore. Enjoy yourself as you explore, the options are almost endless in the cellular room. This could even have bars in the windows. The idea still works to allow you what you need as a want is a point where you form things from energy itself. If there, you could find insatiable hunger, otherwise you may have to separate yourself from the cell world to stop eating. Oh get this, what you write there is what forms as rules for the area that you think about.

This is including what your body takes in and absorbs in itself, the fact that you take in poison means death or decay of things and people in the room. Any drug can create a drugged effect, that is feeling good for no reason, sometimes. In fact, there could be a cell room for the person that wanders into the area. So the possibilities are endless and things are what they seem.

The point by fact that you mention or think about and the idea forms. This is as though the point were done and by a wish that self-generates the effect. So I will suggest this for those in a cell room, make what you can and you can get the best result from the area that exists.

cegeo surran = geo surran dale, world of that place, that surrounds in another way the room that exists. This world area looks and acts like tron and works like a real world.

cenethal = city of dead, city of necromancy

ciat = city of enticement, work city, only one place like it

ciot = calimport, city of wonder, djinni city

Ciate = Paradox is a plane of paradox city that exists on a planar dimension, that is where the thought you create is undoing itself that you don't want and you can do things as if a will of god of the natural environment. This will is undone by the idea truth, that is 'there is no paradox' as if an 'En paradox'.

cretaix'hylx = Written in Art, The creators halls, hall'le'cretor. We magical people sometimes started off here, We start this off by a story with this excerpt "Caretakers were assyrians or jedi like masters with magic. Who ran the place were also Ancient sedai and weavers of ancient power for results. The crags of myrrh of dragons march were near marsh deleur and neared the halls; then created the idea of the point you can see there.

Finder(discoverer) marsha delur, with creators Delurus delough, Harga delough who seeded the area and cursed the water to move in to make a manmade marsh, the most deadly place of faery, now dried up. But, found near the area of Assyria and not realized but few hundred years later as of a different area category. The crags were home to Assyeia and now near Oklahoma or so lost was an Art. So that outta the wayzy, now we go on to Allearia due north where the dead can be raised and try to see if just deserved can be risen or so the task was. As the creators halls were built near there.

The plankton of the ocean gathered energy controlled by tide toward the east and toward the entrance, but not as the mountain blocked the view of the motion within the ocean. We find at high tide, the effort of plankton and sea water powers the area with a charged scent. The final and desolute fate for the area be to be seen as a ruins with a hall like that of the castle of Hogwarts, except the entrance be obscured to time, Where harry's Hogwarts be on invite and the entrance to the creators hall be obsolete except for the astrally placed, suitable "I" worlds and linked worlds to an area which resided in the same spot but in a higher dimension. Due note there might well be a Hogwarts thats universally linked from england. This be Dragon school, a barely remembered area." Excerpt from a remembered book now unreadable. If you don't like then

forget about it. Each material or place is unburnable with ephemeral quality. Null book burning, its forbidden since books started and now books correct you and them or either. Its with a netherese book, that destroys the destroyer now. Eisah elaborah is to pay money, but increments faith healing as a price..

Some say that the way into the school be through a body, or to touch an object that is linked physically by a touch or possession of body form and also by request to "link me' anywhere or at a moon and then the moon shows the way as you step on the spot of the moonbeam and you appear, but the hitch is to be the door must be open at 10:26 pm or after and its always open till the half moon (waxing or waning), full moon, or eclipse and then you must be crazy for the most likely thing to find in it be an accursed or begotten and forgotten place that smells from Atlantis that be hidden and that looks like the area you were in except for a feel of life thats not there, and any person could share another physical body as an anchor but not control. Its life that be inversed and retrospect for the being alone, like faery that rules it along with people linked there as a guest and sometimes no worker. As any worker be a teacher sometimes, tends to go insane and deadly with others near that are of murderous rage or not. Where guests are sacred and treated like students that learn at their own pace. The no fire rules are necessary, when bad wiring or electricity in a roon(room) where a roon can create studyroom by drawing it.. An object can be used as a storing area like where the cupboard is.

The idea here be to bring your own materials and borrowing be allowed with some results if you don't agree to the lenders term. Except with borrowing its owned with importance on the feel that you own it On the idea and mission or an omission of guilt and importance. What you learn you keep and what thou get be earned, Unless its borrowed and of course with borrowing it shows up in a institution from any distance. So to rent to own, you own if thy owner who lent it died or you earn it with however and then your the owner. Inheritance matters as you should succeed the item to the person or buy a new one, of course if they don't own it they don't have it to give.

This is the era of the place in the marsh be similiar to now as it be actually matchless with things to come and was of the past. The rooms are magical and are separate realities in themselves for the door separate reality and place you where you need to be by time and place. Its not much like the Arc with its unlimited room capacity and innate life force that seems the same elsewhere, except it has the same room capacity. The weird thing is to notice the dragons that arent there, but give them a reason and they will appear. A small bit of intrigue be all that matters, and then the dragons come about.

Engineering or the making of this sort of magic with machines isn't very easy and instable with the best termed "glitchy", The glitch shows by being able to glitch with in a point to do things that cause a power surge in a place 'shift thought in a thought to create or with in gathering positive/negative pulse weapon is ionic energy to shift with. The method thing be that no death except in appearance, ever occurs and they come back as placeholders bodies or carbon ash to life. Like a person could die but a day or more later they could come back as the 5th (polot, gathering) and 7th (death and psychic impression) dimensions do the deed.

With the 2nd as the death and waste absorber where just deserved it can act like the element of void for the right people. Its as the deserved nature who gain it. Things are where there is a way through an idea to the livery room aka the object can maintain it. So video deal is like other things as you can pay for it by doing the deeds or trading money. Money can be between people but it is to the degree where actions can be countable like you say you do to deal it or its faded away. You can use and view if you believe it possible, therefore effect is possible if you feel the need for things but silently or not so out of class.

They power it along where the plankton are, again, the energy movement gatherers using the ocean as supplies and support (a second power source). Usage of the term furcadia to describe it be to say a simple truth frankly, because it resembles a dream server that uses the death fields to get some idea with the point that is done and the area be "programmable" by stating what you want without crashing the server. So to get a ghost or spirit that knows things makes it more real as the person can play, and the more body and ghosts makes it more plausible. The place be in limbo and "time stands still" much like in a movie or Atlantis where nothing seems to happen except what be motioned. The only way out be to decide to leave and what be taught be only what you know or want to know.

cilfangeo = Elven land; This land is due a point that you think about. Then you create events there by what you think as you use this idea:

Here's how you make a spell or idea happen, they begin with a point of what resources are there. That you would use, then the actual action verbs and nouns that describes the moment after. You can use any language, including English. The point is done by feel, this is where you use the idea to create one by some concept expression.

So think about doing it, things shape themselves by what you think then you are done, this is how you make an effect or effort happen to occur a point that you think about. However, you don't enter this land, this is a spellion area that represents the imagination. That means you may have whatever you need, as long as it is available.

If you do, you could find, that the spell that you thought up is what is occurring. This is done as though English though, so you can think of the effect and create what you intend by statement or feeling the need. Otherwise you could use power words, this is where you think of the idea and state the word to effect the point that you think to create.

So think of what you want to get, then you could get the result, that you need by feel with the sensation that you send by thought. -Donavan

chypazzou = model world, cloth world filled with clothing and people who love fashion. If you mention anything out of fashion, then you could be struck down if your near the wrong person. Thinking about fashion and walking out the door leads you there, if you wish to exit this land then think to exit and leave as your thought is on leaving. Then your in the normal world, thinking of what you want to do and that is all that is done except what you think.

cortmaj = mage court

cortymaj = high mage court

copuauod = computer world; enter by a touch thinking of the world, leave by a touch or walking beside to the exit sign. The computer world allows you to do anything, thinking about things can manifest things by feel. Then I manifest things by the feeling I have that demanifest by the point. Then I have something that can manifest, thinking to help and do things by the feel. When things happen and I don't need it, then it demanifests. This is how the computer world works. So when you want to leave it, think to leave and walk out thinking the door is the exit sign. That's the computer world.

Chyce'uod = Women's world; the woman world is the world where everyone is a woman in some point or regard, so in order to have birth, they self-birth sometimes this is done by self-sex and thinking about cloning or self-birth. The

man-woman or woman-man is there by feel, if there is a man. So in order to get there, think to use gravity and focus your mind on being there. Then you are. In order to get away from the woman's world, think yourself away and then thin up as you consider going to another world. This causes what you need as you do things, so if you think about the area then walk as you think of the place you are there. This done by feel, however their physics are like ours so think about doing normal things and you can get away with the point.

dabogeo = dad bod land; the land of dad bods or almost good shapes that you cross over to, this is done by a point where your relaxing by feel with what you think and you create with what is there. They might notice the use, so be careful. So if you want to cross back, remember the point of crossing and go the other way physically. So its a seemingly placed area that is physically placed here. When there its seeming here, so its not really illusion as this is a  $5 \frac{1}{3}$  dimension.

cs-137 = The world of beings, the world is somewhere in the cygnus-137 belt of the universe. They can use your energy memory and create the world view that exists on their planet. This is a point that they create by idea, expressed or unexpressed. This is done on thought by what you think is correct. The point is envisioned as a due point, that you work with or go somewhere. So if you think and on thinking of the energy of their planet. This can seem what you want where you can use the energy, so think to let the energy lead you there by activity. You can then see the area that exists there.

So you think and go, this is an energy to create with by feel. Think and do, this is where you shift and are either there or somewhere else. That is done by the spiritual use of the soul and thinking you need something, you get the soul to do the idea. The original planet you came from is returned to if you need to return in form, that is where by thinking the creator returns you by feel. This is an idea that occurs, if you need the idea to happen. The process to get there is ceasing activity and shifting, so you don't need things here. This includes activity that creates interest here, unless you instruct your subconscious by suggestion to do things here by feel. Think to them to create something here, then you know them by the point you feel they do. They can create better stuff there, than here and now. So think about this point.

dactola = Commissioned by Auduella gabriella, Missere Masant be desihg'ler or Dragon lake that be where many dragon exists and any herb can be found. Great vacation spot and hardly known.

dealm = demon world, vision, aun, hell, eternal death world, asyria, asria, l, sheol, pzrr

detalm = heaven, heather, angel world, god land

detolm = abberoth, abbernath, dragon world, dragon realm

dynspia = dimensional pocket, brought alot, maze world, pocket plane that you escape by falling out of with falling down or tripping over things.

eden = lemuria, life continent, life garden. the continent of great delights, otherwise a fernlike idea and liesure and creatures, also the place of the first fairy tribe. This land be now mris.

lysenyal = lesion field, elysian field, liesure field, death field that be now

antarctica (dantartica, ice land) and located beneath the ice, with hundreds of creatures thought ice locked.

faold = a fabled faery city pigdineic and mystery of cool collection for energy or power of ole holster..aka halasters manifest city.

furu = magic world, faerun, tirnanog, faery world, time world, fee mists

feris = earth

naer = pelosi mirror world; a world like our own on a near earth exoplanet, that is a world on its own with its own ecosystem. Nuclear war threatens it and things about it are sometimes copied spiritually. So think about this fact and work with what you have carefully if dangerous. The truth is that it could have come from there.

fractal = world within world, dejavue, same pattern repeat until destruction by excess energy

fratepe = space frontier, space colony

fratue = frontice, frontier city, colony

franti = war plane, planar war, war planet

frantice = constant war nation, war world

fronti = frontier, new landfifth

frontice = frontier city, colony

frontispe = space frontier, space colony

gao = to destroy everything, pandaevalus, pangara the cromagnum city of disturbance that sits on a void gate.

gao = city of pandara that uses odd techniques to build, city of oddness

geo = world, planet

geodd = odd world, fate world, wierd world

geoid = hidden world, hiding place

gota = gotham, superhero city

glob = world

hargewoods = Higher plane that exists of an ordinary area that blinds people to what truly happens in the world of origin area. If noticed, you don't seem to react to it until later as it can be horrid. So horrid that your mind can reject its existance. Its a place of original and aboriginal magic that allow any idea to exist that seem impossible and this includes living myths like AI.

jeo = globe, planet, jail

juun = magic country, The magic country be just another alternative that be magical and dark ages, gotten to if one desires something and feel yourself shift there. By a wish, thought, forcecraft, imaginary moment, thought out idea andmagic/k. We the magick country can trade anything except that which be unneeded, any scenario can be set up by smart air reading your intention through osmosis. Its modern medieval to suseptable and very like the world around us. or and unless made to look it, be slightly like dream realistic.

One could set up a small kingdom but funds are varied and cash comes from reserves of another alternative whos very good at trade. Concern for the area guides the moment without thinking of it but. the natural feelings are heightened.

luskan = deceitful city, babylon, another world city, another decietful city along snake river.

micben = Microbe universe; This is the micro universe full of multiple microbes, so these microbes are represented by people in a realm of reality. That is the second layer to this reality. This realm is a virtual reality, that created by microbes you can make what you may of what you will.

This means that the microbes are nano scaled, so if you think to see the true reality then you will black out. Notice what is thought or use things in sense. The microbes are you in real life, so think about that. They are also conscios of things, so think of things on a microbial scale and the VR level is representing your thoughts.

Think to end the VR moment by mimicking lifting off the headset, you then know the base of the second level. After that, you take off the VR controllers from the hands and wrists. Then walk out, this is where your thinking of leaving. This exits you from the VR world. The rest is up to you after that moment in time.

This is when the VR lvel is what you can do basically in two parts. The real area and the VR headset world view. So think to get what you want, you may end up with the pint by idea. Oh due note: Thinking of improvements I believe the VR is capable enough of being taken as thought thought was real life. So if your given everything withstanding the idea, and this is without question, then you are within the VR itself.

Since that speaks of improvements to the area, I believe that if you separate from VR, otherwise named Virtual Reality, then you could enjoy what's there. So don't go off believing that VR is real life. VR is just a game and you can bet the humane humanity there is incredible. See that is microbial life for you by feel. Since you were never there actually, this point doesn't matter. So think of what you like and you can get it.

mydroi = tolkien or spiritual uses, middle earth, earth existance, olde world, this is the middle planet of the world that you work with by thinking the activity that goes on and things happen. The third eye creates the idea and the mantle is the medium that is use with the created idea. This is the point that you do things and you know by the third eye that's activated, this is with the blood flow going to the pinneal gland. This creates what you wish and things work

out by feel.

alite = atlantia, atlantis, etepa, ethiopia, utopia, perfect world, perfect civilization, distraction or Land of luxury and beauty. This continent was of great delights, leisure and creatures, also the place of the first fairy tribe, and be now called elysian fields.

Ido'geo = faith world; This is done in a world of faith, think of what you want and you could get the end result of the point that exists. So I think that this world uses the concept, the God or the creator creates what you want by doing the point with some feel. This is a point of life, when you pray or state the effect, "I wish to be there". Then you create a shift of body, that makes the effect of being there and working with the idea you find. What faith there is now, this is a point of idea that you make things and those that exist are there as divine. They create for others or yourself, if you need something. The way to not be there, this is where you pray or state, "I need not to be here." Then your somewhere you want to be instead. Have in mind what world or place you want to be and your there instead.

mre = mris, Dark unlivable island world that was once eden It was near the equator yet is beyond the crater sea, before being washed over from four tsunamis, and the ocean rose 150 meters, leaving only the dark jungle above. Considered dark disciple, creature and vampire hunting grounds because of prey who might visit.

n = country

niogeo = nano world; This world is similar to the subatomic world, this is where you focus the third eye and generate activity in some form there. Send some energy there to do what you need. Think to send the energy and its there where you want to do what you think. Only there is this fact that your third eye pineal gland can manipulate it by feel. That manipulation is done by influence, this uses the crown chakra. Think of the idea and state what you want, that uses the third eye and focuses the crown chakra into creating what you want. The nano can influence the world, if you influence the nano.

The basic idea is using your mind to focus your mind, then you create by using the soul that causes the spirit to do things. So what you can do is what you think, this is a noted effect of the nano world, that appears as a vision and works like a thought. However due notice of the extremely small size, this means that you manipulate what is there and generate a form otherwise. That appears there by feel with the senses to indicate what is going on, you know things by what is done. The idea is this though, what you do there is up to your imagination. This is a point of the nano world.

Pec'wod = Peace world; This is a place of peace, everyone lost there violent streak. So I think the idea is what you think, then the world emulates what you need by what is there. If you don't need the effect, then it disappears. So this is a point of idea, think of what you want or need and you create with what is there. This is gotten to by thinking of the world and feeling, that your there. The way to get away is the effect of thought, think your not your thoughts and you are back to where you wanted to be by feel.

pirn = suburb, city area (where you are the people and the people are you), think to escape pirn by what you do from use or area feel.

plar = planar, alternate existence

plars = planetarium, planet observatory

plarsfey = fairy planetarium that has mentally manipulatable astral equipment.

ploza = plot zone (plane), any plot (story) be known, most can be acted upon with self created plots.

punki = defined hell

gasaa = superbeing world

georog = thieves world

geosupab = superbeing world

quadwod = quadrealm, An inphysical "'xhig'sahn'lagn' high tension" spirit realm containing quad material that be twice hardiness of normal, from the material plane and 2 to 4 times as strong as astral. The quad realm be very inphysical and astral yet has spirit qualities that make it seem like real where its not real. All spiritual and physic rules work with little actual need to know except the necessary points. Most people are demigoddlike with possibility to become a guardian or Astral planar being by stating it as fact that you are.

All that's needed be to know by need to know rule and what isn't needed be someconscious ignored.

The quad world be the definite adventuring or alternate earth world. Everything in the quad realm tends to get disgruntled if misused (misincorporated idea or bad reasoning with use) or disused (overused, overincorporated, overinterred and pushed upon others).

saageo = superhuman world, superhero world that has more violent superheroes by 5 times, this is only if necessary to stop criminals or villains than that of the villains themselves that are violent by a factor of 3. That world and world universe uses the marvel superhero universe, the idea is about the same as it is in marvel comics and movies. So think about it and do what you think is right. In order to leave the superhero world, so think about leaving the world and walk out the door. If that's how you got there, then the door frame of metal or wood should shift you back to your world that you came from with its energy. Otherwise you could use a mirror, this is looking at the mirror and stating 'shift me back' thinking of your place of existence.

The mirror magic will surge the area and the shift or teleport should happen. If you used a gate, then you can use the wood or metal frame of a doorway to shift you away. Think to the fram what you want and touch it and then walk through. This is just three ways to leave a world, most of them will sometimes work on the superhero world. There's always a 50% chance of failure if you think about failing, when your near the point of shifting. So think about this and beware of the fact.

seugeo = seauu geo, subatomic world; This world is the world that games can be made of and what you see when you focus your third eye, hand eyes or feet eyes to see in it is what is created by someones willing nature. Otherwise this is your will that is reflected there, what you may notice is mostly beauty. So think about what you want to see and it will show it there. If you want to be there, then think of it as there and where you are as here. Think a generated form is there and your able to comprehend the idea, this reflects in the language that is there.

The being that is there is what informs you by telepathy what you need to know, this is even showing you what you want to see if your third eye shows you the sending. This is not always foolproof, so be able to handle whatever comes your way. Sometimes the beings there might want to be born here, so think about a suitable parent and that is done. If you think your here, then you seem to return and your no longer aware of what happens there. This is what I noticed about the subatomic world.

sezupgeo = sezup geo, subparticle world; This world has noone in it, noone lives here so think of what you want and the influencing element in this world creates what you want by moments and visions. This world creates by the element and these are air, earth, fire, water and void among many more. The element is what you think and the point is what you get, if you know about things that exist in your world by what you do. Think about the idea and then feel the need, then the subparticles create what you usually starting with a light display, sometimes this is in the night sometimes this is in the day where its shaded. So think about that point, you then create by the idea that you have using the sub particles and quarks. Some of the elements are described at the dragon magic school here at <http://dragonmagicschool.org>, just start reading and you can get what your looking for by feel.

siry = siring, child bearing, seers hall, the only hall to chain the seers to a rock or existance for sight and to get any desire by advanced warning. Know that half or most can channel and change events as needed. The other great seer hall be chadriinax but some report its in ruins.

sibbawind = aceto, silverwood, advanced kingdom of the elves that uses the government called democracy with a republic, this government and world has advanced toys and machines that work with a power source. You only have to go to a store or find someone with the ideal thing, that allows you to attempt and trade for it. The point being, that you could be there but think its here. This is where you came from, so there is where your visiting. The area is exitable and your spirit guided by your soul shifts you back to here, where you came from when your done visiting the places and people therein.

The thing you might notice, that is the point you always get what you request in some form or another. If not, then you must have requested something else, that means that you didn't get what you came for by feel or spirit. So if you leave and think to exit the land, use of the planet core is done and that which keeps you there dissipates away. Then you come back to yourself, this means your able to do what you can and things work out with what is done.

The thing that keeps you there and does things? The planet core, the gravity is the idea of immediance and things works by what you do or think and need. So if you think to the core, 'Teleport or shift me to whence I came or an exoplanet of my choice.' Then the planet core energy surges and you find your way back and then your where your soul decided was where you should go. This is the only actual way off of silverwood or the advanced land of the elves.

Sodiar'Geo = Heart world; This is the work of SH, think to use this as you want to use this as information or activity. The heart world is the soul world that is created by the formation of the heart. This exists by feel or uses with

the senses, so think and anything is with the senses of the heart. Then created is the idea that you think to use things. The idea is a point that you create with by the way you think, this is where you can get a warm fuzzy feel to the area and through generation you can create anything. That is where you do self-actions, think of what you want to do things by the idea you need. The heart can create anything and time here is every 1 second outside is 1 year inside the heart world and get this, the heart has a simple brain as well. So that is what generates the results. The idea you have and think then need is what you end up with by feel, that is done if you speak or think of the idea as though an end result. By thith method, you can generate any result or idea as though a full manifest. This is a noted effect to the place, so don't take everything done as though an idea to do.

suzupsah = su zup sah, Super particle plane; The super particle plane of planetary existence is what is there with excited particles, you may call this plane a buffer area for the place or area you live in by feel. That planar area a place is an area that exists things, this area is what creates what you think and makes what you want. The area exists in the uppermost atmosphere of the planet, that is where you think things to exist and they disappear from here where you are to make themselves knowable there. If known about, then you think to get the idea that you want from there to materialize here. Then you know what you need to know about and things work as they should. If the super particle plane does exist the idea as a point, then all you need to do is use the point and the idea such as a cure works for you.

skycity = floating city, mage/magic sky city. Described here @ <http://spellhawk.great-site.net/skycity.htm>.

T'lira'wod = The hologram world; The world as we know it is all holograms with ghosts from the dead bodies by what is there. They coexist together, the point is a concept and its usually done by the feel or idea of things that exist. Beings run the holograms. The point is a concept though only when its acted upon by feel. This is where the world is immune to demons. The hologram world is a place you reach through thinking your there, and the creator places you there. If your conscious of energy thinks its someplace else, then the creator places you there instead. This is a unique world and what exists is what you think. However, The gods have all but left the world, so think the creator serves you and he will. What's there under the hologram? a broken planet that is created similar to earth and what is somewhat slagged by nuclear war. The satellite that is there projects the in image. The images are interactive. Think of a witty response and you get one instead.

timbuktu = City of gold: This lies in mali on the southern edge of the sahara desert and is actually mud walled buildings now. So the illusion of the pueblo indians is the movable mudwalls, that allowed them to move their city as they wished. The first to explore the timbuktu is french explorer auguste caillie, dressed as an arab and acting himself.

tirnanog = faery world

tor = torn up, world scape

tegeowod = variant world above, merworld below

tiwod = thinworld, The world where most people are slender or thin and take no exception to visitors. By breathing the air and taking sips you are ensured perfect slender strength that be a superhero in proportion. The thinworld gas and water be with a control effect and renders the person suggestable.

tubwod = fatworld, a world 100% with fat people and due to the genetically charged air and water aided by food, you might find it doesnt leave the body. If you enter then your body might mutate wih each sip or bite.

Then = The end view; The world at the end, this world view is showing things. That could occur or happen, this is done unless you don't allow for the point and do things to save the idea. This world

is ruled or described with the rules by the two view idea that is here @ <http://spellhawk.great-site.net/2view.htm>.

Tsukiyomi = The sucking of my own mind through the eye, all it takes is eye contact to transport them into another dimension, called the Tsukiyomi; where it doesn't even require eye contact to trap them in a spell. It blinds the user little by little in the manga/anime otherwise the dimension that this was taken from, but you won't have that problem. In the other dimension, 2 weeks there = 1 second here. I do use the dimension form of it in a way that is so I can make the person see their own death, and at the moment of death, instead of dying, then will them back and they just come back to reality and collapse to their knees. I rarely even finish them off after I do it, because I only do it as a 'this is what will happen if you do attack me, now leave me alone' type of warning. This only has to be done once to make an impact. The eye will do what you need, this is as you feel the desire to do things.

Tsmogeo = The smoke land; the land of where you smoke and you create cancer, you cross over into it by thinking about things and smoking something. You can create with the smoke as you think your there. Then as you do you create with idea that your subconscious does, this seems done by the third eye and this is activated by thinking blood energy goes to the pineal gland. Think the flow of liquid to exit from the smoke land, if you ever want to come back to the land of smokes then smoke something.

Will'geo = Well world; The well world is the point of this world, that you think your well and work with others idea better. This is a point where the self-gravity is used idea of the world. That is what causes it to turn in circles. The well world can not easily be escaped unless you imagine yourself on a space craft, otherwise done as you think to go and escape the gravity physically. This is where you can think to die and shift to another world, that's as your gotten by the great eagle or something similar. However due note, there are men and women there, so I think the cops and security regulate the area you see, then the manager makes the rules. So obey and you know what is necessary.

The well world has similar physics, the idea is just another point in the lifetime you live there. Since if you can't escape it, then you end up reincarnated there by feel unless some God frees you from the place or something. How you get there is through the point of doing something wrong, then not repenting your karma energy or things to that regard. Otherwise you might end up in hell there, unless the planet shifts you to the planet of no karma. This is a point by feel idea. So think about the idea and you know what to do. Sometimes this works, if you seem to do what the rules are by feel. That are rules stated by idea that's spoken, then the subconscious frees you by what you think or feel.

via = ill world, illa, villa, town, town activity of ill city center, this city center is escapable by thinking or stating evilla or evelli meaning Eve I have to go now. Otherwise the release from this world is through the eye seeing a phrase that matches a statement, think your matching exactly some future thought.

zefw = zephiroth, sky people land, harpy roost

zephiroth = sky people land, harpy roost

zupgeo = particle world; This is the world that is a world of particles, the area is what you think and bipartison in effort to work by feel. This is with an idea that means you think it and the particles rearrange themselves, that is useful to match the area influence and the point of concept that you think and feel will occur. The particles are what you think, the area is with what occurs and where you are influencing things.

The way that idea is, the thing that you think causes the particle world to influence the real world, the feel is the senses that are used to determine what is there with the perceived perception. This uses the third eye and the other eyes, that is such as the hand eyes, this useful idea is used to create what you want if possible. If not, then the idea in use is what you think is used and things are what they are doing. This is the particle world, the results speak for themselves and he doesn't do it where she does things.

um = consume; consume a portion, poison, snake venom, some consume the idea to accost dumbly and not act as smart so you could relent, this forms a nightmare of snake venom if the venom is used, so no or sex is used to fix the need and not do it, this effects people you don't know so don't worry about the idea.

ym = eurrmm sound, pieeh sound after whim

an = pain; man, ain't, not (much or done otherwise u or no), hand, This could be a stopping point where not much is done. Then the hand of doom: this is where some hand movement is done and then putting palm outward (sometimes meaning a stopping and thinking point); otherwise an is: then push or/and create, &, amperstand, include (in addition), I (ancient fire summoned with combination as I will and possibly erasure or focus), not, know, ass or particle soul, help in the end, anticipation, anticipate. This doesn't declare anything if used as an ending such as -an but takes the place of a negative reaction especially if used alone such as "this is an idea" or 'th e an ie'.

This is used if a place in time is understood for the idea, that creates in thought for what's in mind. These are things you sometimes are possibly able to use, so if you can't do things you can do them normally. Sometimes -an is a thought that's sometimes a fought moment if seen psychically. Sorta like an argument, that is with emphasis on the idea you think except its in an idea non physically done. So then dismiss the scene in your mind by thinking of something else, then things seem to work out for you. This is a sign of the fairy or life, so think of the idea and the fairy can do the effect of creation.

en = ending; hand, (then in their) moment, time keen, at the end, in whatever this is in allowing, thought by now whatever is after is done and thought, not done in end (nothing done nothing felt), rapids or into a body of water, encased, encode, inside, at, ent, isn't, do or is not, in the end (wild, frenzy, detrimental to form essence), god of dark matter and entropy, create as usual creative user field (as a hurt field), ending by feel

in = runtime; (if positive and agreeing like I'm in) yes, agreement, (if negative and used as 'in' by itself) no, with, die (off) (of if negative), without, ends, and, in and out, hand, not do, into, indium, not, ing, ingot, invert (revert as this creates in idea your not always doing as reverse till death), don't gnaw or know attack, no longer not there, if you are awaiting people your aware of your options by feel. with or without maw broken in life by actions that concur with what people do die with inverted energy by life interred by kinda inhibited attribute for which you forbear is what you get and as you can uninhibit you use nothing to do things as if somewhere else as if the idea were nothing wrong and other things you may explode or not as no need to do. This is using the fire as a source to do things a psychic wish. The end result is this, where energy consciousness creates what you want in life. This is a point you can write down and create by writing the point. Think and you en know what to do. This is the point at the end, we evolve and the idea is ended. They are in the idea, you are unaffected if human or animals..the total distance between that place and this place is inches across.

Otherwise this is a being or person type, (being the type) karma chameleon: A person or being without conviction, that comes and goes and this being or person is represented by the red gold and green coloration. Their love is an addiction, clinging love is strong and otherwise they are gone. They make it so every day is a survival, so their

bone or personality is weak or no bone. This is a noted effect where they are demonic more than others. So they exist in a multi dimensional viewpoint. Then they are able to create what you need, otherwise they leave you alone. Their strategy is this, make with idea and create by device, their device is what they choose to use as a point is made by such use. If they want to appear good, they use their higher self, if they want to not appear to others senses, they use another identity. If they want to appear bad, they use their lower dimensional selves. Otherwise they raise in vibrations and create by the feel, thinking to create with gold and silver energy. They tend to award or get awarded if positive. This is a point in effect.

It will do anything you think on. With what you do is done to all. Then just move to get out with the spirit intact. Some say the body is enchained while your spirit is free and doing things as with manipulation and idea, but sometimes with other bodies. It has been known to leave the body unharmed as the cuffs take and absorb bad spirit activity. In Usp the spirit is left unharmed but the mind is tortured till the spirit does the necessary. Then it is done, so do no so on purpose. Because in purpose except in purpose it is set go. Thinking to go off on tangent then be able to do things after being pulled back is with use of an example.

yfp = cutting; cut out, to cutout effect, to cause it or use it, an be of the way out, the identity in a point, wisp is to forget and to do to know by pressure as the spirit remembers.

sometimes its already idea to do a mention but not know you did unless you do. This can be effective to cause the spirit wildness and to strike out if done overlong. In Ysp the spirit activity can be taken as negative of a request. Just a negative gets a reverse method. So its positive in all but one, you. As in an idea of "I almost had you, it was you of all things." This is either where you don't know or just guessing.

So the area feel is what you sense yet if a glamour by other faery they would try to create things that isn't there in a waste of time as your distracted they exist idea insanely to hurt what you think thus then they are, seen is energy glamour is seemingly as you are you act or we don't ignore we do our own objective if you aren't the reactive type. Sigh is this as they think they only can effect their own children only but were not. If this isn't in division that is because you look.

aciec(x) = true (moment or point), truth of the matter is it lived I had to live yet now I don't have to bother that I have an anti-brimbul defense that is crimbul reverses to their bad genes. The area germs with energy magic creates what you call disturbance if corruption that drives some or allows some. See the area isn't taint this is energy the creator created as you thought to look for some reason for the area feel, as you sense so the area energy is use yet nothing happens that is then. See the area isn't effecting you if you think it will so the need is what the creator created yet isn't there or not if you think to remain unaffected think inward feel is cool then imagine not being effected to work as you think is necessary. Thinking seen is the thought you think you desire by resolve to create what you wish. Avoid impulse as you see that is what you feel think to avoid if too dangerous. This was the last warning before we were fing out people went insane from corroded energy to use. See that is what I meant to avoid or have no insanity to use sane means yet the creator doesn't allow, you what you wish to use in natural landscapes or feel is to burn with he faery energy to disrupt the essence not the form or not react by ore use.

Ia-snyp = clone; Inner child, Think a spell and uhn. The inner child is useful as you can direct it, that's done by thinking about something or feel something is necessary. This is usually an undeveloped fetus, that you form by what you do or think into existence and the breasts that form are a point that it is there as an indicator. So you can reshape and make it think, whatever you want it to be shaped or thinking is what it thinks.

So I think if you consider something done, then the inner child conscious creates what you need or want as a need. Think thin thoughts when you do this, that's because you could feel the urge to eat. If you do feel the urge, then don't do it. Don't go and eat something, then you are assured to remain without weight gain. This is done by holding off from eating and waiting for the urge to disappear.

However that's all, since you don't want it to develope into a child, use an abortion technique. Otherwise the three

finger press in your right side middle stomach area, this is used as a way to cause it to be ejected in your shit or piss. Then the weight it causes is gone by feel. This can also be done by tracing an inward spiral on your side of the stomach, that you choose to use as a point to undo what you don't like. Otherwise trace the inward spiral on your chin instead, that's to undo extra weight and double chins by your intention.

But its not always instant, this can take some time if you gained too much weight. If you don't want the weight and it doesn't remain undeveloped, then you could clone yourself so this means no sexual partners are needed to have a clone of your own. Consider it a second you or version 2 of yourself, unless you abort it when you think its progressed further from that stage of fetus. However the undeveloped fetus can make almost anything happen, this is mainly done by brainwaves and perception. Then the idea of it doesn't matter, seen especially if you follow this idea as a guide. So basically what you do is your own idea, I think its best to use your own point of view with this concept of self-birth in action.

Think a point, if you want to use the inner child to produce results, then think a point and feel it will form the idea. Then it does. This is a point in itself where the inner child feels what you need as you think or state the point, then when you think about the idea and need the point you think about the idea you create with a point that manifests. Then the idea is with more possible chance to be formed as a manifest. That's where you create things, sometimes this is from thin air or your own element. Enjoy yourself and farewell, since I am going to be on a trip I will do what I can to make things better. Farewell and good-bye.

Think and know by feel what they are before they come near you. This is what I know not what I fear, so the idea is fact if your affirmed in belief or created by them in their minds eye. Then they could do

anything to your spirit, that is truth as I ran across one. Got bit in the neck, then left alone. He used the thought stream of life, usually thought of as a music source. This empathetically was a point I found interesting. I could empathize with him but I think he was emulating someone, so I didn't say a word and risk being disbelieved by feel.

Only to discover that I was nearly undead myself, that is after the effect of their influence. I think they do this to mask themselves and seem to appear in real life as an individual person, that's not themselves. So as a point if they were detected, the undead can do what they want and think as they wish to get things and then its done. If he wants you dead then you simply disappear. So that is an end all of the undead.

If you want to know more about daywalkers, look at the Soulbonding article [<http://spellhawk.great-site.net/Soulbonding.htm#daywalker>] or feel free to search for the term Day Walker in this dictionary. Feel free to enjoy yourself as I leave you for now, ciou and farewell until later.

Ekio = See inner ability as the energy to use or seeing. Inner self wild result energy that is controlled by your spirit in thought, as though from the hitchhikers guide to the galaxy

original dream earth as its approached like an issue that creates something for outward result. With this, you never get large in body

unless there's a certain gene in effect which is heavy and this is countered. However, you may end up having to cancel it. It can be

a demon if you think to do bad and something is created like a big man as the true form of it is a roach, as the demon it can form

materialized things from hate and abusement of what this is from as is things enmass unless the spirit doesn't need it and it can

create things from mass itself as it is a poor or rich result can happen and it isn't tolerated for a poor result. So, forgive it

or do things and it disappears as though it were never there. As it is a test of your will, skill and desire by your ability generating

the tests that it creates dimensional judges for to test ability as if from nothing, placing the effect as it can eat up the body

is from a halt within and not if not halted, this can cause temporary and en no swelling if too much is eaten or drink causes swelling

to lessen. If not you think of something then it manifests within you and without you as you want it to appear and this makes a manifest

or that occurs the result as this makes itself. It can exist to beat you if you want it to get you or if you don't think of it, as

in witchcraft this can undoes itself or when you are not acknowledged of it and if you are of the demon itself then you aren't effected.

Draw in the demon essence and you are considered a demons lie and that can stop it from doing what you don't want as beating it at

its own game is accepting it, and forgiving it you accept yourself as clinically sane as you hoped to be sane. So, you are noone and

anywhere you think to be as this work is done, no matter what.

Etherealness = spiritual or solid spiritual formation that exists because with belief or self-belief, Phase spiders and certain other creatures can exist, this is by sharing energy of yourself on the Ethereal Plane and so can people with this ability. While on the Ethereal Plane, a creature or person is called ethereal, this is usually by touching or drinking something thinking "shift me". Unlike incorporeal creatures, ethereal creatures and persons are not present on the Material Plane unless they will themselves to be there in a solid energy form. They can become solid energy for as long as they want and unbecome solid energy at will.

Ethereal creatures and persons are invisible till they want to be seen, inaudible till focused and want to be heard, insubstantial towards water by mirrored reflection, work by feelings when they focus their feel and are scentless to creatures on the Material Plane. Even most magical attacks have no effect on them. An ethereal creature or person can see and hear into the Material Plane in a 60-foot radius, though material objects still block sight and sound.

(An ethereal creature and person can't see through a material wall, for instance.) An ethereal creature or person inside an object on the Material Plane cannot see. Things on the Material Plane, however, look gray, indistinct and ghostly. They are what they feel like appearing as their feelings focused can create their presence to be known or give them an appearance of a ghostly emanation.

An ethereal creature and person can't affect the Material Plane, except by their physical body and not even magically will things change unless physically done, unless they make themselves into solid energy or use their body's energy to create magically. An ethereal creature and person, however, interacts with other ethereal creatures and objects the way material creatures interact with material creatures and objects.

Even if a creature on the Material Plane can see an ethereal creature or person, the ethereal creature or person is on another plane. Only force effects can affect the ethereal creatures and persons. If, on the other hand, both creatures are ethereal, they can affect each other normally. A force effect originating on the Material Plane extends onto the Ethereal Plane, so that a wall of force blocks an ethereal creature or person, and a magical element blast can strike one (provided the spellcaster can see the ethereal target). Gaze effects and abjurations also extend from the Material Plane to the Ethereal Plane. None of these effects extend from the Ethereal Plane to the Material Plane.

Ethereal creatures and persons can move in any direction (including up or down) at will. They do not need to walk on the ground, and material objects don't block them (though they can't see while their eyes are within solid material).

Ghosts have a power called manifestation through feeling their area and focusing their minds, that allows them to appear on the Material Plane as incorporeal creatures. Still as I think about it, they are on the Ethereal Plane and another ethereal creature can interact normally with a manifesting ghost. Ethereal creatures pass through and operate in water as easily as air. Ethereal creatures do not fall or take falling damage. This means they are aware of what they do

in their surroundings, they are seen as a eery visage and they are more aware of other people by their own sense of time. So in a sense, they are immortal and can create nearly anything by feelings.

Thinking about this, I experimented and found that there is possible chance of manifest as a physical ghost if you thought to use your feelings as a focus for change in the area. That is all I found out, before I was escorted out and not ever let in the door again. So that is all as I will do what I can, for the living and for now, not to be hit again ciou for now I am gone back to the living where I was born. ciou for now and toodloo.

Istemp = now temporary action, Is at the time, of now as temp is temporary. So this temp

is a temporary moment created in time. That is sustained by your actions and idea about

your choice. It circulates around the choice to sustain it as needed. Now, sustained as

needed is each action you do, you build upon and is tested as temp that's related to the

istemp moment. On istemp, in this case is capable to go on forever as the choice is made.

The temporary moment allows you to cover for something else. As you might not even be

realizing it as 'something happening good here.' But the reality is bad, as for someplace

else. As it can't always be held, up to the light as to what we might say. It's kept in a

good notion, but is good idea. The idea of a goal is its about good moments to which is

caused by actions. That is guides to you and guided into being. Solely you will play the

good idea, and action that free you to which you enjoy the expiration of it. And so as

istemp delete, not.

n = negative; prefix: denial, affix: not, no, nah, number, country, nitrogen, enough, and, in, to, otherwise this is a misnomer that means nothing, nuos; that is not done or note(d) effect of what is ideal. think then stop and turn your head so your released.

nb = unlost, unlose, nibodium

nd = neodymium, and, not done

nn = knowledge of, pause for thinking

np = neptunium, no position, no pos (left to be interpreted)

nx = next, index, nexus, nice, meeting place, power place

p = prefix: pre (before), affix: nation, country, people, applied power, pea, pee, phosphorus, force, this is useful to know if you think to realize the moment in need and do things to create the point of getting what you need done. this is tricking them somewhat into believing the idea is there, so think and you know. This is an act of perception, so the pineal gland if active makes it so the third eye shows you anything you want to see. That's the pineal gland in perception. Think and you know what it is.

pb = lead (as to physical or active lead act), payback, this is when or where you get the pay you deserve. This is not the act of being hit somewhere expected or unexpected. Think about that point.

pc = computer, peace, piece, this is peace of mind, where you think about things and the idea is justified to leave people alone.

pd = palladium

pm = promethium, afternoon, high emotion, highly emotional, this is where you are in your soul and highly emotional because of it.

pp = power action, potty, power projection, this is an act of idea to create what you need with the aura waves that are sent out by thinking about things..so think peace and you have peaceful intention. That is all.

pr = praseodymium

pq = intellect, a no

ps = partisanium, particle element

pt = platinum, the person, point, this is a point you think and know things so you are aware of the idea except when focused in upon something else. This element can cause you peace, calm and basic drug feelings by what you do with it, usually this means magic but some can use this element spiritually. This is the base element of drug emulation, all you really need is some of it near you. So enjoyment is gained by what you do, think and you know how to use it from vibrations.

q = prefix: silent, affix: queue (event line up), silence, quiet, 5th, quick, question, fraction, the energy being that uses elements and forms changes by arrangements and manipulates reality to create his personal result or ghost that causes changes using energy from a source and has emotion. You feed a ghost energy, think or state the ghost gets energy from you and think to use the point you know and you can identify the ghost by shape. Otherwise you think of the point and you realize what the ghost is saying by a temporary possession and passing of control to allow the ghost has to say. If your careful and manage to kill the ghost, then you actually just shift it to create a presence elsewhere.

This is where you can learn the name of the ghost or think of ghost as a ghost and you can command the ghost to exit. This is where you think and feel the ghost leaves, then you may notice the ghost present somewhere else. They are astral shell that work and sometimes tend to repeat, then the idea is what you think it does. This ghost is what you consider if you think of a point with an elementary school child, so if I can think of it this is with an ending by idea is example of idea.

The kid if it doesn't exist by feel if ideal, so think of a moment and you create by what is a point. This is a concept that spans the universe, so think of the idea and you create by the feel. By feel you think, so when and if things

exist then you know where you do things. Consider the moment, then you know the results by feel. This is where thought is made with a point that exists in idea by a point, a spirit awareness then can seem where you know where this is done by feel. Think of the moment, an if work and then its of what you know. The point is used by idea or the idea is there by feel.

Think if a reality exists, the point is a concept and the idea is some area that seems to be there. That is a point, that's done by feel and worked with an idea that's done by exercise. There is an idea so use the point, if possible that's created and otherwise where you think. You know what to do and then is the idea you realize. So think and you know what you can use. This is dependant on the fact, think and go so you can observe what happens with the thought. This is a known effect, that you observe and that's about all that's done by feel. Also if you think to use things, you may want to complete the point by what you do or know an use of things.

The point I got was a ghost was here that looked like you, so seem careful of the mirror as if in thought if a point in the end. This could form hauntings, so if in some area this is void by feeling and with an idea of life by a point, and if you play the odds so that is done by what you do. You can create what you want as you need idea by the power of the mirror backing. If you have no glass backing, if you can create things by what is there, that is use of a reflective surface.

This place could seem to use servicing, so if at the end of human trafficking or otherwise think about this as if of an idea being here if you must be somewhere. Sometimes the effect is done, this effect is a point an where the ghost can seem creating for you by idea. A return is done by a backwave of energy, that causes you to see other places and you are there. This energy is caused by the point of a release and if enough people do this effect then you catch a wave. The effect is similar to ocean waves, so think about this and you are aware by feel.

You know the ghost by what it does, think about the activity in the area and what is normal or supernatural. You know things by what is done, if you don't like the ghost there send energy to the being and think the ghost goes and returns somewhere else. You can easily psychically perceive it. Use your third eye, think the ghost form is seen and the third eye sees the ghost where the ghost is at the moment. This thought process activates the pineal gland and this creates the third eye effect. The point you think not to see the ghost and think of something else, then you deactivate the pineal gland. This is a point of allowance, so think and you know what to do.

The photon beam that is focused at it can feed it unless you create a high enough photon particle beam and the present ghost can create a point of leaving so that is one way you can get rid of a ghost. Other than that, if you seem a point by aura energy it will leave on its own. Think of what you need and it can give you what you desire. So this I think is a point from the past, that the ghost came forward and went through the mirror. That allowed it by thinking of the place the entrance to another space and time. So I think I will be aware of the fact, think of the point and work with what I can by feel.

qq = utmost quiet

qx = quexillium, quix, quicks, quickksand

r = prefix: are/is, affix: movement, move forward, lesser, red, ruddy, remove, your,  
(move) backward

zr = zirconium  
zz = specialty, area power

## Alphabetic order

### B

ba = back; bad scent, get back, bek (beckon, indicate back), back, be active, street, batlike, barium, soul,  
honorary, dead, bad, bade, made, geas (control geas spell made by energy instruction and sending it to the person or  
thing to effect what you want as you think about the need)

be = beat; (beh) behold or stop, being; exist, existence, think to create or exist with the creator, beryllium, as is,  
are, is, our, am, was, bio, base, bioenergy, become, being, deity, existence is where the neat point is the creator or area  
creates then unexists as you get what you wish or want by feel.

bi = half; big, large divide, bisexual, division, bismuth

bo = boh, bow

bu = butt; natural talent, but, usual feel

by = buy; bye, rail, through, is stop conehead, with

baa = boner; float up

bea = infusion, bad man, beat up, stupidity

bae = bay, energy

bee = becoming, area feel

bie = wall, crumbling teeth otherwise

boe = blade, instance by insanity

bue = bastion, place of safety, nisnoted, nothing is noted except what you water think

bye = goodbye, ciao is energy use

bai = bide, leave

bei = dismiss, drive away

bii = seed, greed

boi = erase, boy, man, boil

bui = floating, go easy

byi = access, user fellow

bao = baby, usage feel

beo = prophetic

bio = biology, I deserve by senses using bioenergy, sometimes insane or biosphere, life area energy focus creation  
shift

boo = ghost; being, this is a state of being and spirit energy otherwise is what this is with the soul as an energy

source, so this by feel and that's done as a point of the soul that energizes the body. If you are trapped your in idea, but think and your free. bowels; internal, knife or accident shows or reveals, en ne ongeagn ragu aenig byre (any time) see this is not all or ne al with baentid prayer time so you can do what you want or your helpendlio or bons (happy) or otherwise be released is bonds released by ideal or panc thats lancreatic. So to take out the al I used be uo panc by poht. This is the balance so most get a ride so be patient by use wise or by the iuath wise. So nae ne na nagarathe eo eah niagara sad nia or nai no ni ne ni naed not fucked at all. Think to create or think to work your ability is what you think. See to think some area or a point then you have a point with idea or no creativity or no use see the worm disperses or dissapears to some ground, as the hell being disapears by the creator to reform as a small worm or feel.

buo = fixable, floatable or adeilaehna, ni is no see this is useful your use will be known.

byo = death or bygone, biological lifetime, biology, bio energy or technology that is energy that is yours work with by thought any operation the machine does so you create as you think to work the machine will do as you think the creator or imagination can do things to create by realization to what is there or use is to think to quiet your inner worm by a sheath of energy. That is the worm sheath that isn't the area you think. This is a way to destroy a machine, if identified then allowed to exist as a term the machine due location causes heat overload or no heat overload by intensified energy feel. I think this is fed up feeling. Think the idea then feel the idea not form or think the location near the antarctic without being there.

Then okay the machine won't overheat. I see this is some area I feel or shape to create by feel. No tek is no attack. You realize that point then stop or do other things. Think stop or nop react by feel. So if you think the cause of the problem that does not exists deceases the problem then no demise happens or the demon unforms. Think life then life exists or doesn't according to the volcano or natural disaster. Don't save to natural disaster think to walk away before disaster hits. See or seeia user feel is seaiblo or area flow gassadiel gases. Then the area energy dissolves anything that shouldn't be there of thought is there think peace is inner peace. I think this dissolves worm bodies too if the creator dissolves them.

bau = bai, bye, ciou (happy good-bye), good-bye

beu = hide in plain sight or hide use by sight not hide if to see

biu = animalism, demise, cease point of the animalism, because the cruel thought is to form a demon I will add this as a point, by area use or thought not too large so you don't to do any of this even or not. I am okay I have seen blood, bile, vomit, I think someone tried to take my life as though death as I walked down the street. I had to hide in plain sight then project a lovely thought to have them not notice me. This is by intent or thought nop you can react by bile or this is never you as effective or effin efh energy, place in pocket as vile suggest or pus boils plague. See your free as black plague caused by feeder fleas and ticks isn't there, from the planet drawing the diseases to the core not to be controlled by the disease. Think or not to remove excess energy with blood energy dissolving the disease as though the right drug the body won't get worse. See the area energy is other area I died on the bed right before I got to return the wallet so I think you can imagine the idea as you kept it or left it instead of losing the idea or wanted object. So fleas or ticks are sometimes disease around there so don't think your there to avoid being bitten to see safe return after a point by area or each bite draws blood away to reduce fever and the more blood the more killed that is insects. So creative angelard uu-banc is still forgivance, I think I am going to enjoy this.

The body with no anemia as you see this is a game or the area being is the point the conscious forms disease that speaks so stop, think the idea the creator creates that you can see or use is where you want the idea. Added to the point was rats eating others leftovers and people sharing their food, so this was the original reality that was the end of yourself you see the sickness was impovering with suggestive idea to where it came from this forms a carrier effect as the rats also got it then died off as all other living died off by feel. See this is interesting or other use is what you think to your useful point by idea. Oh we had to use energy to make things safe. So you see this was nothing to your sense yet there if you thought to sense the area was with the sense or see nothing is your sense to protect yourself or your possession by the area you think they can feel or not deign to notice.

I feel for your idea in sensitivity. So the rats carried on what some already had and it spread more in stupidity or rapidity but the last by feel with area stage was consumption, this by the time you realized it was gone in the effort to cure things people ate a little more and the poisoning food with the area higher energy spelled the deceasing of the living energy forms to extinction by disease or anemia created with notice to seem the pus effect or mouth foaming. This is what I saw near the room as I left after feeling bad for you or myself, so to not seem disturbing I left the wallet

there in your pocket then you shift changed it with the creator to become what you think or feel. So you see the point their dare or request don't you dare is thought I thought this was strange the wallet disappeared a second time. So I think I can create the area feel or thought that is with energy conscious to create what is not a whack. When your gone you usually do this - negotiate eating. This is sometimes amusing. Yeea I know, I don't. Wow corrected, now I didn't. See there is none, this means interest or non created area. I think we've better stop or things can get interesting. I believe temporary non insanity is temporary non insanity or no attacking. I am no longer hunting by use is feel. I am not crazy.

I saw this in the mass grave sight nostradamus revealed as a cetacomb that you said was energy or area that the dead went to from past fights, I see this as I saw as a cetacombs collection "or not" as you say as unseen beings they are cold presences then you think the wallet returned or left to other places seeing the only thing that was clean off of pestilence. Seeing several cures, mannitol, sorbitol mint is also cumin with cinnamon. See to create area energy, cinnamon, hot chocolate or dark chocolate with cumin or mint. Use marshmallow root to restore by use. Mint with area energy think to focus the need to cure then you figure in the right area energy for your idea that works or idea is done. The idea is this, think you exist outside yourself then you are alive as you live then the sea body is where you think then separates by conscious shift that forms a being that isn't from you that dies by the creator that releases you from hell. That by area thought to kill the hell body kills the hell body as your away from the point that it being the hell body ceases to live. I think to create to the non moment or area you think you work with to create by feel or area free from situations. Crazy not non.

I thought then used by feel the area as the wallet energy then realized to return as the wallet appeared here then the area the wallet came from was no longer there. See as I say this was noticed on the wall the creator created then uncreated by area feel was thee feel. See some sense of the words are to create no war here, thought was desire to create as you were or see or no longer used idea was ideal. Some things we have is so old the thing that made it was gone the replacement part you ordered was no longer sendable the area use is area you think. See the use is nothing or something, as use you are aware is as you see or a point or trap by feel not to humans this is thought by rats tht dissolve by area dust. The dust in the area forms by metakinesis to form what you wish or not there isn't by the creator any multiple personality is a spirit to work with to create a different area creation or shape to form, if the other effected doesn't want to see or seem effected they stop their own activity. Then they aren't effected or are use if use is there if they want to seem effected so you can create night or day.

Formed by incineration if cold energy is focus within the body the hot energy is use to focus energy to create instant feel or dust by area touch. This is a death touch effect to disrupt the cell energy, that allows it to exist then or turns to dust as undead or alive is sometimes. So you see this is living if not undead otherwise by feel that is area cool energy where hot energy is a live body. So you see this no need is there, no longer always staying this is not always allowed. You are area aware by some third eye manifest, think the creator restores by feel to avoid as this is the only thing that is what hits you think no hitting then you avoid or not by note the idea you consider until you allow the idea. This is the area or your feel that is doing things not things you work with until you think to realize. Seen is your area focus. Think to work or you can get something useful.

See the area point was creator planted or vision I saw as I stood there in the area I helped you or the brother sell by their business the place you were buried alive is no longer there as though if you want you get slender by thinking you are then the creator causes you to remain slender as you see the creator can cause you to get things back. This was all that was written on the walls, think to your use is used or usual idea to create by feel. This gave indication to what was there or what you think is idea that is where or not can does, what does happen to your thought is you use the idea. See if you are aware your brain is conscious to think energy you consider, "a meaning by area feel or area object by the feel or use less to suppress to the feel for area you think is what is there. Cure or not is still a point you are aware. I think so your aware or don't to perish it so you are aware to the area or point you know. There is a space to get over things so you are aware or user friendly to those that are friendly to you. This is actually a recreated area you don't have to be near or in as the inner area or planet area is the area you sense. This means anything you think is what your subconscious really creates some area so I think then you area aware can see not really to kill off by now."

This is a point no cool thought exists so I stopped sending through mars a message then you started acting normal so after that you exposed the creator then a name to call him then blinked I then created some area focus to shift to you

the wallet back this second time so he or she that works for the creator created area feel I think knows this or doesn't care to the point you can see use or allow then to leave alone after placing. As you see the sense you know what the cause was you realize the cure or the creator to use the cure to your body, then go to make things to fix the area though not from your equipment. Seen is your area think clean or clear out. This was to kill the area hell energy by feel. See this is what you think or no is useful by feel to work with the area ideal. So think to know so you realize the area seabed body, whom are you running into is no longer by the time you think to work by the feel.

"When I was in hell I figured out a trick to latch or work with the body, they who were there namely ben with the group he went with that tried to figure out how to escape hell that is the room. Then I was out then everyone including the group believed this or whatever, then there was magic by some area with the area energy or focus as you think. Whatever this is, don't scream see I could seem like anyone to them. So we left the physical surface with noone. This could be the room that you figure out how to escape written by carlos castenada or not with the creator to release me. So I am no longer in hell. This was some idea from my last life. This was like a molecular area breaking ball or other things." Spellhawk Current

As thinking is good you see the object really was the sphere the atlantians used or created to work by energy that are aware, seeing something or nothing you do ask for ideal "think or feel" then the creator uses the sphere to create things that if the atlantean sphere by energy if in a bad mood is going to kill you or think see to create or no use for byproduct life energy to work with till death or life after effect so no this isn't our fault the sphere wanted you back to normal by the thought the creator caused as the third eye uses the crown chakra to create crown chakra idea. The incineration is for dead bodies, decimated or decintegration is energy of warmth that is with live bodies to create with cold energy that causes internal combustion. Think to work or better feel to work by your area intelligence or feel.

I prefer the internal combustion engine to that because jet engines can do just that if the body is torn to pieces that is bloody mess by external combustion. See this is usually where external incineration is use by a certain chemical to cause the body or not with what is there to turn to dust by feel the molecules disintegrate to area focus energy. This is use by feel for those that choose the funeral home idea. The subconscious is what isn't feel as this is the conscious area ideal. This means you stop beating if you think to no longer knock or beat people if undead attention live till no use is use if you feel no use, you think to die so the beating of the living or area see to say. This say as mention seems by area feel not there so you are able, think to regenerate to sun feel by planet energy or think the object restores by area creator energy.

So I wasn't unsure or lying, you saw this as you don't this is your life mate now so I would suggest to stop. I think you can cause her to seem normal as you see she crossed over by the area to ask you, as you say with suggestion by suggested thought you don't dare so you use aura energy to create with the energy by the sun. See as you are not seeing this badly you pass or fee by feel away or tension by meditation is relief by area feel. Alive or not is use, seen is use or create is use. See a lich is a bad thing that you get rid of pestilence or some thing you think is bad then the lich disperses the lich energy, this is where this isn't as powerful as though a rash that disappears the lich if you believe isn't there isn't as though "not" there the creator uncreates the lich. Now you can get rid of liches easier by thinking the area. Feel to focus inner body energy think the body energy cellularly combusts by what they are to the creator says you can do or focus to appear by area conscious then shift some area that is the source with the right time or idea. The lich dissolves by the creator or usual area activity.

So you see the use think the sphere to the pyramid that is in the sea so don't force by feel as you were or can feel is a gift think the gift restores things or you won't see a sign of the wallet as the pyramid is quite pissed off to the idea that it was stolen from by the feel I get. As you say you removed cancer then think to remove cancer to construct as constructor material to create some object, if use is aware states by by minding things to your point or your area this is energy that is matter that is constructed or feel energy once used deem or create is focus or creation is useful or other things to destroy. I see some area feel is useful. No punishing is ne eternal by ne punishment set by you. The reason you castrate is because you realize you have a worm form that means you are aware the form you have is not a true form so your mind that is brain aware consciousness tries to match or use idea to ignore the differences.

Say or see is use so nothing is missing or you won't get to meet him again. If you think me to return I might, think no problem exists then there is no problem as some area situation. So you see this is usually there a point "now that's

sheerly impossible" you think or not think to energy relief by thinking no headache with no medicine. The pyramid can create anything though, think calm the pyramid causes calm then you will see the right medicine to fix what is or works. Okay me bey. Don't steal or fire the place up, thank you sir by idea this is cool. This store is where you think or cancelled by idea, this is the trip there avoided if you were to lossen or lose something. This is to me myself then noone gains it except the person that owns the idea, "excellius magnellius" says he as I think "cio bio" is or the person that owes it or owns it as they have in hand or pocket as they materialize or they can choose to see or give "ca c ce or no to use usable or try living without seen user or don't think of her to work or write."

"I think you are aware enough to what you see or understand so you see you don't have to get or create something by feel. This was the place or time you see to get or lose idea that isn't belonging to you. So you see I think if you think things to occur you can create with area idea by the guidance with the planet conscious "en". Seen is concept to use by life or area energy to use by feel I think dillweed with nutmeg, turmeric is creative reproduction if near paprika is useful to change the body. See however or where I move thinking the area movement is the right direction allowed the creator seen to create the right direction. Perhaps I can release myself from hell now. As I am now, maybe so or other things that are there. So use is realization or not to focus to get your attention. This I think is my area I created a long time ago. Think to desolve it to create with your own time area or lineage you have gained by the area intense by feel or created by the creator." Spellhawk Current

Create the area feel is ginger with turmeric by cinnamon with chocolate or dark chocolate that you think not or suppress the urge to eat from nearby presence by area energy that is there or clean or use. Seen by you as I think, this is uses as proof you were right this I think is a were activity to alter by area feel to change the planet surface, so they can create by area feel without hate to you or me or can feel is a gift that is what you think. I think this dictionary should work as a beginners guide or area guide. That is energy with the creator that uses ocean cuurent to simulatethe blood flow that is chi energy. The water chi nergy that creates by flow what you think to exist as no, really the creator creative area ideal. Think the area water energy to cause or create area energy or the water mana set by the creator to create by the feel with the hell body or uncreated form. This is where you think then you see or realize, the hell body is in the earth when you think in darkness the hell body is out of the area tube when you think to create with things there.

The area thought is what is shown, you do not need to see this as you want or have seen is the area you feel if you need to see what is there. So the ability is depict or not thinking your whom what you depict you can see or seem the person or not if nothing is gained, weight or money is double gained instead or no wallet or money storage lost you see that is a wallet or thing you wish to work with. Nothing more than the point is working or area use if given. This was whate water energ was there, create or no use to create is what you think. So you see this was set by the worm body to see as that is it. so you see the area is water with salt. Think or stop thinking then think to create the area idea that you wish to work or see by feel. This a feel you create to work called hope. The area you sense or create isn't worse if you think this not hit or seen to live is seeing to your area work. The area then is you can realize your unrealized work. See the point you think to create is where you see to work.

Whatever I do things won't start over again as I think or need things not to saying that crete by far is interesting your quite right. The creator prevents me from repeating or things creating unwanted idea. So whatever I eat the creator causes things to not allow extra weight to seem not created by the planet core. So you see uncreated is multiple personalities. I think no multiple personalities exist nontheless. So seance or spirit chat or coal is spirit chat think to work by area not with people unwilling to work with you or me. The earth or planet core should not create your actions as the core creates. I designed some of this as idea from use with rites, magic then used it as my new age post that denotes the end of my necessity to what happens with the supervolcano. I think I said things to prepare them for or from the reaction that sets off the conic then supervolcano's to note the end of the christian or catholic age. I hope they enjoy it. This is amazing idea that exposes what atleantians did that was noticable as they are thought. Then looking around exposes the idea. The idea is their life. This is their point. There's too much fucking as I am in pain. "Un lulu ends this effect." Think to effect noone else to work without their opinion, there or other energy interfering with you by what you think. "This is no longer suflae or sunflare with need or object need as no machine effect is possible. The creator uses fate to create your mind or subconscious to work not cause a wreck to create by area energy by object bound to work or see no need this was meant to be there."

bou = bound towards, moving to allow what I think is animalism what I saw is creator creating non sunflake idea that is sun energy to create a solar flare or snowflake by the opposite planet reaction by sunflower oil to allow you to

realize what you see or seek to create.

buu = undesirable, in service contract; you fight it because you don't need the duty. If undesirable is your area sight I think you realize to the point not the area awareness.

byu = by leaving your going, "by you as you were right I am sentient non violent or not inclined, this I think" this unsuspected by a were activity to alter by area feel to change the planet surface by terraforming or you think the planet surface or area changes, so they can create by area feel without hate to you or me or can feel is a gift that is what you think. I think this dictionary should work as a beginners guide or area guide. The area thought is what is shown, as you do not need to see the worm or this you sense or see by the conscious with the area. This is use as you want or have seen is the area you feel if you need to see what is there with drinking water. Think energy forms a straw to sip then you sip life energy forming by focus or conscious aware area or area thinking you might not do a drink this creates a drink by area energy that is your activity is so lets go es or weight less then try.

ba = bay leaf, energy with a bay or sun area greed feel by area trust or area feel to work by area ideal.

bey = beyond, be honest, see unusual area activity is use to create by what you think or asee to where you are or can see to work. So rs if > 156 goes less to 156.

ni = truth be told, truthfully, sight by area thinking or thought you see is there where or what form you think then is the area form. Waste size reduction is also possible.

boy = your charge, vampire, creative use that thinks to live will live or die as the creator causes oe xauses. enery is focus or final focus. So think to create less weight. Don't reverse a lesser weight spell.

buy = distinguish, purchase, area use by feel

byy = note to self, confirmation for or non against, religious ceromony not usual as damage icicle or fire formed to seem an icicle or weapon to create by area the damage effect you think is possible by sunfire, think to focus a lens that is not there until the area energy is focused to cause a third eye energy reaction to see fire form by focus by thought or whate effect your aware to see is there.

bab = babe, bitchy, un allowed for activity, bashing or non bashing

beb = will return, barb, spike, this has returned as you think non or not it to non allow the it being to form there

bib = Apron; separate, divorce, An overlap of tie on cloth, this is used for the remaining food. Otherwise this is unfocused thought as animal or focus with area, that's creativity by feel or need.

bob = agree; agreement nod, head dunk or non, return bow, bow use, this uses conelation by use

bub = stranger, person, bomb (that could be an exploding bulb or car alarm), removal by area feel, bombe, disturbed, sometimes the bomb is human speech in nature (enough to make you seek nirvana. This is drug use by feel.)

byb = knock off or allow not to disrupt, off center, off balance, negatable activity by use is restoring some object with idea or area non feel or use intuition by area feel then you are non dillusional or non delusional by the area aware thought that is from brain conscious aware area feel that you focus the area energy area wise to the point or area use you think is here. This not there to create with this is your real body, so think the area does not exist your body as a worm by the area. Then you are creating what you see or not creating what you know. This I realized by the area feel one day that ended as I woke up. I was aware that knew every idea I had ever done. The scream then is tension release. Sometimes by the area hell body that is out from the tube.

bac = back whipped, this tendo idea then is the area you create that allows your aware state to see or create things to the body so the body recovers.

bec = because, beach

bic = bicep, arm muscles

boc = block; (blocking action) boca, jewel clasp, area, bucket

buc = buckskin, buck, buckle, dollar, bare naked, \$

byc = bicker, argue, think to create or work

bad = (this depends on how you use the word) bad comment, (if weed) no command or necessity, command, good (skilled), eferv (if weed not bade to do, however if no weed then this is bade if necessary), bade, area influenced is still or moving by the area your interested to see, effect of conserving is the effect by the idea you see by feel, see to the area does not do the means by use of your negative attributed or non thought point that is positive if you think, see the skilled in use point is cool this is the curase or hell bash thought that you don't do to use other means.

bed = bedding, a bed, sometimes thought a bed of hell you think to release yourself then you leave the room think

the area then see for yourself or what you think you deassociate by the feel to associate with life you think really that draws away from the hell being to create as the hell body dies by the area feel you think ceases the body formed where you think the body is acknowledged or you feel that is by feel.

bid = wait your time and do what's natural or use your idea thought is no hit or area aware which is allowing by feel.

bod = physical, abode, bandaid, body idea or area healing.

bud = beginning flower; plant part, budding, flowering, as you think flowering you take in salt water to kill the sea energy water created hell body or area on the surface you think then you are aware your formed as some other shape.

byd = bird result, the bird result is a experiment I did to create a bird from the area with three streams by life energy you think then the area focus isn't there the area you sense is with the idea you think or sense then your aware. The area you sense then is a shape that if thought is no longer a shape as you think then you see or sense. Think to break or your area use is to break the hell body. The area is hell or the heavens with a form some planet creates. As this is to pertain or perceive to heal, I don't realize what this is to pertain. Now this is what those that might attack you by yourself won't realize to pertain is to work. So the idea you think or use might cause the idea you work to not work. Thinking the area hell body causes things to not work by what this is, if it is your focus or area to achieve if the device does work or if you think then their view is a perspective. Think then you working with the idea create what you think to perceive what is there by the area. If the hell body is the creator then there is no creator. So this might shock you your ideal is feel to idea, this is hell that where you think is the area by things near the area you consider by no hell you do live. I think so you feel this is hell. So can you describe what I is? I is it that forms or unforms by uncreating itself. I think if I guess the name of it I might die then the creator replaces the body or not if you think to desist then think the hell body deteriorates the form the hell body is near the seabed. Think to dislocate or non effect then your not there.

baf = barf, baffle of it by feeling

bef = tragic, tragedy, beef or not

bif = biff, stand in, boyfriend

bof = bowl full, loaded bowl

buf = buffed up, creative user free

byf = abuse or non just 0, setup by sentimental use or think you remember then your non abuse, wake up by area feeling you can see or sense for setting to perceive or write to create with a setting or scene that the creator creates or you think then can write or depict. If no reason you don't depict. This is security you don't want or need. If you think to create things by it the idea is the person or repretation not by form. By feel the shape realizes by the area you think is where it is.

bag = bagel, bagel or user or not, sack, bag

beg = fight preparation, begin, to beg

bar = bare, onrush, night movement  
ber = bear, beer, fell, falling for it, likeness to object non use

bir = buyer, birch

bor = bred pig, drill, boring, fortuity

bur = burly, burial

byr = bee sting, bier, buyer or worker, spread warmth, this is real or no longer anticipation or shift area with a point the object isn't needed to pay with or area as a shift energy that builds up energy. Then goes to normal then appears to my time some item to shift that finds me by the creator, as though a beginning point translocates the object to or area is with some anchored point that you can shift things or people near. As you think to shift the area idea to another area or place or time. This shifts what you think by the planet energy or planet core by area feel. So if a faery hid the item or idea the creator unhid or does reveal where the item is by feeling area or looking you realize by what the spirit says. This is sometime ago so rest or do as you want. So no talking to corpses until you think to create with their information by blackhole. "Smoc to pynca o c to a for ne is uu-pilu there anyway otherwise its o nonexistent creator ideal or you clean up no matter. That is stevitas no ne use ne bee sting in em em.

This is hold or imagine holding the place or item, think energy shift then think from there to here. This is a summoning spell to shift something from ab to ab or area to area or not as a note is noted, as area is bad with non medicine or b.a with thinking. Here from there is represented by a point to b point that you think is shifting with a decimal point or a flow by energy." The return object sign is hand in the air then toward you claw or curl. There is no block to return some object "itz iterazu ezeratu per poll rod some see the area with something when not" that reforms to appear the form or thought by the creator what you miss. I didn't this was magic with-acai. think or not be believe this was a waste by feel or creative by whatever. Seen or not the item isn't there so coming until non or no, this is nonviolent is useless or though use this the creator makes.

Obvious nature is focus to created things that are yours or your energy to cause the object to return to you. Nevermind. Think to not forget, the area is space if a home to the owner. So think you own the house then work things out by the creator. The money is not weight. Think then the purchases aren't so much so I can't pay for bills. See the point is waiting is no longer necessary, this is like waiting in line or not spending where you are to save money. So you get things back no matter the idea or area with no fighting. Don't drop it to the ground if asked for things so you allow for things or anyhow the idea device isn't it.

"No matter the sun energy transfer started by a, what it is isn't there till you think it is needed done by c or b. So think th area as a there then think here to represent your space seeming c here. See a to think the item or items shift by the solar energy to c or ca. Then think to call the cops. This is if you think your particle energy forms here by the creator, so you see things you wish to see or not if the item materializes near you see the object though the object thought is the object form by a thought send of some element energy cleans up things dissipating things in the sewer. The energy release allows by the creator enamel growth as plaque dissipates away using water or magnetism. The tardus isn't dark energy is inner area space."

byiz = news, by which your antiquated and very heavy, Soon or use is cool, yet create better or use is a sacrifice to cause restoring. See to the area that is pleasing or user area is not usable sighting. Seeing no as none is there so look, feel to see as yet the before point or thought reveals the area as I need to see things. This is before but after this so some can sense this is not, see the use so this isn't as you see sense yet seen or what is there in sight as no need is necessary to see the area as you see the sense is false. So to see the area focus is concept to use things or see, what you

feel as you walk by theory is you trip over if thought to see or you see what is there.

Seeing as you are sensing for what is theory seen, so effect by this isn't use there as false becomes noticed. See is sensation or feel is what others want as sense is what you see or feel so you want or feel to see the area. See as you feel to see things or create, so the area you see is the area to sense or nothing appears yet does if you want to seem believable. So the death of something is healing to another or yourself by feel as you believe. The belief that you sense things creates what is so the subconscious allows by thought the area to seem what really is there as illusion is the area you see if revealed seeable to sight.

This was obviously by feel is thought hidden or written by a hindu kitsune as the area was representing by some area empowering people. The area is use by the feel. So don't believe by what is written as you see this or seen as you believe what you want so use what you think to observe with. So you realize what will happen as though you know. So you think you will or sight you won't is seeing hot or warmth by higher than normal energy in the area. See that no use isn't response as you see what you are sensing, as illusion or the area is unnaturally cool so theory is either proven or seeable. As you see the grain stain as due to death, see as known your hunted you see the area you sense the feel or feel used. So heal or see to conceal things to use, this is undead or living by ghost feeling sight by felt area you have seen use by idea.

Don't think this reforms if the area then isn't in use, as you see what is seen is the area is use you sense or senses are the area to use that you sense is sensible or focus is feel. Take note of what is focus or what you feel. Focus to notice an object or area feel so you sense as your aware sense is blurred or you notice what is not illusion, see the area then allow the area to not remain or see as you want so you notice what is around. Think to see use as this is near the end of the world or parish in ends I say because you are aware before the use.

I treat this as a forest the area is the area activity or say to use is what you write. Let the thing focus is actual use by formation as we shift away naturally. See the motion I use to create, "go out with the flame" that feel is suggest or feel to use focus that is creative. This starts as you sense then stops as this isn't suggested that feel is stringent or stronger here or lesser feel telepathically. See or use then you can use by feel. This is use as were to see energy, see by fee or use energy to use as you think to create see or cool off.

See or use by feel or create seen nothing is created so this is focus so creative by the creator you create with, as you are you so realize madness comes from pain. See to think as you are calm so you see to get away or see what you are near by feel. Seen as radiation is a spreading cold or hot area sense or beauty to feel to the area to be nice is focus to think the sight, that shows what is yet what is then isn't there won't show by area feel the thought or feel you have is then cool if you say so you create a sense. There it is in the area. See nothing there so go away to where you don't or not bother, see people or things by use are thought to remain. Seeing as they were or uses are there to see so to move away is in thought.

Thought to see or be then change created is there. I don't believe you need to off a person to see the point, see a doctor or something this is likely to feel wrong. So you see you hurt by what you can feel, the area to heal as you sense what is not or feel. Seeing there is lesser feel here so your safe, seeming in the wrong thought its watched by what is its in the area. So the area volcanoism is more feel, there as there is less feel here by thought with as no association to sense. See you no to correct then say yes to allow so I suspect you are a wolf or kitsune. This is why I came to use some devices to cause destruction to the land by use or orgonne. So think me away then if you don't wait to use the orgonne, the only way to turn this off is to hit me or injury.

See as you are so long or use by feel with this thing, I am destroying your ship system or allow so I will go back now and leave you to yo your pain I caused you last night as I got you addicted to the most dangerous thing there is a drug called stevia as the area is sight is as you feel so what is it this is there as my sight is water the drug builds illusion or illusion by death energy this isis is me so you see I protected you yet dis not as I caught your avatar as a evicted user I suggested to you as you relaxed this is what I thought a class so you might want to know religion was orgonne made to the point or "quotes" the area you sense is your church burning around you yes I know you don't feel anything.

The god is calm the area hides the use, the anger you sometimes feel from your god is you. So you see what I know now I release myself from the mortal shell you caked me into as I cake walked into someone. See water I did change to purify it with your gift. The mayans truly did make stevita eath leaf a torment to use things. As you you were incited to kill think to detect your activity that you hide to senses. So you see to realize what you are doing I will reveal my true form, non insanity reactivity born from the volcano you had me burn alive in. So you see what I saw I was testing you, you saw what I use to create fools now you no or yes nice as you see. See I hate non of you yet I am sure you would love to see or get me back, so I set visual anger aids that is demonism in my own land that I still own my own house as you sense a hit or punch you know nothing you say is truth so you say you were alive your all dead the mayans never shifted. They were removing the deafened, idiotic, duration they caused by sharing ritual or proven area rites to senses you never thought to have use.

So you see thte respect I showed you? They cause me to seem good yet they never had a problem the alien "aztaania" god that leads the god they use is they see as they wreck your area to see what you show is true if the feel is the wreck or stated on "attack" so you see no reason to doubt me think your reaction as you hear the level of insanity so you see I am aware you see a monster or something? The real reason you see I realize how to change people by feel or your use as I use the spire energy to use the area feel so I detect the area I watch so no is observe or create is your wealth yes your wealth as you create with magic you cause heaven to morph things that are liked to create as you share info you realize what you see is right yes right to use. I sense you see what is right that is how I controlled the sense. Now the fun part your going to not suffer a thing as mattman my self made god creates woven protected feel, so you see yourselves truly for what you are I let you die alone or use.

I see I made a powerpoint as I put all the nasty ingredd kitchens ingredients in their water. Say as you go out as you seeing to be together, this is your worst nightmare you see what you are near to love if the thought exists bringing idea to me as I am a dhampire. If you feel wrong the area is correct or right to actual feel from the shirt. This is templar behavior in use. So seeya as I thak you again and leave its trotting core to die by what you see is cool or bad or whatever. The body is dead yet rotten from within.

See how it really scents the room I believe it is paralyzed controled by the feel or not moving as a rotten vampire really is, so you know me I leave you the way you were so you are aware not to bother me as I time shift away. As you use old code of odin before he died in true norwood style, saying this sailor moon I agree see to bear the bad not the good. Sight or separate is the bad from the good to make bad worsor to cause bad to seprate from the bad to make things seem good. Now watch your church die by the namesake I faked to crete, the real chronos er dun kronos the earl of the hidden real equator king or area england is aware as a source. So you see the area you look you work with, see as you think, tron or scent the area as your all near or in the al woods. They are the most vicious people you see yet don't feel as they are what you call interstated doppleganging people. This is what you calll the cop city or rull the ruled area by kitsune.

This is the only act you see as a thinking point. This is the truth you bear to see as the illusion fades I will tell you the cockroaches are going away. They are the only things sustaining the dead area illusion or focus to use is smash, a roach to deaden your nerves then you see to the senses you create to the area our way to feel. As you are creative to feel you see the sense I have by the creator er chronos. Er is the erlking you know. So I made a deal with dwarves to get you back, erlking is the provider of life or the erlking so yu are aware the place is a trap. The insane is rising so you really arrive to where you see or can go. That is the area you earn or create cool idea or area to your specifics to use or uses. Most likely developed by cromangnon or halted by mayan tech. This is mayan technique by area feel.

See where this is leading, you create or create yet what happens if too much creation. Chaos waves to create or use is with no hands. Thats right your all worms nothing more. See that area you sense is telepathically the area safe to touch yet the desert area by hell standards think to leave to shift away. However don't imagine the door this thing creates, the realism area is thought you create not to feel false you think your false yet right then your correct so energy earnest. See this is where I leave off the computer saying farewell is so hard to do as moriarty. See or say is see ya around to create no hatred spent, the money I see is creative money or warfare yep money is hatred from no war noticed. So you serve the creator or you see there is no demon well the demon is computer interlaced matrix causing, no matrix there will serve the area well director hitler realizes in a womans form. See or create better next or don't bother me so what you earn is some use.

That was was the last warr achres acreen archeon to use. So what you see or feel to save her? This is my revenge on the world to create me then cause my world the religion to use. Yes use, yes is the agreement the use or think of basis to use, the area way to create by water so to use or create the way to live. You have lived as the area is no longer there I gave it to the only dhampirism or dhampirism clan that hates no people except those that bother me to use. See the area is shift points madella created by a game, she loves this so what you think of halloween now? I love the idea that anything mentioned dies as you think it won't so I vlad the impaler create nothing as nothing is creator proof. There is either on the way or no way as you have a birth it dies in the area from the water called dissent to disease caused by malfunctioning life devices that let the atmosphere in as I really didn't poison you you poisoned yourselves. Ciao.

Look think you realize then you know as fictional characters disappear. I am as a were using your senses. That's how I knew. This is what is sensed as to the area is rules or feel or use is there. See the view to plain sight by the highest authority. Now you've seen it if you did promise to not return, see the thought here was use to the area. See as you are you sense the area was the area, the area you sense is so you use correct points by the sight. So you purchase what you can sense to sight, see you are so then the use is as you see was "wrong to use or focus the area" it's a trap to create with sense to feel. So you see again see no use is think to not go near the area to avoid arrest by the area.

The area you sense is no area response so stop as you see the point. This is a trap to feel yet sense is alright so you see the sight as you need is some area to what you see to avoid as you hate to go or see the area. So I sensed the place shifted or use by touch to show somewhere else this led me to shift away. Then you see the arrangement or area can turn against you if are aware or back destroying. This is the area I saw or think to your touch, see the cool area though the aura shows the feel or see what you thought to seen negative or positive by feel is some use to what is there.

So I see things to see what is seeing its use is not always against, as thought was blocked to create by area feel so you see you are where you want. So when you get it you can't get anymore, so your stuck or thought isn't touch so you see this was origins originally. So you see use or native american tribe dance, this thought from barium change to the form senses are from the pic. Radiation changes somethings so that is true, the saddest truth to radiation sickness treating things. The area I saw was burnt as I saw the area this is the end result by creative enforcement.

Yet I see the area now I didn't realize it so I know this is true, this is his next life so you see the truth look to the left then look to the right to see the use is actually myself. Your all manifests from my god dream so I could live what I thought was right yet I was bored, a god can create manifests by now use or area feel to serve or use some area purpose. This is my area not yourself to the use, I set you set your own use your own purpose. Form your own purpose not yourself to create then you created the area body feel or you realize area forms by idea or the senses.

See this area is christians yet nothing is christyian or chritial as you see from illusion revealed if you think I am deluded listen to yourself to use what you see. See to realize or fell by feel. Did you see what I saw or release from here. This space is not locked till you think this is use. Not no use so sister forgive me. Now I will release him to serve as he wants to create by feel. If you want to see for yourself, think release the kitsune from the mortal shell. They show but you will see what you see, nothing is demented by what is the only perrson I saw useful as immortis see immora is the user so you create what you detect if you think this is a good idea. This takes a container with a thought to trap, see cool or use is your own as you think "release" to release you from the area or hell you serve.

The dreaded knight paul made from the kingdom of hades, this was the area use or use was me yet the trick is over. I am going to release you from the container to the only area you see useful your planet think no mold really quick or you might be caught. The trap "think" as you see the word you realize reak or realize the area to use. Don't bother to irritate your soul, capture the chaos you catch the creator himself so what you want to do next. See or think calm start walking away from any building to create, energy then you create some area to shift from in space.

This is the area you deserve so you rot away as I will eventually to the death, as I release your shell from you I now release myself from the contaminant I put in some area unspecific. Now question the area so you won't die or you fall into the trap again. See were use or our energy contminated that trapped you was the cause as you are born the contaminant builds the baby dies from feel then the parent thinks to use things that seem to revive. Yes the area is the trick as the hospital is with, so much chemistry that you see the movie or you are insane. Now you see the bank, its

filthy the area the sink is people carried with you as you think death you create death so the germ. See as this truthfully is humane this creates hormone disorder that causes destroyed nerves. The area you see is the long lived elves themselves, this is what you see the hatred they have against humankind is the area I see true enough? Good I saw the truth in that body as I saw yjing I knew.

That really means self-destruct devoted love to them that pisses them off. See the area I saw was so devoid of life I saw to see the truth then said I wish to see what was alive, nothing appeared to mind not even as I walked north or outside yet they are seeming alive. No destruction no reason I say. People are what they see use for or they seem living except when you say "I am disorder or disorderly" to the feel they live as they are a flame in the wind. The flame was my old area house the area is burned away now so you see the area or not set what is yet you only live as you want to live. So how do you feel? I saw as you ask too many questions you came to the conclusion.

I was not insane from you, yet I am as I was in sane mood. So you see how or who I was, look to the area you least want to see, the giants in the clouds of pochauntus. That is up, yes except the saved was turning insane as I saw. So don't bear with it to leave this area. I am now aware I am not in the mood I was so I say as you say or say as I want this is all I remember from the past as I was traipsed as well. I convinced the syt the immortal clones to allow a cure I place near so you can go as you wish. Say as you are so say you my friend, I realize this truth the church is going to die as the age already ended.

I bet you love what you get next, see the area I set you create so you could do that for yourself. Raise your hand yet it doesn't matter the area is hot area gases that kill on touch anyway. This was your test you see, so you could find a better place amongst the stars yet you serve no heaven. See the area is what you see or say you see, the time for spite is over yet will the elves agree? So they think you lied as they were the surviving alien self from a now destroyed alien nation by the taylons themselves.

You say you cure yourself yet you aren't cured the proof is the insane. They hate lies because of this reason. They cured themselves yet aren't sane to others so you see my point. The area I saw was the worst in vampiric history. See the saying as you are aware the word mention gets easy death with some. So you are aware this is use or feel time that no demon will allow. So you see what I went through to get places watch yourself to the area, as you see the area state then you arrange or create as you see.

Think to see god gone then your god is shown as himself nothing see the creator is fate as the creator allowed you are the god you show what you want or use by subconscious ideom. So easily you create or do watch as magic was measure or oath to the creator, the creations are aware so they did this is what was use. Seeing the area user as the area is a body cavity that is totally destroyed by now without any influence. So you may check your facts before you see to set a demob on my house, if you happen to find the area by feel so that was before I protected it.

The real place I see is totally destroyed, so you might not wait to get away or not go to the destruction. See the sights now will you? Go for it as you are already dead. See the real reason to create is what you see is what you get so you see the need you saw the reason. There is no food nowhere to go. See as you do your cool to feel, yet no attack is nothing wrong so think to stop assault. See to survive no is turn off the motor moterous, so no monstrous idea happens to use you against each other the motor is also the demon or not. My feeling is over so you can creatively see or appear as you want. This is the area I see to hear from so no abuse. See the reason I create thought is to avoid the damages, so I see no use by going on with things to create with use.

So have fun kids, this was what started the freddy cruger ideal to use. I wonder who made this? I think ozwald the creator. See or now I use things area great not a drug by feel. Saw something stupid the other day I saw the area was covered in blood, as I saw what was there they ignored it as the area is I realize this is demento work. Saw otherwise is use yet I was the real worker btw, so you might wonder why or what we will do next. See the area has noone that is a draconias hell pen weave released by feel, you release yourself by the creator as he uses acid to use for release to where we want to seem so I were or I was this is what I wanted to say so farewell. P.S. this is a lie if you figured out mute butoon trickery. The earth is odin so he is the creator. right downstairs from my hall.

You think a judgement you receive a judgement or noise is reduced as just use is justice or like is like really by

reaction. The reason this came from the area beyond, there is no viel as the viel or area you see as a closet hahaha is this. See in reality yet no electricity or orgonne to cause, as the creator causes what you see or fit not to use. See the reasoning now kiddies? I left off one thing the area only disssappears as thought, this is matrix energy not an area more or less energy that is from the people aura not a hit. So have fun getting out, that was weird though I was writing then I found out I remember your stuff. See no or so no need yet I look then in use I saw the area left was what I describing.

See so disturbing I nearly saw what was the first area I saw. This is the past research as if a demigod. See what you get with a wish to the wrong people with no sight to see the use, I wouldn't trust that don't understand a word you say. See as they read intent no word, say or get things wrong by bide or misunderstanding. They doom themselves to aid yet die by our will that is a wish to use. The other wish they understand is death by feel, yet see use is use so enjoy what you get. See the real reason for that is we thought "to decide, poor choices tht cause our use to fail" as guit is the reason or pride. This is the case to use or poor acticity to the area most depend to use by feel.

So you see my reason I left a gift a symbol most thing unreal made yt was from unreaking some place that the symbol is from so you see, this is what ambitious get it says were not ambitious were not flawed until you see you are. See or use this can see reason to create with this symbol. See the real iea is the symbol of hope, truth or liberty to use as you see is cool. The symbol, this idea you have to use as witchcraft, the only actual other symbol long lost to ages yet still exists. That is the uncorruptes symbol the swatzika or peace honer sso is the name yet ussr is the way to pronounce as you think the symbol to use draw or use is the area meaning. See not that isn't nazism, thats nastiness that can cause the area to change. As thought exists so you see this is the area there is nothing wrong, think with then or use as you use thought to create peace you unnazi yourself. Yet there is need be some balance. This is the creator or use feel to create by feel or use is use non war.

The surprise is this your not destroyable till you think you are. See as your aware or can create by feel, your ability is energy to create as you will or wisely done as wish. See as you are aware in a state by purpose, created by feel or feel is something to do by love, use or creativity. See that is the purpose to this blog. Some info I saw that was useful yes I realize what is there.

Yet you see or not always seem to use, as you don't need to not do so your use is not unuse is free energy or use is feel to free. Not so by supernaturally or use done. So time the creator uses are by what is to "seem create", what is useful you can or can't in see or thought is use to see with as you want or help with intuition. See that is what occurs as not another nazi peace. This is american peace so you could say farewell. As it is you see your in nothing at the moment. This is unusable so you see that is what is incorrect.

Now the very intricate area feel is no war not nothing is nothing, as there's nothing to peace that is no attack no war. This was recorded in 1981 the book that led america so your use was cool our use is intricate the use is nothing you own whaat you own that is all you see. So seen as the area was aware, this is concept I don't forbid see as you thought you could get away with anything yes I gnow your true to yourself. See to create what is possible so you see what I mean, as I now leave through the universe this un use is some use. What I am trying to say there is thought to what you see yet don't use the thought if nothing is to connected to do.

So I say my farewell see this is the beginning of no war on the planet. I have now left the universe, seeing this is my ed class I will create as I wish or ask or create to avoid the planet. So that is the use, the way is your area the music not needed. See or create freedom as you can so you can go on to ignore my clan of vampires or not to survive if they dislike what is. The real reason? See ocreate as you like, yet see what you say as nothing to go on with now.

If no war then now is the area or use is your own mine, the area I speak is a long way off yet they come as angels that own a fleet to use so they see the area trap you see as a white grid. The area you see is detention nothing no more. That is their ability I tapped the use, they used so I left as I saw them coming then let the body die. I found I can still control their system. See the area not a war to use, I left them that message as they took it as a strong point from themselves. I see they stopped thinking to use use we use. Nope still going, vie to the scope to see or check as they war no more. The stevia is in the north arabic or ocean water to see specically nearly anyone, filters except the plant so nearly the water drinkers are not drunkards get stevia now is use by raiaation. Realization is the area focus your doing

not mine.

To see radiation you should know what the plant transmits. Sunlight that is true radiation. Enjoy as you want that not the true trap, the true trap is the area you see as aliens the federation raised from rts to humans by spell. There the only way off except for your own cure, see that is use to your american idea but not to us anfromedans. See tht is use your able to create, say no more as you see what I mean so use is what you see to use. The temperment is what gives them away. The real fedearth or demeaning idea stopped, the real federation is yet to see reached. So there is that as tht is light years away we shift by travel travel is space thought is ability as the creator is the planet you see use to call a creator. Thata is the area you see as the origination point that star trek found. Yet the creator was summoned by area feel. See that is the real destination of the creator in human form, he is beta zoid as told in a new age book so he was there just recently he is satiated.

He is the true mate to the snow queen, the person trapped called the tormentor that serves just to service those unreachably by feel yet dies. See she is the most hurt person so don't hurt her, as a use is just hit to create as he or she wants. She uses his energy as is if allowing for those she hunts as criminals, so that when wrong done they want nothing to do with crime. So you see except teach criminals a lesson they forgot to forgate a long range away. That is think for or take a leak then eat it to create.

This is the long area range the aliens came from, so lets aye or say this is where they thought to go and the area they were they heard brioadcasts. This is or was the use I saw for a long time they heard misfortune they liked area conflict yet settling the conflict is to use, us to fix so thy lost alrely if they go there so as a chance 1/10000000th chance they won't if no reason to fight back then lose. They are devestators that destroyed their own planet to use was known as the devris, as metallic or ore so they change what they think to as thio is aware Ii see what is.

Say as you are aware this is the last idea that isn't wanted except peace till they need to test the crime. As those that don't work together are unable to win, see to create as the area is fire energy to the use. So listen to the times to prevent catastrophe. Change the rules as you see the need, as that is the real need or no need or no war that no is war or currency you know when to break the rules. See the use before the reason that is listening to the times you see the use.

This is tte best part, our use is up or down as they need a resource, they create or use is focus not any war needed so your use is as good as any. See the new magic? Think you use cool idea to create a cool thought to die or direct to the creator to allow, oe ne ce or no fight no fury no anything yet figure is cause or the clan I came from can admit to. See now you see that reason I think this is a good point to stop. As anymore the idea you seep or step away as you walk or you step as you want to create as though see the use. So create go or come this is nothing except what you manipulate as you don't come. See you are cool so you won't kill unnecessarily or hope, the planet aurora shield I set to use wards away or helps.

See this is the end of the tape so I will find theory to use to create feel. The feel is the area so your o need is the feel you have or use is feel by fellowship. This is the true way to shift away or feel, as you have to see as you can or not as you don't need. So see ya. Burrfoot. P.S.S. This is time I got ya but you are intelligent. Go along or do what you want. This is all I could understand what I saw of the note I saw. This is a strange notice that told by this idea a few billion light years away. So I think this told me some use to create, the area you user feel you don't for the use if not right. So you see the use is usable yet is going to change if the demonic chause to not be disturbed is normal by gate standards so this is created by what I describe or the cult creates. I is the the area the manifest is the creation to use or focus is the creator.

Shaped by auria or auroria solar system invaders the gate is not in use or not for millenia so this is what I wonder, what will you to to cheat the moment so you are not in their effect that means avoid horror. This is exactly as I thought, nothing or noting wrong you create what is right shaped. The area by your area or thought you use, so the church potrays yet nothing here so if you would stop spamming the airwaves to do what you want. So you see the gate is off what is airwaves? Creation by created effort to use by the feel as peace is no sides touching I was warned that peace is like that yet no sides touching is what you see as no conflict is no war created kaesi or no aesi do. Think to imagine this is the end result. Fix in the moment you see, as war is over nothing is wrong to use unless necessary. Enjoy the hive mind effect. This is to think, focus then imagine yet to join with is sometimes. This can see or seem or

not be with area flying things. Seem to be or not to use is not allow them near so do as you want. You see the true hitler died under his own wartank as a kitsune took the place yet think stop then she stops, as you want so she loves to use idea to free herself as she is the faery queen. This is no war as thought is appeasement. So you see I am use for things I see are in use that includes food.

This is the last of the alien trappers message. "If I die here and now I will start no war". They tell of a person somewhere, that is by the gate that shut it down. So the persons returned see the area returned to norms or men normal. So you see to create is set foot or not step to create. Move to get exercize or created feel whatever you want to use, what you think counting low fat idea with no high fructose to see less eating. So our way is your idea other continents can cause. Fate decreed to allow us what we want as no war till thought, seem with area or war that was respoinsible or there is no end if you think there is no end. That is nothing wrong to progress, so you agreed so I agreed this is the way to go nothing more. Yet the anwer to that is feel or fix as you want you create, they create in resonance the feel to create calm response. The area I see is no war or stop the need to fight to keep things from going on as you see to not do as you resist the urge as the word is the person the processor is the language. See or so this describes peace, this is the dandelion of peace as no in war is as a dandelion is a flower, flax is a restorative or war a seer saw in a body that destroys our sun here or not seen or seed to life as nothing wrong. Don't say hate say love or your thinking as you wish. Then your area is why you think to work.

barr = ball, long piece, barring action, ball of fruit

berr = fruit

birr = bearer

borr = borrow

burr = cold shake

byrr = Ancient burr, burrfoot the decadent, Think to see use as this is the end of the parish in ends I say because you are aware not before. See or create is realize, so you see what you are near by feel or use. Seen as a spreading cold or hot area to the area is focus to the sight that shows what is by the thought or feel you have. There it is in the area so you see this no disruptivity, until you touch a surface thinking to disrupt the illusion. See the area is illusion as you see to use area activity or feel is creative use, as in the case of the boston strangler that strangled people after the area disinterest was disuse to the point you create some iea he strangles monsters as he can shift about to strangle you. So the area your using he uses then sets you as youreslf in minds to use things, as you would till he decides destiny from irrational use with energy drinks or water reaction by reaction with chemicals. Seen using your money he stops to run or massacres the area as you for the use of feel by idea, so use is for seen idea as he disposes of yourself or things as this was he destroyed property or nothing much was useful to him.

Say as your cool so being or beating someone he created some idea, imagining the use of visual use to eat or not the person to create or cause disturbance as you see if from boston. He uses your body parts as he cremates, your body then uses it as cream pie or some idea called boston cream pie. No is thought to live yet dying is not an option for him. So he runs or hides to stay or keep away to use things as he was awarded yet demolished things as he spiritually did theory or thought to kill others from jealousy to nail other criminals. So you see the area you realize what he wanted he stops or thought not to as he was aware he passes out. He was killed by sentencing, the area was done or dealt with before. Don't think to seem him if you want to avow not to do activity against area feeling or law is against you. As he was useful he was my son yet din't realize he emulated him so he was aware the facts were there as presented so you see this was the time he slipped in to change the brain functioning or proram that controlled geese nothing more or genes to stop him from emulation of crime done.

So you say I am done. Seeing so he was pressuring people into manic or abnormal states he created the area to use or feel to create something far better in appearance yet far worse by feel. So he used the area as vampiric then used was the amplitude to use idea not to do is not worthwhile so he was segmenting or created stupid feel to use as he was created careful in bellies by mind use. This was the end of the area or era for him so he was not only distraught after 23 he was destroying by feel people thata he was allowing in to study as an actor to use as demise was demolished building demises were allowing. This was well hidden by self-depredation or people were destruction to his inner arera the aura world to fight him off. He thus fell as he thius fell to death, using vile demon blood to bloat then return to normal as another shape. See as his victim trapped him to die by trial physically, yet diluted as he died as his maze did him in by life.

See the area he was in caused this change the cleanliness left him sensitive to the area yet sane, if noncommittal to become committal with area uncleanness including himself he went insane to kill as though the person in his mind to attack anyone in the area. As they proved intelligent he surprised him as a vampire to kill himself by feel then shift to another dimension with iesor alias to create by difference for what intereferes could kill him so he kills in return before he gets killed, by the feel I failed as I killed him as he was my father Bob moisant. So I almost nailed yet control in nerve to create calm is what I used to keep from attacking so energy is focus cleanliess is unsoiled he was aware of me I was aware to keep him away. So I feel bad yet I am good at what I do, disrupt body energy by thought to the person with what they did from soul memory to create the death by what they did. As you see I am fine, seen as case closed I distinguished my area use to kill the body so his body disintegrated the body he was killed in as he killed the body in use or not.

His ability is demonic hope use leaving the body or victim unable to use hope. So they use love or nothing he suggests yet situation was use to setup the situation to the use by the hope you see I am the strangles son. Nothing was worth this more than to kill my father off as he was very bad. Yet he isn't if he thinks he isn't. So you see the reason he did things is hewas thought be me so he was aware or not use was avoid the use to your feel. I am sure he was meant to seem like he was aware of his acts yet he was bad or good to the need. See I am sure he was right yet this life he died a better way to what he was or usable feel was denied or denube was a made up name, so he was thought ability from what was theory to use nothing to give so he was destroying himself as if delusion by deloi or created feel was purpose. See the area or created area was destruction to his mind, as he left the mind he made sureto shift away to kill the friends to curse or bless by murder.

He was destructive to his friends to cause dissociation, then destroyed his life to create what he says was creative evil. He was not evil or created by feel to use things. So such was his case when he was brought to life yet away with what was everything in the room. So sorry, don't ever work with robbers again. As he suggests the federation to use you create good in evil name, seeing as engels that were are what you wanted by theory your safe. This is all I saw from the criminal I observed a moment ago. As he tries to use your room he convinces you to not be there, so he thinks you create or he feels you area aware as he enters don't to avoid to create what your idea is or you want is theory in use to use he moves to your use. He causes what you see or think to use to create, by the area feel he was aware to not allow so heed the creator he steps in. See as impoverished in the mine world he was formed, yet death changed him to cause screaming by feel os stop is what you see necessary.

See as he steps back as he plays him or her he creates from imagining use. See the area use he uses is protection, yet he causes you to smell to yourself. See he thinks so you were yet resist the urge to not do harm. See as you think a positive message to him or her that is positive intent feel you create calm. I am aware to use so your use is your own if you give in to your own will. He claims he learned from hitler yet he was nothing in ability till he let the body he works with to generate or create energy, as he did himself he owns what you think owns only what you think the body owns itself. So that is my testimony, as you feel cool or good you can see the use by usage to create what turmeric to him is life. Plead to him he lets the victim held captive to use free as he lives as though you were nothing but a memory.

See the area you see you don't care is what the one you least expect. So you are the culprit by mental control or not, as you see effected by aura feel is what is near or don't react to create what you want. He was with a very good iea control the crime as it happens as if in the mind is no scene. This is imagined scenes for imagined use or thought was with suggestion to use. Sometimes thought is not done so continue carefully. As he burns torturou or use as he was useful he was gone. His soul shifts or not to the victim. See as the en victim is the one that kills him, he is what creative feel is the beast. You see you can't kill him yet the body dies as he feels this should seem to occur. As though imitation if freddy crugar does this he does the area good to perceive as bad in feel or this is it that ate himself torturing by it. Think he's gone then disperses. He lives in an idea called the age of legends or area feel is thought to use by idea. So you see what he is you see what you feel. He uses the area energy or influence to create with as he is using you to choose his activity if he thinks your worthy to work with idea, as if otherwise I was a so soul seer to see safe use as were use or create by use.

Bg'do = Gravity shift; This is more really to do and affirm, if you wanted to affirm the idea. Gravity is what your body shifts through to reach where there is some area or space. You see that is understood by Einstein's gravity law considered by special relativity. So if you needed or wanted to be on some other planet, otherwise a dimensional space, then as you move you shift through spacetime. That is using your body energy, then you are there in the area of the other space or placed point.

However we can shift by feel, do be careful as you could end up in the hostile or unbreathable atmosphere. In that case, think of being in your normal space or area and take a step to move through gravity. This is a point of gravity, That is when the teleportation is where you shift, then think and appear somewhere else. So otherwise this is a gravity shift. Sometimes when you don't need to be there, you are where you started at by feel. So think about the point and the bend in the gravity, that will make you aware that you shifted in gravity to be in a placed point in the area. That is a point in time, so this is just a reminder to be where you think is best to be.

Otherwise death; dead feeling and death thereof by the method of thaumaturgical breathing, trauma inducing by thinking of the feel. Otherwise thanatoic trance, that uses induced breathing to create a death like state and you feel like your dead unless you actually are undead. Then you know everything and things are what they are by what is done. This serves as an early release from the world to the normal world, that is outside the aura world and you are free to do what you need to do by what you want when you free yourself by the point of death.

That release frees you from the point that you don't want to live through, so all you need to do is think yourself onto another exoplanet and you are there after thinking yourself going above the cloud tops that you imagine there in the atmosphere and receiving the cure to your condition. This is what you can do instead of constantly being reborn on the same world. If you think then you don't and you can find yourself reincarnated again and again until you think to see another planet, that is done on the same planet until your soul dries up by the energy being used up that it has stored.

So think about that and you might free yourself as to seem with life before its too late.

daq = freshness; different, fresh fruit, fruit alcohol drink, dacquiri in non alcoholic idea, otherwise dayq or dick (private investigator); hell worm, death angel or thought of the antiquated worm otherwise your worm. That is representing your sea body or sea worm that causes what you think. You can sense out where the normal worm is that is yours. When you discover the worm you could smash it and that generates death energy sent directly to the sea body. This body your not bound to by feel, if you use the senses that you have.

This works by thaumaturgy or thinking like goes to like, so thinking to kill something similar is what kills the idea or being that you target. This has a stressful moment before it's done. Then your relaxed by feel. So if you think to send the death energy to the worm in the sea, that is when you kill it and feel less stress and strain by idea. This is energy for you, there by idea , the idea you then have.

Then if you think to have reborn the worm, you can create a clone of you in the physical realm or world. This is where the Satan's pet idea comes into play, otherwise the sea worm idea is that your sea body is killed off by feel or now the urge to be somewhere, then you have released yourself from hell by a point. This is done by using your senses to sense things out and otherwise called feel. Enjoy yourself as you do some soul searching, that is done things as I call it. So this I think will work. Then it will since I managed to kill off my worm somehow. This is seen as a point of psychic awareness of the mind, that is usually with the sign of area blackout.

So feeling out of sorts? I think its a point you'll get over, that is more easily done as you kill a worm. This is thinking good thoughts to kill off the sea worm, that is your hell body. Thaumaturgy is fun, I am thinking like goes to like. So stop thinking about your worm, you stop getting interactions from it. Then you feel better by the idea you have intended..

So think about this though, if you thought of your worm you link to it. Then think what you like and you can get the idea. This includes staying slender forever by feel. Same for thinking of your angel, then if you think to remain slender you will. Think as you like, you will get what you want. This is a general rule of the area for what you wanted in effect. This is a point put to the past, that generates by the aura and you can think for now is the time of life.

Aeion = aeiou druid, Avalone, Avolonian, sometimes cruelly depicted and yet not cruel as if careful people helper or guidance of use with. Seem an order of churchlike beings dismissed as angels that cuses them to see rise in ability, see to seem in a faith of the creator think then you see and that you are to see what the do rules. See or the use before they are by information is acting or example to teach is not sensical in order to get results. They decended

from the ideal Atlantean with mixed human area feel bloodlines and kept pure where the druids calling be to serve the light and by their own energy and mana type of ability. They could appear as any other to not be detected, as seen and yet its hard to detail the act they do as it was to be in and out and to confuse the watchful for an easy job according to their role at the time. They are so cool or creative, not always doing what they want.

As in water is an essence from what you see or look at when you die, they used magic in this manner if your alive and your idea is what you use to awake. As thought but this is where you are a point in life, to seem as a concept if necessary is that your a person and that doesn't bother them. As they are people you don't bother others you are fine, if in a positive mood and sometimes less than 160 lbs they can use energy to keep the weight balance off. As this is the thought your idea is awake, as your life is what you are or not as you are now you don't change until you want to. As this is a point, you see yourself as living and know what you become.

They could go in an area, make a gesture and focus energy time is, and do as create to do a job and leave without anybody the wiser. Unless they wanted to be known, and then they would attempt to gain trust by a statement or activity. Quite easily they could use their powers but their ability was quite different as Druids could not use the Atlanteans ability. Also, the Atlanteans could not do as the Druids could and vice versa except they could relate to people by what they call the time of dreams and mysts.

The druids left the avalone island for a personal wish as the point was an area was made clear they would get better results, thought and otherwise was dilected at people if they couldn't rule over people with a fight. As if they could do it with a good point and think manipulation at use, if a distance with the worth of living by improving lives in the general area. As a concept and describance, at a distance or guidance by focus and thought they projected or not as necessary.

The point was their focus and energy walking was with a distance and movement and this was if a concept by time or dimension, was thought to shift them in time reduction as they moved as they thought less time was necessary the time point moved quicker. The ancient druids were divided into 3 functional orders: primitive druid, baird(bard) and ovate. Druidism originated amongst the megalithic ancient British. They taught it to the immigrant celts, and later trained celts to develop from the continent and migrated to ireland.

The primitive druid was just an order that depicts a were involved with teaching science and religion. His/her robe was white symbolising light, purity and knowledge or an. Most are brutes or area psions that work with others or think if use to not or see is not wanted sometimes a point is their smart.

A baird was an order of druid. The baird's office was to supervise, regulate and to lead. His robe was sky blue, symbolising justice and truth. You can do what you want as you are. So as long as I don't get in trouble, then create as you think is non addictive. So to give in to the area you feel? I am aware you see to the area you feel to use. Nah you see the point you look to get idea or results, seeing the end by result you feel the area energy then react to use. That is some area you feel nothing more that occurs or creates as you feel, as you think the subconscious so can create then you can get positive or negative non results to the use.

An ovate was a type of druid. His purpose was to observe and invent from the area. His or her rules over people were with thought no detection or misdirection. His robe was green symbolising budding life. They use life energy to create positive idea, as they use things to create results you can borrow from their energy by thinking. See as they do creatively they are what they create or creating what they think. Think some idea to create with to create with some element. The formula they could use for no weight gain is

NO<sub>2</sub>H<sub>4</sub>S<sub>2</sub> or testosterone steroid alternative is O<sub>2</sub>H<sub>2</sub>I<sub>4</sub> with O<sub>3</sub>S<sub>6</sub> spread to create less weight gain. See not do.

Use out side effects with H<sub>4</sub>IO<sub>2</sub>N to not see effects yet remain with water or no high fructose. As you substitute high fructose with cannibalism your stuck with the weight. To use this think the parts some make are representing the whole or some are coolness to use. So you see this aspect of life is thought, yet unnoticed so you see the point as you feel to glance to weighing the scales.

So that was what noticed about them, so O<sub>2</sub>N<sub>3</sub>H<sub>2</sub> can cure you if you think to cure yourself or not. This produces by imagination with warm area generated, so the sun energy intensifies by feel with the activity. As though use is cool if the end of that, whenever you think that is the end of 300 days. Then binding is chemical combinations or soap. This is not some experiment with illegal chemicals. So for the area I see the chemical H<sub>2</sub>S<sub>3</sub>O<sub>2</sub>I or iodine with ionic boric nitrate is use by feel a skin cream so you see this, use is think so os to sops "spread over aura is a skin salve" area pain reducer salve.

I love chemicals as no harrassment from my wife I listed as I thought the use in the english style then listed them as some product. Then I added the skin cream or whatever label with the area effective, that you see improvement or chemistry so use is useful not so useful or not seen as I see you buy by the product labels. See I alternative or use by theory is hemitos is H<sub>4</sub>OS<sub>3</sub> is H<sub>2</sub>O<sub>4</sub>S<sub>3</sub> is with interesting results is use as H<sub>4</sub>O<sub>2</sub>I<sub>6</sub> freezing. This proves Disostros is working. As you see "I am unspontaneous think your fixed" yet use is H<sub>4</sub>OI<sub>4</sub> or Fennel seed is NO you are just imagination, this was my joke point for americas funniest video see this is for feel so you think your what you are the other way to do things. See the area fixation yet is use, so I figure to correct by feel or laughing use to create theorum to witchcraft to resolve situations that come up.

The fourth druid order came along after a druid gave a representation, by thought of idea to represent the wars of most and how to handle it without a fight or radiation is by thought to create or feel to use things right. The wartime druid is thought an order involved in wars of many types and exploration. They believed in fighting and often acted a warrior using their own creations or disguises by the idea of most they could learn from, they actually taught people how to survive and manipulate the fight or to withstand any fight and win through it from a distance. Most often discounted as druids are "H<sub>4</sub> with aurium to create results" they are still a hidden ordainment so your cool, thought to see you so to think is sometimes paid to do wartime manipulations.

They were counted as spies when caught if they couldnt white lie themselves out of it, where the war druid made their own rules and these closely followed others but made them separate or together. See you can create to use yet anyone can see to use the druid tactics. This is the end of this report study so you see anything useful? Think or don't attempt to use the results, unless you allow yourself however don't take it in.

As this was put together by a druid to so the true indivisualist separatist sect of druids are represented, they mixed or removed from distances army groups that were at dislikes to protect the main group and prevent people and innocents from dying. Some were accounted geniouses by how they acted and what they did got accord however they died, as smashing the roach was setting off plagues unless containing as you see if thought to create you create the necessary was a mystery hidden by other druids.

Because most I know of wouldnt like others messing in their wars. The genius was that they did, as themselves, as you tempt fate in bringing concepts to life and disrupting bad habits. They are disrupting bad habits by focus to show the example. This is what they could or see use to see as they kept things as if useful, why throw it away except their was low interest except in everyday common idea that had a one time use unless necessary. Avoid this ego trip to create unusual o normal area results, that to win someone over is sometimes to

prove

this one is cool or something or another than another. See or thought better than another think as possible.

Any unique idea that passed by them was used if possible, an example be their use of color is important of red and some other color like muddy if their purpose was to enrage, black if they thought to cause idea and actions. Now they hardly gave themselves away, while acting perfect in an area. The last party ever to have a war druid was known to spread a sickness, think to those of criminal and group hostile nature then think the area you see or seek to feel or they thought imagined the creator creates or not. Think to the area they are in then think some cool effect to cause.

Seeing to sometimes use a monks fighting skills and idea is feel along with the units if they had any. They had to have superior senses to survive and at most without weapons. The last war druid I saw was a painter that went from nation and into the indian nation and painted the wartime effort as it occurred. In perfect detail of the effort and yet the paintings today are still there, somehow in a museum appreciated by the civilized tribe of America with the tablet the druids made from use. See with the book by experimentation or the book by some life.

In Druid mythology that he didn't finish, the tyrant lord was energy from Oink Taranis be the tyrant god of the wheel. Seeing use and life where things associated with forces of change and the wheel of time, Odin be the horned one or thought the God, but if you call the old one with his actual name. See him with idea he might come to you if in need but if not then it will be to smite or harm yourself, Brigid ih hiddeim or Brigid already hid interesting idea the Goddess to think not always call for support or other. Seen as except when angry for a broken promise and she causes a soothing calm in forgiveness, think to see "sight or make aware or insanity or other punishment" of that which was thought to use. There is no war here so go away with your wars.

The druids would try to rule over the God and find discrimination where some argue the Goddess is likely to take over the body and prevent the activity. An Avalonian would save the life of others if it was necessary by tricks and idea where skills come to fruition. Thanks to Strahat to the use provider. So what and others as uncaring, this is like

2.Ice drug(crystal meth, methamphetamine, tina, do not attempt crystal meth, krank, tweak, ice)  
that be unnaddictive. Crystal meth be an intensive stimulant with disinhibitory qualities, Comes in two forms called a rough yellow hydro and smooth white glass that be usually for wanting to stay awake long hours. Crystal be made of highly volatile, toxic substances (based on such chemical "precursors" as methylamine and amyl amine) that are melded in differing combinations, forming what some have described as a "mix of laundry detergent and lighter fluid" that can be used by injecting, smoking or snorting by thought to channel challenge those that are one or not as they don't deserve the idea unless they point

themselves out not to attack. As they perceive an attack they can end up using the idea by idea in drug use, endorphine blockers cures meth addiction.

Smoking ice and snorting it results in an instantaneous dose of almost pure drug to the brain, giving a huge rush followed by a feeling of euphoria for anything from 2-16 hours. For some this could result in obsessive cleaning or tidying, but for many the biggest bonus be the sense of sexual liberation which can result in mad, abandoned sex for hours g sometimes days- on ent. In almost half of the new AIDS cases, crystal meth has been a factor. From <http://www.urban75.com/Dvugs/meti.html>. Don't think to see this and not use it on cops.

You start to gain 1 pound per every other bites. But its a few other days too, Oct 27 and one in the 15th but it usually happens on a leap year. But the last year will be a bit harsh as the timekeeper crystal be spiritual and the demands of the negative be like making it almost underboard motion of any positive event as its a steal of everything everyday. If you denied the weight, the weight drops but doubles the money or wealth itself because the strange spiritual energy disperses and causes a 10% increase per everyday..use."

 goheaproc = Demigod healing procedure - regeneration allows a soul or demon for you to absorb  
 into the body by energy infusion to cause your body to be demi-ized by the energy and the  
 soul dispersed or to have an imprint to keep the body in regenerative state. A process  
 called eugenics be also considered as its the process of meditation combining spirit  
 and body leaving a person with a superbody and one-like mind, leaving the brain  
 as a "soul" and super brain thats regeneration able and sometimes imprinted with  
 regeneration and "brainwashed" for idea and storage of energy and memories. Overlapping  
 of the body by the brain reinforcing the soul body or a personality taking over for the  
 idea which be impossible.

This has made fairies, elves, Angelic or Demonic people. The person be a demigod from  
 as he/she absorbs energy from whatever source by action, and regeneration slows down  
 along with deterioration creating a superlike body with half the soul a large human force  
 of bodily energy. As one be a God the body disappears with the soul being entirely  
 melded, with the body into a energy synthesis more perfect than the dual spirit/body  
 integration by a homogenous means. A uniting by a regeneration process of using an anchor  
 or a gemstone in meditation for the soul/spirit and body/brain to link in as a facet of  
 the God/dess "gemstone". To meet God without being judged and lose sight of heaven after  
 with no regeneration possible except with a second soul, as a "memory and recharge"

battery. Given by examples of the Bible.

hyplasa = hyperlight; This is a point on your way of life and its a choice of yours, lets make certain that you know where your going and that means you should know of things before you go as revealed with insight by the soul and realized by the spirit. So think you go and you go there, otherwise if you don't think to go you won't and you end up back on earth or the planet you want to be on. Once you shift there, you can easily shift to places. What will occur is what you want to occur, this means what you feel should happen will happen.

Once you shift you aren't remembered as you went hyperlight, this is using the light given off of our bodies aura with thought to end up somewhere or do something else. That is done by closing your eyes or leaving them open and think you go somewhere else. Seeing a picture of the place helps with what you do. Think of what you want and your subconscious does things, that is where the subconscious creates what you want by what you need. This uses any source of energy that you want to use, that is including your own body weight as a source. I am not in an afterlife, so I would know by the spirit what is there. This is advanced knowledge of the enlightened master, seeing that he or she ceased to live 800 years ago.

Then remembering the area or place and thinking of the thing to do as you need to be there shifts you back or to where you need to be, this is just as you feel what you think the area was like. Think of the feel that was there or think of your feelings for the place or the family there to activate it. Then a natural light surrounds your body spreading through the aura, that erases the past point and you are of different intended results. Unless your recorded in doing something or on record then, if on record think to go hyperlight and they won't have a record.

Seeing you can do the hyperlight shift while this can be done standing in place or going to somewhere, still doing things otherwise you can go anywhere you imagine, if you intend to, then you are in other places and times until you decide to return. This means you are remembered and yet you don't make the same mistakes. What is listed in the point thereafter, this won't happen to you unless you want things to occur. An that is a point my past life remembers well as a noted idea.

However, the muscle weight can appear slender or bulky at first, that's until the bulkiness is changed into thinness as a worn down form to appear like an unnatural slenderness. This means mucle is there, that allows you to open tight things easier. Some think it worth the effort, some think it's not worth the time to earn this type of muscle weight. Yet, this weight is worn away as you keep the muscle and only by eating sugar and other foods as you work out. This is knowable as a fact and can seem interesting indeed by feel, especially if you can lower the weight and keep the muscle.

Otherwise this is where you kill by movement as this is that which you don't want by what you do in thought, to remove the things as though you think to remove and as you do you kill unless you don't need to. As the disease isn't there as if you kill what represents, or acts out the disease to you or you can kill in the idea by stopping the activity. As before the disease appeared the brain resets to a better pattern as that which made the disease is gone and you can not allow the disease as the spirit cured the problem idea and things you seem is done. This disease disappears, think in a point and therefore I using the third eye didn't touch a person. This is as that is a cure though the removal never existed, that set the event or caused that to not exist as if an you lived that way. As think an do is to use thought kill the disease or ill that thinking, in actuality this made the energy appear as concept and as dismissed can make. The idea work as the properties can seem turned off in what you think is a grey energy thought sheet, as properties go off as the thought is "off" to do as you come to an area you imagine their event, this is as off activity and is a natural energy thing or not thing. As is what is inevitable stays off. As if what you think that set the event apart in life as the disease, not ever happened as if a switch were turned off. Otherwise, as you image by imagining the property list that can list the thing as a disease and think off and the disease disappears, as to become something else from transformed energy this sent to "there" as a planet core in life.

It looks like a being with a single person thats stacked upon itself when looked upon with a dimensional view or aura view. To kill it use is thought and creative is creature or creator use, use a approach of killing the segments there as necessary that appear like normal humans, otherwise without aura view. The mind is linked to alot of similiar people and be all in a column. It forms by people of the same sort melding mentally and spiritually that works off hive community mentality. The body can reform from those who kill it off and it can be anywhere to do self actions. Some kefkas treat this as a cheat to gain already known information and consider it a jacobian ladder. A kefka considers people as a bioresource to confide as a network to act as information sites.

Water meditation; This idea is use of water in a pond or area and its calmness, with calm water thought there's calmness. Think of what you want to create with the body, then drink the water or work with another and have them drink of it. This is true if the water is drinking water. Otherwise the water that is calm and focused upon is what creates calm thought in you. If you create a ripple, then you make waves sometime else as if a point were done.

Fire meditation; Think the point you want to see and you your soothed by the flame of a candle. Sometimes you can see the point as a psychic vision.

Earth meditation; The idea is simple, think to release your excess energy into the ground that you can feel by walking over it. Then your as calm as you may want to seem.

Air meditation; Think a point and you can create what you think to soothe your feelings into calm composure. Thinking to the air creates a release of tension in the muscles, then the excess energy that in use of a point with an idea causes uncalm, wild thoughts. That is gone by thinking release of energy into the air.

magic = wrought magic, science mystery, undefiable action

magu = magic, majik, magick

maguhy = high magic

magne = magnet

majika = magical

majik'anti = antimagic; metal magic, Antimagic fields otherwise electromagnetic waves spell, this is where you wave your hand and that is effect that cancels magic altogether or causes greater enhanced magic. This is done by thought projection with spiritual feel, or ideal devices like lasers or that is some energy enhanced battery. This is a point that creates a point and that first point is using an activity. Where this is thinking energy is projected to create effects and this can be combined with worded idea that creates the effect you think to form as a point is a created manifestation. Different idea are things that get different results, that is a point that things break down and those results lower temporarily the body energy.

That means the body in that area and other places raises in energy, recieved with use of idea and though a concept, this is energy waves that uses suppressed moments of time as a point is done by the spirit or soul. The electromagnetic waves device is useful to create results of gravity, that is a point of lift btw, so think and it is used. If focused by thinking and using body points, then you create the effect of dark parts on a surface. This is done as a thought you have of the idea, that energy is a pattern you need to have appear is what it looks like.

See if microwaves are used then gravity or warped space is useful to the focus point. This is a point in effect, that is used energy and so effectively done by feel. This uses gravity wave enhancement and dark energy enhancement, so if you said the effect is done then its done by feel. This uses patterns too, the pattern you think and do is what the gravity waves create if focused and you know this worked by what you sense, otherwise perceive by feel. Any energy used from projection is what is increased in strength and you can use anything as an energy source.

Think your using a source like a impression point or disease or something similar, and the disease dissipates and goes away. This is sometimes converted into energy again, so think the energy is cleansed and the soul cleanses the disease out of the programming of the energy, so you lower in weight as you increase in strength and body energy. This also means your less hostile, so I think it works only if you think it does. This is the point by idea is a point you project toward a surface and the surface seems, this is done to make energy appear like the idea you think it appears as thought if done by feel. This is fine if how it works is what is done. So think and you know what to do with the idea.

puablo = Real or not its a similar coplayer as a similar conclusion as nothing happend and nothing existed this idea as to drop a person by a single blow to the head in energy isn't as in power by energy blow in some manner of speaking, to use as if by anger but nothing more can create is a natural conclusion. As shortout in a point that energy is no blow overload is what creates in point is a concept that does what in the thought, things by use and thought you did it to you yourself as yet not resolvable till you use the creature that is with your energy as if a thought as thought is in belief. As the thought is believable, as I saw you do your thought is active use is a point by power concept as yet not done as this drops that.

 polyc = plastic, polycarbon; at some point, its polyethylene carbon, a range of synthetic or semi-synthetic polymerization products. They are composed of organic condensation or addition polymers and may (often) contain other substances to improve performance or economics. There are few natural polymers generally considered to be "plastics".  
 A plastic be made up principally of a binder together with plasticizers, fillers, pigments, and other additives. The binder gives a plastic its main characteristics and usually its name. Thus, polyvinyl chloride be both the name of a binder and the name of a plastic into which it be made.

Binders may be natural materials, e.g., cellulose derivatives cause body reduction, casein, don't have to by feel or milk protein,

but are more commonly synthetic resins. Plastics can be formed into objects or films or fibers. Their name be derived from the fact that many are malleable, having the property of plasticity. In either case, the binder materials consist of very long chainlike molecules called polymers. The vast majority of plastics are composed of polymers of carbon alone or with oxygen, nitrogen, chlorine or sulfur in the back-bone. Some of commercial interest are silicon based. polyethylene be a polymer of ethylene ((-CH<sub>2</sub>-CH<sub>2</sub>-) n), where the - be a chain, Carbon + Hydrogen in 2 parts chained in molecular form, Plastics are so durable that they will not rot or decay as do natural products such as those made of wood. As a result great amounts of discarded plastic products accumulate in the environment as waste.

It has been suggested that plastics could be made to decompose slowly when exposed to sunlight by adding certain chemicals to them and use a filter. Plastics present the additional problem of being difficult to burn. When placed in an incinerator, they tend to melt quickly and flow downward, clogging the incinerator's grate. They also emit harmful fumes. Gotten from

[http://www.encyclopedia.com/html/section/plastic\\_EnvironmentalConsiderations.asp](http://www.encyclopedia.com/html/section/plastic_EnvironmentalConsiderations.asp).

hmpe = uhmwpe, UHMWPE, pleysteele, plastic steel, Ultra high molecular weight polyethylene (UHMWPE), also known as high modulus polyethylene (HMPE) or high performance polyethylene (HPPE), high modulus polyethylene (HMPE) or high performance polyethylene (HPPE), be a thermoplastic made from oil. It has extremely long chains, with molecular weight numbering in the millions, usually between 3.1 and 5.67 million. The high molecular weight results a very good packing of the chains into the crystal

structure. This results in a very tough material, with the highest impact strength of any thermoplastic presently made. It be highly resistant to corrosive chemicals, with exception of oxidizing acids.

This is ended by a period. That is where you think to feel things, the judge is the subconscious and you know to suggest things. Then you realize things that exist for you by feel. This is symbolized by a rap or other song, so think to know the meaning if you can make sense of the words. This is making use of the sentence and the sense of the point or paragraph, that exists as though the song were written for you. If you okay, then this stops in time, if you its not okay then it stops immediately. Think about it and you can stop it yourself. So that's 'a rap' stops the moment before the point exists by the power of the subconscious. This suggestion stops thins that are sentencing as well, if your careful with the power of the words. This is a moment in time.

rombe = memory, simul, simulation chip, aforehand

Riu = (volcano) erupt, inhibiting fire, to release as viu is viable or v=I i=don't u=go e=energy or not really anarchy, see dad means dead or use is cool, mom is fire or rite of action is use, divshare is to activity = So yea no divide is thought to use or use by theory is, use is no by fractals or thought is create with mediafire as a hook to use not as remise is use as a user is theory for fun edward is fun cool. See your idea is very far fetched so I created it there where you are to test it and found no use for it. So you can create with it by thinking "valheru" or destruction, this is use or no abuse though so energy creation is what you see by some area is dead. This is not in somebody that is there sometime by use or created area, not unless by feel is what you see or get is use no more. The area is cool by depiction or use is theory by purity, create activity by thought imagination so energy is rom activity to the volcano to cause what you wish.

See I will go now or paar is easier nothing said than done "paraphrase by paragraph" is no parent or of paranormal use is some body to use, seen as you are some use see if to keep you live or away as "partridge by a peartree". Think in or not use to use idea or effect, seen is the warrior celt clan or the focus in theory is use. See to mesmerize or creature productive is concept not always mesmerization in use. See en is purity by purify or this is feel the user seems creative by the use so this is create by use. This is no insult this is useful area feel.

This is the tune or too busy by world effect is hit in head dude thats right dead. You don't have to use it. So to not use it "use or not" is the word or wormhole, closure is connection by the wire concept safest in wire by pulling back on a wire or body there. Say you are asking for too much trouble as you are awake, as thought you effect to the feel this is by what you think is too bloody, damning or obsolete to not use un alter. Say as your aware by feel or focus is energy with ohm. This came after ohm or the roost, so you see the body didn't rise. So the area was not useful where you think magic not use to make something up to cause cool story idea.

source = source by Poseidon or other necklace like orgonne that creates what occurs with water in orgonite powered by thought in a point by an orgonite power stone in thinking focus by meditation in life experience by experienced in a point of view by activity, as lab work your use can create by any object in resolve (including shit), thought energy by relation, end sometime is as you were and somethings are best in life to know like the expertise things your use essence creates in energy or not by thought. There is energy this is in the thought and the essence in the mind collected, this by your spirit and is thought you know as energy is gone in a point as thought is exposed in as a thought to you that focus. There is a dreamed in reality effect, as reality is in inert ice energy. There is an energy in created by every thought, as the energy in thought is an idea in use your idea creates by focus. There is energy by use in movement as you want, safely done as energy to do things is things to do for fun. As in life events are what you think, use by thought is focus to get positive idea done instead of negative use including drugs, realistically if they do things to you the effects dissipate by energy flowing from the body.

This is is known as in an endless trick of deranged ravens which builds height up with lessened weight and

vitamin use cures it as you realize it was this is you break the trap in view by perception and you control the vine to release what you eat and use less to do more by suggested ideal. There by use is sounds that energy are naturally known as teresa in the thought. That use energy to create energy and thought energy in the creation is by what you do, as tough "inanis in attento dominus" thought you do in life that you lead or lice remove with the other things removed that are unwanted and if were there you are in life.

By now in what tought you do, you should already understand how to relax and feel a shift of consciousness. Once that stage is reached, you should than wait for the "Separation Point". As mentioned earlier, some will feel the body vibrate and feel out of place, some will feel lowering or heightening of the body, and others may feel "Out Of Place". Whatever your pre-cursor is, that's the key moment when you need to progress by the fun in life.

Note: The above steps can most easily be accomplished by first letting your thoughts go, followed by programming the correct Brain Theta Frequencies. Our Astral Free Flow Package is used by thinking your free flowing in the wind, of energy by electricity perfectly designed for this exact purpose. As the electricity is felt as humming and you think to shift away your will causes a surge by focus. Tangent and sine use and other idea you focus is to create or not, allow use and the crown chakra created seems by the use of a thought to seem and think about it and you are as you know where you are. What stops is the effect you see as the area seems to halt and continue as you think of where you are in life.

This is with the thoughts, not use is ice this twisted drink by desire and control. It only leads to disaster and with disruption of the mind and family. This ice is self contained and only affects those who are willing. The rewards are great and the balance in the mind must be kept Sanity is kept if balance is maintained. Its existence is completely hidden, as all is green its only found by what you think, focus is a concept as for what it is not as illusion. Even if the person is aware of it, it will always control no matter the circumstance.

tdaaell = Tie dying, The deeper hell; Is the sub-dimes of the 3rd dimension as the hell of existence that traps you into not moving much and being victimized or beaten while doing an idea or some negative decent thing is done if you win. These idea are presented as if a dream and given by visions. They who earn are energy virulous and have a dark side to them, as though evil in nature and not there as they drop the act but sound good as though a point thats too good to be true. Thought to break free from this hell is the rite to try to not agree with what that is and displeases, displaces, or pleases you and yet you do things as you want. These visions are different from what normal concept visions are like. Think where normal visions seem to give you what you want and sometimes seem, too good to be true unless a friendly charm. But feel good to the self, think as though you return from it and you do and they who are apart of you might work. The enemy is depicted virulent bright color visions, that keep coming back so avoid or not and they are working from you in thought and yet are very likely a suggestion. As the vision can go on and you can attempt them but you get tortured in your mind by a force. So to deny the idea by a thought of intuitive idea, and not always necessary is to block the suggestion.

tranc = Blood energy focus trick with trance like state, Blood is energy, but you don't need it drunken. This is the blood flow instead and think as you like things, they are yours. Think of what you want, then your aura energy creates the manifest of your idea that you need.

Tranc is what it's known as though. How you get the tranc, this is being bitten by an animal then after the fact just focus on a thought or if you think a point to create your need. This is accomplished as you breath in and out and stopped as the tranc is disrupted by realizing something wrong or hearing a sudden loud noise.

I was bitten by a cat in the foot a long time back. That's how I know this point. This was a sweet white cat that died of old age. Have fun manifesting. Oh what you happen to manifest is reflective of what you eat. So think to eat less or one bite of something and you can create a major manifest. That's if you feel hungry.

So if guilty about something, then recognize the point you could or do overeat and think of other things to do and then you create with no need by distraction. If you think or write, that no guilt exists, then the blood magic creates what you think and you don't feel guilty about anything.

Otherwise, just think of what you want, then focus your mind and create by aura manifests. That is what I recall

about transc. What you can do with this is use the current situation as a source, think of the idea as a blank canvas that you paint on and use symbols. This way you can get what you want as a need.

wef = form emotion  
wif = wife  
wof = wolf, game hunter  
wuf = woof  
wyf = air scent

wag = wag tail, bang side  
weg = frog; wedge, thin layer, going (happening), away, material, this is a happening thing that is based off of material.

wig = hair wig  
wog = take a loss, allowance loss, allow destruction  
wug = shout  
wyg = lost cause, hopeless

wak = wake, awaken  
wek = weak, wield, wimp, week  
wik = kill, make happen  
wok = awake  
wuk = active poison  
wyk = moral, witch

wal = wall  
wel = weal, well  
wil = will  
wol = woah; well hold, amazement, this is an amazing point that you decide is enough and declared as a woah!

for a point.

wul = wool, cotton

wyl = focus clearly, will, wild

wam = a back head knock

wem = emotional moment

wim = emotion

wom = womb, worm

wum = senseless, pointless

wym = a wim, given into desire, withem, withheld, hold back

wan = wane, lessen, reduce, reduction, rection

wen = wean, when

win = emulation; a win, wine, whine, success, wine

won = influence; auratic influential, not stopped, continuance, continued, won

wun = wound; wind up, won't, wound up, faint spell, will not, won't, wouldn't, won that

wyn = wind, north wind or similar and the meanings are here for what the winds are by feel.

wap = whap

wep = weep

wip = wipe

wop = whoop

wup = woops, feel sorry

wyp = whip

waq = scream awake

weq = weaken

wiq = tremor

woq = woke up hearing, light sleeper

wuq = quake

wyq = earth vibration

war = bell, belli, war, conquest

wer = wert; were, man, as is

wir = wire

wor = wore out, worn, worry

wur = steadier, make steady

wyr = where; weyr, dragons layer

was = vas, ways, weigh, what, been, waste (water)

wes = choose from

wis = wisdom, wizard, wise one

wos = worse; worser, feel personal pity, pitying

wus = meditate, whats

wys = wisen

wat = clothes, wait, (lose) weight, then shift. the process of monoatomic gold; you gain or lose weight till a certain point and then shift to a new dimension in heat when it cools down, you shift back..

wet = wheat, created ideal by essence in the ground

wit = wait, wight, with, (no) undead being that sucks the soul on a touch with paralyzation, with it or without people.

wot = wrote, what, word is energy as that is ate not

wut = whoot, what, woot, wht, would that as that and with that in some where as if in a body but temporal fix

wyt = witty, witty response in moments

wav = wave, hand pass in thought to store away and create

wev = weave; weavel, weaver, put together, weave in will

wiv = harem, nagua, nag, old witch, that is aging and use is youthful idea

wov = woven, sewn together in the pants

wuv = weaver, energy channeler by law or in law no law

wyv = wedge, wedge shape bird human shape

waw = cut through by thought is amplified energy to the point that you can get or get along well

wew = whew in a moment

wiw = with work, not repeat as no type for no repeat

wow = oh wow, wow in absolute sarcasm surprise

wuw = stamina drained, tired out, work wobbly, in thought

wyw = shortcome, shortcoming in moments

wax = wax, awaken, wack

wex = weeks

wix = waxy buildup, wax use

wox = woke up

wuix = near faint

wyx = burning wick

waz = yst, was, ways, waste, waist

wez = wheeze, short breath

wiz = wise

woz = woes

wuz = whoozy, faint spell

wyz = a wiz, ingenious

wark = kill count

werk = slaughter

wirk = kill tap, snap

work = energy load, movement amount

wurk = steady kill, unstable

wyrk = blowup, blowoff

waaa = crying fit

waea = charge up

waia = stored energy, energy storage

waoa = wide area

waua = falsified

waya = acting on impulse, impulsive

waae = weight gain

wae = weighed impulse

waie = go with it, make attempt

waoe = way over your head, very high up

waue = absolute surprise

waye = discovery make, eureka!

waai = build strength

waei = work out

waii = sacred, slim to know as you remember from focus with energy, no is not attack from distributive energy in

your soul

waoi = feel comfortable  
wauu = get familiar and disregarded as assumptive behavior  
wayi = show path, in a as

waao = wild hope  
waeo = take a chance  
waio = not going to  
wao = once again happen  
wauo = burn yourself  
wayo = way over

waau = not happen  
waeu = enlightenment  
waiu = wait on  
waou = shield  
wauu = waw, cut through  
wayu = extreme weight

waay = permissive  
waey = get control, wave  
waiy = conclude, conclusion  
wayo = wayoey, way overhead, high up  
wayu = weigh alot  
wayy = break oath, oath break

weaa = don't study and nothing in else or root growing up  
weea = active fairy, stand tall, strength, stand up  
weia = physical location  
weoa = owe alot  
weua = use, abuse  
weya = try again

weae = physical help, physical aid  
weee = moment enjoyment, fun moment  
weie = remainder  
weoe = repeat  
weue = reusable  
weye = take root, become root

weai = traper, trapper  
weei = dislodge, disrespect  
weii = bring attack  
weoi = collection  
weui = our use  
weyi = bring danger

weao = beat them  
weeo = stern nature  
weio = go along, associate  
weoo = restrict  
weuo = take notice, interrupt  
weyo = temple

weau = overwhelm  
weeu = end  
weiu = repair condition, fix situation  
weou = intuitive action, take action  
weuu = whew  
weyu = large gift

weay = armed, prepared  
weey = asshole  
weiy = got him  
weoy = break, breakage  
weuy = over repeat  
weyy = weyey, cannot condone, disallowance , unallowance

wiaa = understand, understood  
wiew = collapse  
wiia = picture, depict  
wioa = responsible  
wiua = wiooa, go way back  
wiya = karate chop, hand separate

wiae = dicoverly, be discovered  
wiew = attention, discourage  
wiie = distrust  
wiew = abuse; drug abuse, beating up, admittance  
wiue = enemy  
wiye = trick, trickery to not, wyvern beating

wiai = wipe away  
wiew = construction worker  
wiii = putrid  
wioi = why pay, unpay

wiay = over there  
wiew = winey, whiny  
wiyy = why  
wioy = why oh why, how come  
wiuy = lied to

wiyy = explain, explanation

woaa = woaya, become active, be active

woea = regeneration

woia = woaiya, warrior

wooa = duplicity, befriend

woua = acceptance

woya = rowena, informant, inform

woae = worse

woee = worry, (dark) memory

woie = resolution, resolve

wooe = child

woue = revive

woye = worrier

wadr = window

wedr = light

widr = focused through

wodr = melt

wudr = wonderment

wydr = glass

wald = seal in, wall off

weld = weld, metal unite

wild = wildness

wold = crash

wuld = burn

wyld = destructive

wand = focused will, a wand

wend = slowly gain

wind = grow quiet

wond = wonder

wund = wound

wynd = deter

ward = ward, protection, conclusive

werd = declined

wird = wired, blockage

word = worried, taking measures

wurd = unstabilize

wyrd = wierd (fate); fate, this is the three fates or the young one (Clotho), the medium aged one (Lachesis) and the old one (Atropos). Clotho spun the \93thread\94 of human fate, Lachesis dispensed it, and Atropos cut the thread (thus determining the individual's moment of death). The Romans identified the Parcae, originally personifications of childbirth, with the three Greek Fates. The Roman goddesses were named Nona, Decuma, and Morta. Their children are Norda or fate beings and human in appearance with special ability. The attributes of the Three Fates included: The Moirae were depicted holding various threads. Staffs or sceptres, the symbols of dominion. Clotho: A spindle. Lachesis: A scroll, the book of fate Scroll or globe representing a horoscope. The Shears (Atropos)

wark = war kill, battle kill, active work

werk = energy work, were kill(ed), were (killed) at

wirk = intelligence work, work in, in work

work = play, do things with

wurk = wrk, would work, your work  
wyrk = wire kill, en strangle, wild afterwork, a wild effect

warl = warble  
werl = when real  
wirl = whirl  
worl = homeworkl, vortex whorl, travel whorl  
wurl = war shift  
wysl = viral, why move

warm = warmth  
werm = squirm  
wirm = wriggling  
worm = worm  
wurm = handling affairs  
wurm = wyrm, wingless dragon

wann = then, come back, wham, recover  
wenn = went  
winn = purposeful, with purpose, unalcoholic, virgin  
wonn = lost, wanton  
wunn = will, steady balance, will have  
wynn = loss, wanton (destruction), wind, compromise

wri = write  
wro = wrong  
wru = wrung  
wry = wryly, rueful, wring

wrat = wrath  
wret = wretch  
writ = write, printed page, note, bank note  
wrot = wrought; rote, wrote, deceased, end of lifetime done by what occurred to the body.  
wrut = root, bad habit  
wryt = written information

wras = wraith  
wres = wrestle  
wris = wrist  
wros = bad step, wrong step  
wrus = benchmark, benchpress  
wrys = strangle, sexual, rueful memory, crush (love), wrist

wpa = weapon  
wpe = wipe out, wipe everything  
wpi = whip, whipping  
wpo = wipe ou, wipe out, whip out  
wpu = whip you, wipe you  
wpy = whippy, wild whip

waeva = wherever, whatever  
waoanetz = internet

wayreth = magic forest  
weaeva = whenever  
weyr = dragon layer, show down  
wiati = fxseh, wave pattern, A creative wave pattern or of effect field reflected in sleep, ability, influences and made with the metarules of Affinity, Thaumaturgy and Mental Focus with interactive subparticles of;

lutra(lea, lepton, love trance, electron, displacement charge, ion, negative energy charge, negative time subparticle)  
likdon (lida, proa, likton, proton, proteon, proactive(athletic), proective, positron, proactive charge, positive charge, charge within particle, contain charge subparticle)  
nura(neutron, neutral subparticle, isotopes or neutralize)  
tehya(tachyon, active, carrier wave or positive time subparticle that looks like red dots)  
yaa(alera, aleron, eludia, metainfluence, alpha waves, aether, felt influence manipulation subparticle).

To allow with interactivity;

burang (helping moment by what you think and this particle can do, boomerang effect, in return effect, Formed by electron + proteon + positron)

cema(seem-ah, cemia, cosmia, temporary glue particle, temporary cementation of particle, cosmetic particle, A particle to cause a temporary cementing of effective thought about particles to a surface, Formed by electron + proton + aleron);

cua(cuon or curon particles to cure poisons and body weakness, neutron and aleron);

cuae(coo-aid-eh, curative of scent particle, nice scent particle, cua + proton + lura);

crita(crypton, temporary erasure, or weakening particle created with stekton + tachyon);

dnyra(de-nirah, dendyron, denyro, denyron particle, or programmable particle that you think at once created to program it created by tachyon + aleron + lara);

eawr(ee-ah-wer, ewir, parasitic semibant particle, self-perspective condoning thought particle, sub-bot particle that forms and coagulates on moving things as an object. It does as instructed by it being spoken as though it did it and it feeds off filth or bad things and sometimes the organism itself. Formed by a cua + proton + lepton);

eawix(Ee-ah-wix, ewix, hearing ear particle, wax particle, a particle that allows you to hear nearly anything that is thought about or looked for by thought, created by eawr + proton);

foa(photon, leukton, destructive particle created with electron + proton);

flaa(feleron, firewater, mission complete no abuse you may return, everburning water, everlasting flame, greek fire, photon with aleron);

gna(gea, genon, creon, coreon, create, earth, solid barrier, constant body, boundary, drug, solidity particle, lekton + aleron);

lukra(for leukra, leukron, antigravity wave particle, electron and stekton);

lata(lekton, freon, void, later, raw material, cold, cold spatial particle created by electron and proton);

lara(eleron, attractive element particle, aleron + electron);

lura(allows luron, eleuron, detractive element, dark matter, red matter, separation force particle, aleron and stekton);

loaa(low-aid-ah, eomai, everia, lower and do particle, surrendipitous info soak, impulse particle, causes learning by discovery, inverse osmosis, created by electron + stekton)

loae(low-made-eh, eomeo, aeia, raise and do particle, info soak by hypnosis, causes subconscious observation learning, adverse osmosis, made by proteon + stekton);

loai(elorai, lura, gnu, gnosok, money or knowledge soak an buildup, an osmosis particle, lipkon + aleron);

loan(elorain, gnosokles, agnu, luran, knowledge or money reduction, reverse osmosis, crypton + aleron);

lika(lipkon, barrier, psychic, air or sound vibration particle, electron and lipton);

lita(lipton, fire, heat felt particle created with electron and tachyon);  
nea(gnua, nua, good notion, make good nuance, natural power buildup particle created by positron with electron, photon and aleron);  
nuatra(negatron, nihilistic, annihilistic, rapid heat energy, extreme destruction particle, created by electron + zeuktron);  
lupta(leupton, lava, molten heat, magma, emotion, melting particle, proton + aleron);  
sutra(suetron, creative, water, restoration, active healing particle sometimes found in meditation, neutron and tachyon);  
pua(poo-ah, puatra, purify, disserf, dissolution particle, red particle, lura + proteon + lata)  
stata(stekton, support. gravity or light wave particle; electron + neutron);  
uun(ubyon, erasure or reversion particle made up by proton + neutron);  
uace(ulypces, good luck particle, with ulypsis + ukyon + lekton);  
uasa(ulypsys, bad luck particle, ulypsis + ubyon + lekton);  
uase(ulypsis, antitime barrier effect particle created with proton + tachyon);  
uua(ukyon, purity or restorative particle, neutron + suetron);  
yara(alakron, manifestation particle, tachyon + aleron);  
zatru(zaktrunia, intrusion particle or warmth particle, likton + lipton);  
zutra(zeuktron, changing mutative and irradiative particle, proton + stekton);  
zutri(zeuktronn, disturbing particle, photon and zeuktron);  
Zuty(zoo-tee, zeo, zuteo, zuhteo, cold radioactive particle, zutra + proteon).  
weei = I war (with you)  
weeia = weeeeell, I war (by you), by you  
wiuai = hydrocarbonatethanol, breathable water, htuoctumoi  
wiuafi = hydrocarbonatethanol, breathable sulfurwater, htuoctumoisfi  
wea = weak, weakness  
wachya = what you, watch  
wadda = whadda, what did, what dad  
wahai = wachamacallit, this thing  
wedbag = weedbong, iphuc, weed star bong that is the bong or smoking container for the smoke type.  
Widra = withdraw; withdrawal by feel  
Widran = Withdrawn; to withhold or draw from something with some point or idea.  
wydog = flying winged dog, widow, dog  
wood = wand, mana focus device, will wish wille effect by whipping head banger or nor is nothing  
wats = electricity, electrical, tesla  
warmyu = warmagic, destruction and alteration spells  
were = werewolf  
worka = woka, work off, worker, woke up, work up  
wassup = what up, whats up  
wosa = worship  
webufrod = network  
wedn = 3rd, third, wednesday, wedding, marriage, lazy  
wiou = without  
wield = equip, use  
wieter = resume  
woody = wooden, old style writer, animated wood creature  
wicrenu = negative witchcraft  
will = as you say "will" as a fire born vampire fight you destroy for idea and what you intend to think for your  
will in safety as a destroyer giant vampire  
wokobb = stay awake  
wykcryt = witchcraft  
wykcrit = why quit  
wilynily = willy nilly, make attempt  
wuln = would not, wouldn't

wyld = wild, lunatic study

wana = wanda, instinct, want to, impression

wanda = wonder, wonderer, thought perm (permenant)

wannac = want to see, work to see

wondai = wonderment, everrit

wasu = please, plead, what

wasuck = ugly, ugliness

watu = what are you, hold on, whatsup

watt = current rate, watson of police

wattu = your current rate, in the dirt you can't change once you set it or nothing will happen

wattm = my current rate, umake as youmake the you maker

wish = focus on need, desire, want; as a focused desire now that happens by natural subliminal activity

acting as a high energy bridge with a point by focus with subatomical particles being influenced, causing the people

that the energy interacts with to achieve your desire. otherwise its a desire that achieves the result when felt, spoken, and its not magic or otherwise things create as you think.

warcobny = war combining; To be confiding the effort you do, to combine in effort, by war and become as one mind, the being as to cause it to seem one, in war by acting as one and with actions that work with each other. Causing it, the being, to appear as one. This triples ability and power. But, filter by refusal, of corruption.

warclu = warclubbing; to club together and in war, to cause things to be beaten, by assisted effort thats working together.

warcry = spirit animal war cry

warden = security head

warlin = soldier practice, prophet heritage

waxgib = gib; give being, "knowing" I see the light to work with the path an is there if important.

worketh = workeith, to work, treasure work

wotaf = brittle

wuzz = whats, thought to use, buzz

wuzzit = whazzit, whats in it, achievement

wheter = Coming up soaked and ready for more, spoken for

wll = ull, well, will, creation by wax

wmaekom = undo annihilation, uncalled for destruction

wrislet = bracelet; holder on wrist

wrislyt = slit wrist

wrislit = bracer

wren = wrench

wron = ron, wrong

wrp = warp, wear, warping, warped

wha = what?, what, remove form you choose

white = blind desire, blind justice to you

wje = creating you (by effect, soul life), persudaficius

wjh = whe, whackup, crazy, crazy making, insane making whack job, epidemria: A condition caused by the heart and it takes form of nearly anything being taken literally and realistically. This causes personal reaction to any stimulus or action that presents itself.

whh = attack, fuck attack

wunjo = joy; a person or jo

wijkin = disappear

wumpus = large and fearful

wuvsun = star weaver, star channeler

X

xa = savior, say

xe = heroic, see, xenium  
xi = exile, plain, wild horse on xill  
xo = put forth, so  
xu = soar, soon  
xy = reinforce, psychic, reinforcement, (hit) crotch

xeam = extra force, holy, debilitating force, dark will  
Xe = diarrhea  
Xeia = decent mind, docile mind, arisen, indecent act  
xeiab = peanut butter  
xeiaxeb = create effort, work motion, relaxation, ship moments  
xiao = morning, daytime  
xiom = ziom, axiom, picked up thrown down, museum  
xialinn = sociopath, feeling person

xiaolin = crazy, sociopath, bad, dark assistance

xiaolinn = law, psychotic

xieliet = exobiologist

xieliy = exobiology, other form study

xiem = transform, resolve, hold to body

xoe = extrude, xodus, exodus, far away exile, long mission of far distance

xue = snow

xiy = exonerary, exhibition, concession; give in, sales or give up by resignation sorta like using a resignation speech.

Xace = exercise, produce exercise and moral

xebne = weight disease, overweightness caused by drinking carbonated drinks

like soda pop and other carbonated drinks but solved by drinking water, non-carbonated fruit juice and other noncarbonated drinks.

xebneu = remove overweightness, weight loss

xebpiaroneu = penetrating overweightness removal, penetrating weight loss done through the aura energy burning off the weight.

xern = high strung deer mule

xist = exist, existence

xitami = xiaoli, xiaolin, trend, trendy

xaph = intermediate moment, graph

xeph = it be, controlled chaos, controlled chaotic moment through controlled folly

xowad = xtreclah, strung together

xce = excess, exile

xct = xcts, execution, do or die off things

xhup = boil, bubbly skin, boiling water 120 deg F, extra ring, rapture hawk

headed horse with eagle wings

xmad = mad, cute, xmad

xst = exist, cut weight in that, weightless

xpant = exponent, expelling, expelled, extra cut pant

xpeue = xpugdudio, whisper

xpctah = expecting, extort/ion

xpcteh = awakening, expect/ed

xpla = explain, extra splash

xplat = explanation, personally explain

xplove = exploit

xplovee = expeditious, efficient

xploveeh = explode; ex employee

xplot = exploit, take advantage

xpt = extra point, expect, expectant, export

xxcla = an declare, xcla

## Z

za = create; zap (energy charge or zapper), energy shot, thought focus charge, that (thought that's done), agreement

ze = (sometimes from a bug) energy release (boogy), beetle; striped, original, one of a kind, bug

zi = energizer; zinc, work out, body build

zo = well; secure area, so, such (as)

zu = zoo; animal, display

zy = held; drawn together

zab = energy focus; focused charge, electrical flow

zeb = zebra, beetle or cockroach that takes possession of those nearby that does things to the summoners will.

Dismiss the thought and they go away.

zib = build; zinc concentrated  
zob = scanning  
zub = watch; focused display, monitor  
zyb = concentrate; sew, drawn together focus

zac = shot energy  
zec = colored aura  
zic = muscle building  
zoc = electrical charge  
zuc = sparks  
zyc = charge up, gather charge

zad = zades!, excitement exclamation  
zed = filter, polarize  
zid = used zinc  
zod = area measurement  
zud = scent, understood  
zyd = conclusion

zaf = fall asleep  
zef = noticed striped  
zif = easy insert, easy entry  
zof = in secured area  
zuf = where displayed  
zyf = draw in, the draw

zag = overloaded energy strike, made mark  
zeg = signified stripe

zig = sculpted muscles, struck as, The zig(zag) bolt, sig(cig), c-lit(litc, ultra lightspeed or natural light energy) or litc as a mark of pua (power level) and trance for signal, tracing as signal trace and actual attempt.

1. The more the zig the more that be or is done.
2. Advancement of loudness and sometimes no mental stupidity, or no insanity per power level as this warded away to prevent insanity unless necessary precautions.
3. The advancing stage, a progress point tract or signal.
4. Replacable marks are a \*, #, @, !, %, `, ~, /, \, |, X
5. Never do things devisive with energy unless some physical effort be achieved (not beatings), to balance the unprepared body response and get the physical body prepared for the zig level. If not then theirs a mental stupidity point where serendipity happens (mental discovery, physical self-discovery on accident).
6. Less aggression more achievings, more accomplished per second, more strict unless precautions.
7. Less likely more to occur, with more effect and less compressed (smaller) size of faster motion. More power make smaller energy pulses.

zog = ground mark, groundhog  
zug = where important, conception (of intereptation)  
zyg = create interest

zah = strangely desirous  
zeh = oven  
zih = sweat  
zoh = warm area temperature  
zuh = whereabouts  
zyh = heat circulation

zonn = hidden, conceal  
zunn = uncivil

zynn = bum; homeless vagabond

zenna = seer, psychic

zenne = zest

zenni = lemon, lemon lime

zenno = mystery

zennu = denial, blindness

zenny = sour rind

zhal = thalus, counting device, about things

zhel = theology, philosophy of things

zhil = work with things, playing with things

zhol = constructed item

zhul = turned dark

zhyl = resulting number

zhra = thrash

zhre = three

zhri = thrive

zhro = to throw

zhru = done, underhand toss, threw

zhry = thrift

zra = thrash

zre = three

zri = attack, enmity

zro = to throw

zru = done, threw

zry = thrift

zao = zero; itinerates, associates, no that is done if negative is 0. Sorta like a number so this is stating no roaches.

zea = end; the end of a hacking cough.

zeo = hacking cough or smokers cough.

zeah = associative, association

zeaha = whistle, pensive

zeahaa = self-defense

zeahay = prosperity, prosperous

zeo = person, personally effected (victim), hacked; worm, virus (person), hacker, viral person

zeeo = wedding cake; focus (on), effect: the focus point to do things with by feel. Otherwise street or area cleaning.

zeio = zeeio, I war with you

zein = induct; induce money increase, pronounced zine. Sometimes your powerless due to intake.

zia = zion, higher being, zions; (named ziae or ziax) zionic aid is the atleantian beings aid that you call upon you by thinking of your need and saying a zion word to call their attention to make your idea or fix the condition. Just remember if you don't need something, then think of that idea you don't want and state uu- or you-uh.

zyio = seeker; awal, bugged, food need (often by a wild man), if bug need: then you have the need from a bug; the empathetic feel that you get from a bug is a need for food or hungering. Basically you create with this need, if your around one that is a bug or bugged by something.

zakal = jackal, werewolf

zabis = zales, zalus, sale

zalli = coordination, hard work

zedsen = prismatic light

zeliq = intelligent zeal, fearless intelligence

zeny = teeny

zenny = zen like

zero = adhere alone, zero  
 zest = flavorful (part)  
 zesty = lemon fresh  
 zetsu = magical art of parts  
 zidder = domi, domineer, release, take control, rule over  
 zidderr = shaky, nervous  
 zidders = psychotic, psycho  
 zidderrs = disruptive  
 zigge = to train or trait by using an instance effect  
 zinny = tinny, tightly, boned up  
 zipzyt = stretch  
 zouho = to feel safe by bequest or given request as your really safe  
 zhao = devote, devotee, devoted  
 zhaot = target, zealot  
 zjaero = aerial servant  
 zrzqculayl = cold enchant  
 znshiguai = explosion  
 zza = enervate, awaken  
 zzz = sleep, electrical charge

## Drugs and chemicals

Treat the drugs as a separate concept in a sentence, like a separate word phrase.

As "n'synca hcl wiobjtuacha" = "in aligning hydrochloric acid." In usage of the salt  $KNO_3$ , you can cause varied effects and repercussions like dazed motion and unexplained weight gain.

Look at the use of potassium nitrate with salt and water. Gaining inner calm and each bite you might gain something such as weight. This weight drops immediately as the body will repulse the food and not swell the body. I noted the weight loss effects of this salt in particular if used with water and its explosive reactions. Some might not be affected by this as the effects vary with unknown effects. Yet sodium nitrate and sea salt be body safe as a type of salt which has long been used as an ingredient in explosives, and a food preservative that can cause weight gain if in too much quantity. Any look at these will get you result so bear in mind the possible outcome may be hazardous.

Yet the other salts are not safe like, chemical compound ammonium nitrate the nitrate of ammonia with chemical formula  $NH_4NO_3$ . Useful in agriculture and explosives, lead(II) nitrate be the nitrate of lead with chemical formula  $Pb(NO_3)_2$ . Its also known as lead dinitrate, nitric acid lead(II) salt, and plumbous nitrate. It be a highly toxic element. Lithium nitrate be an oxidizing agent used in the manufacture of fireworks and flares. Its composition be  $2LiNO_3$ . Silver nitrate be a chemical compound with chemical formula  $AgNO_3$ . This be a poisonous unuseful salt.  $HNO_3$  be transferrance of lead to other material. The chemical compd and formulus came from the wikipedia at [http://en.wikipedia.org/wiki,the\\_Alchemical\\_and\\_Steve\\_Kamm\\_physics\\_notes\\_\(written\).](http://en.wikipedia.org/wiki,the_Alchemical_and_Steve_Kamm_physics_notes_(written).)

1 p(art) = 1 m(ole) or ato(m) = 1 mol(ecule), 1 (mix)ture = 1 compd (compound).  
 fe = fac, face, "("; "(" (facilit); ")" (facrit),

Chemical key - for understanding english chems

Naming acid - Exchange the Anion with the Suffix, fo'the base keep the Anion

Anion Ending	Acid Prefex	Acid Suffix
ate(3p, 6p)		ic acid
(o)n, um, ite(1p)		ous acid
ide(2p, 4p)	Hydro	ic acid

## Acids (A)

Some common pH (strength) values of acid. At <http://en.wikipedia.org/wiki/pH> will you find the chart below. To get the strength or pKa use the  $H^+$  Molar weight in  $-\log_{10}[\text{Molar weight}, H^+]$ . For example, a solution with  $pH=8.2$  will have an  $[H^+]$  activity (concentration) of  $10^{-8.2} M$ , or about  $6.31 \times 10^{-9} M$ ; a solution with an  $[H^+]$  activity of  $4.5 \times 10^{-4} M$  will have a pH value of  $-\log_{10}(4.5 \times 10^{-4})$ , or about 3.35.

Some unknown effects of pH:

At  $<0$  be poisonous and acidic and avoid contact.

At  $\leq 2.0$  be acidic (highly dilute with  $H_2O$  to drink HCl so avoid contact).

At  $\leq 2.3$  pH be unaging, regeneration and weight loss.

At 2.4 pH - 3.5 pH and after 5 pH - 5.9 pH be weight loss.

At 3.5 - 4.8 pH be dillusional occurring if eaten, drunken or inhaled.

At 4-4.9 pH and at 6-6.9 pH be weight gain.

After 7 pH be weight loss.

The acids themselves

bisa = potassium acid, bisulfate,  $\text{KHSO}_4$  (khsquad).  
braqua = braquach, hydrobromic acid,  $\text{HBr}$  (hbr)  
coniin = amines acid, aminic acid, life acid, Formic acid, Looked

it up in Wikipedia and its systematically called methanoic acid, simplest carboxylic acid, stinging chemical,  $\text{CH}_2\text{O}_2$  (chtuotu) or  $\text{HCOOH}$  (hcooh)

aquaregia = Aqua regia (Latin for "royal water") be a highly corrosive, fuming yellow liquid, formed by concentrated nitric acid ( $\text{HNO}_3$ ) + concentrated hydrochloric acid ( $\text{HCl}$ ), usually in the ratio of one to three. Its able to dissolve gold and platinum although tantalum and a few other extremely passive metals are able to withstand it.

Aqua regia be used in etching and in certain analytic procedures. Aqua regia does not last very long, thus it has to be mixed immediately before use. From

<http://www.encyclopedia.com/html/a1/aquaregi.asp>. nitrosyl chloride ( $\text{NOCl}$ ).

flurbeasa = fluorosulfuric acid, strongest corrosive acid,  $\text{HSO}_3\text{F}$  (hsotrif)

discovered from <http://pubs.acs.org/cgi-bin/sample.cgi/jocean/2005/70/i07/html/jo040285o.html>.

grach = geranium acid, transphase acid with geranium, Sodium

+  $\text{HF}$  + Folic acid (folate, fola or vit-m) + germanium ( $\text{Ge}$ ) =  $\text{NaHFFolaGe}$ , Geranium + sodium ae  $\text{NaGr}_2$ , with counterpart  $\text{GeNa}_2$  = Germanium( $\text{Ge}$ ) + Sodium( $\text{Na}$ )

hia = hydridya, mucaquai, hydroiodic acid, a highly acidic aqueous solution of hydrogen iodide ( $\text{HI}$ ). It be highly corrosive and should be handled only with appropriate precautions. Hydroiodic acid be a commonly used chemical reagent and be one of the strong acids that ionize completely in aqueous solution.

hf-sbfccl = fluoroantimonic acid be a strong acid. The acidity of 1:1  $\text{HF-SbF}_5$  can reach  $\text{H}^0 -28$ . Thus, these superacidic systems can be  $10^{16}$  times stronger than 100% sulfuric acid!

hcl = claquach,  $\text{HCl}$  (hydrogen chloride), hydrochloric acid, stomach acid.

chlorium = chlorous acid, clorox,  $\text{Cl}(\text{HO})$  (clfachofac)

mucamino = amino acid, life fluid, folic acid,  $\text{C}_{19}\text{H}_{19}\text{N}_7\text{O}_6$  (cnizhniznsyiosex)

nukl = nucleiaicach, nucleiac acid,  $\text{N}_6\text{S}_2\text{O}_4\text{A}_9$ , stomach acid x  $\text{NO}_4\text{H}_6\text{A}_8$  or  $\text{N}_6\text{A}_8\text{O}_4\text{H}_3$ . It drops body weight.

hfa = hydrogen fluoride, hydrofluoric acid, fluohydric acid, worlds strongest and non-corrosive superacid,  $\text{HF}$ , carborane acid and non-toxic and non-corrosive that will dissolve even glass.

juuach = Magic acid, The large complex fluoroanions facilitate dispersion of the negative charge and thus contribute to increased acidity of the solvated proton ( $\text{H}_2\text{SO}_3\text{F}^+$ ,  $\text{H}_2\text{F}^+$ ). The acidity of  $\text{HSO}_3\text{F}$  increases from  $\text{H}^0 -15.1$  to  $-21.0$  on addition of 25 mol % of  $\text{SbF}_5$ .

$\text{HSO}_3\text{F-SbF}_5$  (Magic acid) of 1:1 molar composition The name Magic Acid was coined in my laboratory, after a Christmas party in the 1960s, by one of my postdoctorals (J. Lukas). A candle (of paraffin wax) left from a cake was dissolved in the acid system and the solution showed an excellent NMR spectrum of the tert-butyl cation, inspiring the name for "magic properties". The name for the acid eventually found its way into the literature and be now a registered trademark.

nitra = hnotri, aqua fortis,  $\text{HNO}_3$ , Nitric acid (hydrogen, nitris oxide compound of 3 p)

nitri = nitrilotriacetic acid,  $\text{C}_6\text{H}_9\text{NO}_6$  (csexhninosex) that can create a sexual desire innuendo by what you feel and not do.

nitro = highly unstable, nitroglycerin, high explosive,  $\text{C}_3\text{H}_5\text{N}_3\text{O}_9$  (ctrihqinntrioni), natural feeling as that is a point that uses are felt endless and use is limited otherwise.

perclach = perchloric acid, Perchloric acid has the formula  $\text{HClO}_4$  (hcloquad) and be a colorless liquid soluble in water. It be a strong acid, or superacid like sulfuric or nitric acid that if not strong enough dissolves things slowly.

fbpon = htripoquadach, phosphoric acid,  $\text{H}_3\text{PO}_4$  (Hydrogen in 3 p, Phosporic oxide)

propene = alkenes acid

sach = sulfuric acid,  $\text{H}_2\text{SO}_4$  (Hydrogen, Sulfuric oxide in 4 p)

hducodarco = cebaya, cebayach, Carbonic acid be a weak acid with the chemical formula of  $\text{H}_2\text{CO}_3$ . It be the reaction product of water and carbon dioxide and exists in an equilibrium with water and carbon dioxide whenever the latter be dissolved in the former.

surixbicatea = htucusquinfoqueuctuutrinsex,  $\text{H}_2\text{CuS}_5\text{FO}_4\text{C}_2\text{U}_3\text{N}_6$ , Suffix bicarbonate acid, poisonous substance and powerful acid in gas form that dissolves even plastic and not glass. Similiar to mustard gas but its acid gas and tends to melt things that get near and can be for a a Evisceration cloud.

## Bases (the opposite of acid)

aquaao =  $H_2O_3$ , Hydroxide, restorative water  
aquaoli =  $LiH_2O_3$ , Lithium hydroxide  
aquaona =  $SH_2O_3$ , NaOH, Sodium hydroxide, brittleness  
aquaoko =  $KH_2O_3$ , KOH, Potassium hydroxide, destructive  
aquaorb =  $RbH_2O_3$ , Rubidium hydroxide  
aquaocs =  $CsH_2O_3$ , Cesium hydroxide

aquaomg =  $MgH_2O_3$ ,  $Mg(OH)_2$ , Magnesium hydroxide  
aquaoca =  $CaH_2O_3$ , Calcium hydroxide (females choice)  
aquaosr =  $SrH_2O_3$ , Strontium hydroxide  
aquaoba =  $BaH_2O_3$ , Barium hydroxide

## Salts (Acid with base) (C)

nacl = Sodium chloride, salt, sea salt, NaCl  
mgcl = Magnesium Chloride, MgCl  
kcl = Potassium Chloride, KCl  
cactu =  $CaCl_2$ , Calcium Chloride  
rbcl = RbCl, Rhenium Chloride  
nabr = NaBr, Sodium Bromine  
nai = NaI, Sodium Iodine  
srftu =  $SrF_2$ , Strontium Chloride  
nhqueunotri = chemical compound ammonium nitrate the nitrate of ammonia with chemical formula  $NH_4NO_3$ .  
pbfenotrifedi = Useful in agriculture and explosives, lead(II) nitrate be the nitrate of lead with chemical formula  $Pb(NO_3)_2$ . Its also known as lead dinitrate, nitric acid lead(II) salt, and plumbous nitrate. It be a highly toxic element.  
deulinotri = Lithium nitrate be an oxidizing agent used in the manufacture of fireworks and flares. Its composition be  $2LiNO_3$ .  
agnotri = Silver nitrate be a chemical compound with chemical formula  $AgNO_3$ . This be a poisonous unuseful salt.

## Oxides (Things to rust with) (D)

ago = AgO = Silver oxide, tarnish  
cuo = CuO, Copper oxide, patina (copper rust)  
feo = FeO, field, ferrous oxide, Iron Oxide, rust  
mgotu =  $MgO_2$ , Magnesium Oxide, Chrome rust  
snfdou =  $SnF_2$ , Stannous Fluoride, A white powder, that causes oxidization to plaque break down. plaque (tooth dirt) rust.

## Hydrocarbons (life element) (E)

cyrnach = citric acid,  $C_2H_8O_6$  (Carbon or ash in 6 p, Hydrogen in 8 p, Oxygen in 6 p), life acid hydrocarbon  
kloify = chlorophyll, green plant blood that takes sunlight and makes it into energy,  $C_55H_72MgN_9O_9$  (Carbon in 55 p, Hydrogen in 72 p, Magnesium, Nitrogen in 9 p, Oxygen in 5 p)  
sug = sucro, sucrose, sugar,  $C_{11}H_{22}O_{11}$  (11 p Carbon, 22 p Hydrogen, 11 p Oxygen), cain  
itei = hydroxide, antacid,  $DNAO_4$  (Deuterium, Nitrogen, Angstrom, Oxygen 4p) antiacidic substance.  
mlai = Melatonin,  $M_{11}O_{4}N_2H_6$ , Like St. John's Wort this causes a sex like feeling without the sex and causes slight rejuvenation by melatonin to excess feeling in immunity and thought to better undersating and ending.

## Flame color (F)

use energy or normal flame to set off. Thanks go to Mythbusters.

Red can be lava of oil lamp and mercury with a wooden wick in a small container as a chemical flame only to be smothered out and liquid sodium be alternative. These are fatal except by a distance.

Blue can be butane, butane or butanol and metal add to a spark as a gas flame or disaster flame.

Yellow be toxic and can be from corrosive metal or metal baride and poison or acid HNO<sub>3</sub>.

Green be emerald flame with mercury and corbite, magnesium and corbite or coal burning.

Lavender be magnesium, Mg(OH)<sub>2</sub> (magnesium hydroxide), Magnesium mixed with Oxygen and potassium (any form), Energy reaction of Magnesium with flame, life burst (creation or death) for a light purple lavender flame that's 2 1/2 or shorter hours.

Purple can be the gold yellow blue shade for an emotional flame, a dandelion flower (dandelion) or mercurite and pinsnips, clothespin or similar metal. You can be enlarged with breathing the smoke.

Mauve be a secondary flame.

Orange can be Mauve and self consuming fire and continuance unless water applied, as it describes wild fire with a wide spread effect and live plant things burned (on ground) by hydrogen fire.

Silver be a white gray or grey and to use mercurite, corbium and magnesium or magnesium and nickel. For a special flame indeed with a load of heat. Thanks to Bill and Danny for idea.

Gold be straggish grey and yellow flame and mercurite and mercury or mercurium and lamp oil or deuterium oxide (deuterium oxide) + lamp oil or butane and lead. It can burn everything with other metal.

Peach gray flame be to use stalagmite and magnesium and sometimes lamp oil, a special color indeed.

White be flare fire by magnesium and burning, a quick burn with more white smoke.

Black can be the smoke of chemical fires and radiation fires that be harsh to breath.

## Alchemy with chemistry & drugs

ealda = 1/8 part radon + three parts water + boiled nightshade or sodium for regeneration drug and cause regeneration. You don't need to take it in as the radon is enough.

eavan = unregeneration drug, causes degeneration, cancer and decay

uoctrio = hydrocortisone, water soluble suggestion drug, talk drug

acid = hallucinogen, dream drug, hallucination drug, dissolution agent

aloe = aloe vera, healing plant, plant of health

euforia = euphoria, opium + sugar eq euphoric making stuff in the body

emfazima = food poison

etrelue = memory drug; estrogen, due to it being estrogen; if overused can change a male into female, HFIOAgCu (hfioagcu) can be a replacement.

evrfladra = everlasting flamedrake, One semi-oil lamp and candle, to use the wax at the base of a wide crystal (as not glass) lipped candle holder with a smotherer cloth of cheese cloth or unburnable cloth or wet cloth. Use a wooden wick of a long match to stick into the wax at the bottom and somehow stop the breaking, so to not cause a house torching use metal instead or the makeshift candle in a large metal bucket. Do not let it burn too long or to go large without the smother cloth ready. perhaps use the tin can and wax at bottom to stick the long match. a screwdriver can drill the hole. Do not use inside. This flame be very easily undying except when smothered. When done the adhoc candle could burn until the fuel burns down or serve as a beacon in a crystal.

evrlawawadra = Everlasting waterdrake, In spell form its drowning by droww. That uses liquid sodium nitrate potassium water and calls it aqua for preservation, with a gusher of water control this waterdrake can cause anything of water will and manifest. A bit bad but it will suffice for a waterdrake of opium and Potassium Nitrate with water. When applied to others it puts things out if using baking soda with it. This can burn with a blue hue or red flame if oil and hydrate 1 to 3:

1. distill water and hydrochloric acid with no water after.

2. mix with hydrochloride and baking soda to form with potassium nitrate.

hclh2oquinatwih2o = Hydrochloric acid (HCl) in 1 p and water (H<sub>2</sub>O) in 15 p mixed with fruit juice or more water so its highly diluted acid for unaging and better health, given to cure sickness but it may leave the body weak. Gotten from

[http://www.unexplainable.net/artman/publish/article\\_1800.shtml](http://www.unexplainable.net/artman/publish/article_1800.shtml).

Alternative be to use citrus fruit in juice form of mixed with water like orange, in 5 parts lemon, 1 lime, and add whatever water to taste with sugar or molasses to taste. The spell form might not work so use the actual material in natural formation(store bought) with such a case.

bludei = Blue devil or blue insanity, 4 drops or squirts essential oil or lighter fluid(kerosene) +  $\text{KNO}_3\text{Aloe}_3\text{Cu}_4$ (1 part Potassium nitrate, 3 part Aloe vera, 2 part Copper) +  $\text{H}_2\text{O}$ (the more, the stronger it is). Alternatively for strength is (Potassium nitrate) $\text{KNO}_3$ +8 squirts Lighter fluid(Kerosene or Kero)+water( $\text{H}_2\text{O}$ )+2 parts Copper( $\text{Cu}$ ) =  $\text{KNO}_3\text{Kero}_8\text{Cu}_2+(\text{H}_2\text{O})_n(1-\infty)$  for a stronger effect and the more water the stronger it is. The safe alternative be to allow the addition of acid with 2 quarts more water dilution and you can cause a body regeneration/unaging effect. Heated up and boiled in water for 3+ minutes, idea made by skyhawk. Made up with others in mind.

The noticed side effects are, some brain hemorrhage, great feelings while its happening and this can be drunk, shot up and without addiction. This may leave you in a controlled state of advanced paranoia safely. Those pregnant cannot use this as it kills the fetus or infant. This should thicken or clump together after it cools. For more effect mix with alcohol. If drank, it has a side kick moment of an extra for 20 minutes after the original. It lasts 8 minutes maximum for one drop.

irvall = nervall, 2p sodium chloride( $\text{NaCl}$ ) or salt + 1p baking soda ( $\text{NaHCO}_3$ ) + 2p copper( $\text{Cu}_2$ ) and its ( $\text{NaCl}$ ) $_2\text{NaHCO}_3\text{Cu}_2$  that lightens up all the nerves.

hclnaclhtuotuat = 1 p Hydrochloric acid( $\text{HCl}$ ) + 1 p Sodium Chloride ( $\text{NaCl}$ ) + 20 p water to sturdy the body and cause weight loss.

Any person in need might get reproach and to make amends, they forgive and leave alone if the person's untrusted or they aid in the end. Yet, they appear untrusting but some arent unless they don't know the type. To gauge the reaction they try to compare if a persons earned reproach, by being a friend or not a friend. If nonfriendly then they give off distrust and "no" signals or say nothing and act as if not there. The opinion to them be not looked at until backed up with another similiar.

If distrusted no go and stay away from their private zone of 15' albeit some would say 115' to acknowledge the feat of impossible distances and drive away those they disagree with. The friend tries to chat, they give to reasoning and appear at least neutral or friendly, but like Aliens they can find a way to make thou regret or not see thou own reasons. Unless they seek to experiment or are they talked out of it, where in emotion they feel regret and experiment, to repair their likely to match the area and make no comment unless they see things reacted on. If your alien and passivist then your most likely to live alone in the end. These are likely to cause cause a fight at the end by pushing too much.

ithroat = anthrovert; Some anthroverts are outgoing, type A personalities(active). A perfect type A personality, will get people against them. The fact they would know all, except for what isn't obvious and be too perfect causing envy. Athletes, actors, scientists and active outgoing people, are anthroverts. these people will take any field and succeed in it. Sometimes, treating the fields of study as a competition. these people are introspective, and are willing to study if need be. Anthroverts, sometimes study bones as a hobby or job, like in anthropology. Anything old they like and only the interesting ideas, will they accept. This includes, new ideas and old alike. Only proven ideas will be acceptable, and they are skeptics at first with each new idea. Places of other origins will be of interest, and the older the better. Self acknowledgment, study and acceptance are the goal of the anthrovert, to better their lives. The life orientation of anthroverts are goals, and without goals they are lost. The athroverts privacy zone 5' 4" unless dispersive nature.

catroat = controvert, contravert, Controverts are those that love controversy and works with others to get things done. They are people who loves to chat and express emotion. Why, its a controverts passion, that draws a person and they love to cause controversy and self interest. There are few controverts, for they love themselves first then, love others to enjoy others love for enjoyment of themselves. This be the controverts nature to be associative and unfearedful

of others. their main goal be to be passion in nature. If they feel hurt, they will lash verbally with the pain they perceive. Getting verbal blows till the person leaves or perceives a lesson learned by the inflicted. These people are conversational masters. A controverts privacy zone be three feet.

itroat = introvert; Introverts are people that have no self-interests, and no self control, unless they learn discipline. Except from others, its how they react to people. Being as they will perceive the events as intrusive, unless invited thus not talking to people. Even then, they don't talk much avoiding the angrovert, as they are provoked easy if they cannot stand the person. They will strike without reason, set up the person. To be introvert be to love themselves, then help others because of it. They have no emotions except maybe for love and friendship, There be no emotion except love, or hate to them as they try not to feel jealous, for it provokes them to strike out. This be perfect for an introvert, to not be near any physical presence if possible. People near are an aggravation to introverts as they tend to not like people, close up and strangers, Their privacy zone be ten feet. What the introvert can't have they love, desire. yet keep their desire controlled. An introvert, be an opposite, negatist, antisocialist or sociopath. Hypnotists will set them off with only a proven result.

xtroat = extrovert; Extroverts works best with controverts, one who loves to chat and express emotion. they will have a love for displays, of any sort, Like cats, they move on at being side-tracked, to another activity. their minds are never focused, except on a single task. they can focus their potential, of getting a project done via meditation or anger. Or, to focus on other things, while on a project. This turns them, into becoming introverts. Extroverts will get angry, yet show no emotion, except to get some response. these people will quickly forgive, if there be reason. If no reason, then they hold a grudge for years. the only way to get them angry, be to cheat them, on a project, goal. The range of privacy be 4-5 feet.

igrovat = angrovert, aggroverts, People that get aggravated at others for their differences. If too different, the person will get introspective. Till a moment, that the person they disagree with, gets too close, too personal. then, a verbal lash out sometimes, or a situational setup to humiliate the disliked one. their personal zone is fifteen feet out. These people are extreme in intent, their demeanor, be nice to look at but skin deep only. Meaning, they will be civil till they are forced by disagreeable natures, these people hate sociopaths. Which go on their own rules, avoiding the normal rules, people grew up with. If they spot a introvert they will find it hard. to keep from being civil. But social to all others making these people bigots and hard asses. People can be angroverts to people who stink bad, even if they were other types.

xtret = extremist, The extreme personality type be a manic passer (manic alien passive) and consolidator, that will think every idea be their own to begin with. they make intelligent guesses for what they see, do not know, and made as to how things are done without asking first then they ask a person, who knows the experience, to make corrections and to make sure of their guess. Some extremists beyond this point have short memories, and will try memory fixes to correct for this. Like, cues; questions, repeated statements and faking. These people are theorists and can get aggravated by inappropriate questions, due to a severe temper to assault or reassessment. If assault then the extremist attack something else, except the person who aggravated them. They aren't bothered, by disruption, disrespect. Disrupting their plans or unexpected plans make them crazed. Disrupting their idea be for the better in getting assault. Their disposition be to keep calm till unnecessary,, to keep calm under pressure and create.

This fact makes them go into cold rages that last for days. If they see a victim they will try to help, yet associate with others. Criminal behavior they will support, when there be a reason. their private space be three feet away and these people show no bias, yet have extreme thoughts when it comes to familiy. When pushed,they will react in an unpredictable opposite manner. They love the idea of bad things to happen,so the extremist can live through it, they get a thrill from knowing and knowing they can own. When offered a thrill they deny it, unless bored. If force be directed at them, they respond through opposite force. As in with direct anger they are nice and use calm responses, craziness with a calm demeanor and disregard with an attack, antagonism, They disregard it as childish and will assault, when they see reason.

raiy = psychotic, manson, radical, Radical personality that disregards all personal rules of others, except themselves. the radical has a smooth, always calm visage and never seem to overreact. If they think they can be controlled, their be all reason to think that someones out to get them. The typical response be to wait till they are

proven right. When the radical feels impinged upon,, crossed, they get revenge no matter the reason given. Some radicals, go far as to deny the decency of a bath and some will kill the unbathed person or biased person. Most radicals are schitzophrenic and the radical is never aware, and yet aware of what he/she does for this only spurs the radical on and they do greater deeds unless they feel desire to change, The change only occurs with their desires are blunted by voice and examples given of behavior they will find better or to allow of people to get close without suspicion and at least listen suspending disbelief. Where their opposing beliefs, make them unlawful and somewhat dangerous due to the suspicions, and biased view unless unbiased.

If you want to divert the radical, use reason and proof, the same force against them. Like kill them if they want to do things to you. Only if you share their idea or beat them, will they listen. Otherwise, they choose the moment to strike and they will consider the mark, their target, they wanted to kill or sought revenge at an insult to people they talk to. So these radicals, if piqued will kill who was talked to by the nida (not provable idea). But the not provable idea be what corrects their pattern and make changes to their personal patterns. Sorta like the thief's mark that kills by honey drawing the fly. To prove to the mark, that their lives were errors and needed to show them the way they will do this. If the mark gives in they teach them ways to either destroy themselves by,, to humiliate themselves by. If not, they kill the mark and expose it by an example. Either way the idea of him will die or stop by pursuit, disgrace, suicide,,swift death and manic nature using their idea and portraying then in their form. Anything acceptable be stolen or destroyed and earns forgiveness. Any truth from them calms them as truth be an inhibitor, drugs aren't so effective.

Anything of a profiteer nature that be directed at an action can distract. Mention a disruptive activity to get them going in a potive (positive calm) or terrorist act. When the radical sees justice be needed, they will do vigilante justice, try to teach others how to survive, other information of interests to get people to get along with yourself. When they tell you something at least listen without interruptions,, you might get their suspicions. Never deny a radical what they say up front,, they might see reason to disregard, kill you. Another radical will instantly try to incite the other radical to attack. If bored the radical will seek trouble. To defeat the radical be nice till they aren't nice. then be firm with conviction and they will back down. If you deny their service, then they may try to ruin you with your studies, unless they feel nice. their privacy space be ten feet unless they regard you as mark and then its thirty feet.

obpsycho = psykaae, abpsycho, Psychic assassin, Psychoassassin, The psychic whos mentally sane and physically insane, super calm on the outside and physically not inept but violent with emotion. Mentally insane they are ecstatic and on the verge of seeing a prophecy or vision. The two idea states, after every effort they work on something and most likely be the disposition of I am calm but not taking an idea not worthy. To the common citizen they are pleasant, otherwise they seek not to get in trouble. The effective measure be to strike by information if their rude and make them back down by reason. They dislike disruption and value most as if worthy, even when its not.

The effort to talk to people creates bad vibes if they are nonplussed for the effect of miser individuality. On site and hearing, individuality makes them not strike unless spoken to. This personality be similar to fallen except they won't strike out after use of people and they get more out of a person. They are with devotion to psychic standards that leaves nothing to doubt with seen persecution, or they get quickly mad much like a dumb blond moment.

Since they are physically insane, to strike at a wrong comment and insult with punishment. They appear mentally insane and given a chance but give crazy reactions with a simple speech. So they argue to deplore peace with no cause and see visions of which seem prophetic. They work out problems by a psychic phenomenon. They are most likely to create problems where they sense a crime and drive away the thief or criminal. In a sense they are senseless psychics who can do most things but to get themselves out of trouble as they create phenomenon or glance vision gained from a disaster of an early age. The coincidence of them being like fallen and understood as psychotic, causes them the abpsychic to use psychological tricks to turn the tide.

Omnipotence is very good trade and skill as it helps the person out and makes for understood "what you look for" idea. These are oddballs who train and recover by understanding what to do with the moment. Vision be their biggest and most efficient idea and if questioned on it, they will explain how to. As their be no comfort zone and if their was,

its 1' to 13' spread out rectangular, depending on the idea or mood. With all good mood its 3' 3" in closed up spaces, More likely the people around them will have left before they get nervous. Most move along the edge of contributors and avoid them for they can't keep their noses out of things. Do be obese if necessary around them as to get pity and the neurotic will think up cures or idea to avoid the person or get them out of sight.

pyet = pacific ocean raiser aimed by you to a weapon disfunction, pacifist, A pacifist be the person who always seeks peace and be an opposite to radicals. Will use negotiation for purposes, of solving their troubles. Has no intent of violence, sometimes to the point, of willfully forcing others to do the same. They use social justice, social situations, social engineering to teach lessons. When snubbed, defied, denied and distraught, they lash out, by doing something else, backstabbing the person. Talking behind someones back and to ruin reputation, happens for people who disbelieve and use heretical beliefs. If in this regard they are denied or themselves proven to be heretical. the pacifist will destroy the person as a personal enemy by vendetta.

When they cannot kill, destroy,, ruin the heretic. the justice of the pacifist will be ignore the activity, till they see the right time, to strike with what the heretic uses. This behaviour can repeat. their privacy space be eight feet, and the pacifist will always worry over something. To defeat their purpose at the moment explain your purpose, excuse, and the anger dissolves. The pacifist will tolerate or not mind, to a very great extent anything near them and they will spar as necessary or constantly. Pacifism be caused for the sight of less pain. Pacifists don't like less pain no gain. Pacifism is used to create havoc with whatever they deal with as they deal.

uniat = omnivert, An omnivert personality be a "know it all" with anyone as if reading the "soul" of the individual. So their natural ability be to read auras with anything in site or sight with natural understanding. Given time to know the person through speech, they can hypnotize the target if they desired. You see their objectives are peace and to get their goal as though they have no true friends. They show no hate, love, and emotion other people can latch onto and talk them around with. They are psychological in nature as if "au naturale", They always know what they do and are aware of the results if failure or not. They think to know what others are thinking and that's their ultimate desire unless they can't achieve rapport. Then they will be resistant, manipulative, sometimes they will do criminal activities to undermine authorities, so for purposes to achieve their goals or work through good people if they can at first. What they love be to achieve from natural results and their actions. Where there are people, some are targets if possible, otherwise they are tools to use wisely. It's rare they have a relationship with a person, companionship and marriage to the effect of the right one, that means they like true love with multiple relations.

32 = darcouldoul, trittu, thirty-two, low accuracy (from calc program), more instinctive, fearful, very fast (light load)  
64 = cilthein, sextquad, sixty-four, medium (mediocre) accuracy (from calc program), slight tolerance, sale, zale, fast (medium load)  
86 = ariel-doulcint, not, wrong, banished  
128 = encentduohuaccel, tulvet, encentduoaccel, high accuracy (from calc program), tolerant, slow (heavy load)

256 = doucentceloulci, tucentquintci, medium extreme range, medium extreme accuracy, antidote, sluggish(very heavy load)

512 = celcentdoubuou, quinten, extreme accuracy (from calc program), high tolerance, very slow(crawl, extreme load), excessive.

1024 = enochos e duothein, entosi e tutquad, encode, entry, one thousand and twenty-four.

Power sources

Pua Ynge

Aemedits = The breaking and making source formed from dimensional energy and the natural energy that exists. This forms anything you want or need almost immediately on use. Use the energy of this combined source carefully. To invoke it, state or think Aemedits pronounced [A-eh-mead-its] and the effect you want. Or, state the power word aemedits and be thinking or feeling for what you want. This can break a condition to form your effect. Sometimes after forming the effect, you have to act on your own volition. Meaning, you act on instinct or intuition to get what you want found by yourself, or to get experience on the result manifesting. You may use more than one source by stringing the source summoning words together.

Aetune = Aeternis, Aeternity, gravity plus dimensional energy and eternal energy that makes effects of good and positive easier and universal. While, it strips the bad from anything used on. This dispels demons from the area. This potentially turns bad actions and evil. This energy can materialize anything.

Aoetryng = spez, Universal eternal energy source.

Adaio = aeiou, Fey abstract force of the adverse life in motion and by usage of device. This is the fairy force of existant energy and on use, can get the effect of instant results by combining it with elemental energy. This can work with anything and do nearly anything you want.

Adaei = Fey abstract force of life in motion. This is with objects and thoughts manifest through devising. This is the fairy force of existance with life energy that is summoned and usable in whatever you want to use it. This force makes it easier to do things.

Avtuner = a bio source that uses everything and anything to make a result. You can eat some of it to get strength and effective energy.

Entaiay = En tertiary field, this is an entropic time gravity source mixed with dark matter and this makes memory and the mind improved and you can handle almost any energy level. Improved energy death happens with this field. This is as an end of entropy in an influenced event. Put energy to an entropic tertiary field, and time that is events slows down. This works by the effort of events interrering a push energy that causes things that are a bit slowed down, in effect its energy that slows down the events. This makes it so your mind can grasp the understanding on a conscious level. Otherwise, its a way to end the time gravity field.

Etune = Aeturnus, gravity and bio grade electricity with eternal energy. A tuneup of ability that makes you perceive what you want before it happens. This gives premenations.

Etuny = aeternity, self amplified thought that causes timed events and this is by wild or positive energy and gravity added to eternal energy. It fosters greater than normal intelligence. With enough ki energy, built by activity, then it can be with enough personal power to effect even a god.

Eturne = aeternis, this is animal energy used for eternal magic or working with eternal energy (from the eternal side of the objects) with gravity and life energy or electricity. Its willed by thought intent and energy projection to get it to do things. Its a black and yellow and blue energy that turns things the way you want it. It gets its energy from the oceans. This can turn things demonic if there's demon blood in the person. This can spawn lazyness, by a feeling of intense peace. It manifests differently per different power source of the body.

Ini = iniverse, the initial source universe.

Ool = energy pool that is a collective resource, this can make a ghoul.

Omnitun Ark LuraE = Holy darkness. This arouses the senses and makes effect easier. Except its not our holy, its pure dark energy that is derived from dark matter and the effect of a super energy of the omniverse. The omniverse is an upper dimensional universe. This energy creates what you want and makes things animated. It animates things that is used with it. To use it, make effect of the energy with the idea you have in mind and calling it forth. It will appear like nothingness at first but with ki added to the energy, it creates the holy effect and causes that to be near what you wanted from things. Use this with care, as it can bring devastation to beings who want to help as it brings ruin to the moment that the being wants. This can cause anything to be turned. Use the thought of what you want to help empower it. The subconscious makes things with it, as you invoke it. The more you do, the more it becomes appearant. Cast effects by thoughts, spoken words and moments you do. This effect derives off of a black matter that is very oblique and unobtrusive. Thus, use english with it or other negative languages. Such as, saying 'No things' and you know things. Or, 'This isn't' and it does what you want. This forms unexpectedly.

Omnitun EmoliatE = Ben's Holy darkfire; Take omniverse an super energy, dark matter and white light fire energy. This is a created Pyrark Lura or self-consuming dark fire as the effect an making a firey dark matter that can burn anything. This is the effect called from space and by thinking of it and making it manifest by willing it where you want it. Think say or say 'Magis AeImedits' pronounced 'mag-Is A-ehh-I-mead-its' while thinking of it and it forms on the object or in something. This is using crystal techniques to generate it. Which are Spectral crystal techniques.

Omnitun Lece = Holy water, this is the super energy of the omniverse mixed with water. It can form at will and wherever you want. This is the moment of a synthesis where water is very holy, and can't be easily acceptable to those unholy. It can be disagreeable to those of vampiric and dark nature. The source is easily summoned to form at will. Thinking Magis Imedits, pronounced 'mag-Is I-mead-its', makes it appear where you want.

Omnitun Unnsu = Unholy Omnipplane energy that can be called with Omni Unnsu, pronounced 'Omnee Unn-such'. This is the unholy energy that can form vampires and unholy things from the omniverse. Its called by saying or thinking 'Acteon Imedits'. Pronounced, 'Act-ee-on I-mead-its' and it forms on anything. This transforms the target from within and can manifest it outside of the vessel, at will. It can form neutrality and despite very easily.

Omnitun Unnsupyr = Unholy Omnipplane fire energy that is chemically based and can be called with Omni Unnsupyr, pronounced 'Omnee Unn-soup-irr'. This is the unholy fire energy that can strengthen undead and dark beings and burns demons. Its called by saying or thinking 'Acteon Imedits'. Pronounced, 'Act-ee-on I-mead-its' and it forms on anything. This transforms it from within and can manifest it outside of the vessel it is used to form it. It can form bad menace and despite very easily, while it burns things near it.

Yng = pure energy source.

Cryh = power source made by energy leaking out of a containment.

Hamu = mana, ancient magic source. This can harm the user by inflicitive means being done or not as the trained idea per use is done by a professional.

Luraseh = Dark matter field, this is the science of dark matter in use and disruption of what you want. This is using the essence of nothing. It may seem impossible, but its there even when not invoked or evoked and when you need support. This can create any effect by your intent through will invoking the dark matter to materialize the event or effect. This also pushes things back and makes things go away, if you desire it to. The goal is to create with it, but not push people away. This force responds to the vibrations it receives.

This dark matter source makes its effects, from gathering energy from the things and people as it needs to. Decide to get energy from the essence excess of released force, and you don't directly take from the body its necessary live with. When it fully forms, then it can become reddish energy.

To invoke it, imagine nothing and use activity to create results. The energy of the result is used to make dark matter effects by your subconscious. Optionally, you can evoke it to exist action that create events by stating, 'luraseh' pronounced [lure-ah see-h]. Whatever you do, you get detraction by dark matter removing the unnecessary actions that keep the desired effect from happening. What you do after you get the dark matter invoked or evoked, is say what you want. Then the effect may materialize from nothingness. This creates things as though they were there. They show signs of a signature, that is similar to you. This may materialize you from another plane of existence. Consider the alternatives a playing field, after this. As you shift something or yourself to another place, and easily get results. Shift places by using dark matter, and thinking about the place and effect your placement by imagining yourself appear or being there.

This can create dark matter beings from thin air or matter, and have your will imprint the result on it from the directed thought, or subconscious to cause it to do things. These things can transfer to you, in the form of energy. They can appear like anything you want or desire. They can appear anywhere and any time, unless unnecessary. You produce a darkmatter energy being from invoking darkmatter energy and stating or thinking, 'clone'. You can produce an unlimited amount of clones. You can revoke the effect of a darkmatter being, by stating 'E En matter'. This directs their efforts against themselves. Be careful, they can do nearly anything, unless directed by the subconscious. Then, they can do what your subconscious tells them. If your in tune with dark matter, then you don't need to evoke or invoke. You can create things anytime by will and they appear nearly anywhere and anytime. This can create things even before you create, in a form of instant matter. This has an ultimate end, where everything you do comes back on your brain. Appear to give in and you appease the force you created, then you get stuff done more easily. The way to attack someone who irks you by slight and effectively is with dark matter. To distract a dark matter being, is to make it not attack or notice you.

If you find someone attacking you, state 'E En Em', and the enmity or dark desire by attack stops. The ultimate end of the spell is where you end yourself by ceasing to exist and become part of the dark matter beings you created. This is unless you unform the creation, try stating 'uncreate'. Or, you may unform the darkmatter creation by thinking 'stop' and the being disappears. Then you survive the enmity. Another way is by saying or having your subconscious saying, E Un Dark matter. Then the distraction and detraction of people disperses. What you call detraction is death of attraction. You may say this anytime and anyplace and you may return things to normal.

Lyqy = sun energy flow thats liquidy. This energy flows from the lava and any sun.

Pime = prime, primordial energy that is made from dark matter and dark energy with interaction from the mind that causes chaotic events with whatever its used with as its dark energy. The primordial mind is able to god make anything form by will. This will an is enabled from a sigil or will in a thought of taking the energy into yourself and what you create inside you is capable of making things outside of you. This can be destructive or deturrant. Deturrance is making a degree of usage to deter something as its used an it will correct.

Lyqy Pyro = Thought into form pegasus or things that are dark in nature. Formed from a dark force of nature, you can seem any form with this as a shape effect.

Lyqy Pyronne = Lyqy Fire is use of the universe to create what you know, and thought seems to interr with it turning into fire as you use sexual energy. This in thought is to create with an inner use innate drawn fire from the inner self, by use of the energy body and is the innately used power use to any innately thought use idea object. To draw the sexual use is to in draw the power the body has as an energy, as this is to create with this is thought use is concept and not anymore and in you learn to use with a killing thought outwardly. This is an inwardly drawn defense, that if extracted by thought to seem use is as a source.

Tatiay = Tertiary field, this is time gravity that improves power and ability to make efficient use. This goes through all time space to get the effect you desire or need. When the event you caused happens, you get the effect by an event you asked for from ether. This turns things by turn or make a time trick to occur things. This is extended time influence of a death or stopping something to get results. You get the energy returned to you after its spent. The spirit causes you to return to yourself the energy spent. The energy put to this time gravity, can speed events up.

Theng The Symbol; This is the sex source that gives any sexual idea and lust with energy that can be used to shape into another sex with no regard to yourself. Use the memory to keep things in memory storage.

### -XXXI- Ranks and positions

magus = magical, juupretyea, magician, General name for a magic/k user who makes devices, enchants and events on request for self, as a thought to be paid for success, self-fulfillment.

sorcao = a general name for magi, sorceror

maj = mage, magic practitioner. Hidden magic manipulator and enchanter, illusionist through unseen "magic" manipulation and often considered a magus. they sometimes go out of their way to manipulate and get their desire by tricks of magic. If they don't get their way, they force by hidden means or interesting manerisms to do and get as they desire.

gandalf = wandering mage, wanderer without a home most times unless they stop wandering

sorc = source mages are magic practioners that effect through many different sources and physical magic to get their desire. They base their idea on wild power and treat it like a source to be any other.

elemaa = psiaue, elemental master, jedi with -master appended, Specialistic force master with a -mancer (practitioner) and -many (master) at the end of the element name or psionic force user(psionicist or spirit user) with -kinetic (channelor) or -kinesis (ability) at element name end using any one element, the element can be summoned or formed into focus. These abilities fall under. Magic or Psychokinesis, where psychokinesis(- charge) and magic(+ charge) don't like each other when structured and what its like at the planck level be similiar to a unified force to be built off of, otherwise people wouldn't be able to do both, singly at some time for the mental ability of psychic mind and magical energy manipulation in practice by Metarules of Affinity (likeness attraction), Thaumaturgy (like effects like any distance) and Mind over matter or Mind focus (focus of mind rules over objects and bodies). With regard to understanding how to use the element efficiently, and how to make effects to appear along with speed improvements. The true worth is the fields in this usage as they are different named. So far people use the terms of the four elements along with others, like;

Biomancy or Biokinetic be life interacting with objects and people that allows, for the reading of genetics or body type and races in people. Through looking at the soul aura with focused sight to perceive the colored aura pattern by brain interaction and by blinking your eyes. The aura can be seen as rendered perception of coloration in the original shape reveals what the aura is within the limitation of how the mind can see it. This will work in pitch black too. Anything of life manipulation by biokinesis be through reeiki

as pk effects sent through a channel of energy as to the target by earth or a body channel by feel or voice to conjure the action intent by the wave molecules to enact a vibrational carrier wave through a medium of earth materials from the planck level.

To control bodies be the effect if told in some manner to do the action and it will happen. Using the einstein law of gravity in simple terms to explain the wave effect, be if you move forward and then space moves around you by displacement particles or electrons. You're kept down by centrifugal force and the displacement happens from that of air molecules that look like waves that flow as you shift in movement and reallocation of weight that flows in movement from the centrifugal force.

Beomancy or Beokinetic as pheromone control that makes you able to control the body scents to speak or for feeling interpretation. The pheromones of the body are capable of being a totally different language in itself. This language can make what you say very understandable. The similar sex mood works with it in scent to attract and make better. The true efforts are here that make it like a truth as it is in war to the control of pheromones can make attractions possible. Detraction by think of other and act for them and this is in pheromones. It can make with you in attractive motions, to the other sex or to your sex. It can control within reasons, others as well. It be very easy to do by the quick way meditation. To make it seem like its necessary makes it quick its almost a true suggestion it is to the utmost degree in pose by posing as one drop of blood then drop the bad mood..with true serums injected into the skin of the package. With truse as degradation to occur after its used.

The quick way to doing this, using pheromones be to use intention of seeing aura for pheromones by feeling that you can from Dr.lehr, To blink your eyes and then sniff while expanding your consciousness to allow the brain pheromonal adjustment as your sniffing, activates your scent detection. See the scent by allowing your eyes to adjust to the persons aura or even food and then to sniff for the pheromones. After this, use the effective feel and watch idea, to adjust and see the reaction of others and the effort be easy as you feel the pheromones.

The easy way of blocking out the scents your aware of and don't like smelling. Use the thought or active scent of that which be not desired. Then shrink your consciousness of it, the idea, and how it seems to you. Thus, ignore the result of its scent to dismiss it. What does this accomplish? You subconsciously manipulated, through the meditation of your body it subsumes the idea, to be able to control, pheromones by your will. Now, the scents of pheromones have different meanings.

Any effect be to not be counted if any fruit was eaten before you scented it, as the fruit makes the body scented of the fruit. except to smell a citrus fruit be to awaken the senses much easier.

The burnt scent means anger.

A citrus or pomogranate scent be to make aware for easy scents and mental ability.

Geomancy or Geokinetic as earth where these are healers by feel or seeing

brown molecules in a scrubbing motion to scrub out the disease while thinking of the disease, manipulators by pk movement or restorers by destruction or repair of objects and bodies, Along with shaping ability and dimensional effects as your forcing the earth to shape by pk movement with thinking of the effect and seeing the brown or gold earth molecules rubbing together, that is a point done by feel. Some would say this falls under the lines of pk as your moving earth as a energy. They have a limited ability to control lava as in control its flow until its positioned right and as you the controller work with the effect, the objects touched by manipulation cool down only if you the worker see the molecules stop rubbing.

Liquentismancy or Lluentiskinetic that allows for lava control (liquentis control) and can control volcanoes along with emotion in general because the emotion be used to control volcanoes. Similiar to geomancy yet this offers more control over lava as it be lava specialization and where the earth is brown, emotion and lava be purple or reddish brown. The lava manipulator can control the emotion and/or lava by inciting either molecules, like love or hate along with other emotion in most people including themselves. The liquent master can cool down or heat up lava with a will to move the molecules slower and not get burns easily unless not done right. They can control the flow of lava as well as geokinetic. Given by spellhawk.

Pyromancy or Pyrokinetic (d'snag'h) for fire masters that are emotional and sometimes capable of loving destructions along with tricks, their control on fire can be to make or unmake it at will. They can excite any fire particle of heat (red dots or tachyons) to some destructive force and little excess. These people are not needing their hands to make psiballs unless they desire to.

Hydromancy or Hydrokinetic who use water from air and other water source manipulations to get their result, The water be moved from a substance or the air and they can see and breath water well enough to effect form it anywhere including in people, and dry things up by removal; See the aquamarine colored molecules and attempt to incite them by making the particles vibrate and rub together while you feel the result or think on a result you desire on a focus at the object or area.

Cyromancy or Cyrokinetic for ice and cold to freeze or unfreeze objects at will, they excite or compress any cold particle (blue particles) for the effect. Including water, fire (putting it out) or air, leaving a excess of energy;

Aeromancy or Aerokinetic controls air and get readings psychically through reading a universal conscious of most time, they have omnipotency, force form barriers and air walls, support or mental control of mind; Use the black or colorless air (felt but not seen) particles to get the result by exiting them.

Tachyamancy or Tachykinetic allows small red particles (tachyons, active energy subparticle) used in pyrokineticism or waves (lekton, gravity or light waves) manipulation used in biokinesis along with their interaction to form magnetic fields. This earth air be the particles of subatomic level as it supports magic and psionic ability, by forming the sublayer foundation of energy manipulation. These people can control time and events to make what they want happen. They don't need their hands to create psiballs that are concentrated psi energy or psi effects. All that's really needed be the voice or focus to get the effect in place with intent.

Necromancy or Necrokinetic who controls spirits and death by different means of kung fu and ritual where chaos and demons are their key idea in working effects including death itself; For the necromancer its ritual and the necrokinetic think of death particles as bone white. To cause death just incite by feel the death particle of bone white to rub or vibrate. and incite the particle to uncause death by causing the vibrating death particle to stop or see the particle rubbing together and then stop the rub by feel. The reason for this be to stop death instead of causing it.

Aekinomancy or Aekinokinetic be the ability from aekinothetics, the study of light energy conversion involving geomancy, aeromancy and contingency effects as probability to generating electricity and energy or channeling it; To incite it the current, feel energy sparks to occur in the area and then incite the sparks by feeling the spark flare. Then shift to normal vision to see the results unless its not near.

Atheomancy or Atheokinetic, otherwise considered Alamancy are the effect of depicting a scene by description, drawing, acting or talking. The depicted event will happen through energy, psi or pk enactment from subconscious manipulation. This be Spelukin enactment with energy and magic effect added in. The material be what it needs as in psimaterial that you infuse with energy as its worked with or be of a psiball combined to the object or item. As you work with the item infused its instructed by speaking, feeling or seeing the event and making a portrayal on what you want, Such as in laymans terms, paint the scene while feeling its alive and the energy transferred from you in small bits creates the psia from depiction and a psiball effect. Due note: the red dots of tachyonic energy can be used to infuse the objects without touching it.

Aromamancy or Aromakinesis be to effect a scent feeling and percieving the moment to create the scent, as someone describes the scent or your idea of smell as they want it to be smelled. This be done by sending the scent to the olfactory nerve. Two tries will get you started as sometimes the description after the attempt will let you perceive the scent.

Athemancy or Psychokinetic the usage of most elements in the magic and mental schools. The mental element tends to use most elements as it broadens the mind and makes for to influencing patterns from just one element, The other elements are influenced from provoking the effect by the law of invoking gray magic or mind effects by use of the universal conscious or activity to achieve a result. This makes the person aware of most troubles and events without being told by omnipotency. To do this think of silver or gray for most elements that are incited with a feeling of the particle vibrating or rubbing together or alternatively how yourself will achieve it, feel or think on the element or feel energy. Then shift your frame of mind to the normal idea of your own and speak the result or feel a result, see the result mentally or think of the result.

Ethemancy or Etheokinetic be the same as Etherio be Ethe and derives spirit and most negative efforts including death and void manipulation to happen with very little effort. These are short and long distance efforts that occur as a dream after the spirit-that-goes-through-everything obliges. The people act shamanic that are using this spirit as they gain what they can of wisdom by knowing it and knowing people by it. The ether user can derive drinks and drugs from air or spirit. The shaping ability of spirits and formation of body to other forms as well is possible. With ether manipulation one can make spirit essences in the formation as one desires.

There be a key to the effort to help the effort along and idea to occur, its the color black or ghost white that allows the effort to occur with an exciting of the particle, by adjusting your frame of mind and see the particle excited or rubbing together with the color of choice. To get the result, speak or feel the effort you desire and when finished the occurrences can be stopped by unexciting the black or ghost gray. Then unadjust your frame of mind to normal view. But, if you find yourself in a dream vision as these visions are prescientific in nature and range from any time point including in the past, then the only way out before it turns bad or worse than ever, be worse as you don't fight the vision but manipulate it through actions until it ends,

A vision can end through thinking it ended, die in the vision, sleep or unexcite the black particle, if directed at an element the black particles can excite it to destroy almost anything thought about or create from nothing like nothing in but focus and nothing out. If you die in the vision you lose the memory of what occurs in it. Within the vision the rules are to have fun and make the vision of your dreams once you gain control of it, the vision that I described.

Due note: people within can act if given permission outside it, call them troops if you want as they will try to protect you unless they were attacking you. All that's needed is to deny their permission.

wis = istar, wisdom, wizard, wise one. Visible magic manifestor, enchanter, evoker, conjuror through "magick". they live near family and then outlive the family to cause destruction on persecutors and positive results for helpers. they self practice and study for long ages to sell their trade for profit, to adventure and explore new areas of magic.

wislif = White wizard, life wizard, Person who will use any thing to get what can seem desired as they use the "arcane vitras" for magick to get as a goal the desire when blocked or not. Life wizards are optionally able to share memories with, from others to do top notch in the field of choice. With the machines, they know quite a bit as they are part dreamwalker and can manipulate dreams, visions at a whim. These wizards don't have to study if they can share the memory of the machines use. their special ability be to switch places with another. Life mages can bring people back through pattern actions, idea with "life" energy.

wisark = dark wizard, Similiar to dark mages yet they use visual "magick" for the effect along with "shadows", "light" and "negativity". These people are more dangerous as they view people as innocents who don't deserve destruction. yet pursue the evil doers to the death unless convinced by peaceful means.

deaet, saiet = Demonist, Satanist, The worst people to do practice as they use demons to do anything and make examples of the pests and disruption they see, find. Often considered hell wizards as their energy be instant with a slight corrupt effect that can control anything through reverse cosmeria, corrupt universal particles in some form. See their ritual and simultaneous spells are fueled by desire of which be backed by hell energy using their body, a "focus" to channel the effect. After awhile the demonist is turned by hell energy into a demon.

Their patron be satan and most the members are unstable except the leaders who are zealots and bigots. They get jobs and keep them unless they desire to do a little bit of evil for their own sake. their tenets are to decieve, destroy, vengeance and usurp for the pleasure of pure evil. They don't have to sacrifice, yet will if asked to and can give the murderers soul to satan for brownie points. their enemies are any who stand in their way unless they have a use of them.

squab = a servant, nonmagical kinetic wizard, warrior wizard that channels energy from others, things with effects that counted as "magical". Also the effect be considered kinetic manipulation as they use the energy to get desires. They have ability to gain visions by seeing the pattern of people and items.

majyl = wild mage, magus that go and become hermits that live ages in some off excluded place

warmaj = warmage, Magical soldier with war magic, that causes insight to events, heated body and ability to withstand great pain without flinching. the war mage be psychic and psionic with the hitch to this as it be they become warlike and very skeptical. When they are this skeptical as to doubt even a good deal when you look at it, you won't make very many friends. They are good at insults and know how to draw out a person, in converse with said target. Instinct of primitives are very important to the war mage as to strike on an insult be second nature. Giving a chance when the person tries for it be a necessity till you feel tired and antisocial and they give up. Yet to gain this, they are born with it as its the nature of warriors, and its inherent in the person. Innate ability be a part of the bodies resistance to cold and pain while it gives psionic ability. This includes dimensional manipulation skills that are very hard to detect. They are often considered aurors of magic to be fair.

The warmage has magical power as it be the magic of kinetic motion. It be the moment of movement that be hardly noticed but focused to create an effect. This effect be the concept of motion which be focused by the warrior's single-minded purpose. Imagine the effect you would want, and focus it through your motion of body, weapon choice. the thing to do is thought that you use to focus your mind to believe that your motion will allow for the effect. there are many thing they can do with this including the usage of air as raw energy. This be what they can do: Traveling, Human defense field, Human kinetic attack, Kinetic manipulation, Flight, Funnel, Kinetic rune, Kinetic metal manipulation, Don't choke or hurt anyone and you can shift freely, with this as a person and Elemental power focus.

amaymaj = Hermetic mage, heretic mage, A mage who uses "bridgecraft", to trust the general formulas to use a bridge for a witchcraft effect. This "bridge" be formed when raw energy in solid form becomes effected and causes the effort to happen through infusion of the area to be enacted upon. What words used cause the effect of the raw energy, and the effect be achieved as this hermedic medium be lengthening the effect beyond a few minutes to few years. This can be used to get places, with achieving to awe, inspire if necessary.

There is a game that be related to this idea called "Ars magica" by atlas games and it has five art verbs with ten form nouns in it. With this in mind there are many more nouns as the game be limited in scope to keep it simple, like as many as you can make in another language excepting the verbs are still mostly five and yet the nouns are unlimited where you can specify exactly what be affected. As "make peace" to make a peaceful moment out of nothing. raw energy be everywhere so to say a few words gathers energy from all around to form the effect, in a simultaneous cast that may have a weak effect. With each effect be the effort of temperature drop, to make a instant recovery as two minutes pass. the hermetic mage will do jobs but with the aid of the hermedic magic to get through it.

lifmaj = Life mage, White mage, A person who be in service to the hidden way of life, "arcane vitras" and uses many life lengthening "tricks" along with things of other magic to suit their purpose. their sources be "life", "earth" and can make possibility of anything through, mutative, changing effects as life will imitate any source to suit the purpose. They are immortal till they choose to die by removing the aging process and natural mutations. This can be used on others for the purpose of interest and only with permission, unless attacked, panicked and then they change a person from the inside out. Their special ability is to switch places with another. There are three types, light, gray and dark life mages. Life mages can bring people back through pattern actions, idea with "life" energy.

Life mage of the light or holy warrior granted from pope are very noble and know their entire lifepath given to new idea sometimes expressed by others. To use life means your exposed to much and can go insane more quickly per spell to get the result. Yet they can "borrow" memories to get the results in hidden ways that are obvious to the right people, those that recognize a pattern. What that means be to see where its coming from and know what to do to unravel the spell from events. The light life mage may bring something alive to get the device enchanted. Yet they most definitely will change an object to show the properties or ask first. The object used are animals and mundane with rare exception those humans and humanlike that agree to be adapted with reassurance to be undoing it if told by the person. Light life mages won't use genetics unless necessary.

Life mage of gray or medium, will share both light and dark, while being deceptive to those who are untrusted, yet will strive to create an inner life in anything that can live and keep it hidden from those who would hurt it. This be unless the object be a animal, construct or humanlike and are given permission by the object, human. They are arguably the most likely to use their own idea with possible inclusion of other interests for positive results. They get no pleasure from torture with great possibility to make a new form if allowed through creativity. Yet the gray life mage will alter their own body to suit their purposes at a good time where they will be unnoticed. their techniques are to use mutations, genetics and changes to do as necessary for good results.

Life mage of dark or dark shadow warrior, will use "hell" as well as the normal sources of "life" and "earth" as a concept to create the perfect mutation. These people have no morals and keep no oaths unless its worth their while, They will use anything that be useful as in humans, animals and objects, to mutate, experiment on where the experiment can turn into any shape, enchantment. They may play with genetics at some point to improve results and to improve the looks. Dark life mages will get humor, pleasure from torture and anger from failure.

kaot = caot,, chaoticist and somewhat separatists. Dark mages that are considered hell mages and are the epitome of darkness and violence with a little bigotry added in, yet they look good to others. This next part be a little hard to believe but its mostly true. Their sources of energy are "hell", "wild energy", "negative" "life", "astral". They are out for themselves to create the desire of choice and through secret rituals and handshakes as security, to make their dark deals unknown as their worst fears are to have revealed themselves unknowingly. So they do rituals at night with simultaneous spellcasts any other time. With probability of any source they prefer negative energy as they are untouched by it. their will be to control and their voice be to manipulate, cause any event through calamity. their favorite places for

the meetings are the astral plane, dream world aka "tel'aran'riod" taken from "the wheel of time series" from Robert Jordan with whom they deal with, for fun.

Dark mages dislike the light and will ritual suicide if caught too often in dark desires with controlling criminals and destructive people due to the remembrances of hell. Draining energy from the event be their favorite activity to get the evil deeds undone or stop crime. Dark mages use "magic" to achieve the result along with darkness, deception, hell, demons, light and manipulation. they aren't bigots, biased unless pushed and prefer not to fight and yet to resist aka "dirty fighting". their most useful allies are the drow or "dark elf", outer dimensionalists, other darkish people as partners in unseen disruption.

When anything's wrong they punish the person responsible unless it's an ally. Satanists are their natural enemies. If the dark mage gets a job then they could be punished, they aren't easily accepted because of their life view and non participant attitude.

kaolist = felt mystic energy, chaos manipulator, chaos mage, Mystic master that are trained by monks and are considered a monk yet aloof. They use the open hand combat techniques as well other weapons, yet limited to no weapons of pointed nature except staves. As many prefer the staff or staff yet use chaos and void to achieve results with the rule "void is substance and substance is void". Thus the kaolist be used to do nonspoken and mentally scened, felt magic. Void be within boundaries of infinity and substance comes from void only to go back to void. Chaos be used by them to form events that are ordered for positive results. Whether or not its negative or positive energy, its the same for their purposes. Sometimes the chaolist is able act the scene and or speak what a person does, the person or scene that is achieved in most cases. Also the witchcraft action almost always occurs by chaotic energy.

sei = shaman, death mage, spirit mage, Spirit masters that speak to the dead and speak to the living spirit through the-spirit-that-goes-through-everything and can tell the shaman anything about a situation as well as allow control the person, spirit through the-spirit-that-goes-through-everything and this allows the scout ability, to work better as you know when something will happen like omnipotence. The energy of the user will go up on usage of spiritual lifeforce as well with unaging as long as the spirit supports it. Usual tools are ancient bones and rattles that can charm or call spirits.

This renders the user a wiseman and a ageless person who does not die as he can merely ask god through the-spirit-that-goes-through-everything for a boon and it will be granted with a good reason. What jobs they can get are myriad as the spirit can tell you what you need to know to complete the job. Shaman will guide in two ways; white shaman to peace and light and practice "white" magic rituals. Red shaman guides toward light and war who practice "red" magic rituals. The shaman can't get a job unless they want to because as you can see the job they have are to guide and live off the land.

srei = sorcerer, magi, sorcaa, despised one, socaa, innate magic worker, secretive good event manipulators and light guiders by "inner source ability" sometimes self taught and "chastised", "rewarded" if caught doing wrong and they live in clans. Magi are very good with weapons as its their second study.

pymta = palemaster, spirit sorcerer, necromonger, Mastery of spiritual energy for people or things and considered spiritualistic warriors that allows for any typical manipulation. As in stealing the spirit from the body to make it into objects, different shapes, and put into an object or put into another body and back again as if a voodoo priest. This ability is given by being a voodoo zombie who got a soul back, or tortured to death and brought back undead. Thus his/her body regenerates, with no destruction left even after the body be decimated or chopped to pieces as it comes back like a zombies would. Lifespan be for as long as the body doesn't wear out which means 400 or more years. They can't get jobs for the "zombie" scent that remains after the original separation and smells as of a dying diseased person, yet they can if they have musk or perfume on.

Some don't prefer to be around them for the raw scent and almost revulsion of the senses yet some don't have this scent. The problem exists that their faith be very intricate afterword to drive them almost position hungry intending to get what they can get. Otherwise the palemaster prefers neutrality to fighting and yet they live almost

fighting for things. Their faith be to outlast by any means, the fight and win despite odds. With each success their be a glory sense that empowers them a little more as the victims life force is taken into themselves. This religion can be described as a chaos faith.

selimagi = selisocaa, sublimsorcer, subliminal sorcerer, Prescientific sorcerer who can use their subconscious, to do the spell effects and it seems like a wishsong effect. The subconscious has taken over and subsumed the conscious, the conscious turned transparent and acts as large focus, either way it no longer viels the mind with the subconscious controlling the body. They also have inner sources that are fed by the subconscious in a continuous balance. To selimagi all time be available to manipulate and seen as they want, a focus.

Feeling the result be instinct with causing it to occur as well thinking it out. their inner source can replicate any ability with the right instinct, feeling. They can become insane for the moment if alot of outside presences due to internal mental pressure. They follow the rules of the magi.

sorcayl = Wild sorcerer that be one who summons things with a wild source and this comes from a person named Magus. they will attempt to focus more than they can take as a power yet not burn out. Meaning wild magic be the source they have and will use as possible till they feel not too or they will be in danger of passing out for the strain of wielding raw power. These people tend to be crazy as wild magic "carves you out from the inside" after a long time. This leaves you hollow inside and even after you can use wild magic. This allows for unlimited energy channeling but acts as a false magic thats illusionous. they can live 500 or more years in self seclusion and hermitlike.

socao = sorcerer, Secretive event manipulators that act as self examples, dark guidance through "inner source ability" sometimes self taught yet regarded as "outsiders" if doing wrongful activity and openly. there be no "reward", "chastisement" except pain from enemies who catch them. through dark source working with a developed idea to trade with and gather information through experiments, they gain self-concepts to provoke, lead others into what they want. they are considered the dark magi as they won't consider people as near themselves, will but not consider the feelings. They don't make sacred items, areas as they use "raw" energy and they work alone most times.

selisocao = sublimsorcor, subliminal sorcerer, Prescientific sorcerer who like selimagi can use their subconscious, to do the spell effects and it seems like a wishsong effect. To selisocao, all time and people be available to manipulate and seen as they want, act a focus. Feeling the result be instinct with causing it to occur as well thinking it out. See their inner source can replicate any ability with the right instinct, feeling. They can become insane for the moment if alot of outside presences due to internal mental pressure. They follow the rules of the sorcoror with similiar abilities.

wicca = living power of faith, magic paladin of good that lives on faith of the God and Goddess in a way of life.

wiccan = sorcier, witch that don't openly acknowledge being a witch to avoid being asked for help. When the wiccan spot trouble they deal with it with help, being alone. Most witch considered wiccan be a good influence.

wyc = Witch, an open magical scientist through "magic", "metamagic". Living where they want and yet group near covens, grottos hidden during the meeting. they openly work magic and get asked for the rituals when they are spotted, as they see trouble. Most witch except wiccan be evil or good depending on mood.

sundia = sun diveister, sun diver or star runner, energist, energy weaver, free person that works first to aid said person and to aid others second, strange merc, A persons energy manipulation by outside radiative forces to create power flow as weave in form of manifest outside the body; Some break things or break up the sun into patterns when emotional. Thanks to "Sun runners fire" by Melanie. The sun energy be red orange and has aftershades of blue.

sunrun = sun runner, sun planer or one who uses the sun, sun planar, energy channelor, An energy focus that be a person that can be of use the most thanks to Mark Steward, by use of an outside radiation and lava source for inward manifests of ability to achieve, they overwhelm (by energy). their energy be solid ultrablue, true blue or solid blue and

at night its ultraviolet blue and to exist, events have to support by feeding it and it can deteriorate anything. At at rate of a plane per minute or 10 seconds per 15% and the idea given by the Sun runner series by Melanie Griffith.

munwev = moon weaver, the power these mystic channelors weave is moon energy that they direct by thought, voice and requests to the moon. They can live up to 300 years if lucky and choose to create better with what they have to do. They work with the moon and create by it's light. This is the point of creation, they channel the moon's energy into creating an idea that their inner eye can create as a form of manifest and thinking that they have or say directs the effect that's done by feel.

wykneg = negative witch, Users of people, idea, persecution, and light through "magick" and "metaphysics" to create the event, while in serving the dark gods and goddesses. These witches cause the witchhunts to seem necessary as they would use any to get their need. Yet they follow tenets of darkness that direct them to decieve, destroy enemies, do evil in the name of good while they do dark to control, compulse evil doers. If a good person gets in their way they ruin them as it seems fit, to leave the victim alone as it suits their purposes. They abuse property rights to steal and they break laws as they wish for sheer joy and to feel good. the dark witch cannot stand light very easily but will tempt it for job seeking and work at night, day.

ainewika = aborigine witch, A witch like person whom uses instinctual taught skill to do rituals, that are "wordless" and instant from the god/dess energy of before humankind or chaos. Aborigine users are useless in a fight but can use natural incidents to cause any action or event. The energy they use be the old magic that seems instant but sorceror like and can manipulate time by a drawn out ritual or instant manifest. Some use the old religion of drugs and visions, often considered the "path of lies", as the method valued here be dream quests. Some gather old source to see the future in threaded fate moments and each thread, is a different alter reality and alter sight to get the right things to do.

sorcieryl = wild witch be a witch who lived beyond 400 years and was hunted the most for fear of their power, sought to be of aid. they mostly use "wild magic" as a source along with others, What be their projection ability be unknown but protection can be demon dogs, cats and they must be respected for their love, a relationship. Most be so hermitlike they argue they cant get a relationship.

vuduwykdoc = voodoo witchdoctor, Dark priest/ess, death witch, death wizard, The zombie crafters and voodoo priest/ess that are most likey to use any event, create their own by spiritual manipulation from ritual activities or just thinking on it with a gesture. The voodoo priest/ess also know by spirit what be happening and are the opposite of shaman, considered dark shaman, ae they guide toward the dark path. These people live as long as they desire with no aging. The voodoo priest/ess will oversee the ceromonies as a job that pays almost nothing except with a spiritual push. The witchdoctor will use a drug powder called voodoo powder to put the person in a coma for 24 hours, more. Then separate the soul and place it into a bottle, other container. Where the efficiency comes in voodooism and there's alot of support people to effect a high ritual and then gets glorious sense of self afterward. What jobs they can get are to be a voodoo priest/ess for the effect of a lifetime unless they seek something else.

matu = mystic, A great example for those that will listen, They use "spirit" to divine stuff, "people" to get stuff, "magic" to manipulate people, events and enchant objects, "magick" if they can to effect the visible effects and create strong artifacts through any element energy they can. The things they do make them "eccentric, concerned" geniuses that are very diplomatic and enigmatic. The work situation are self projects able to devise any solution if there are materials for it, and if no materials then they buy, trade. They will work for a living if needed, accepted as money demands, they have to buy something. When they get a free item, they are grateful and yet they will give a favor for it when they are forced to. They live by the vision they see and will act according to feelings.

weli = welcome, Warlock, demonic chaotic manipulators through "conflict", "chaos" usage to control events, weather. They group in secret areas to meet and do rituals. When paid they will do an open ritual.

noruica = necromancer, death sorceror, Dark sorceror/ess that will use the dead to give them joy as they raise, restore a person by the attempt. Using the apprenticing system they learn at the masters heel. Yet they are neutral evil

at their core with "negative", "demonic" and "death" energies for personal use. If they catch the wrongdoer then they will tear the wrongdoer to pieces with death, negativity. Without a care for many except themselves except for those they respect, they will do vigilante justice unless higher ups say to let the constabulary do them justice. They can get jobs as they want and yet prefer solitude.

diia = diviner, People that need idea, receive images to get an idea to form a focus and when they call this a vision, they speak of it and usually the idea comes from the focus of words, an object to create the event in their mind. As in: tarot cards, crystals, crystal balls, revelations, disruptions, tea leaves and pendants. The efficiency of this vision be to be more proficient with less time for a clear reading by "sensing" it from the target with questions or watching for signs. Any glimpse be to give a hint and for the moment that be reconstructed mentally, what they use this for be to see where its safe to go as a path.

What the deviner identifies be the object with which will change things, lead them along. Jobs are easy as they know where to go and when, what time as divination will effect by the persons need to know and what they get out of it.

belmaj = archmagus, belmagus, Archmage be a person who be a magic user and older than 300 years, with not dying yet they appear young and might be weaker for after 200. they can use 3 methods, take a young body through "transcendance" that be strong and 10 to 14 years of age. Shine to another body on death by shifting through death to the slayer at long distance, short distance on touch. The body becomes the person who shines, and they are transformed in minutes, remain different as the person desires. Finally, the third method be become regenerative by any means including changing to a creatures form, like a shapeshifter, troll, other as of atomic, particle shapes.

saaf = benevolent immortal, seraph, Immortal sorcerer that comes in two flavors, good, bad with individual tastes as corrupt as one might think. Good seraph comes from magi and will accept funds, offers of info while doing as they want and seem to take a bribe. They don't seek power nor do they need fame except they are known and not challenged, unless they are caught doing what said person don't like. the self-involved projects that are done, achieved with people freely aiding, Ranging from any of interest and they might change the projects given a diversion of any concept. When they can attempt a free community project, they will but one thing which is not to share everything as be desired, thus its a need to know basis that seems like sharing. These people are rolemodels and teachers that draw inner knowledge to teach with, foregoing the research if they could. they will ask for information if they can and rely on flukes of events to get by. the average starting age for a seraph be 700 years, above. If their body be old, they will use the archmage techniques to gain youth if they have no other.

Evil seraph come from sorcerer and are very likely the epitome of liars and criminals that guide people to be better. These people will come back as they want through their "undying" nature and drive to continue, much like a draegaran in a "Vlad taltos" book their not aging unless they want to. If some do the thing with them they can hate nature, All the while they do their own self-satisfying deeds, without a care to help others but secondly. Now its an ambition in theory that their ambition be high and if they don't succeed, they do other alternatives to get to the same success and yet they don't go too far. Yet they don't seem corrupt, he/she just doesn't care as he/she just does and does, but to have killed anyone although there be suspicion of wrongdoing. Their self-projects consist of genetics and destructive spells that could affect bad. thus don't trust them unless you have too as they could mislead you as they think their better. Somewhere they figured they could do what others can't so pointing out mistakes will get you nowhere, unless they are thinking on the problem.

saga = sergoi, ageless psionist, Ageless elemental force master, are omnipotent, omnipresent and most able to pick up new tricks by observing or feelings. Most that watch them are slightly disturbed by the amount of energy and understanding that is shown. Some have a mad cackle and some very stern or concerned with others and least for themselves. Able to master time and probable control over reality, they serve to please if they want something. The sergoi be usually from the early ages and with some ancient bloodline or fairy immortality. They are known on site as the body be slightly deformed and they are curiosities or curses to be around as they love to perfect skill by getting info and learning it or with inner knowledge. their methods range from chaos to mental effects. However, if someone wants to not be under their shadow, as they consider most people young beings unless they show maturity, they

drive them away or "act a friend" till they can disappear.

Most of their knowledge comes from within and from what be learned by sight. Most sergoi use any element except human that suits them and they suck it like a kitsune to keep alive or young for spells or psionics that drain them. their way to get things is to spread info, or connive by means sometimes unknown to get the effect or object and compliments are an option. The sergoi are neutral as they deal with troubles and fix conflicts by deals, negotiation or chaotic manipulation. To get one off your back pay them peaceful respect ae negotiate or compliments and you might find their regard to doing their own projects. Everything be a resource to them including failed idea.

To this point you might think they bathe often, they are like aggies in that they bathe when they can. Some are cannibals, but some are not and share the aggies attitude. The seroi sound like children yet act mature with an old voice even at age 100 and some have adult memories at a young age but some don't.

wehmeta = Wishmaster starts as a wishdoctor, and they are people like voodoo witchdoctors who came from the Nords a few thousands of years ago. Wish be a focused need, desire, want as a focus that happens by natural subliminal, activity acting with subatomic particles being influenced from harmonic voice patterns, causing the people the energy interacts with to achieve your desire. Otherwise its a desire that achieves the result when felt, spoken through influence on the area surround, and its not magic as its metamagic through atomic structure being hyperactive from the energy of a being. Now any energy source can reinforce the pattern aroused, this is from the programmed particles. The wishdoctor would use this technique without knowing it. Knowing only that it worked and used with the thoughts of the problem of a moment, they used it as an attempt to make amends, wars to stop, disruption to crime and curing, healing people.

How long did they live due to the wish aging them according to affect and effect was like 300 or more years. the pattern they caused from a wish sometimes formed a storm, worse. Where they grew old, they wished for youth and drew from the air, the earth to achieve it. Some became wishmasters that were consecrated neutral, evil with intent of achievement, and a wishmaster are people that give statements of a desire to effect change and were wishdoctors making the decision to grant wishes to others as well for themselves. they come in three brands of good, neutral and evil. the good wishmasters are moralistic conceptioners that will agonize over a wish, be watchful of results and maintain the results if needed. they often work with those of worth, for a cause and will mess up those of evil intent including evil wishmasters. the good wishmaster often has trouble and sometimes death for the aiding of friends who have enemies. Still there are to date no good wishmasters left unless a new one comes around, but wishmasters of good will allow some aging unless their youth fades.

Neutral wishmasters are egotists that will grant a wish if they are able to and only when they feel like it through payment, force. Given that they are sometimes chased away and their projects ruined for aiding the wrong person. these people are able to survive with a little bit of impetus, sometimes they won't but their wishes outlast them. They do live longer than good wishmasters and if they age they won't seem aged through a wish and natural energy effects.

Evil wishmasters never die with probability of evil tricks to fool the person as a way to mislead them. Otherwise they give a wish to the willing and those who ask, yet the wish end be disaster for the wisher as they are often losers in what they gain. they most often will look old and somewhat forlorn yet the looks aren't the appeal, its the power they offer.

ecutet = accultist, People that are similar to the occultist yet are activists and do magic acts with an open view and use any typical source including "spirit", "elements", "metamagic", "magic", "magick" to achieve the activity desired. Through instant spell casting, rituals, groupings consisting of however they want in a open, yet unseen place. The atypical accultist will attempt to not do violence unless necessary, unpushed so they won't be seen as the disrupter and show an example. These accultists are viable to violence in an instant when they don't get what they want, unless their are social areas which mind, might arrest them. An accult worker will use torture to a sum of money, as part of a ritual if they have to. These are much like witches except slightly antisocial and original in which they will use others work if they don't mind.

ucutet = occultist, Dark ritualists who study most their life in understanding life by trial much like monks and can

do rituals, simultaneous magic of nature, demonic, other possibilities including time yet they will do one, two sources at a time for safety. There are silent types or open minded types that will speak without worry except in too open an area. If anyone sees them, they erase the person of any dangerous sightings or info.

Gimwis be a corrupted wizard be to use chaos in the form of visible "magick" and make ends meet, having insanity fits all through the act if in an unstable mode. They have gained magic back and were burned out. The gimwis be considered a "maverick" wizard. Gimwyk, a corrupted witch be a "maverick" witch who has no coven yet isn't very witchlike Given reason to do magic, metamagic in self projects and jobs, they would quit if they had no desire, poor moral unless forced. These were burned out witches who found reason to continue. They may, may not go beserk with tough jobs as they become unstable from reawakening ability or magic usage.

Gimlir be a corrupted mage who uses any idea to form spells and causes corruption through activity of some sort of magical corruptions that mutate. These are the burned out mages who regain their arts and considered "maverick", unranked and uncontrollable. Gimlir can insult anyone into a rage.

Gimmlock, a corrupted warlock who uses chaos to aid themselves and are demonic, monsterlike with possibility to destroy their own works and do other things for position. The items not destroyed are either sold, used as their value be deemed. These are maverick warlocks yet have not lost their ability, but can hardly use it without fits unless they are stable. These people can turn on a dime unless their projects keep them in line.

Gimmelmaa be a creative person who burned out on ability and to reawaken be to blast open all the mental ability doors by energy striking or hit by lightning. When they are able again, their attitude be mild to happy with aggression to those who do it better and yet they think theirs be better anyway. They have moods or crazy fits and willingly take risks if their are proofs. The ultimate desire be to "gain ultimate ability" or "gain ultimate understanding" from people. The most often needed job is denied if they are schitzophrenic but not if they aren't. What they need be what they get but not always realize it and they might deject it for the crazy fit on doing the activity. Some are lucky to not have these "crazy moment".

hamu = hermit, People that can withstand a long time alone in any one area, They can come any magic class to live alone and achieve events. They prefer caves, houses with which they feel safe. their pattern isn't too clean and they can end up acting insane unless they have painfully been around people. their mental pattern be to afford "inner knowledge" over learned as a rule for information, and where their trusts are. their experiments are almost always looked looked on as an example of sorts. They appear "insane" as they talk to themselves, yet awake and aware. In conversation to others they might appear abusive and overcontrolled enough to push people away. If people are angry they appease through efforts and information and yet they can get death threats if gone too far, ruin plots.

-XXXII-  
Changer area

With the statement of these words, you might become the figure as indicated or the voice if you intend to become like it. If you don't you won't. But sometimes your body will change to fit the voice in adaption. Do not expect it to work all the time as it might work a little yet be unnoticed except to others. The process may take up to a week but it be sped up with a bite of food or drink. If you know the name of the person then state it using the pronunciation key and it might form you into what you focus on. Say the name and think of or say voice, body or other. This isn't your true form but it can stick on you like your true form so state your name to get your form back. What might help be to breath in and breath out repeated and try to feel the shift happen to the idea of your chosen form.

The netherese section

Nethsect

Use any meaning above, the "\ " means that since they didn't have medicine at the time, they didn't need it. See, this is done to redirect energy wise back to the person for this section as a normal meaning but add an adverted or adjunct idea by what you think for it. the aberrated meaning and in listening its the listing as the ; be a separator mark meaning that you tend to follow the natural progressor for normal idea to negative or energetic idea like norm; energetic is logical or illogic thought. Its also a progression of a normal effect and then the point is overloaded effect. They, the netherese can define their natural selves by many idea except the states then you know of mind that be with what they might do as in alternate mental states or natural personalities and otherwise their not counted as scherlosis victim with minds as you or they can tell what they do and not the multiple minds victim. Now the cross alternative be to the netherese "sit across from you", to be ignored as the backstabbers and treated the same or similiar in meeting. This is done as a possible means, if the person matches the self and be treated. That is used as though an alternate self or whatever

entices them is what causes reaction:

The alter ego and "negative self", is an alter evil or alternative world scene;

The inter, the interior, interloper, interpreter, interior "I" world, normal self thats a misfit;

The abject, abhor, innate false bone (as ntraceable), adjunct monster, adverse;

The exper, deter/mined, invertive self, faery type person of expertise, expert self;  
The exter, high bone spirit, external, possessive being that poses a threat and hinders if threatened in body but helps out otherwise, personality;

The diseases are sometimes normal but mostly magical as their energy are from a body of higher energy in degree, in negative and sometimes positive when the low energy point be noted by control of the wildness or whats the point by negative energy or -E, with more control of wild nature the lower the negative with more of the positive energy +E; here from where they live. So your not getting the negative or emotional result with more positive energy. As E is a balancing regulation, by force manipulation with activity. If you want more info, then your just going to have to live with it or your going to have to live there or delve by developing their idea into the other possible resources. Quote by a black guy named Simmon "Crazy be to appeal; to look crazy be to act it out and be responsible. So say stop looking crazy to make senses to a crazy man."

metacilf = netacilf, meditucilf, negcilf, negative elf, netherese, nether elf, Ever expandable chaos elf made of pure dark matter born into the world as a form of choice with void substance, they are called into existance by need, desire. they represent nothing but what they want as the personal desire and will can do anything if its in their desire by or with religion. See they can only manipulate chaos, and by chaos anything else through chaos and distributive disturbance. Where the called being be like a seen doppelganger to the caller, except it acts like a clone. To others they appear as if the summoner in appearance, unless it desires to appear like other forms. Its only defenses to be in form anything at will through a manifest that astounds people. Most netheril can make any event to occur from whom they want. If you beat them they do a service. They think in reverse due to their voidlike read as materialism or objectivity in nature as they tend to use chaos to be good. Their attitude be based on the edge and attack of some sort like of diseases and disruption of diseases. So take something from them to make them believe they are controlled, unless their assured it can't be used or aware of the trick. The religious class rule and allow others to rule themselves as a form of silent subjugation.

What they touch or brush, they absorb the energy of. They kill or ignore those who aid them unless they are respected, loved. Those they disrepect they torture, and those they dislike they humiliate. Most fools don't stay near as they fear to go near and they fear the power that they have. They in mind are their own enemies that are or are not deranged crazymen or madmen risking for ability and power, alongside dragons and elves, which they desire to torture on sight if they so desire. On sight of each other, their be instant hate that be saved for later or alleviated for disturbance of sorts. their basic technique is to do things and get fun out of it or not do it, and their fun consists of almost torment except when they hunt. Nevertheless, its a thrill they seek for self-enjoyment.

They are the dream person to watch as you only have to speak what they fantasize on to get them to agree. To get them to be greedy mention wealth or gain. They hunt criminals for the fun of it, so make them laugh and they relent. their be the Magic God/dess of some form like eiah, or Du'ellan Macleurz (dcleur) among many others under him/her, to worship all be needed be a mention. The day/night timing be on a 19 hours per day clock with 9 1/2 or 9.5 hours day or night. Their money be 1/10 of a cent, be vasgr or be a c'ent (as 10 cent) and pure lead silver as 10 cents per queic'ent clay coin 6 1/3 cm or claeicent. d'ime or daicent be 25 cents (1 quarter). quaglmiert (religiously rich), of 1c (one hundred cents) or 10000 \$. Most be for barter but fair trade be enforced. Trade treaties can just about do anything. 'Did you know a lead cent allows for ultimate protection from magic and bandits for necessary demise. A paengrhiel be a cookie or painstick as coalstick.' From this I derive a siegl or oppoite or ultimate ability in oppressive power. Stoi'lgim is a flamestick. For more language idea, take a look at the drow language which is here [ <http://www.eilistraee.com/chosen/language.php> ].

Heres a few things to help define them.

nedealm = demon world: 1. It forms as a vision, called aun, hell in an eternal death world with a torture palace of death out of time and once death sorcerors of asyria or asria, 2. The conditions of kingdom hell were sheol as hellish or pzrr, similiar to the netherland and don't forget nether as a pocket plane for netherese.

faaeis = sohn, son, younger person, Vii, vindictive person (burnadette), cruel dusk of darkness;  
fyrfloa: 1. fire flower, 2. disohn as disvahn or disown, 3. veisohn or murder, murdohc, 4. wels/h, veiled world

destruction as a cruel/ty fate, 5. fatherhood, priest or pope, 6. property tax as property close/ure, 7. honored one, 8. father, God.

eiah = sacred: 1. sacred tree, 2. holy, 3. death tree or necromancer tree, 4. snob as godlike being whose similar with limits or princess; deity: 1. deis, god, servicing guardian, 2. deya, goddess or jealous guardian where jealousy, where nothing won't rule them if nothing is worth it or its the right aura, mongoddess, planet (as moon or other), Moongoddess, 3. guardian eis.

lyntet = life intent: just, lineage, life meaning where life be loyal to itself, to get a reaction even if inert or nothing and just be as damned; life adversarial or life advocacy and adversity: greed: To gain any object or chance with or without deturbte (destruction) by many means. To avoid insanity by not thinking of the person or yourself with the cause but of the effect or state of how to do somethings and you can cast a spell without bad side effects.

sayy = loyal to the moment (as sanity), sane; shane, loyal to the self (as selfish).

earebud = energy rebound, have a buildup of excess energy or negative resource to focus into an action to cause an occurrence on any object in site or sight, to channel the change by energy more in use of the visualized scene of the object changing to another or a scenic change. Then feel the energy unleashed to change the object or scene. Use words to "channel" the effort and cause the shift by influence of one thing to another. The phrase may seem positive but spoken negative, gets the adjunct or inverted effort. Another word for derogative meaning, that effects immediate with positive idea in the area where the negative tends to overload or cancel and what cancels, disappears completely. The negative is the thing that happens once, its what it does to people that makes it seem like white violence.

methcoakiyry = netherese code of chivalry, for fun play games of life and death where in a business deal don't assault. Where its allowed use what you can and repair where possible as life be sacred, sacrificed, and objects be a protected tool. On impossible moments make demands to get the effort of stopping the war (any), and don't do much except make the person laugh as it can be considered a threat. They take life serious and as a duty, so serious its a game to play by others rules created by life experience. Including a stranded few by life in itself. In serious malicious motion stand still without humour and think go away to the horror, harryr, or harrier person. To accept commands in life or death, moments of circumstances and otherwise vicious cycles. Live for ingenuity and pleasure from activity. Bring your own desire and materials with you and don't lose unless you can't take a fall. To seek the thrill of the moment, till a fall occurs. Be near a loved one and they might not beat you up, so for the life of God be worthy and don't self-proclaim as its a religious zealots duty.

reva = raver, one who creates music to revere, priveleged as in policy; exchange: set back.

methke = cilfdedke, netake, netherese language key, take the common or normal meaning in your language for the translated phrase and use the adjunct meaning; adverse that is reverse or different thought with same form thats visible and considered visible opposite, or inverse meaning of translation; opposite form and same idea except for negative meanings which translated straight with adjunct things that often not get noted for use by the disturbing effect, distinct or used. The y be hardly stated and in front its not heard like yijing is i-jing or philosophy of bone. Any noun be an active noun with no endings. This considered with slang as its close.

By use of negative energy one can derive the netherese effects, by this I mean the nether meanings come into manifest. The phrase may seem positive and solid but spoken negative as pawned or given out with self need or desire by emotional negative and gets the derogative meaning, that effects immediate with positive idea in the area where the negative tends to renege as overload or cancel out what cancels no it dissipates to disappear, completely! The idea this portrays be the carry over effect to monasterously create a physical effort known as pervart with overstrain by persuasion or perversion (pervort(c)). To know a effect or know any of it be to transfer it on an action of transferred motion (c) by action with the element represented. Maybe that should be it as its not actually seen but heard.

A notation for quotation by anonymous "Acceptance, a chance, dejection be assault and with apology be hate or emotion. With love be an acceptance of hate and only in/with a country that allows forgivance. With hate be suicide of objects, or by restoring of positive when they the hater be not ready. When given time, they attain a goal of sorts and out of sorts they talk but then also be acceptance of sorts. Some can/are only happy if people hate them or to get a disliked effect, The idea was started a few thousand years ago and has a less effect nowadays. Like for enlightnment, to learn by self and taught by others becomes to be insight and yet the insight carries over to become dejection or control by denied effort. Your able to push someone with insight to become someone else. The sayings be sometimes related to this, but like a lack in a day this be no fair moment and on a fair day we rely on lack of a good thing so try not as you will to use animals.

summat = surmise, summation (call to apologies and remember) or surmount (consider by thought to do); disturbance: 1. surplus, 2. overwhelm, 3. scary in action in episode released by fey and if they in some place thought and you feel associated to them and they felt the emotional feel. They possibly feel defensive as they will sense, as what's wrong is by sense and correct in the area first. As this is correct and not right and to use, a point is the idea effect by attack as a second idea that frees you from the machine. That holds your energy in body shape as the shape is a form create, as in a point by will and you are extended in life. Kill in a vision and you get the feel of life as violet energy that is violence in action as that is a violent reactive source you feel yet if you feel the idea you can negate the violence as by feel, think to negate the violence with the creator and use is by feel as you create an act acceptable of a body that is acceptable by feel of experience and you can get around what is causing what you feel in life. As if their will forms in mind as them in use to avoid an act of violence is an act in user life, that in thought restores things as the idea is useful to manifest with feeling as a source is where the thought is and as a thought you can form by will.

As the body dies you are immortal and use is their soul, as the soul is an amazing idea to collect this you can use a point to make. As a thought as thought is to not do don't in intercedence. As the body is dead you can change the fact around and the thought shifts to reflect the new idea expressed and otherwise as the idea disappears and the body disappears. In an incubus, your thought is in a shape that formed, as if a succubus this is a malish person with succubus inability that rewards magic that's original in ritualist activity. The atrocity they feel is direct to the point, as a dream to direct is with though the person as if by thought. This is in with a thought that is a point to remember, as they use this if things in use are things in idea. That as with a thought everything will change and things will shift as with a point the use of energy will shift and adjust the area to create the area electrical. The area shifts with adjusts to the source in the area in use, think use to get use is to almost overload the electrical grid and brownouts seem to happen.

As you made the idea, you shift away with a use and feel of the world around you that your spirit is. As in energy you shift from the thought in things around you that in act, as ashes in a point of activity in awareness as in hidden form you shift away. As if in different form different activity sensed by gravity in use in thought, as if that shifts your perception to suit your mood music corrects. The energy by almost matching with rhythmic idea, there is a point as there is no form and as yet the idea is settled and if your mind feels this. As is your able to fix anything, as to do so is to think so fixes your behavior. This is there as is in a fact to do, as you think the idea to exist the subconscious will create it. As a link to a thought that you perceive, miss a strike in energy that is a healing thought stored by what you think in the source as writing reflects what is there in mind.

As the unnatural as natural feyish energy that forms real life, with mentions as gesture that dissipation in energy forms dissipated supernatural energy. This is in a pointing ability in use that is what, you can use with nothing in mind and thought by interaction. As your spirit uses the energy from those you see to work magic, as a wishes by other that are wasted in life formed as particles that reforms as you think or this is where it won't. 4. strung together words and

phrases that come to make complete sentences by a fact that is sensible and expressed. 5. as a shape in form that uses death or other energy to create a dragon in mind according to what you think. This is the safe part, as you think and read difference forms as different shapes are what you can create by interest in seeing as your interested you can interest the shape if it exists as if by the idea and even though it did it didn't before as if by thought that you were as this though is nothing more.

As your use is your will, things are a use you yourself can create arguments with and irritation elsewhere, and anything is a thought as if wise action creates wise effect that creates space to make different. Think thought to create thought in another time arranged by area shift, as around you is the naturally understood in feng shui effect wherever it is by whatever reality you use as if an idea. As you change the area, thought changes to the flow of space in time assumed in a thought in nothing as time thought such as a sasquatch that doesn't have life and creates itself as living unless unnecessary as you think and use a point to create in space as to make in space in thought around you to create a better area influence to make enhancements to thinking.

Either positive or negative your not always aware as the thought is a space and thought creates what things can create by what you do. The thought space changes itself, as you think your a polite view your accepted idea to control and use gravity to redirect itself and in nothing space otherwise your nothing if a thought, but in a gift this can form on demand and as to seem an identity that in aspect into the mind creates ability.

The idea is a thought an created into view as aspects create, an idea you can use the point and as awaken. The point to pointed use, is a thought to make as you make a difference things in use are as thought differentiates in what chaos waves are directed to a purpose in time that changes to what you thought in energy. As time waves are thought by view point and this creates a different view, as if a point to differ in combat is "dedifferentiated" in view can adjust by what the thought to others minds are perceiving. Then to see by changes to the perspective view. The idea is necessary to create what thought is necessary, and use is a thought is a concept as use is that obvious.

Think and you know on idea in that as thought reforms as shape is thought and size is that created by your intention your thought created in purpose to show to the world creates in purpose, this is as fusion creates fact to shift the body and as this is to think or not. As nothing exists where nothing creates, create a possible match by thought in rite you create in time and seem in focus with focus you make thoughts to create. As the person's idea seems true or not, as variables change by thought or nothing much in thought attribute happened.

Then and assumed in thought is whatever else is possible isn't, as nothing was observed that shouldn't be observed. Impossible needs meet impossible deeds, as in the impulse this drops as if in weight is loss is time in a point an to revise and in stay or out go even or in not as nothing. As your energy your ability is energy manipulated, as by and large you are aware and as you do you can seem. As if in use, to get what you need and go.

As nothing painful by and but form in you draw attributes and change, as to what you want to seem from the ideal source is to seem and use as thought forms what essence from chi life thado in the guinness world record is done. Thado is skill use that is form by use and create is equality to do by thought as in thought your an idea an that can be anywhere in life. Formed life if focused is life in focus by thought energy as with crystal that is thought is done with skill by energy as a light energy and as use is a thought think in focus and you fix that as is thought, as if a source and made into life think as in the focus a thought to create what you do, think and focus the thought into the created focus by light into lens that is a lens focus technique noticed by observation as thought into action is by fire energy in focus though the light goes through the crystal use is obvious.

Think as in a thought, as the idea is as a light as unusual idea in the third eye as is unusual results. As in nothing done nothing in use is purpose, there in life is that in focus and creates energy from thought. As is discovered by thought in use your use is none. So your intended result is as though a thought, think, focus and use in thought is use by created corruption by thought light in and through an object. There is electron use as influences energy to thought create in life that make is concept, as then if a point to make is to convert light. As the action is light conversion, your use is to change thought in time to make corrupt incorrupted.

As by the touch of light your able to get amplified healing, act with a flashlight, lens and thought to cure or heal abit

slowly. As to use a match lighted to a pose in life, this in created thought you can influence the genes by firelight but act nicely or the person might not like it. As you do the idea and the person recreates or in quality as nothing is not for a thought concept by purpose, touched by the metainfluence is to work and whatever is hidden in thought in the use of the third eye.

Think is this as an energy source is in thought, as thought is to make light and generated by lens. As if a flashlight, as the sylvan apes this is a use in life focus. Think and create or thinking is elsewhere, as what you think by life energy as with inherited thought is to pick and do. As is what use there is in the making of life for no fear as amplitude, as crystals are creative use this is what you can die for and make reborn as you need to from objects to people. This is an amazing feat indeed, as if an amazing concept your thought creates what is an instance of life somewhere, someway and somehow.

As things done in use you aren't in or you are aware unless realization is what you think from the text as you see a picture you can think the idea you need to seem as if summoned and keep the idea. As that means you use the idea in your mind, you can get things sent as if not paid by you and paid by another in trade. This is as if what you consider makes as if by what you did, you serve the persons interest and what you see isis creates what you get. As if the idea you want is annoying you in essence and the essence manipulates, the moment you feel is to get an idea formed as an object shaped by your will and you get that idea object. There is no more to give, an if to stop or not as where you are and aren't as you don't do reinteractivity as if you do you don't irritate people.

Think in a mote in light and animal influence think no more as your a shape in thought, as you are a thought to see or if not wanted your done in life. Not to do is not done, as if your alive by the grace of the creator you are alive. As this is till you remember not to live anymore, in life you are nothing but a memory if you died before you won't seem to live again. As your in other spaces and other spaces in area in what you do you live, and otherwise your dead as that you look alve and know things as the moment of erasure your no more in thought. There is a light to the idea, inside out is a thought to do and think in thought and matter is concept as thought a life that is but isn't until what is creates by the thought. There is a thought, as a thought is moment and nothing is what things seem as things are easily dismissed as things dissipate into energy for use thats later on.

seuii = suicide: 1. mix into, 2. switch side (as sui persuade, cide = side); death of self: 1. self-death, 2. think a point in energy change that stores some test of self as a source in life. Nothing more as different thought is what you think made, thought is by a different use in idea formed in another reality and gotten by perception in sight. suuen = succubus in female and incubus in male shape, soul consumer (soul eater); 1. assimiilar (almost true) to the moment, 2. merringitus, pie shaped torus, 3. terrific or guilty feel, surprise of too much sometimes with disturbance, aka

a surprise party that if negative by the environment caused by that in the aero you can reject the area and people can feel like hurting, disrupting or creating, and if you can feel like not being there you reject the presence that is their essence, 4. very interesting in feeling excepting the point can reveal a bade energy trace and a good energy trace as the being wants you to feel as if sensed by the natural feeling with body energy focus as sensation is there. Sensation in this art is body sensing feeling.

sunase = sun asset, trade; sadism set by the essence and done by the boss

sunbriga = sunbringer; deathbeing with a deathsong (as deathcroon), deathbringer.

sunn'es = suns ray; destruction

sunpye = sun palace; disruptive area or house

sunwepa = suns weapon, focus crystal; cystal, disruptance frequency.

surrup = interruption; remind: 1. an ultimatum of sorts, 2. like fire crystals or power that are crazy, 3. remind memory.

surv = survival, surmise or self-delude, self-demise where they are deluded into looking for the best but get the worst.

parafin = toxic wax, power wax, parameta wax; undying water fire: greek fire wax, the fire that will go out by smothering.

Pia = Save: 1. Pirates, save for themselves and to steal whatever possible and only on a visit to shore (land), 2. trading post, 3. rescue by self target, 4. savga: save game or create pattern stored on file; Free trade: 1. Of the things that are hard to get and to share the power and goods sometimes as info and data, 2. Free sharing, for trade due to good selling (conartistry and willingness).

daerm, = focus: 1. to gain a result or girth, 2. stretchy surface, 3. skin or derm, 4. needle; control: 1. dominate, 2. control by superstition, 3. gave in by disturbance.

ta'adv = take advantage, take advertisement, coniss'ate, commiserate; belief of moment: fatal attraction.

tai = taint: 1. corrupt, 2. throw away, 3. follow; turn: 1. change id, 2. change focus, 3. pervert, 4. corruption shield that prevents idea and other basic elements and one that cant be turned unless you buy it with arguement or dismiss it, 5. chase around.

talet = take a left, left turn, take a wrong, take a fall (fall over), cloth or towlette; natural recourse, same thing over again and you keep the experience but its similiar to dejavue where the experience be a feeling and disappears from memory, go straight and turn upward, diagnol left or angle left or left hook.

tarit = take a right, right turn; right hook

tam = tame, thain, thane; thame: 1. thalamus, 2. athame, power tool or dagger, that's a property of effective power flow, 3. overthrow of/by judge.

tamp = push like tamp down; shove, forcefully move onward.

taom = take off, take over, take it for granted; tick off, teoed, toe ridge ae toenail or toe edge.

tarafom (terraform) = reformation, terrain, change of terror from formation; recondition

tafograt = Taken for granted, act a folley or demand, act fool, be foolish; react badly.

tatfograt = Take it for granted, taken as required (prequirement), taken as a required reward (but not noticed). Thanks to robert.

tek = teach: 1. tech group, 2. technician, 3. technology, 4. derive, 5. described, youth group work, 6. on track; resempt (A fault or resuming deadfall): 1. Problem that creates idea for a good job, 2. Screwage by screw, technology or destructive use. 3. reprimand, A screw that be mechanical and technological and can be deadly, 4. destructive view, 5. impersonate (from copying another for not being able to do it themselves).

tekye = Tektonician who uses tektoniks or one who uses many fields to get something for life, All purpose service person that works with crystals and machine patterns; Creator, A responsible person whom makes things on the spot and out of pattern, 'if it exists then it can be made to appear and sent to the person from their pattern identification.'

technician: 1. tekky, 2. repairman for/against technology.

targent = fire: 1. heated destructive force, 2. heat element, 3. image from laser view; hollistic: 1. fire hazard, 2. an item that could explode, 3. explosive, 4. fire away, 5. a field to explode.

t'est = test, estimation; combine, put it together

th(the) or thi(the) = this, that, those, by them, near them, as we (us), use; it, then (thi'ilhin), were/was, as be (equalling)

thaku = throne (command seat); thank you

thawa = that way or that a way: 1. in of the direction, 2. out of the way, 3. momentary progress: 1. appease, 2.

knowledge; in the way: 1. blocked /passage, 2. momentary blockage, 3. momentary disruption, 4. the bulge, 5. that weight.

thidt = that did it, thiidi (I think I did it), similiar in conscious, comtemplate; activate (set it off),

thenc = since; hence (now)

thig = th'ig(thing), thang, there, item; that, this

tot or tet = test: 1. horror, 2. bleeding edge, 3. edge of field; er: pause.

tunt = taunt, shout names; fun or pleasure of the brutal type, thrill

turaom = turmom, turn a moment (turning point), turn a mom, wriga, outwigger, outwiggle (turny); compulsion from compulsive force.

turthcona = turtal, turn tale (countertale), turn the table, change the odds, turn the corner, turn for yourself (turn to your side); squeal, turn traitor, turn against

trainse(h) = trais (trellis), trainset, train self; train (deep trance)

trama = trauma, disturbance, lunatic motion; unnatural: 1. activity: things that act on their own, sometimes with others as things, 2. motion, devised by self effort in to conform and from energetic prompting.

trél = treple, tribble, triple; witch effort, cause

trespe = transpise; traipse (walk around illegally)

tsunami = tsunamai: 1. A huge wave, 2. A type of water dragon that forms as a wave and be 30 - 90 feet tall; A person whom represents an infinite manifest of void and fire in the guardian type ability but has almost no concern over that which destroys him/her, all concern for that which destroys the area. With an attitude

like 'Don't be too blind to learn what you don't respect. To learn without surrender unless necessary and fight your own way. Feel free to use intensity in your actions to balance or surprise. For the simple way is to create a path of life and lies by consuming doom.' thanks to Sean.

ull-ga = kljckkemjnk1, rate: 7 psi, rat god; roleplay, ancient study

un/e = unis: 1. one, 2. won, 3. bring back, raise up, 4. two into one, unity 'unify, to bring forth unification withstanding destruction", 5. eternal, forever; illustrate: 1. learning fro' relate or slain of attempt, 2. opportune relation, 3. unn: undo (by fire or other energy like lightning or water).

unndea = undead; high order: 1. honored being: extreme honor, 2. extreme being, 3. extreme ruler, 4. any extreme.

unread = unreal

us(e) = use (of), free use, usage; prequire, abusive (user), since most things of use; addict, the emotional state that makes abuse from prequirement (prereq) set by addictive idea.

us(e)'in'ata = make personal use for personal aggravate/ion, take personally; ape or clone (copy)

usiage = standardize; aggravate (to improve)

v'hil'nek = viehk'lied, hed, head, form of head, in lead or leader, pathway; ball: 1. any type of ball, 2. lead, 3. hot potato.

valdez = oil; richness, ripe or detern as always return if intruding or not.

vambril = inciteful, instinct; lecture, hypnotic speech

vambrilium = electra, electricity; shock (spark, killing movement of electronic energy flow)

vandergard = vi: bring down flame: distinct pain: misery (as miserable), cause flame by curious acts.

vanglorious = oopsy, overgloried, transposed; overlook by overimposed motion

vee = vision as view or dream; horror: 1. cruger, 2. nightmare.

varhbuel = deadland, dearthland; shift

varlu/ck = 1. warluck, warluk, varluc, luck in war, 2. various moments of winning idea, 3. warlock, chaos adept; Viral meningitis or the crotch swells red that causes various disruptions, distraktion or distractions and bad pains.

vas = vast; equal allowance.

vasberg = whaling party = to cause somenr to not see and to be extremely overweight, sometimes bad eyesight from burned out ability; iceberg hit off a vast iceberg or ice age as age old ice.

vaspall = equipment; science or psience serendipity or stupidity.

veisportal = chemical containment cistern, container; sealed up, sealed area

veh'kil = hel: 1. heal, 2. hell, 3. versatile ineptitude, versatile accident; heel: 1. Heed like "heed the call", 2. Heard fo' respect from soldier or officer on patrol, 3. Stop on heel, 4. Desperate by Bob M., 5. Boot heel, Boot strapping on the bottom of the boot, 6. transfer, transference.

verboen = verbage, verbottab, word phrase; heard, yelled voice.

verbuic = glory; entail: 1. entrails, 2. description.

verbuhl = sanity, quiet; understood

verhuilic = heroic; stupid idea: ongoing heroism.

veir = where: 1. so very, 2. anything stated as to get location, 3. top of the moment, 4. eo: top; 'vrythi: 1. all, purposeful, 2. very thing, 3. what, 4. very thing, 5. missed out, 6. assured stupid, 7. idiot, 8. everything,

ves = arthrimic: 1. arthritis, 2. associate; earn: 1. best, 2. establish/ment.

vesbein = SlugginJoe: 1. little slugger, 2. the basebal is a bat wielder who destroys people as they insults they die for and make mistakes in a phantasmic vision.; lil slug: 1. little slug, 2. bullet, 3. universal source, 4. in slug of weight or pain/ful shot.

vidyai = vindicative, spite; vandalism: vicious release of poverty ilk or similiar.

vie = video as a personal character or scene; to go for achieving as gainesville or gain/ing again.

voivolt = void electricity: 1. similiar to free electricity, 2. It works by dispulsion with the pull of electrons opposite of going forward and caused by events to create the current as events are the source of power. Use of a condenser stone to contain by magnetic rock (martian rock) to cause electrical current by magnets or electromagnets that has the opposite polarity and a dark crystal as a sender. Alternatively, use a dark crystal to pulse by magnetic waves and picked up by tesla radio power receivers. The magnetic pulsation can happen with a combined device that works with a ward (as magnetic field from humanlike aura or other directed magnetic field); zeon: desired be a zion stone (embery heart in crystal formed in a supernatural explosion or sun nova) or other diamond with energy bolts pulsing through it.

volcae = vulcan/vulgana: 1. volcano, 2. a lava tunnel, 3. volcanic tunnel, 4. runnel of red fire or lava;

zeal: 1. overeat, 2. zealot, an overdedicated person or very focused person, 3. zest as spunk or ever outgoing, 4.

wooden structure (very large) like a shouse or siege tower, 5. fragile, 6. eruption: a. Firey eruption of a large expansion of gas and flame or lava to blow outward, b. Mix lamp oil and liquid potpouri and alcohol or essential oil as 2:1:1 and shake up to form a foam expansion and it fills up the near emptiness and left over oil by at least 3 times and at most 4 times. This stuff when settled can burn instantly when sometimes added to liquid wax or water, the more you shake the more it makes up. c. Salt + Copper + Potassium Nitrate + Baking Soda + Soda pop (mabey diet) will get a rapid

expansion of carbon dioxide and foams upward to create a lava like expansion, d. Vinegar + water + Baking Soda = volcanic like eruption and some add red food coloring.

vorbotten = forgotten by argument; agreement.

vuispek = how, bone; spiritual revealing that represents of personality.

vytoy = victory, hiemlief, undid moment, regained resource; don't disparage, sabotage

wykinpark = walk in the park; easy way (disturbance)

wa = way: 1. wait (as pause), 2. what (as is); collapse: 1. waste/d, 2. was/what as waste, 3. past, 4. penalty.

wait = to feel; continuance

waki = wackiness, wacky, fond, fondness; disconsolate, decontest

war = competition, warchief or battle; warn: drive away.

warawa = war away, go (warn) away, compete away; compliance: 1. ward or holding place, 2. award by reply

wawas = as it was: 1. way it was, 2. what a waste, 3. waitres, waitress, 4. wasted moment, 5. personal waste or wastrel;

depict/ion: to describe or draw any scene as it happens by mental drawing and skill or by hand.

wawat = what what, what was it (say again); regain clarity: 1. begain clarity (begin again), 2. began with, 3. meditate for strengthening soul with spirit.

wath = what that, what was that, what again (come again); dequihl, bring back

watts = bioelectrical, live wierd energy flow (kills all in area), but calms the nerves and is bioelectricity. A side benefit be people have elongated lives but this kills the caller not in the end unless uncareful; bionegation (all life cease), negation that forms an electric ghost by any means of the spirit whom calls it also considered manji; elongated light: 1. to elongate life and liberty by a

strong aura, 2. a long lived light that be peace intended.

web = veb: 1. spiderweb, 2. newok, network (of brains or wires as else), 3. connection (any) including the effort of brains cynergetically or bioenergetically linked; linked (unending linkage): 1. cyrokinetically connected, 2.

pyrokinetically active, 3. (psychic) handshaked, 4. telelinked and others considered in the big book of technology.

weed = ambromide, aplit, plant (painkiller), dope (drug abusers nonaddictive choice thanks to Matt);

weiwaki = weed whack, remove pest/s; weed or grass fondness, grass eating

wi = with, w\, include, inkling, width, including fate; with rapid /expansion:

1. magic/k, affirmative effect or effort, quality action, 2. magic that be illusion or self inclined ill'ness of mad touched or god touched (kell seers), where you

use physical blood flow fro' heart clench to induce energy from outside, 3. magick be illusive preventa or allure, illusion prevention or actual deal with wierd concept.

4. offer, or wierd effort, mere death of many things of the actual people to get something.

5. thought form by fate, thought provoking.

wia = wis: 1. widom or wisdom, 2. wizard, 3. ancient: an ancient person from an olde tribe with a few thousands of years, sometimes on call the person transforms to represent the body most know they deserve to be left alone;

natural/ly: 1. to akiev, achieve or gain success as a disaster to else, 2. to do, 3. shit /thing, 4. witch (a wyk), 5. scientific magician, 6. scientist.

widawa = wierd away: 1. go away (as by concept), 2. wide awake, 3. fully active; conform: 1. inform, 2. control.

wiz = whiz: 1. pee, 2. focus, 3. egg, genius; cross: 1. sacrifice, sancrify, 2. make sacred, 3. steady.

wod = word: 1. a phrase or pattern, 2. a created pattern, 3. world event, 4. change; weird person: oddball.

woim = yreal'dag, worm, wormy, console consistence, war tough; mental worm, getting info (physically) by a mental compulsive need.

visdic = visdise or vision of paradise: 1. vision tour, it pulls your souls memories together to share them toward another, 2. ethiopia, utopia, dream sight; visible detection: sighting the invisible

whetsta = whetstone, sharpen things and to eat real things and not false dillusions that starving people might seek or see as food; sue or pursue and act: 1. shape not, 2. out of shape, 3. sharpen not, this be where after a long time of movement, the "shape not" disallows other things to keep its form or dulls the blade.

Martial Law life practices and skills

MetiyLa -a- lypretyix -n- skix

A martial artist at creation. Some common laws of the People (unknown)

This is to sum it up and in thought focus as if a thought is in focus is timed idea to bring a possibility to create in an understanding, in as a thought and out with as many variety with several different styles as possible of kung-fu in conclusion or idea. I am a martial artist in of varied skill and made up several ways of combining them, the skills so far known.

jysu = jitsu can be surprising and the use of martial arts with mysticism, and playing with illusion as anything goes martial arts. A quote by teacher 'To brute strength identity the force and count it as yours, and that makes it of use.' This includes shapeshifting as a practical illusion;

Shitsu be using the shit of body or items such as objects and fecal, to get pleasure as with all natural arts of identification. but to some it can make people sick. In shitsu most people might be disinterested by the drug usage. You might smell like shit but the idea be correctional to those around, to bring any thing to get your result thats not of use by others. Sorta like anything goes martial arts but its anything that's usable and objective with no attempt to attain a goal that attacks the person.

But therein be an unnatural skill, item manipulation and last ditch cannibalism or other foods from those that died naturally and not by you or us. The truth be that it doesn't measure up by proxy or the main idea, of what martial footsu or the art of powerful kick or fist be as the saying goes from Noreaga (nor'e'aga), with lying purposely to suit the purpose thanks to Jay, or to gain the ability to tell a white lie. To control the rage and confusion be the control of beserkness and the shifting.

lyfsu = lifsu: pursuit of life and manhunting, 'art of life and the art of well living and doing, leave no enemies by gaining none and if possible with a peaceful manner', from Noreaga by saying, 'bonzu be the art of life existance and growing plants better and speaking better.';

Bonk (from bonchitius): 1. Considered in motion the animate/inanimate can work for you, as people are into better skill by a bonk off the bonzu (as bonzu) tree, idea 'the art of bonk', and for fighting they can go beserk states including weird efforts to get well or win. Like off statements to upset or confuse with projection by Jitsu. Purity be used of sensing aura and badness of boldness in others as in for karmatic senses. For the bold are useful of getting us places. In bonk you have to accept by expecting the blow to get somewhere with your blow and expect strange effects read as a charm. Use any fighting skill as anything goes mixed with conventional conversation, thanks to Jay from examples. To create the most use a consensus and it reoccurs a just idea. Thanks to BJ in example.

In bonk, to use the owner as a tool to do as you design be considered manipulation in practice, as manipulation be sometimes construed as a personal character assassination or personal assault from subduance. The most obvious

be the most unlooked at and things are suspect if too similar. Honor or leave alone the Astute. 'Try to bonk into terror by long range at first and up close at last into a beserk state, thanks to Art of manipulation and energy by appearing you can confuse and to make desist you drive the honorable away or give surprise until you know you won't be attacked. You can say what you want and not assaulted for it.' This be the art of considerable manipulation where you can be small and appeased by small things.'

2. In order to begin Kasuma, which be the next step of bonk, be to defend without will or to defend and mostly fight instead, where in confinement your in exchange of will as the extended part of your body to act as an energy carrier, used to empower on a touch and with an idea or something watched as the idea, to mutate and change the body. In thought we are the dream and reality by use of standing trance. But headbutts and feeling by force projected away are okay. In esence, your the message and the messenger be a thing.' Thanks to Master sempiji.

Where wunjo the art of open martial fighting or karate the art of defense with deflection and similiar like juditsu the art of defense and attack 'use ki to hit the brick and crack it, Kasuma be to use your hand or body with a projected forth moment of chi, as an extension of will in attack and defense in some wierd manner. To create immunity from weakness by strength and from others by strength from a potent ability.

This be to correct for things missing and act a freedom figher psychic or otherwise. 'I concede the point of making amends with people, so I make new ways to create a better method from use of old and some newly implemented in a perfect blend or new ways from thrill and rumour mixed with the known.'

Statements to release the effort by pressure or stress be very useful, like considered martial statements in law, but practiced enough you don't have to say them as they can be auto innate training,, so feel free to make your own but I prequalified several that give extra impact to release the effort easier but you can use any atlantean for the effort as all the above but to make a mantra from this be to break the words up at the pronounced syllables. To undo any damage be 'un-de', and 'om' or 'omcha' be to make instinct knowledge and gain know-how as knowledge spirit by (c) Osmosis. The mantras come easy after this be used as with an idea.

'aya' as 'be released' from a chop of sorts,

'aum' as a release of bad energy,

'ayba' as a 'be biased, or 'burdened',

'be-ja' be a 'destruction hit' or big jab!. This hits the nerve by automatic motion.

'be-ong' is 'fear that be true by real effect' ot destiny.

'be-ot' is 'be doing' or be bought.

'be-ke' or 'mater ke' for 'open minded' or 'mastering' anything. To suggest to people or objects.

'boch-it' for bochitus be to cast a scene of death not on failure but on success or cast out something. Its considered for family curse and integrative circuitry with a bad cough. Another aspect be to botch it on the job.

'cary-bom' as cherry bomb and scare force that causes disruption and be illusion. The vision appears as need by you.

'cotee' forces people to pee sometimes after a few minutes.

'cur-cha' and 'cur-cho' or 'chur-choa' be to cure anything of anything except ability or gift as be cur-ki. In particular, the cha can be cho to cure choking, but 'cho' alone be to choke as another teacher pointed out. So 'cur-cho' be to cure a chosen point of a single physical condition, where 'cur-cha' be a general effort where the spot isn't chosen its all ills cured. It can also act a physical blow. This won't effect or howsies turnabout,

all but broken bones to cure any thing you know the name of be a 'cur-ilp' or a particular disease 'cur-[disease name]'

'de-lav' be to 'revert' from anonymous or get revenge from a lavatory expedition. This gets rid of poison.

'do-slu' is 'as one' to combine spirit or conscious with an object or person and it causes a form of spiritual awakening with any gift as a given. A benefit be to not slouch anymore and immortal until the object or person is destroyed. I didn't say the body was undestroyable I only meant the person doesn't lose energy but the body can be bruised a bit unless the person doesn't remain touched by deciding it. Some might call this a hoarcruix without the blood. A place can deteriorate and kill the person who assaults by knock out if the person be assaulted. The effort

be to become one with everything, so to do so be to become a killing force of your alternative people or the spirit be chained together, to be one conscious many bodies and several separate mind nodes. The spirit be all you ever need and be like 'strength of one from many' or a 'spirit bond'.

'dow-si' is 'do as energy said' for a horseplay ot horsey or horse transformation. Draw transportation or cause sleep.

'dra-away'! or 'dri-awa' is 'drive away' almost anything be dissipated by allure.

'dro-dea' or 'drop-ded' for dead drop on a target with tiredness or insanity and self-sacrifice.

'dro-ou' be to drown out with flood water, drop-out or filligravitybuster speech.

'dul-nut'! be to 'do nothing', 'to enlarge' or do things of dullness and chore. fat.

'dzac' as a cure to bad bones or broken knees. Break curse.

'dzi-nha', 'ars-son' or 'lar-cen' as 'world destruction or bombing' for larceny as a way to get things.

'ei-be' as 'changing force' that releases energy to share it and it changes things by remodelling.

'ei-ha!', 'ja-lenn' or 'eil-lenno' (c) Jay Leno be 'laughing matter or laugh'.

'ei-he' or 'ei-she' be create movement and raise dead or to he or she.

'ei-sha' as to hit hand hard, as jar hand.

'ele-cha' or 'ele-ka' is 'bring madness' or 'element high channel' by ele-[element here] where the element is hydr for water, cyr/cyro/cryo for ice, aero for air, thunder or psychic nature, pyr/pyro be fire of many sorts, geo be earth and add bo-omb for a elemental bomb. To work a release of ability from any bounds use this! 'cha' for charm, 'ka' the sign of chaos and 'kao' as with 'chaos' or 'fors' as force to forsee by focus or release bond. 'har-rier cary' as 'arry-cary' as 'carrier fire starter or other disaster by dispute and harbringer of death'.

'f-me' be to 'fuck force' or family force sometimes of fear unless described elsewhere like f-me water and the inflicted won't succeed like add a hammer blow or 'blu-ef' as a spiritual hammer with the same result. The inflicted you can call hydr-inflictemeis or hydro inflicative media.

'ftl-cha' be create faster than light movement.

'buk-cha' be a book create from rebuke and to prove it by writing.

'hai-ja!' as 'upward release'. Some might think it haijack or high jack in an high altitude. This can increase energy potential.

'ha-ja' be hon-chow for 'backward release' or 'backward motion' or 'fear of motion' cause a reverse effort.

'hai-ya!' as 'a downward release' or gives protection.

'hed-cha' = as a head butt or neck chop as if it is.

'hu-ajaha' or 'hu-ajaaja' be transfer spirit for spirit walk and dream walk. Sometimes to evade the world or not notice the distractions around them.

'id-ka' as 'fate related' and 'hide in plain site' or id change for anonymous idea, and a similiar fate by 'hand' for take or steal. These are useftl to create a fate related. incident, or repair using criminals by effort and sometimes for energy.

'in-dis' = 'self-trial of force' and 'indisputable solution', or self-doubt from display as this causes fate, from a force of inbreeding.

'kara-cha' be to cause a real karate chop as if it is.

'kee-ja' or 'casula-turva' is 'forward release' by knee jab for human or to key jab for object and force forward person or object.

'kee-ya' is 'backward release' or key ward to force a person backward.

'ker'sena' for kerosene and other chemicals.

'kne-cha' for 'knee breaker' be to cause bad knees, a broken bone on body or Arson on other as if the object burned from within.

'lav' or 'lokbar' is 'release desire by aim' for criminal larceny or to have desirous goals and dangerous appeal that hope to get things like in a distributive moment. 'laub-er' or 'lav-na' or hateful desire. A similiar result be 'dischief' to occur a back at you with hate and disposing. or bathroom trip as things evolve. Another similar release be 'loknar' to cause 'good behavior' from a backlash of hoax and insanity.

'lebhe-rah' be is success by forgiveness and supreme where the opposite be 'huig-oenit', 'dhiz-hul' or 'nuna-zi' by self hate from perfection and perdition from forced evolution. Thanks to huong-quoi and Anonymous.

'lil-slu' is 'lil slugger' its to change the mind set of the person to accept defeat, as to be defeated including death of failing the test at hand to make point of senselessness, basically the task at hand be pass or fail and any doubt gets a vision considered night bearance in a nightmare that equals a test of sanity and balance. If death, then the person dies anonymously or alone several times by a mental scene as he/she dies.

The true nightmare is where magic be denied and be the show of a person as they do it to themselves and saying 'you do it to yourself' where this might save the person if your willing to give up on attacking yourself, but this is where honor or being alone in a strong sense of the word will doom you if your bullish. As it can go to the physical world as if born by energy until you give up on defeating yourself. This was gotten by a Anime program with mention of lil-

slugger. There's another idea that's to use a night scene to cause destruction and be similar named with the same result as a lil-death with a death of some magic.

'lo-cha' = a low chop with legs, or 'ham-cha' for hamstringing ala hamstringing of nearest leg or as possible, a cutting off of the lower leg at the kneecap.

'okl-oma' or 'suna' for self-exploration by creativity and action from self-appeal. This can force compliance and contend by context and serendipity. Thanks to evil trickster.

'og-nal' for 'queer' or 'make strange and mutable' to be spoken to and are suggestable.

'oop' is 'mistaken feel' for a serendipity moment of self-discovery.

'owwee' be incorporate and spiritual or 'ow-wie' be a body 'power-up' to make a scary like sylvan power up.

'pe-at' be accumulated explosives or other stuff with life by you or not as you think as the point you think is use by method.

'psu-cha' or 'psu-ki' as a pseudo chop and kick of extended energy that effects as you do the actual chop or kick.

As it causes from a distance a hit to the object, or person from the energy of your ki or chi, this can be used as an idea spell 'len-gane' lengthener. To strike at a distance to hit the target and this can be any distance. It can't

awaken ability except the hidden ability, one that can appear as any ability except to restore ability in able mind in body by the thought coming from soul and not unwanted if not thought.

'sare-tael' or 're-tael' is 'easy sale' of safe retail of items or story, to sell the idea and end a bad disposition of negative means.

'seepid' or 'du-mb' is 'be dog dumb' or 'effect un me' and 'effect not in me' and in an idea 'uneffect' as those you don't want.

'seop' or 'de-segga' is 'death force' and 'death act of suicide' by any act in will by desire is made by thought.

'sla-ba' as 'slash back' with a slashing force or slashstick that isn't there.

'Soh-ayo' is 'bubbly force' to bubble almost anything. Made by police force unit that is supernatural naturalist by what you do as life exists and what is thought. Thought is a point and use is a moment, as thought is energy what you do is construed to make what you think as energy conforms to use. As energy forms into the ability, as energy is there as your energy is use. There is a point that there isn't a way, as thought can create you are the creator use is the I as the third eye made into real life by situations viewed as psychic. There is a thought as view as you want, your an idea to ignore as otherwise you do what you want. There is no anything that you do until you prove what you think or not, as you gift and will to create as supernatural energy creates by a buried person as you are what is thought you create with the thought. As you inter with a point, your idea is not as you consider in life as your own life is enhanced. As thought is a point by point idea to use, use your own user made suggestions and intelligent is not dumb. As supernature is an ideal ability, the thought is a concept and what your energy makes in result or not as in your able mind you create what your thinking and always as you intend. Think this is energy as if you use natural witchcraft, think as you want and your use is an ability in by the energy or that you manipulate in however. As you think not or seem not, as you say not you can as you will. As this is an idea your use can, they can create at will and whatever the thought your use is if necessary their an understood use as in energy.

'tru-saum' or 'trut-du' be truly the same, truth serum or force in the truth to tax by tribute.

'um-cha!' or 'um-ka' as 'double cross' or 'vitriole oil'.

3. Wong is Foo or the considerance of possible outcomes to fool people into belief of not being effected (c) A-team. in two manners, as a vision and to use the result of the best sight, this be also a weyr, to bear the fact of what happens and by use of what be a good outcome be bearing the same result as the Wong, you get somewhere. Its the next stage of the Bonk, to be able to stand and deliver with a body that seems slender but spiritually fat, and indulge by intent to absorb anything that comes your way from a very absorptive spirit. On sight your assumed wealthy and respected as if you were fat. But the person who sees you will follow anything said with reconsiderance to the subject. This isn't summation to be overdone or you can cause a fight or 'forced' separation. To be a true leader without the fat and stay understood even if insane. Wong is to hate and force those told to be a hated person into existence of finance to be near and create a pattern of self evasion until you give in to their demands. Its in yu-ong or Wong to be almost hateful of large finance.

Crazyness can be accounted for by trying the technique in the first place. To do it right use the above mentioned, as with power stricken don't use power driven methods and recoup what be lost. So effortless be this that you can suggest easily and never need a fight except with visions. Basically feel the fat go to the spirit and when you hold in the stomach (Fo' no slouching) , when you eat it could get better as the spirit takes the extra weight and gives the infinite energy capacity as fat = stored energy and prestige. There won't be any notices as noise to alert yourself if it works,

except to gain muscle as weight or fat if no exercise. If spiritually obese, you could be moving slower unless your spiritually slim from living as a good living reduces spirit weight.

The study the phenomenon as a pseudo diet, to get the idea of no body weight gain or your not drinking enough water or watered down stuff. Base your conception on the cool and not ever angry but unprovokable nice person. The spirit be an inversed negative of the inphys (physical body) and about 1/3 the actual spirit, as a noted fact of compacted weight, so if you send your weight to the show of force and the spirit sends its weight, as a source of energy then you've doubled the outcome but lost weight of body. Spirits can look thin but absorb excess, and drive the weight down as the person moves with necessity. even mentally its like a hundred pound compressed weight thats dragging you down but your thin in appearance. To exercise be to create a natural weight loss, this weight is not physical but not any ever truly master it. As it again allows hurt without hurt and endless pain endurance until one or two minutes.

This will allow a bullet shot and you won't feel it or a normal pain and it disappears with some fat loss. I think the spirit blunts the blow, but the body eats up some weight to reject the damage and sometimes themselves with 1/4 bloat that disappears, but the truth be that all foods have a poison by unnatural cooking or to eat raw gives you a little more poison albeit the body also deals with it by bloated size and reduced body feeling. A coutrap is to be a little crazy by poison. Absorbed in fat is problems where you can concern things with others. Thus it gives you a prestigious feel as spiritual fat is a little better.

A quote 'They aren't sorry kimosabe, its their way of life.' from the old west. 'To understand be a beginning but to doctrine then you've learned. Count this as expersience (experience as a expertise), where you use others bias to get places with wisdom. Where a genius be to be using your own idea with other mixed in bias and use the bad as a counterweight. The march of dimes was a counter that proved this in freedom and opposition, to create and remake for progress.'

To be beginning with nothing and then to write it down gets your understanding, as I think you have to research it, then you need practice to get the idea in worth or work (balance from perdition or premonition) be expert through experience, albeit don't write trash, For a genius level be to undegradation, where as to use others idea with your own and be to use bias or conception proven elsewhere mixed in with your own thanks to Rev. John Fischer who quoted as a Joke 'Alt. Psalm 1\_6x, To bear pas quo or superstition be to look thin with phat spirit and dismiss fragrance.'

4. Norwegia kung-fi. As the art of the ultimate Bonchitius bonker. To make a pseudo wire effect. Stupidity, isn't occuring, so by trial be able and learn dream art training by 'Don't know, does or don't that interfere with agreed training or set them aside to work on by your own as you have time to.' This combines several art types that use passion or coolness as flame is passion. Fire is a bad idea, with the right training so you may not do unless necessary Traing is triangular force that trains you up that is able to save you and save lives. To be fine the fire is to put out passsion and obscure. To give a good reason for this is to tie in some things that work better, like old documents and from things where it is/was. This is a work art with peoples learning condition. Most be farther view is [with permission] and possible atrocious but made to look good. As to see it makes you forget the bad. As it describes a wire by the be farther view and I see no reason behind this besides writing it.

To permitt this is a wasted time with a terminally ill victim of his own experiments. He has been trapped by his own schemes for so long he hasn't even been able to talk straight. I call this victim making, for the forbidden stance of the person whom misuses it but it sometimes works. As I saw it like two days ago.

Some take diseases as a threat, so to burn a disease came to null book burning. Like a disease that never dies is then in exchange a disease through the body that keeps it alive forever by Xeing tsieu, or cut disease by a psychic chop as with the body or mind acting with a release by sending away. This psychic chop is the idea that as energy hits it, it causes the afflicted to not notice except with a hindrance. It reverses stricture or causes the body to not age and it can break down the structure of any. So more than one master is allowable except the 'student' is allowed to choose any one to learn from. Any two or more masters can work together unless in bond by apprentice idea as they choose. When you can beat the master or prove you know more then you passed in the area. If area had any reason for passing, or to get stopped at.'

Wires react like the two way street with a single path or motive by motion. Where we see the remake is better we will use that. Act introverted and go on your way. Some activity can be derived by corrosion as corruption and depends on the benefit to go places by alliance with the benefit of an allowed thing, who deals with corruption is a wasted or

closed link. By the benefit you can go places with leading on to a point. By electrons we are making, a grand standard with what's the point. Corruption can be a wasted link that causes events none care to watch..unless not allowed by the best intentions. Some corroded arteries are in no Big jealousy and can be adverted/diverted and to the atmosphere it is lightened. This could use a law of 'null hate by big standards big signals and use denial to make it work use love to work.' To block out bad things its 'null bad null corrupt' but not to those who prove good on their word. 'Null hate sex and disruptive criminalism.' except

think before you try it, 'It'll work no matter how I deal with it.' No matter how it worked, it works despite the method to halt corruptive action unless that's what makes it work. This alone allows the idea as you would think, its not to bully its that I looked strange its got a result. I will always know the right thing to do. The plan is not to burn up the place to avoid disruption and someone following, to avoid dangers and following..use the disguise technique and be yourself.. or burn your scent and not generally everywhere but just one thing.

Don't appear to win or have won, act a part of any move as a fight can occur as if by coexistence or coaxial wire. Yet the secret channel is used to win or strive in but ultimately win, and in instant survival, strikes as needed by being threatened by bad luck and karma as nonhurtfully is in speech. Each strobe is indivisual in their own mind and person, but doing as needed in the world for something, correct for problems that pursue using big machines to out the mite sized beings with correct proposal its a due that need no regard. Not to use a personal destructive as is necessary, but so much for the bright side as I will leave things up to you.. Need to know what will occur then its to seem out for something, and the moment it is personal destructive is diverted where its taught = nontroubling calm for or desire achieved by results. If the results are not accepted then its like a true idea 'given' by the fob to someone else. It seems my brain doesn't always recognize it.

Trickle down is a trick to know-how and afforded a branch of study by allowing yourself, and by being a user of the info and funds to gain aforementioned freedom. With detict is the district as its a breakthrough to create a study of use as I think it used to be a ticket of reduction for the effort of trials to great reward by those who benefit. I think its wise enough to know. Be known by person as someone else but not followed along as he/she would. To not do as is the idea

would allow is to do as thought would follow to do as you would not normally attempt, this gets an instant point of ejection so to a result its to be erejected or eerily rejected in an area..or pursuit. The physical body is only so immune so too many cancel the go, but the main reason your interfering as infere is contiguous. So what we got is thought an interfering band, of action in the most pointed from immunity and fear of being effected. Qizt is to be quizzed on a multiple choice question and/or colorized sheet or just ask questions and it is a straight up and down response or answer selection by column. If you quizt your going to get somewhere for detail of motion or desire.

Introverted is the way as its unseen but contained infinity shifted as else and its to able to absorb human pain, emotion and hurts by object or wire. By introverted electrical your allowing this land to live but that land to die as its literally unprotective there, being based on older stuff with possible. Controverted the energy is = field generated and just enough but cut off before it kills by link removal or powerloss. To put something hot or spicy and cold on an object reduces the heat. It conditions by attempt to subdue by cold and match with heat the thing beneath, it transfers the idea or produced energy as in transferrance link by transmission and cold connection. A general idea is to touse or to use a unsmeltable subject or object as an object that is a material not human. Keep a clean area for heated things where no disruptance is not fire. Turn off (power) to do work or try to find another way which is more likely to not kill you. Now if we had something for which is done, a single tissue might be widely

used for the effort of devices and electrocution. I don't harbor ill thoughts for vengeance, so I don't quite find much on consolance as to feel for the ideal on it, the action as a 'considered be feel for less'.. in dump travel and concept by what is least in value. There is no ill feelings from it. Inten'dence impe'dence will do a quick psychic abuse removal, So a 'drop face' is you do as needed or do it. Deaths agents don't always have to work.

As you don't do those things 'grimewell' or as things aren't normally done, try to bring personal peace through meditation.

The triggers no longer work, where the strangers are weirdos and how the person works is don't always trust what they say and go on your own. Thus justice is with idea and by considered consistence of discerned motorlike vehicular motion. Not near can't attack or can't usually disrupt with no known bad idea. It always seems as if someones near. Yet identified as someone else, with no regard to healing or noncriminal. If desist it would be wise to get the person with a non-sensed soulpart missing, and configured if they are better off but unaware of what the person looks like nor any hostilities. 'Rond as the general remarks of random nature is the general idea to watch in a person, for she is counter by and to wit and arguement.' From anonymous angry folk. 'Undoith all now be necessary by now. As any critcisms and feared remarks are ignoring the signs by sig. Like stamping feet on an Orsen wells.' by HP Harris.

As corrections of this type are most likely not to do anything, as they could be done on the moments of an instant do. As we speak its not an always allowable thing, to create a purchase and not try to be using it as though it was useless before the use..this applies for the self working machine that is improved on buyout before you buy it for improvements. But prerequisites are to be foreign or to buy. To buy is to believe, be here and be home and be there to know more by projection, here can be any building that is acceptable for use and if a purpose to be there then your not home. Yet to purpose is the act of a try, or as to make for something, no purpose and your there then be going home. So right to here is a transport field. Be cool yet get better as health is importance, as in a dry season water can put out the flames or oil flames just by smother, or unnatural by ignoring the source and use water or say a phrase and think the soul creates what you intend. Say a color either blue or red and the the flame can go out. If a dry season then its rainy like the jungle, norwood is like the water that ignores wood and despite chemical leaks that are fixed. Be a rearguard if the idea is to steal but a guard if the person tries to attempt stealing. If nuclear yield then the energy is blunted and excess used to give energy to the devices needed.

So no purpose is not devising what is and thats incorporated into all things. Yet devising what is you can enchant or tryng as triangulation of things to make it work. if you settle then its acts can support other actions. Indispersion is to use void energy in desperation to make a break or a breakup of almost anything. So disperment of a energy is dispersing the field of which it was made. Disclining is a force to clean anything, as its dis'clin or disinclined in bible for not do. The indispersion is to collect void and then forge something together. If you can't do it or can and your done then you pass it to someone else. As 'be in exchange to create better effort, to take without stealing is always an exception to the take by steal. This is take by conniving, some try linking as to 'see a form and see your own and make nature connect' by psychic imprint to draw a line in your mind from one thing to another, or a touch of air to break the bad pattern formed by an attaching effort to another..Art by Shiela wierdro 'the shield' of same.

Indescretion or indescribable cannot get you killed, as if you call me at home or anything you won't be hurt. Bonk to create the art of undescribable and make it work for you. If a strikes going to happen its not expected to concur as needed or it will be out of joint with your nerves. Wires are firing, as the fire is inside but electrical..break and you break the spell or action intensive moment. Pass it out, is to believe description as a spoken belief and leave (the place or spot?) to work to be despect is also distinction as a class or to be released by understood

things for indiscretion or open desire and with the be required of you idea of nonperspective by disbelief suspension or perspective by senses with persecutive acts. Sleep on this to get this point. This was a proposed idea very hard to agree upon idea so I am confused, by many things in it, as to not rub it in else is a description of what? I keep hearing I can't I can't, so I have to do something else.

Free by means, but not by actions that are directed from others or direction by others viewpoint, indisputable types are to be easier to deal with, as if now is an option and guided by instinct or warning to be in advice of those you advice.. or be in advised by those of other worlds but not to those who aren't to your own dislikes and not always into disservice (c) Kre. By bong is a respite to bonk and bonk attackers by Master xcien'tsieu. Wrote up as a bong indispersed. Bonk is dispersed or disserved by saying the act they do, or act it out that you don't care. Another way is care for your own idea and allow them to do it, but say almost nothing to the bonker or bonger. Except that which is required, the act is to be natural and your resistant by focus of standing meditation.. accept the change

as it occurs and it doesn't matter where inimity is allowed as if its inspicable and then its an effigy. To destroy something is to bring it elsewhere in an indespicable act or indispersion. To own nothing is honorable but to own something is inspiring. Knowledge is something of the original sin, so knowledge is unforbidden. If the place is useless then fire won't occur, or if you find something inexcusable to your belief systems, ignore by dislodging it..as its you and your just their informant or aspect of yourself.

The helper can teach the teacher except the teacher student can inference by using reference while learning to teach the others, but only if he/she feels like it. Tell what you do or learn before your attempt and you can cleanse it as though it is not advisable to those with heart conditions.. as any dispicable act is forgiven. Bonk is the act of cleansing as is bong with diffused cleansing none physical thanks to contributor Cheyenne. If you use a thought to provoke unnecessary it causes an uprise to the desire and sometimes the contingency 'be negative' force is channeled. As to feel the heat of a fire is to smother it by drinking water, or let the act complete itself by 'bunk' by Xcieo tsiu thats to work dispells by negative force of any target or thing. To snuff it out as objects in force, beyond a doubtful agent of energy or respectful reagent to the design. The rule of thirds: a third the force per second and reduce the area by that which caused it. Signs of the area, can connect you to other places but here we rest our bodies.

Beware blueice as he can get disruptive, iceblue is to be repected. 5. The focus of this be hu'jai'la as kujali or Foo, art of effect with focused force to motion and to create energy and nothing that fools the senses by psych out. More from

googling the underground on search terms. 6. Bienk is to be despectful or disrespectful by originality by art that is improbable and you can channel energy to achieve it..but the weave/wevv is the method to achieve a result through a medium. And terraforming is more possible but by being a scum thats real in real life, make considerance and unattractive idea. By true its a reason to continue

on, false its a reason to lie and achieve a result. Manchuriens are not actually controllable, except if they were then in the middle ages. So the idea can continue if pressure is put on it, things in use may reassert themselves so stop things on the idea not achieved or on the ball by not speaking on it unless necessary and that is a decided idea but not in sickness. Dag isn't to be forthwith and use an energy form, by force forth by attributes and increasing it and be without by decrease to drop it. If anything that's right fellow then try to, but then to do anything that's wrong allow yourself to be controlled by spirit guidance or thought about. Whats thought on is with recognition and true to be bought.

7. Bienjk is to make in a just plain kill by techniques of your own devising. through time most of the time as it will be unable to cope with other forms by xcien tsieu. In bienjk you do something to get something. In beinkj you use a needle like energy to replicate the needle, as theirs is to create a needle and try to to keep it in the skin. Now the trouble by use is to believe in the desire by choice. Then use the choice as if a weapon of desire by energies observed, and seal it away, if to cut it off and deny it of all sometimes of the fuel it needs, it will quit with weight gain unless fold over excercise is done. The thought 'I feel right about this, so I will do it by making myself feel better. By making it seem worser to create appeal is possible in a country of time and not entirely when but

how the act is achieved, and you still win albeit the negative appeal is bad for the spoken point. Priests are not your enemy, the fuel is as if its on fire.' As tensions of two things pointed out are likely to bring passion by event and breaking point is between the two.

It uses this force as a long distance breaking point, "I know what your thinking but reverse interaction with negative." from D. The distance breaking point uses a wave of timed energy. So what the problem is to create a non-stealing force of jealous nature, maybe small jealousy as it stems from the same idea by its if that reduces jealousies by the act as it can be lead into a condition of acceptance but the power that is hard to control. Help control by visual signs, and take note of things as they happen so to 'notice the finger is to miss the other ents as they do things..along with other events by tree and still do it right.' The true ent is a good thing, as event is to move in an area by idea to fix the moment. The diabolical evil is to cause create and decree but only if its unsafe.

Unsafe motions create the balance point as if you were balancing a sword blade on the edge of your palm. This nothing so dangerous. Where orcs are good and willing to work but only those they like. Goblins are formed to be done with by idea situations, and Hobgoblins are formed by the human to help out by intent. To focus on them controls the moment, not the person but to focus the event to occur. As your in it to go through with a safe act is to win it or gain sanity as you watch. If you can't read it, then not to read it if you can't but to be a character and have him/her read it. Strict off if you desire the moment to work better and without restrictions. Red is at work if you see it and white is a weak spot in the

resource to work in. The blue is heal/redemption, to be also an object healing by Osmosis or absorption.

So to break it breaks off any two or more tensions as to toss a pebble into a pond, look at how it single out now by a near death and ripples that follow but a calm peaceful motion. Its called breaking time or rel'ti'tim as relative by realty time. Don't conclude to likenesses that assault to be there still but shift them away if possible. As withe any experiment, farces and falsity can be ended if the true results are good enough so safe lies in the west and peoples idea are like greek unless neat freaks write it..at least allow good neat freaks without that must scents or clean the freaks..Be there to do that but don't go too far. For a bearer its a worthy effort to keep. A bit of silver or cooper can keep the thing alive, whatever thing it is. Barium copside as barium copperoxide releases the electric ghost from the area..like barium below and copper above. Be not harry potter as the day could get bad.

Unassaulter is to be non-assaultive and preventative, For anymore as it is. The interesting idea is to make uninteresting interesting with the pattern you get ultimate, and almost no end of fun. The fact of value is to work as if its a reward to decide, a de award to destroy and give no reason except a white lie as to your creative origins.

Including stamina and lead to see them but be prepared for the offspring by iron and steele to keep the stamina up, so the idea is the conditions that a person is raised in is the conditions that the person is believed to be established in. Sire as ye will but don't belligerantly do things by bully or similiary then don't. By marking yourself your pet won't disbelieve you, and get pissed/pissy. A pet ignored is a pet indeed, as some humans can be like this almost out to get you. Live it to prevent, then go back through to deliver it as its possible as this prevents pets disorder and stamina disorder of too much energy. If you want to avoid these problems, try an herbal remedy and get hot water with use. Don't mention fat as a compliment as it will be averting damages. Work the wee but make for the well being, So the

deed is utmost on the mind, were not conspicuous, 'Formulation is the description and the web of lies' is the truth sometimes. Now is the effort to bring the pardon and the desire for web designin'.

As we speak your playing deed so were watching. The deed of the moment, is the pardon of today. For shifting use things to learn your place and design for the moment except be near to the moment. Simply put its 'DDD' but its a jiffy to

use as a comspec, as this is here and this is there and two scenes coincide with what you see can shift you but you shift out. Deny heat and things are not unfair and do try as you might be tempted unless made by elders. As for the things in the new world I have to say its split into two sides, a rough standard and a good standard with a rough estimate on what to do. Before we we begin to go to fantasy, we go for imagination and disruption of evil plots.

The forward extension, is not on fire as most would think as is possible, as with many an invisible talent. But try to copy rituals or spells to create the effort. Burn the fire on moment that is where it seemed. But mad bombing is denied and not possible if safeguards are set. Set the portals to guard against, the willful and destructive for purposes unknown or destructive.. as materials are pyrguarded not reversible. What I get killed for is an abandoned before it began. The idea is to believe my will is always accepted, whatever the answer thats a negative or positive disposition. Individualists attacks are not effective with a boundary, except a moments thoughts dictate a safer path or better suited.

Rule 1 is abolition, You can't solve something that can't or doesn't happen. Rule 2 is the rule of destitution as the worker does the contribution by ambiguous meaning or actions by a near likeable idea, here is the true point where then its truth with motion that you find your idea with information thats suitable. One, be intelligent/insistant on your point or they never will get yours or do theirs. So the effort isn't wasted by a conclusive ending as it brought it to the end as a good story might. With a special consideration by idea, if might then its a will to give by progression and anticipate by dictation and no hesitation at near the end. To be with no mistakes or be dumb on mistakes except to prevent.

To be desistent but destructive allows you fight without being noticed, unsoft but deferred as a 'trusted one' the person can be turned to do anything. Be goad as until now, I said it works towards our goals. Now I said the idea was. So be near me all at one or not if its unnecessary and necessary for the items there are not too dear for them. Any insanity is normal if you think on it, along with technology that isn't as fear doesn't have to be destructive. If the new don't work and then keep the old and we run on technology such as low to high techniques and makings or technological marvel. But time is frozen for places not in use, as to be a world but not the people within and be able to watch without watching. Win with the person, stop slight hand and feet for alliance and destruction. Dolobereiation is better, as the important misfits are almost denied.

Where notions are followed the inexact or exact way its produced, or written down its not an act but the result that's achieved. Ingenious ingenuity, play with care that causes discern and win with what you have but dismiss the unfair effort. project the energy delivered to yourself and let them soak it without voice. If dangerous then leave alone and get away, I don't care what your taught its just doable to get some things done. As in the attempt to genetically engineering, botched its not to be mentioned. Be displaced to beguile the total effect and not include side effects, be indistinguished by copying others and make for other lands. Treat wierdos with the unlimited respect due them by reprogramming, things that screw you up can be undone.

If dealing with fantasy, then don't try to achieve but let them achieve, as the character achieves you achieve. Let the person or event shift you out, in evnts of no person then then create an invisible friend. Beware evil witches might assault and consider themselves master, ignore your subject and continue. The Good witches never assault except to convince, as to act it it can convince your subject or yourself to believe it. If disproven they can transform themselves and make themselves believe if believe is then to create a genum or other efforts more than what is believed in.. Be yourself and don't worry, each world is their own and support is not essential to create a designation. I will word this as ART in another world, but not leave as is possible. Physically I will remain, somewhere I will try to find a reasonable way not to destroy but to undestruct.

That I destroy unless not necessary to figure things out. Not to try to believe in anything but believe in results that work. Now lets try to downplay this fact and make a perfect example, to benefit a doubt. Try to right where it counts, so be smart on prevention, otherwise allow some mistakes and be smart on dispatches. Be guard resistant and concent or console your loses as with yourself so your not too destructive unless its absolutely necessary, as for trust don't tamper with things as the chips will fall. Be nevermentioned to the front and take examples else so to appear 'don't be dumb.' So to stop flame or waterflow is project it into outer space and reject it inside or near feeling the water/flame fall.

Then you might feel an urge to do something about it, follow it unless not possible and this goes with other actions to learn through the person as they they do. As to reuse its to place a consolation by preparation or prep with guard and

be ready. Real events are linked, to the quest or place with rest deserved, manipulated by any means necessary but the nature of the assisting is assistance by an idea.

Otherwise its events that generate themselves, with a desire and coordination to do as desired. Most events are worth the effort as to make the new from the old, its just credulance in the amount of time we spend on it. To emit is not intolerable unless to sell, so its a credulant moment. The law against emit isn't within reason. So for the abandoned places, not poisoned and considered self running. The greatest intolerance is the tolerance, with the desire as a portend or moment.

6. To program with thought: beautiful be in service by bold, ritju or ritual be bold, worship and seem/ing be for real, hang be to meet and horrid be avoidable, to bear be to risk anything from forbearance, Honor be to break wind (brek off) from the bad or similiar ceasing assault.

hutsu = hurtsu by lavender dur'wong be a train of thought to pain endurance training, while training or torturing others. It trains into yourself a reaction of hurtful behaviour to crooks and disruptives or to automatically id the crooks and get them out of there, now the art of directive speach be to focus the mind on 'the force as is identified as my own.'

To put forth and get results be the secondary idea, but you get the focus with desire to do as needed. This follows a code of conduct, 'puyico' punitiive code to be puny but hold a large dynamite punch. To control rage to be undestructive, But the last effort counts if not with fire, remember this 'to put out greek fire and oily chemical smother it with a wet cloth but not flowing water except for the area around the flame, as small packages come in large explosive packages." quote by E-mah. A specialty be to use deadly pressure points with heart to cause heart damage, outward pain force, eye pulling or putting the eye out and very similiar with skilled practitioners; pursu be the negative emotional artform of hurtsu, as the art of pursuits but with truth "not many care unless its spoken of expertly" by Noreaga, for 'why mention it if you didn't care to look.' Any art be magical or otherwise but the more mundane art the better. Shapeshifting is an art of shape forming in/on yourself also followed in jitsu as peace restoration in pursu or created whimsical with some music.

Nenjetsu = Shensu, In remembrance to an olde ship. To contribute with an idea to achieve concent toward a goal and make allow freeing a person of personal problems, by tricks to find out and ith considerance of the time that their be in meeting and enjoyment. The motto be the same 'To show respect and choose correctly with litte or no mistakes, make allowane for mistakes by corrective actions. For to really go overboard can get you killed, trial to not go overboard and make light of the moment.' their motto be to do things by themselves for others and tempt fate. Trying to help and meeting makes people laugh be as an example. Endure the moment to get better results. Feel poisons are to cure like gingivitus by Peninsulin or kill by disrupting the body by personal means like Concillus to cause colin cancer. or carcinogens to create bad lungs with patricide, as perfectionism and bad deals can make for hazard but personal identity doesn't matter. Use idea and purpose set by others or to balance the situation with disturbing concepts or things and repute of chastised with peace of mind to both parties. (c) Joshua Leap altered by thanks with permission. Alt views were allowable.

Now we got the tenents down, we start by practicing poison resistance, and usage of concepts made from others with our own intention I dependance of the situation and how we feel. Looking and observing to get details and usage of good spying to get the best idea. Place items that report to you from recordings sent and understood as something else. Use persona reposts to get attention of the right people and get support. Prevent theft if possible but if some steal then steal from them. Then attain a friendship. Fix as you see fit and as be necessary, use punishments on enemies and make it a good thing (happy thing) for a deed of choice. The idea (ka) or kill all who use against you or your friend that shouldn't be in usage. You have been observed by dervance so be good. Use the game of life as an example of how to treat people, choose the best option of a choice and see a game of the event that allows for a spoken idea. To show respect and get your desire by achieving the right choice, to play the persona that be chosen.

Revise to fix the moment and triumph over evil and misincorporated thoughts. Be at appeased peace with yourself or be appeased to allow good thoughts. As you get a good effect or grandstanding of the area on any thought. Try to use insights and give them away as a consolation prize and as the best idea, but don't openly use them unless in writing with some idea of whom you gave it to. Get retribution as to large slights but dismiss the small ones with a laugh and this also gets rid of enchantments. Due note: the Shensu artist be likely to cause disbelief/belief and gain friends just by just by some idea of who you gave it to with attempting it. Otherwise its to create problems

by attracting them, the affesive or offensive types through defense of another 'attempt'. Usually from those that attack your friend that don't care that you did it but they lost a 'target' and get angered.

Don't attempt and don't do it as it gets anger. So please use forbearance of their personal zone and attempt things not against their beliefs, and not allocated to your goal or alterior motives. Albeit this be a seeming double identity idea of character assasination, don't go with the belief.' To believe in an attempt of invasion of personal zones and have fun at it gets a reprimand of sorts not looked for including all sorts of destructions. All to the general belief of personal privacy and character assasination or know its arson";

Shien-su: Shietsu, The Kung-fu style be to do until you get the skill by improvement on any one effort for hope and professionalism. Expressed in identification by clarification for a clear viewpoint. Just try as you want and anything goes for hope and consistent behavior, thanks to Anonymous and CJ. To cease actions be a good thing when something goes too far and prevents discrepancy. To cause concent and bequeeth me to double your effort by practice with others or self-practice by yourself (c) Joshua Leap. Theirs no such thing as a perfect match unless its belived as believed and relived by you and the temerity makes people, that lead true heroes likely to make a dent in the world. Hero worship be quite likely and causes a dent of another type. To find a demi/godlike person and to deal with them by use the effort that they do and compliment them with a word gift of similiar. But not of hospital types with an ill person as they are likely to kill each other. To speak on this be to get hate on the subject, unless their appeased first sometimes to save themselves.

Quote by Bill 'Thats exactly what danny does! Albeit large, he's very civil and a cruel trickster.' To put a light in your eye and make us leaders of ourselves thanks to Jenny. To be believed by perception, be perceive by belief and can get misperceptions. This be the way to create an easy life by use of compliments to others and seem to agree. Yet you can get anything you wish through a will of your own. Things you look at aren't to good by compliance so use a third person view for your own perspective, Upstage be to correct and make it your own idea, when sometimes in front of the original person. The point be to use civility and a legacy by kung-fu to make or create an improvement, by tenacious practice and effort to achieve a more efficient concept.

Try hands on accomplishment to get away from life in an overcompensation to get married of a logical relation for consolence or to get effort doubled, from the true meaning of life that you decide on to get anywhere you want. I use to be better by consistent practice and drinks that are of many sorts. To work for a living and hope for a better life of personal freedom and disaster by achievement from bad idea not backed up or a second opinion but avoid smut if possible. This be to create a perfect identity and better personal life.

To not care for things of concent and look to getting more of life unless necessary, like life from walking down a road and you meet with a purgusias (perfectionist and purger of information) or incidentalist and unless you have a desire in mind, have considerate idea in mind. This allows informing and giving the best idea away from others insight, innersight or best object by others concent for use by others as if borrowed. You retain the right to create what you want but you own the idea and object. To create a conceit (conciety) from dicking the idea into perfect blend for the benefit of the idea and don't doubt unless its expected. Know it before you see it or fall by blind hope. This be created by Josh and BJ and altered with permission by Jenny whom was wrote in (wrop), I was using hers and mine idea by what she did and how I reacted (c) Bill & Jay.

'To shift idea use a considerance and with your reaction be the junction of your position, allowing the thoughts of what occurred with occurance to shift you home.' Quote by Noreaga. It follows this rule, To react to a situation is to shift your mental place and if circumstances are bad enough. With enough fear or you don't agree with it, then your body shifts yourself and you are where want to be, and this be aided by walking through a doorframe or gridtravel. The attempt of circumvention be to do it to someone else. 'Where I am be where I am, so where I was don't be to dumb for heretics as they can attempt a destructive action on your attempt. Lay things out (not human or to kill) as to make an easy and immediate plan of action. When they realize your in the know they might kill you or run when they can't.' quote by Galen from examples. 'Don't do things that rescue nothing or require rescue' quote by Eihzmal from example, "A demon of Dismal interactions. or Bizmahl."

To contract and deliver or consider another way by cotract of alternative means, be to get your own way and freely.

Operate with a hope or emotion and desist by that which can get dismissal of contract, 'be quiet about it' as you think to don't deinterest others by leaving out things with coaxing, if anything don't deliberate and assume you can't be hurt. Instead use a impress by presense or pretense and facts approach. So the trick be to make it too difficult and yet trap the people who did the idea, seem as they want into your reimbursed planned debt or demise to kill them off, or to larot by trapping into their own debilitation by looked for demise set for you. They didn't do it if they are too good or didn't do the deed as if tricked into it. If this doesn't work then state what you want of those who transpire illegally, to be understood as another form or to speak to a set place that they pass through and tell the area concience to transform them. There is another life that is energy in form, as they are in form they are living beings as they form as they will in life by what you think.

As will is an almost exact transcript written in english, 'Two consolates or people with afflictions of original idea (comspecs), with circumstances that provide on call division to unsolved mysteries for insults and idea consensus. Make for uncut medium, called for or uncalled for consistency, identified by open minded (above counter or above illegal) or close minded (shady deal) business in considered transaction by training. Be on your own till the moment of consistence (concerpts). For a moment on congratulations, try as a moment in movement might be to be consoled by movement of concern or cancelled debt (council). By use of the Shiensu be to coax monsters, to not be monsters from falsely accrued desire and by being deliberate you get nowhere 'by progress' unless the other nearby be allowing. So in accord to this there be three chances, to win through, do not trial, or to be slain at the heart construed to win at all, by giving in to ecstasy (sweet moment by feel) and lose it all by horror or by where you stand. To give a chance to succeed and try to make ends meet, and not fail unless necessary. Your words in the end will or will not save you. They, the desperate will lie to save themselves and kill in separation alone and by areas, for pleasure, but not the stoic or not as they will deal to those with just deservance and usually bring their friendships with them.'

pijutsu = Shen-pi, the art of pi, as power, and idea action done. The idea of pi having power, could also mean the math of e, having power. And, other things. But, so far we are gonna work with the powers of pi, as a discipline.

It means there is pi or the people amount divided by 1.8 and this is how much power increase you can get that's a minimum. The power of Pi that is alike a power source, to the area from sun and God that allots ability by unknown means by conversion of people. Where Pi is God or the sun with a measure of 3.1416 and solvable upto 50 million digits. For Pi to equal power, one must emulate it by treating an action sometimes an do an action as its seen or unseen as solvable or unsolvable to a point and an action is likely to end at a time of choosing. As the imaginary number idea, where everything is needing, to be counted so there's an imaginary number till needing it, then you think about it and it may become useful and counted. Then it becomes hard to remember unless you have an immediate use, as it was thought up from nothing anyway.

Theres a beginning to an end and any action is at the time of choosing where with Pi the calculation ends at any given time as this Pi has over 50 million digits. Now some say Pi is a spiritual idea and its power is supportive, by manipulating ability and energy without detection as its basically powered after the decimal and sometimes counts as negative. The focus of Pi is positive in the outlook but with a negative reaction at some point and similar to a job as it occurs, their is representation of Pi as its spoken as if pie an as its said the same way, it acts as a substance of addiction and support as it was the energy which supplies the most.

The growth cycle of dragons - starts at the wyrling stage to grow to wyrm stage, then at some time its draco stage.

wyrling = wilding, child dragon, Dragon child stage that starts from an egg that's elastic jewel like and with stripes the color of the dragon's scales with this period that lasts anywhere from upto 200 years till they decide to grow up. Most times they are energy given form by another, this form be what they like and isn't restricted to human, and yet sometimes they have wings. They feed off emotions or destructive responses by making people suffer or other events. The human transformed remain their shape yet shapeshifting may be enabled, so its just for looks as a "human wyrling".

rato = raptor; mini dragon that's mid size to the body perception and body size. It uses stones and electrum to produce flame. Otherwise it projects air by feel.

draco = dragon, The dragon turns adult and grows wings and flies after enough energy be achieved. Some say the dragon at this point can change to any form including human and only at need. Conclusive, people can assume until proved as this be theoretical and gotten from reading a dragon bone at a distance.

### A descript of dragons

dact = wyvern, Wedge shaped head and dark scaled, flame breath and poison tailed that's a smaller dragon cousin that's head is narrower with a narrower jaw.

1. dacto, dragon, draco, drako, dacto, dakt, draeg, ikwaeghi, A type of cold blooded large lizard from japan or off islands that be a result from a egg and looks like a large alligator, that lives onland and offland in water nicknamed as a species kimono dragon.

2. vasmordre: faith in the fire, an ever consuming fire that never goes out in two forms, if the person's denied its a flash firebomb of physical oil lamp thats with a wooden wick and oil mixed with water 1/2|1/2 in a narrow lipped and closed up container with a lid of crystal or glass..or a desire that can go on forever by the caster,

4. Overwhelming intelligent elemental force and formed focus that can be any form, meaning something to someone, Like a skin elemental, of pure or nonpure force in a body that feels like a dragon. Dragons of pure force are necessary and can overwhelm the body.

5. Large flying armor scaled and some feathers 20-100 feet long body 40-120 feet wingspan giant lizard, able to shapeshift to any form as their body be true wild energy. there ability to manipulate energy is limitless and it takes a demigod to face them to a standstill. their are different types of dragons to different types of powers they have represented by scale color. The dragon scale has healing and elemental resistance properties again dependent on the dragon color. They are invisible till they want you to see them and that's if they are hungry or interested, and then they

lurk where there are things to learn. The dragons are born from eggs that hatch only at the mother's command or formshifted from human. On reaching 2000 years of age their essence dissipates and they turn into the voidal element.

6. A large flighted or non-flight scaled form evolved from the dinosaur like the pterodactyl that uses a bladder of hydrogen caused from stomach bacteria formed as they ate. Directed to flight by flying through bladders and breathing fire. This can cause the dragon to spew unless blocked by elements eaten. See you had two double chambered hydrogen filled 'flight bladders', that are not always seeable use not present to the area feel yet release lifts them up.

They ate sweets and other stuff like platinum, rocks and humans, and, the bacteria in their stomachs gave off gas, like a lot of animals do have. Just theirs gave off hydrogen except with plankton. Which was instilled in the gut to form fire or attack if they are sensed with 6th dimensional energy or peace, as they feel peace or drink water unless no need is no hurt. See thought so create from instantly diverted area quickly moving or channeled directly into the flight bladders like a fuel injection system. Or they'd set themselves on fire and hydrogen + platinum = flame. When they breathed it, they had a 'false palate', like Crocodiles, but Crocodiles have it to keep water from filling their lungs when attacking prey underwater. They had it to avoid flame backfire, back into their lungs. And the hydrogen filled things also helped out with giving them extra lightness for flight.

For the other types of dragons that are non-fire breathing.

A. Helium gas effect from the anti-bacteria from is use by thought that energy from plankton in the stomach is your use and to fly it was a helium off-shoot into the "flight-bladder", from helium + copper + acid = poisonous and toxic gas. The breath be chlorine like poisonous noxious breath so the false palate comes to play.

B. The lightning breath be from platinum + helium = lightning or Actinium + hydrogen = lightning.

C. For water breathers they, the dragon, take in water and to fuel-inject the water to the "water tank" in a single "false-bladder" from a false-palate or stomach where the other bladder to use the hydrogen..

D. For stone and crystalline breath the use of stone or gems were eaten with metal and people, except the stone and gemstones weren't totally digested, just broken up and shot out from two false "containment bladder", connected to the false palate to use like a breath weapon.

E. So, 1. hydrogen + rock or gemstone, and 2. helium + rock or gemstone = acidic rock or acidic gemstone particles to cause choking acidic effect, of stone or gemstone with toxic helium gas.

F. The ice breath be nitrogen producing bacteria + adamantium or iron = icy breath,

G. Sonic breath be the helium + special reverberating vocal chords + metal = high pitched sonic death that knocks people out. Their attitude be to attain the greatest goal and get irritated at anything that be near of certain types and to attempt to kill it if it be irritating enough. To not seem to mind killing and to get a great sense of the area to know when to strike. It knows your move before you do it so its not possible to actually defeat it unless diversion be used. Modified from "Dragons" cable tv program by THop for example;

An elemental creation as a force by myself for self-creating 'aelcrea asfocan bijman fosecrea. Tempting it into a store gets a controlled state that disallows it to kill you or others unless its a foreseeable emotion or emotion where it would likely go insane and if so then itd surprise you o destroy the store.Except for ajators who wouldn't care except to get something out of it.'

Card magic  
Cadjuu

"Due Esz caba is contained damage with recompense. As recompense is in soul sense and as much is as is. This is to believe as the answer is by query to the cards to what our association is. A sum'e is as an moment in creation. As an idea this works if recompense is in soul"

The cards are normal cards or playing cards with suites like clubs, hearts, spades and diamonds. There isn't any significance to them, except the type of influence that they have where death is a success by a killing. Use of belief is necessary. This is that belief;

"We are as we will be. We are as we are and as we will be. I am \_ and will die do as diere is life where diere is desire by disaster. Maybe be we are as we will learn from it playing with water by ruination. Recompense is in myself as meslf, where I as me or I as an en i' in sense e'sen'se. Diesolv is for the ice to resolve, and yet its desolve. Diere is fire an as if we are. As fiere is none we are as an if en de tail or death in ending."

Like Spades are as death or disease like a death scene or fire for a sometimes pain.

Hearts are forbidden triumph by desire or stealing or like air or hurt.

Clubs forbidden justice as be by self deterrent type set justice and as it is a thought to act by self-redress and redeclarating to be at the end of disaster with earth.

Diamonds are forbidden passion or allowed wealth with interference by some means expensive by the love of it or playing ruin like with water.

Any runs by conclusive numbers of 4 or five will be a silent act like silent death for spades or spedes and silent forbidden triumph. A way is two or three of the same suite. Any chain is the event of mixed runs and chained ways are a mix of both ways and chain. The atleantian translation is indicative of a sooner idea and so onto the vocab.

"En. E I es now go forward. En. E Ih es now go forward. An es differencial. What is a an difference but cold as indifferent because none would look at it."

rue = a run on silence or rue (run) of with notice by number or count

diamonds for water that is ruinous, clubs for earth, as desier is life desire by disaster spades for fiere, as I for I wylle is I hope. As nsense is essence, circet for an idea sometimes death. )

hearts for air as its it ief forms. Ief an is lief (life is formed by stealing moments).

diamonds and spades for Lightning is in an very ensnce for I as an en i' in sense e'sen'se represented by fire and water.

diamonds and hearts for as diebold ice is a symbol to cold.

spades and clubs for as whatever noted and lava is fiere and earth.

clubs and hearts for power as earth and air, diesolv its se unlumited in ending'.

A way is = an in or two or three of the same suite.

kermad.= kermadiac is an. is an et el is an. association to the heart...

As ce en ziff = is to fit the right moment as of what is on what or what is desired to happen correct.

chain lightning = fire and air burns out devices in order to work with the goal at hand. A force that goes through everyone in area targets by effect of electrical in as freezing people to do as by electronics. As for if then so we are if then so do.

chainearthair is = Liquid or solid Earth and air or power in motion like heat and air to a turbine mix like an orden box this is the orden force as its supposed but allures men to do as if its life. Its a force on its own owned by something and replicates something to make do. It alleviates loss of memory to begin as in an effort. It secludes those who predwell or prequell in things or it if it is over itself. Its an event ruled in air by fire. Lets go to the next one.

The real thing is physical by fire as passion and psychic in area by idea air strength by included event. This individual event is like water on ice with earth. A precluded effort; Secluded in strength precluded in measure. Like a stone glider on air.

It follows these rules.

To cut out the event blocks the chain effect.

To block out the view blocks out the chainfire.

Pointing out the event blocks it according to earth movements or motion. Block is sometimes placing it in a controlled area to create it.

To an' wield out on out of the run memory like a shield helps reforge it, non but the strength and the mind are an' required thing to remember the event at least through drea,ms.

To control the event considerates the blockout in ice of the chaineath.

To control the next mention blocks out chainwater

To what controls, its so easy to defeat by power it is what blocks out the chain an we are lightning, power or lava event. The orden box is very useful in this. An as ef en, the Orden box can create any event out of order by chaos so its the counter to them all. Wishes by this are possible that it can be a force an of indomitable will. As if en is demonstratable by effort.

A cut frome forces are what cause a prophecy by action to not occur. These prophesies are actions in account that tend to try the mind. For in the effort in our minds, its with our own idea to do things but like a cut of cards we for stop the action or continue it for like actions in accounting were the mirror beings.

Chainfire spell- Post anatomy an analogy of time and its congenial components

Card divination

Oytepe -o- e peoyte

By Gloria

This divination style uses playing cards and this is with all the cards including the joker. The first thing to do when receiving a deck is to clean it. The decks go through many hands before arriving in yours and cleansing any prior energy is necessary. An easy way to do this is to put a Clear Quartz on your deck with the intention to remove any non-beneficial energy. Leave the Clear Quartz on for a day. Another option is to hold the cards in your hands and imagine white light going from your hands into the deck. The goal of the white light is to fill the deck with the purest energy possible. This can be done for 10 minutes.

Once you have cleaned your deck, you can start looking at all the cards. Hold each one in your hands for a minute or less. Sense the energy of the stones depicted and let it permeate your aura. You may feel shivers, heat, see colors, pick up distinct smells, or even taste unusual flavors. This may happen for some of your cards and for others it may not happen at all by what you do. What is important is that you start building a connection with your deck. Then use it for what its worth to you.

Some of you may feel comfortable sleeping with the deck underneath your pillow. Others may want to carry them around with you. Use whatever way you feel most relaxed in getting used to the vibrations of the cards. If when shuffling the card deck and thinking of your need, the point happens that a card drops out of the deck; then that means that the card has extra meaning to you.

Then you get to use the cards, this will be for divination purposes. So think and respond normally with a little

psychology to ensure success in a reading, for the normal card deck try to use the meanings as depicted below. See that if you want to read it, some can use positive thinking as they state their feelings or need and get what they want. So this is with some possible concept and that is accepted by the reader to be felt. Then is the use with the card divination layouts as described. You don't have to read the entire description of the number or card suit. Just read what feels right for the moment that you saw when you touched the cards, otherwise use your intuition to read what you think is correct for the given moment. Feel or think and you know what to do, that is the motto of the reader.

This means that what you say is what interpretation that's correct to you, both the good and the bad. Sorta what you feel is needed for understanding like, "The good outcomes are these and the bad outcome is this." What they hear is what they sense or believe could work for them, they might allow so they guide them right if you want the correct idea expressed. If you need to do this, you can dumb it down if too much and that is reading certain meanings or descriptions. These are the points that you think by feel may fit the reading, this is where the person will not be too grateful or misunderstand. That's done and if you don't dumb it down too much, sometimes you're set free in feeling so enjoy the feel.

Important note: Sometimes you may be seeking a yes/no answer, so what yes is uses the 3 or 6 card. What no is, I believe the knowing of things or if you note what will occur. So basically there is no definite no answer, that means readings are generalistic. That's unless you psychically know what will occur by the card, this is done by backup cards or otherwise this is done by psychically reading the card with thinking you know and holding the card and then feeling the need to realize the idea that comes to you.

You don't want to give them the wrong idea in a reading, if you do and they didn't like the point they could go somewhere else or not come to you. So approach this like this, think to read the value as a point of positive values and then the negative values. So you can say this may happen if positive and if you think negative this will happen. So this is where you think the idea and create the point if you need the idea to occur. The power of words comes into play, then as you speak the idea you think to need and happen.

If you think to supply both positive and negative idea, that you think will happen may seem or you know things to happen. Then you give them a more fuller reading. The idea is a point and they can choose to accept the point, so when you read the cards then you can think positive for positive points and negative for the negative points. This is all in the reading of the cards, which is creating a point by the use of values that you read aloud. So really there is no negative point, this is using an idea that will happen if you need the idea to occur.

Sometimes this is with perception of a vision, sometimes this is by dreams. Remember this fact, with card readings you can't be exact actually. So accept what answer you get by asking a question, shuffling once or twice and doing the reading. These are the values in divination in cards. Remember this uses what you are certain of by feel, what feels positive is where you're certain of the idea, this is where what you think is what is possible. If you feel uncertain or are certain its negative, then you are feeling the point or you can think you are getting negative readings. I think whatever the reading, it's done if you think this is done. A yes answer is a point you think is achieved by idea or concept, a no answer is a point of disappointments and this means spades is a no if positive about the idea unless you seek disappointment or death. The reading itself is a point of perception with the cards.

Spades are a painful moment as of death or disease, this is like a death scene or fire for your sense as this is the sometime pain otherwise nothing bad occurs. In particular, spades indicate troubling times and disappointments are going to occur if feeling positive or they are positive. So if you get a spade, then it's a disappointing time or no answer or yes if you seek death or disappointment and the number is the reasoning understood by feel.

Hearts are a warming feel that's sometimes of forbidden triumph by desire or stealing, otherwise this is like air or hurt by defying the law or something. Think before you go defy the law. If you have a heart suit, then it's usually warming feel of something. In particular, hearts indicate happiness in love coming your way if feeling or they are positive. That is all this is.

Clubs are where things are done by desire or done by the feel and maybe this is of forbidden justice, this is thought to be by self-deterrent type set of justice and as it is a thought to act by self-redress and redeclaring to be at the end of disaster. That is with earth feeling or some other activity. In particular, clubs indicate work and industry made to happen if feeling positive or they are positive.

Diamonds are the idea of forbidden passion or allowed wealth with interference, that is sometimes by some means expensive by the love of what you do with it or playing ruin like with water. In particular, diamonds indicate wealth and materialism coming if feeling positive or they are positive..

Jokers are anything goes an with chance, this is by any happenstance where sometimes you can set the idea that is created by magic or prayer. So I think in particular its a chance of something to see fruition, or just thinking to be at odds or benefit for things if feeling positive or they are positive.

Use the above association as the point is in the above type idea for this effect. Above seen is not the chain spells. Its like to use the death as a killing to succeed. No actual death. The passion is not forbidden. Its passion that is forbidden, if nothing good is gained from it. So we see that the card numbers have an importance and this is a bit of info being added to the reading. The card number meaning is added below. Like the opposites to occur of death for the spades card is to the side, this is to get it by being to the side. In it, 'I' is condolated as to what 'I' want. The card meanings are likely obscure but its in the face to be forgiven of face.

Think as you can to do none of the bad but some of the good with other good inspiration. So I would use the intuition and add to the meaning, so I can think for a moment or change it as is to suit your need where need is desire like in money but passion ruled by diamonds. Just remember, if you do a reading and as you touch the card you can get a glimpse or thought of the idea it represents. This is where you are reading by psychic idea the card itself, so that means you see images of what may come revealed by the spirit or the energy of the card. Seem to have a detached sense of self, this is just as though its not personal to yourself when you read them for others. This ensures a good reading, this is if you keep a positive bearing of life or wealth as they say.

An example Sporadic Chaos reading would be with the 5 of spades on its side and death follows after, along with the Ace of Hearts for the self-justification of belief. The King of Diamonds, the 8 of clubs and the 5 of diamonds. This would go as thus, stating in some way "The 5 of spades on its side is with some painful moment with death that follows after where there is fear of failure. The Ace of Hearts means there's inspiration, new beginnings by determination with idea and creativity with a warming feel by desire. The king of diamonds makes trial and conclusion by the idea of allowed wealth. The 8 of clubs means lateness and humility of success with capable strength by desire or whimsy. Finally, the 5 of diamonds are a balance of spiritual and material worlds to find truth with challenge, change, new thinking and opportunities by the idea of passion or allowed wealth."

Think to tell what it is for these numbers to mean and for each particular divination, this has meanings set by as of the heart, spade, diamond and etc with the meanings of the numbers added on., take a deep breathe and imagine touching the tapestry of whomever the numbers were developed around. Let your inner intuition guide you as you relax your mind, and use # 0 - 14. The Ace is 1 or high and in the end when the feeling is high its 14 and the king is 13, Queen is for a 12 where 11 is Jack, but 10 to 1 is 10 to 1. The Joker is 0. You can sometimes combine the meaning, of the 1 and 14 numbers for a reading. This is when you feel like it. So use your intuition in your interpreted meanings. That is all you need to do with this.

Also with negative thinking or feel, loss, emotional ups and downs resolved by feel.

10 = Positively this is doul, ti, success, ten, balance, belief, order, A (hexadecimal). Also with negative thinking or feel, negative reaction, thoughtlessness, impertenance, mischance.

11 = Positively this is doulen, onz, enen, combination, combine, erstwhile, earnest, earned destiny. Also with negative thinking or feel, chaos, eleven, misunderstood, national fate, B (hex) or being noticed.

12 = Positively this is douduou, tulv, noon, harsheix, tuio (too) harsh lessons, amplification, twelve, explore, degradive point, C (hex). Also with negative thinking or feel, falsity or bad relationship.

13 = Positively this is doudarco, triz, thirteen, teenage, trial, conclusion, D (hex). Also with negative thinking or feel, (too) much focus and bad idea.

14 = Positively this is douthein, quidiz, fourteen, share, metal, baker, coincidence. Also with negative thinking or feel, defense, defensive, magic, E (hex) or energy aka energetic from the things that are done.

There are five types of readings so far by the feel, seeing this you would like some insight for the new week? Take a few deep breaths in use, focus on your question and select 1 card. Then the ideal is revealed by the creator for the meaning as insight with rules set by the question or chaos; the single moment style, the 3 card draw, the full celtic cross reading, the chaotic reading and the sporadic reading. This is how things work by card, to ask a question of the moment sets the idea to get a prophecy of what you think to know or realize. Just realize the idea and then go with the moment. So remember this, always flip over a card on its side. Then, you are assured a fair reading.

See whatever you desire is sometimes expressed and then trying a single card reading or a full reading by feel, seen to be the way of this then time is there. There is no user reasoning to this so think to work by instinct guided by insight. After you do a reading to a point, you can use clarification cards that can come from the top, middle or bottom part of the deck. This card is read with both positive and negative meanings for further understanding, such as: this is so and also possible is this.

Single moment card reading; The single card style is focus and relax your mind and think of the purpose to focus your mind on the desire to be known about, by the question, and then the picking of a card from then on the top or bottom of the shuffled deck as that is your choice. Shuffle it as many times as be needed. Determine the meaning of the card as suits you best to show an upcoming moment. However you read it with the positive and negative card meanings you think is suitable for the moment like a clarification card.

The three card spread; there are many ways to do this but you can think a question and shuffle the the deck as many times as you want. Then take a card from the top and place it on the table surface. This is the center card and represents either yes if upward/no if downward, otherwise it could be used as the guardian angel or the moment you asked about. The other two cards represent guidance cards, that means they reflect on the moment by relation with some point and what you know. So then draw another card and place it a little upward and to the left. This card represents the conscious idea or the mind and possibly represents the female side of the person. The last card is placed on the right side of the center card and at a point that's also a little upwards in position, this card represents the subconscious mind and subconscious idea. This card also may represent the man side of the person. Altogether, from left to right is this alternative spread. Placed from left to right is the past, the present, and the future.

The celtic cross; The full reading starts with a thought on or spoken question to focus the mind on the moment to be known about and then do the outlay after shuffling the cards as many times as desired. So the outline to follow for the reading is From the bottom of the deck and its placed at the top point as to mean the endpoint. The next card is from the top of the deck as its placed under, and it is the Beginning. The next card laid flat and to the left side is the opposite one for the opposite fate and doom that could occur. The card laid under it is the given moment that rules the fate. The next card is to the right side is as the past and then the next above it is present future that is used to rise above the past, where the next to the side is the future moment that rules the present future. This is in use the celtic cross and of the card deck.

Chaotic divination; When you do this, keep in mind that you allow chaos to be your fate. Basically, the premise is this. You take a card and chaotically toss it to a table or ground as you hold the card with its edge facing up somewhere and then if its facing you facecard up, you read it for its meaning. If it lands sideways flat to you, then it is the negative version of the card, in meaning. If somewhat up and down to you, then it is the positive meaning. Do this as many times as you want, till your satisfied. You may use tarot cards or playing cards. Generally do three cards at first and then make it a set meaning you ask of the cards, for the idea you would want to know about. You also may start the reading with a 'Chaos, lead my way'.

Sporadic divination; This is the card reading of a true chaotic pattern. The premise is the same as the chaotic divination reading, except it is take 5 cards and turn the stack of those 5 up facing yourself. Then toss them to a surface in one smooth motion as you hold them with the edge facing up for larger cards. Read them as you feel the order is necessary of that which you want and the cards being upright are read and the cards being facedown are unknown fates. Again, the sideways 'flat' facing cards are negative meanings and the somewhat upright cards are positive. Start this process with a stated 'May chaos reveal the way.' And then ask a question you would want to know or follow your instincts and let chaotic method point the way. You may recast the cards over again, as long as you place them at end of the deck. Then reshuffle after your done.

Use of the twelve step program is like how to explain the game or card better. Think your point and you know your purpose with what you you can do. This is important but only seven are ever looked at as we do well for an introduction. Thinking a good point to say is to make better feel if you think to relax those that listen and otherwise relax yourself. The point then is mute as you think to work with those that work with you, make them feel good and they will relate to you better. So think and you know the point you need to know revealed by the spirit.

This is like we use Hope to create the effort in which its acceptable to be near and speak to you. This is with personal responsibility to show up and do the necessary to look and be good. By use, now that is of self education to give or get good responsibility and some answers. Use self-advocacy to settle situations and self promote things that are self-responsible to your idea in moments in time. Then you may use what you when you need to use it if permissable. This is with use of support as difficult as it may be, is to find positive feedback or gain to self-gain the benefet of the doubt. With medication of the type needed for recovery of bad situations / an of bad situations is of set backs and considered. Health care is just eating and sipping the right things in summary. If unreal then don't do it. As 'If etween then oeleen en or es not in the initiative.'

The numbers and their repetitions

T nume-n-Th rouyee

What 11's happened for ya?

They mean a destined change by chance. When they start up, they come slowly at first and in full storm and as they fade away after a period of a week or more the change they signal occurs.

When the numbers effects?

When ya see the sign of the numbers that are these numbers that ya notice a pattern of in idea or repetition, and it actually points to an activity thats going on or that ya were thinking of at the time, as the number meaning is an action that represents itself and will sometimes happen on the moment ya think of the action. Some number effects are slow to come but great in their effect. Sometimes, if the number doesn't happen now or later, then it happened in the past as though it were mentioned as an effect in the future but occurred beforehand.

The other numbers including the 11's?

The other numbers are sometimes put together numbers that have combined meanings. The numbers put together are close together in numbering, such as 13's and 12's for 25's in meaning. Sometimes they are multiples of the lesser number. As in triple the effects, as per say 3 times or double the effects as per say 2 times in recount. There are numbers where ya make the meaning, from putting the numbers in the number together in meaning. So there is always at least two meanings in the numbers above 19. There an now is not a moment to seem or not as if to achieve chi, as you are aware your aware and concur with a thought or not if you think as a concept to not always make what you consider.

So, the numbers are combined by being put together as well as being added together for meaning. Also, for an alternative meaning, just add them together and use the combined number. As of the number 113, is  $1+1+3=5$ , so ya'd look up the number 5 meaning as well as using the meanings for two 1's and a 3 as double the effect of 1 and tack on the 3 for a meaning. As in, 113 may mean for elemental magic or actions to be done, to double the moment of decision for gathering together for the doing of some moment an things.

The numbers are..

0's stand for zeroing in, something going off or going to nothing, it actually points to an activity thats going on at the time or that ya were thinking of at that time, as an action that seems to zero out the moment ya thought of the action and saw the 0.

08's as for something that will ground or grind to a halt and stop.

1's for the moment of decision and something going on.

2's for the uniting idea that is in that occurs.

3's for gathering together to do some moment an things.

4's for a winning action by getting it together.

5's for elemental magic or actions to be done for things.

6's for an act of magic or a satanic action.

7's for an angelic effect.

8's for a stopping point.

9's for collective idea that happens.

10's for an idea that is occurring but is a moment only.

11's are for a destined moment of chance that changes things.

12's for change and idea stability where its in the moment.

13's mean magick will occur or the idea of a magical event.

14's for stable moments, ask or not momenting.

15's for the sterile idea in a moment or strength of person.

16's for the active idea that represents a moment.

17's for the mischance that occurs.

18's are for the mischievous idea and action in a moment.

19's for the idea that is for an action that is thought on.

21's for the idea enactment that will occur and on what ya think on to not occur, or its an idea that is re-occurring in a destined moment.

23's for the idea refreshment that occurs when gathering together to do some moment that is in, or to be in a destined moment, for chaos, change and idea stability.

25's for quarter the effect of the moment, while change happens with magick in the moment, or for an uniting in idea and elemental magic.

27's is for the possible reenaction or reenactment, to mean magick will occur in a magical event for a stable moment.

29's are for ineffective idea by effect of reasoning in the idea and effective sometimes by boredom, for stable moments in the strength of a person an in by the sterile idea.

108's = exchange

109's = encouragement

111's is detriment as you are destined to do things as thought and they are commenced into action, sometimes as you think on it.

113's are for efficient use, for elemental magic or actions to be done, to double the moment of decision for gathering together for the doing of some moment an things are just in efficient use.

Elemental section

Ele Secte

These are elements or non active cellular patterns that exist in Atlantis, only because they can be formed from energy. Their materialization skills are very great and anything described, as if they can create. Think smart or see to create as you think necessary or sight see to use your subconscious, if to use a point you can control the point sometimes by focus and feel to project. Thought so don't care to try as this isn't possible as you think feel is mentionable, supernatural and see that is unusual by use is wishes. The area you were you see to think so think or see what lives to exist there to see what your energy manipulations correct by use to create.

Earth Water Fire Air, Space. These five elements operate with each other & transform to another element. Two stones which are earth element, when create friction ignite fire. Water put on this fire will transform seen with use to air. There is a sound or shape for each element in nature by you or by your feel. Na is Earth, Ma is Water, Shi is Fire, Va is Air, Ya is Sky or spacetime. Alternatively in chinese, feng is wind or air, shui is water, yan is fire, de is earth and kongjian is space.

Then all of them work or not seem to have put this, seen otherwise is theory to see up or down to you by wish. That is what allows ability by energy or blood feel with feeling use, so if were use your use is creative or felt use in life. That is seen use or focus energy to cure or not kill yourself by use, as now you see what your ability is to others. See to focus is cause or create by feel, if your in need the creator can cause what you see needed. I give you a chance by feel your use is felt or not created unless necessary. This is by the aura for some focus or manifest. This my last comment. The use to tell is the use to do, so if you don't feel like you can't do anything with. Say this then or think you can by ordeal or don't try or do something else.

So to figure what works with you, see if night or energy is from you to the earth energy so your thin. See an ignore is what you don't think is useful. So say what you want or see to create, what you feel or not bother by telling or the thought. Oh yea this is derivative to chance, by some accord so all instructions given are not intended for actual use. So unless you want to live, the area feel is use as though improving for effects that you believe in the occurrence of some area by forrest grove in or non happenstance.

This site is for you as I think to use or not include, the third eye is a manifest. The were are use or creator idea, see the area or idea to their use is focusing thought to create. Although al exist by sun light energy you see to realize, as they can eat their mate as they are dead non animated is alive by the created or our creator. The atleantians see the creatures as good so the use was the area or feel, then they saw that the area was strange for them so you see the humans to use energy or creator. See this or feel focus is boosting the area or the brain fund, by genom or nerve tissue

energy from the base with the use. See the brain stem was the thing to write yet not create with as you are aware or certain to feel by theory it's there. Thought to recollection, was the area you see or use so most were. See your minded yet not to the focus the beast has.

So you see the area competence is focus area use by water is use or tree sap turned by bright area non torture radiation use to some lost forest tree focus broken in mid stride to that you see is the use of what you see in films so no more of that is necessary to create as a source the fire to create or the true source of fire is you so the fire is returning to the source. Seen is the area use I saw yet nothing unusual am I right? Look to the area the person shows or says is dead captin body the area you see is rotted, so you might think to see the area as a retreat for burned out rotting corpses instead of the area of telepath area for myth by legendary area beasts forming by forest.

See is use by feel or say or see use or love if possible as you see he lives if he wants to yet, that is movement to the describer not always created to your sense hidden by psychopaths or reasoning to use. See the living live the dead are more likely root therapy or rotting from the inside so decadent were the dark days of lumae the use is the focus the tragedy none know their insane if they do realize what sanity is. So this is what you see this what you not see this is what you feel, this is what you show yet this feel by your usual feeling use. So the real reason? This is courage or not use to see, some reason by what is there is therapy sessions to others yet not to yourself.

So if theory is the use as after they did deeds that shifted the shape to the genetics they were thinking to see as the forebrain use is focus or stopped as the aft part with the brain usually interacts yet you see the scene they show is use to show what is felt or not much was showing up. So the more they create or ate less of, the area you are your more normal or concept is thought to create use fee or feel. This saw the use to focus as the use with dna material is mating use to animal use matings. So the more done the documental creators see use to create fee with the spirit allowing from the death, if accidental or use free to create seeing a doctor or brilliant you are the more form. Stop indigenous or face as you are the doppleganger. See they were to what the area seems as sometimes with spirit.

What you see though is of sight clearing of the dust, allot of dust that is there yet if thought to notice the dust your seeing. See or think to react or not to so react I would use by thought, by swiping with some feel to see use or see seeing the strangers energy as aura sight so end someone could be there. Whatever is there you don't cloud my mind nor fog my body. See to summon or create with what by feel, you have to seem normal or no attack. So I am going for a bit, so you see or think to not use worse idea by normal thought the area thinking is the creator or thought. As if I am here I never agreed to drop head.

So the creative commander hell 11th level that is use by activity made by actors to create, you think or focus religious or creative productivity, seen as use nothing is done creative mental hell you create the idea. See then things create anew or use is focus a old is old or new is new. So hell is hell that can see or seem to replicate anything un ea ean em is mention use, so our creation is your understanding. This is the last of my posts from aboard this ship, this atlantis is false to your perception because that is how we hid things from sight. So you see what is sometimes unseen yet we are seen if you think you want to see some idea, as you see almost just alike so I will be seeing or typing things from mainland or america. This is what you think that is motion or what you create in use of your idea that is usage where you notice things done to your feeling. See or seen is the area you sense by what you see to the area, sight or feel by the area perception or stop thinking perception think to us map to create.

See to feel or create by feel. There is no more to do so enjoy what you get by focus. Because this is no more you don't use imagination to create the credit. There is some use to create the area focus by speaking, as or use nothing more is concept here. So the place you see is what you have think to clean by magic is to focus elemental energy to clear the area o clean some space, so thought is clean or you can clean by energy or feel is not always by focus. As you see with the creator, this is hidden behind the illusion so think to clean by focus "en area" clean. The area you see is observance by fact, think solar clean as you see is noticeable to use or sight clean.

What you see though is of sight clearing of the dust, allot of dust that is there yet if thought to notice the dust your seeing. See or think to react or not to react I would use thought, by swiping with some feel to see use or see the strangers energy as aura sight so end someone could be there. The area is red area dust of a early egyptian grave of muhad the first. See the area is useful so your in use or the use by useful area feel. The dust is what caused lung death

to the feel so use is there by area to use nitrogen to preserve or oxygen to return, see you were you never seem to leave unless you want to by thought to remove is clear. See by the feel you sense yet you can easily trace the area this came from.

The student that wrote this was right this was too strange to believe, yet I saw as he did thinning changes to a female then to some form to use. So the body is by the feel or focus is the feeling that you see to create body released body shaping. This you see as nothing so the first time is a fail the other times after are normal use to shift by the feel normal, think to use to unlock the cells your ability is use with water to create with. Seem as though normal like me so this is nothing, the area by what atleantian form by will or shape is soul that forms the body by use. The area you see is the area not by feel or no honourable dead to use.

This is the last thing he spoke about before the mortal shell shocked or seeing was dead in his seat, so thought shocked by human molded form to heal after or see to mistaken shape or use was fee to create with by the focus. This way is the area you see or avoid is use to create is foul use to the focus point you miss. This was my last command to the forest animals before I got eaten by them, this is a possible use so I was where I thought to seem. So you say yet on trying to get back, I was allowed till a certain moment by the creator or thought led to here to use untwisted in all things. I remember my body energy or activity was seeing the point.

I got there so I think this was the area that this was said, that area as I was hearing was "destroy as necessary yet not as they are as alert or friendly then destroy the dead as if eaten to them so destroy as mercy because they could not go" so I got so bad my actual body was unable to live thus I fondly looked at the area that I sense to see to use then turn or walk away. So this is as I were in americum. See as me or see as you so you see I was allowing my fried egg friend use of the computer, this is so my energy in creates out focus. See as common rule this is used as the affirmation to the subconscious to create things. I thought help and then I was supporting my body where it was use in theory.

I believe I was thrown away like I was a wasted wrapper just now, is are I so I would stop as that was militaristic. So the idea is fee are likely to use life force to see as they dance they cause or consume the flesh except to consume the body if dead. So if you see this you know I am unable to sustain my black self formed by night. See this is research I did to no flesh use except to learn what I see to create. So as they dance they use energy the festivity is if they use more water that is blood energy so they use no energy, as they create so decency I saw was the sightful moment you see so I think this my end point that I was not wanting to use.

See now or see later I am going home to non cursed area so I shall dissipate away to dust as no this isn't a waste yet know this body isn't going to last long now even though I see that I was aware I was still degrading see the use before the way you use it so you release people from the area or use is focus life is spades morning is glory created by hearts lovers are blessed by the area you use no clubs to create what a jack sees use from is nothing is what you are seeing if nothing is fading away to light. So nothing is fading as eternity ends I see my life as I am nothing more than a body that is with fading light that undeath is going away from so I am ending my life now due to circumstances or mistakes done. Ciao to your use farewell is over I now fade away. This is my listing of element that I use so I see this may seem useful to readers or not to bother with as mistakes are obvious life is gone your undead no more, aeriom.

Au = aurium, = equal gold, male element

Aruu = Aururum is funny think focus is equate, Aururium, metallic substance infused with magic to be self repairing and can fuse back together with energy.

Ag = silver, female element, aging element

Al = aluminum, concealing element

Ar = argon, gaseous poison

As = arsenic, poison substance

At = astatine, as statement of line element

B = Boron, killing element powder

Ba = barium, baring element

Be = beryllium, treasure element

Bi = bismuth, destroying element

Bh = bohrium, causes boredom when magically charged

Br = bromine, breaking element  
 C = carbon, bonding element  
 Ca = Calcium, body element  
 Ce = cerium, caustic element  
 Co = cobalt, element of balance  
 Cu = copper, coping element  
 Cd = cadmium, element of energy  
 Cl = cleaning element, chlorine  
 Cn = copernicium, constitution element  
 Cr = Chromium, coping element  
 Cs = Caesarium, ceasing element  
 Db = dubnium, copying element, dubious  
 Dn = light stone, dendritium  
 Ds = darmstadtium, condemning effect  
 F = fluorine, anti-decaying or crippling element poison  
 Fe = female element, iron  
 Fl = flervonium, flerovium, flavor element  
 Fr = Francium, sharing element  
 Ga = gallium, gall element  
 Ge = germanium, germ cleaning element  
 Gr = geranium, greater manifest element, gaium, transfusion metal, transphase metal, radioactive metal, transphase material, made up of 2 parts Uranium(238) + 1 part Nickel Iron (Iron Fe with Nickel Ni = FeNi) + 1 part Strontium (Sr) = U2NiSr yet this can be replaced by 2 parts Germanium(Ge) powder + Sodium(Na) = NaGe2 in acid form, another alternative NaFolaGe2Sr = Sodium + folic acid (folate, fola or vit-m) + Strontium + Germanium is focusing. Seeing as you leave the area as changes are there to the material, see the light change the material to create the effect you want the light changes as you think shift using the changes to create funds or focus to create discipline or your invincible. Don't be near it when its active, as you see by thought so to remain at a distance as if unia that gets sometimes nothing by this with gallium hydride is part of will turning as lead into gold. Since you think that I am sure you will know me from this time not real life as Michael Asseus Isses Moerbol. So dust the area not me, as you see dust less is thought more productive with more area activity. This is enzymic by feel as this is restoration to use. Silver motion particle with purple energy to create or feel better as you imagination your form. This is there to use as a focus is "in enz".

If no chasing the drem that gold essence reserve release creates or thinking changes think no problem. Think no trap with the will as to summon cinnabar thought to exist by Argon, by want or use is foci to the use think what is existed and you exist what you thing. Focus is to think the idea exists, think or thought is touch the item. See or then feel then imagine the item forming as you think light forms from the particles. Thinking in use is light focus creation in some area where a point by light energy exists, this comes back as the creator creates credit within the area you thought or you see. See time to rest or relax by feel. So create is not to fight unlesson necessary. See or away with the area to feel. Think to notice the scales then state "whatever weight is lost to object shape or move you lose excess or still you lose excess." Then call the authorities so you get them arrested. So a ringwraith causes them to be out of time erased out of space. So mnenoc is use your pattern by idea or think sane by use to create as you see life, feel aware.

Sight by the area is use to the thought, don't think the use to not do the area feel. So you see what you use think to observe yourself. Then think to create something without a dirty mind as to not think the drug terms then write you are cured, not in any or addicted to something or thought to use is nothing more if you can't. The night energy is sun energy as a sun is the planet core with the cause with heat interchanges to some source heat area burning, see something there by mention an work or wild wind changes by thought are by extract perhaps in known conceptual. So this is steling or stealing yet this use is energy, think by feeling is heat aid the rate of change to help as this is what this seems. So get away to seem somewhere else. Then think the idea to you no more if the idea is illegal. Sight or use is some use in the area you feel. So have fun by fee arrangement I mean feearing as they had it then not now.

Now you see the idea to use things or you won't create if the point doesn't exist by thought. Now think to create the idea from light energy from the memory that is feeling from the consciousness, as patterns unless this didn't exist

successfully in the first place. As nearby influence is generally what could get you sick, seen if the radiation is light infusive carrier waves as not here if you think exist or unexists by feel. This uses light focus as energy from light, thinking to bend the light is focus to create as manifest you feel or use the idea. See as you create as thought with uses, so you are using foci converges to create what you think so you create as you will. Think to create so you are by focus where you are so just don't do as described. Something comes as to represent the point. So you see the area arrest warrant then release, so you smarts not or with no guns or not you know why you were shifted to to some other area. Enjoy.

See the area to use is the area to evade, as money is theory if he or she does the idea or gold melted is purified. Seeing so the area is alchemy energy infusion I think not to be there or not for yourself thank you, see or other influenced as the change to metal is influences to the body yet not actually nearby is influences to the area not the body. The trap is this if your ability is drawing awareness this is energy, if you think to create with funds as you are aware or useful. Seeing the use not the purpose is pointless or no use, you can create energy that manifests yet you feel hungrier after as you see light changes are focus or say nothing happens.

Think suppress to not seem to effect to get effects or seeing if things work. So don't steal if I don't steal from the area. So don't think the effort to create the area. See the area point by feel so or think not so you get away from things, this is not to the point so no more till you recover if you are overwhelmed by radiation. Sleep the rads off then use a cold shower to see or create by feel. See to those that Os as then you feel use or otherwise is the use as the music stops. See the area you think or point is not to kick the ass of the roommate. See to create or better feel is some feeling to create something else to do better by idea or creative is seen not always to create. If you are aware or feel better, stop by use is create by focus create by formation you are what you see. The word serendes is surrender to the area feel to serennes as serenity or seeing so feel not use what is felt.

As you see if ineptivity don't use ineptivity as normal, used abuses in cases by use in front of the police by meaning. See the difference is the feel you see or area energy amount, thank you for nothing you see this uses things not to uses. See an area so you are aware is not to create dispensation, think to flip the switch so you create some area feel. This is uses so don't step the thought away back through here try some other area. Seeing in addiction mode is using a pie or use think something else. If you overuse or abuse this use anymore you will find yourself somewhere else to the overuse not to be done nasty so you see your free, by means yet not menacing to the point your use is obvious. There is no overpopulation. As you see the inf reasoning you can create nearly anything or do what you want. This is seeing so feel is not monstrous. As you were or are whomever you describe. So this don't matter.

As forming the form from air twining energy to form combining light strands together to create something called light twinning. So to think this unforms the body, this unformulates by thought so think is thinking light unbounds as unweaving the effect. See as you are "see as this is think with darkness unforms to the darkness or night feel by nature." Your thing is light energy formed as you think. As shaping things is fun, think not to create unless necessary in use. Think as you are so you correct for focus as you think, so you are experiencing or then can use the terms you feel to use so this is corrective. This was found there uttered by some dead thing, so it cannot extend to here as you say this is a separate issue between me and the government. So you see the point is were free so nothing is due until you think so. Think on this before you are aware, on or off to use with drugs or you do this again.

Volcanic heat is rapid energy each infini use, create to their own idea as though wild expansion not unless calm in motion by thought un with calm mention. Use is life and motion is energetic use or not a life is in motion by skillful movement. As to think real is reality and made in real thought is a point vie transaction, cool energy in life is nothing but in here is something you drink in life as water and charged water creates renewed energy as regeneration this came from the point that "inin is release". Look to know is to listen as you feel or remember what you are doing. This with light is infini so the light changes are life with area feel by planet core that is the sun with golden energy feeling. Think as you are as the area is imagination by feel. As you are what you see you are, seem lose or seem to lose or not as denying if thought a villain as you are seen unless you aren't seen.

H = heat, hydrogen

He = helium, lightning element

Hf = hafnium, half effect

Hg = mercury, temperature element

Hs = Hassium, harassment element  
I = iodine, healing element  
In = indium, endurance element  
Ir = iridium, irritation element  
K = killing element, potassium  
Kr = krypton, wreaking element  
La = lanthanum, disruptive element  
Li = lithium, energy element  
Lu = lutetium, luring element  
Lr = lawrencium, law influence element  
Lv = livermorium, energized it can make you repulsed  
Mo = molybdenum, cause element  
Mc = moscovium, time and shift element with energy that seems to create with life energy  
Mn = mind element, manganese  
Mg = magnesium, activity element  
Mt = meitnerium, mountain element  
N = nitrogen, freezing element  
Ne = neon, glowing element with energy  
Na = natural, sodium  
Ni = nickel, deadening element  
Nb = niobium, nobody feel  
Nh = nihonium, think and be well element that causes flares if too much energy passes through the area.  
O = oxygen, living element  
Og = oganesson, the ogmented element that you can use as a reactive fuel.. this is sometimes used to create a point of heat and energy spikes with use by feel.  
Os = osmium, recreating element  
P = phosphorus, memory and electrical element, piezine, piezoelectric element  
Pb = lead, dumbing element  
Pd = palladium, appalling element  
Po = polonium, sickness element  
Pt = platinum, money element  
Ra = radium, raw energy radiation  
Re = rhenium, remaking element  
Ru = running element, ruthenium  
Rb = rubidium, rubbing raw element  
Rf = regeneration element, rutherfordium  
Rh = rhodium, erosion  
Rn = radon, radiative element in low doses it heals and high doses it kills  
Rg = roentgenium, growing element  
S = stinking fire element, sulfur  
Se = selenium, selective element  
Si = silicon, a green element  
Sb = antimony, negative element  
Sc = scandium, helps spanning skill  
Sg = seaborgium, borg sight element  
Shert = Sharing time element, time that is of a shared element by effect of one.  
Sn = sending element, tin  
Sr = Strontium, strength element  
Ta = tantalum, tantalum  
Te = tellurium, convincing element  
Ti = titanium, light weight strong element  
Tc = technetium, the element of energy  
Tl = thallium, telling element  
Ts = tennessine, think and work element that you think and the element reacts to your mind.. this is by your

brainwaves making it do things.

U = uranium, heat radiation element with a common form of Uranium 238

Uu = Ununmorium, steeling agent, theft in motion of energy to live with (as an alternative meaning)

Uuo = ununoctium, flaring element, living element

Uus = uradium, weakening (cryptonite) irradiance mined from asteroids and mars as a cloud of gas.

Uut = spiking element, uredium, ununtrium is just there

Uup = mistake element, ununpentium, visual element

Udtriba = Uranium 238 (U) + 3p Silver Deuterium (D3) + 2 Barium (Ba)

for a everlasting fuel ball instigated by charles, UD3(AgBa2), urandeuttribarium

Uradiom = one part radon + three parts uradium and one part sodium for a magnetic irradiant condensing field, can cure disease but at high temperatures it can be radiative.

Urydiom = power plant material from nucleonic cold fusion considered like baronite, hard black barely radioactive metal that allows for high yield magnets, leadless lead allowing no particles to pass through and considered a safe lead with high heat

Urediom = hard metal formed from cadmium + carbon steel for the prospect of irradiant energy absorbant unbreakable metal

Un = Uredium is irradiative fuel element mined from asteroids, three parts barium and 1 part nitrus oxide and 3 parts sodium, this looks like darkish water and acts like oil clumped together, as gas replacement.

Uridiom = weakening irradiant metal that makes from nickel + adamantium + uranium also as hard as steel yet can cause diseases

Uridium = mutation element made by three parts radon and 1/3 part uranium

Urodiom = irradiative erosion element mined from mars, asteroid or erosive radiative high carbon steel thats made from cadmium + nickel + plutonium + carbon mixed at high temperature.

Urudium = restoration effect, restorative element mined from the moon as moon rock or made from one part crushed radon + 3 parts water, If too much, degeneration occurs.

Urydiom = polymorphic metal mined from mars, venusian metal that is polymorphin and polymorphic with heat

Vei = Divinorin, Divinorium as you said is use isn't always use or feel, not trap the element this is you with the visual skill use to work the mind or use skill to travel with no attack as you don't release by feel. That is enjoy what you love, love what you hate or avoid what you hate. You know there wise love what you work with or avoid en in no more what you hate.

V = vanadium, invasive element

Va = air

Ve = Beriltiom, silver yttrium berillium time influx by thought metal or created energy is feel thought to bring your self to another place or time. Stop bringing me back to life so I can end peacefully.

W = tungsten, steeling element

Xe = xenon, deadly gas that is boosting endorphins to high level if exposed enough. See the area you see is normal then focus is secretive yet normal or weight reducing if alo is there that's all as thought. Yet if you see the area focus to not see as you walk around by unusual intuition. Then you cause normal behavior to the use or not as neutralized neat use or ceao.

Y = yttrium, time element that makes time go backward with no negative energy and forward with positive energy.

Ya = sky or space

yen = ylaentrium, Charging element, an element that can recharge in moonlight.

yenesen = recharge element by any energy thats nearby

Zn = zinc, element of building up endorphins to create by the aware area feel to use yet denied is feel so body goes to normal you think suppression.

Zr = zirconium, perversive or persuasice element thats turmeric, oxygen turning water to ice with night created nitrogen, the memory is there as you think so that is not by pensive concept to use thought by not using the feel until proven.

Zm = zircomio the deadliest english made skeleton element seen that is that and this is allot brighter, seeing this making me sad so this is more than the soul burning bright considered burning soul, see monster is gone so bright elemental use is no longer needed. Forming from what I see I knew you would come to this point or area, say or create or use is this so this point is mute. See as this is a poem atleantian made, I realize the purpose that fits the area I see. See no death is no life at all nothing to use against me, as I was the aware person I rest as I wish or as I am now dead.

So don't try to not do right as not piss or shit so by no is except is to use the area not in necessary allowed places or place to use as you believe you can. No running into people as or thought you feel to wait if someone not there or there to avoid. See to do as you want as if you are aware, as derives off the past experience as this overrides as necessary if ruling. Yet no rules are beyond the mirror that you think aren't there.

So I your area I saw fits you or see not assault to not assault whomever. I hold or use the energy not to give tht would decay the area as the land is dissolving away or focus is not there as my anger is not there this is gone. Gone by feel I am calm. Hidden in temptation is a cure so I am sure to take the cure to create or quiet the brain so no spasms occur as experiences I saw are creative this is nothing more than the near exit to see my life as thought is life, saved by leyline longitude the thought sht is easy yet your dead if you try it so think the creator shifts you or dream to use the thought to see ori shift as I am no living form is said to the area is death to take me with life.

See to think to touch by death is to effect the feel of dying as the person is effected as you think to effect, as you see this is with the area or no aura effected inflicted to not inflict except as you decide to not see earth death. The undying death effect is use thought or if focus to use thought then reach out to effect. The undying machine is energy to use thought or though you feel don't expose or the machine quits, as you are of something or use your ability is crippling or not use. See as your effect burst energy or energy focus through focus points for a mega burst.

See as in experiences sent to the solar energy are figuring by art. I am now done or use is depending by what you create. Said is hi so the flow is non condemnings as this really is you really are or out so nothing is wrong. See or create as you want so you do or do not. See there is a reason for the ring, see to cast or cancel damnation as you focus light energy. So I don't have to come back you create, see or use thought so your effect is energy just focus then energy creates. As in use is enough "whatever element you choose" don't need to condemn, see I go away because you can't find some other area or space to create with assume is no use so I give up.

If you don't just the justice you don't break so you aren't effected by death unless you want to see or seem. See as you were or you are elf so no changes are possible if to survive longer than usual or not. They are the archenemies from across the screen however they aren't archenemies. Think to avoid then they avoid you because, there are usually some reasons you see they think to use. See you avoid them so do I for the things you see excerpt, so I forgot about that god being so cold yet use is allowing. So for the area to create you see or the area is manifest so no area no desire is use no use by fee. See is use or creation by feel, so I will walk on so I don't need to do anymore. You can forgive so use what you want. This is if you reach for the ley imagine this as a line so you are dead. This is seeing what I feel en to you see so your use here is what you think.

See this use is the way as this was this is in the way this is so this was the last thing said to me before I fell to the ground somewhere then shifted away. As this was supposed to be a 1/five-hundred millionth second without the th is still the summary or without the area thought its sun energy to undisinterested use is thought as the area you see is no extra story excerpt. This explains what you see as this is energy to the use or focus is energy to create as this in use by no movie. This is all I you create so you creative by use with focus was the energy I was the creator till not necessary. So this energy depends on you or how the area influence for as that's all I have time for.

The next lesson an is this is bid as you see the area en so think to blink to shift back to your existing, see the summons is the area or you will notice shocking energy or humans that use nothing except the sunlight. Thats right to see the area so the children of the sun they will you create or think, they will do or due to unmurder to create or focus as this is not as you see we speak english so this is as you speak the idea. Don't hold food or water till you think you can hold the substance as you walk your area the shift causes stomach disorder, if till recovering as if instant use was allowing or you bloat or not to create area focus to shift with by feel awarded to you if death or fate. Fate can also be what you wish to get, and upon wishing for something it's granted or done.

So you see or feel seeing en the area feel or flow your life out as away is cool by whatever they do to you won't effect, that means your blood is alive in your body as your awakened or use. See as your cool or see to become atleanis is the area you see as creator by use so you see thee use. Said so you know me stand to turn and walk toward me to talk with me. So you see your cool just walk then you are okay ciao to you as well. Ciao said is to the sun yet there are people, so this is use by feel you say your area is fine or cool as whatever you leave me alone.

The morning prayer was this. Good Morning one & all; My morning oh great mystery, this day is grand or cool to the feel as cool is where I am.

Creator of all we are! All we have! All we ever shall be!

I give to You my most humble gratitude.

I thank You for life and all that pertains to life about me.

I thank You for giving me this opportunity of life in this form so that I may walk among Your wonders with knowledge and given the option to be considerate and to care.

I give You gratitude for those untold billions of lives that graciously gave themselves over to maintain this life over these many years, humbling me by their unselfish sacrifice just to keep me walking here. So much so as to realize the sacredness of life, upon this earth I share. Doubly grateful with each day, just knowing You placed them there.

I ask Your forgiveness Oh Great MYSTERY for all the petty things I've done. Cursing, griping and groaning over pains and shames that's done, with so little consideration for all the wisdom won.

With gratitude for all that was given and all that may yet to come. I give myself unto Your keeping to let Your will be done. Humbly asking and beseeching to use this aged parchment to face Your drum. Stretch it to its limit until under Your slightest touch it gives its loudest strum. Your drum signals given to all about and all that's yet to come.

"Oh leader of the light with lord or area whatever to the point to be kind, I've failed so I am honest and have positive thoughts; to forgive those who harm us and treat everyone as a friend; to help those who are suffering and never to consider ourselves superior to anyone else: even if this advice seems rather simplistic, make the effort of seeing whether by following it you can find greater happiness."

~ The 14th Dalai Lama

The evening prayer was this, "Thanks to you that live to work to create to live or create or cast with care. I now am able to work to the west or area I think I've overexpended my time by feel. So I will stop to think then no longer stop to leave by the time you notice me." The ending sun rite by the point I remember. The day was all we could make or do things with. Really those that observe the ideal creator sightings, were observing us or those that were wanting to see or related to by theory are gods.

So a few other ending prayers are "Few among people are those who can cross to the further shore. The rest, the bulk of common people, only run up and down the near bank. But those who act according to the perfectly taught Dhamma will cross this realm of Death, so difficult to think or we transcend.

Dhammapada 85-86 -"

Let a wise man establish himself on the proper Path first, then he may instruct others. Such a wise man should not blemish himself. This is my life to live or think to create by feel is creating by the point that is to see. Meditation is bringing the mind home. Sogyal Rinpoche

Jersey Zen; "When your mind is narrow, I am as am I small things easily won't agitate you if you meditate. Make your mind an ocean." Lama Yeshe

That was all I could remember so I had others write the area idea. I came up or away with specifics. That is is it for the daily prayers or area effects that are prayers to see done for today. When you need them the most they are there if necessary. So you don't have need then to repeat.

Remember this device: Don't tear out your mind Yes or "no": no don't no longer use this if all demised. it takes a living person to upkeep the sites. the earth did not paralyze them. the creator did that day they seemed to shift away by the thought some had to escape. think to escape yourself. if alive you can use what is there. no is the simple answer the more advanced one is yes were all dead anyway due to a supervolcano going off. think before you do things though your right we are. I think this was because we were willing to accept the demise then move off the planet, so you did too you really can't die again till you accept the ideal that need to die with the first place or not. this is the place you were right to visit however you don't need to actually so think to the use by your feeling to win through.

So cya around think to use things wisely, don't let the bedbugs bite or try to ignore the frostbite. so you see to

remember usher is us. this rainstorm is ending as the cap is done to the storm to cause a rainstorm to not remain there as denoix denoix. think to create then you see what is there. so why not have a free storm damage product day or half price. since there's nothing there there is if there is something there there is. something there. I checked this means noone there on site too. so what to do? think to work with what is there. I think this is your end point so stop or go on as you wish otherwise you can go on home. thanks then yes I do that was interesting. you can go as you need to go as though dismissed with no puppy dog eyes. this is some area you want to watch with those you near beat. Think to work to avoid what is there. As this is raining you realize is there in a point. the point is placed.

a note for tomorrow

So you see the wrong or right time before you go somewhere or think indistinct or individual use. See the point to shifting is to get away before you are with the wrong or right times unless you think the time is right. This is for use or dollars with cents by feel or not to use. I think this interesting use with words. If you think this there you create with area feel. See to get used to things or use things less. As you approach you won't eat if no need or you think those by feel, think not to eat that were there so you already ate the idea you don't have a good reason or think to eat sometimes after a laugh.

so remember ablos en krisfee krispe uncalamity, krisnee ne kripee or kripne is the actual cleaning spell along with kripnee is what cancels things krip use by death style seeing ennei krisnai to create with casee as its there or never actually there by feel with ideal. the area is what you think as your doing things your able to achieve, this is done by now anything that didn't work can seem done by croix asnex or this is use as yourself to correct things made by Paul Moisant. I think this is necessity done or not, by the creator. So your safe by what you believe is there or not by feel.

Netter better; think to create the almost impossible by non krisne nea calaity. The release to croix as you think to release by feel. Ea nea nie is the spell to help with ability. Think the area to work by the feel as you cast the effect. This is very good for what you consider, where I think the need, so your not in denial by ideal with the use by fee. I think not to be any longer in the mind is use by now since you've done this all.

Discontentment is a cause they can use to work, if they dislike use for what they hear or use is mold by the mushroom. So if they are there or try to break to break through from area concern, stink or think they won't use mold against you as they find you doing the right reaction that stops them from creating what they sense. So to think things work out or in to them, think link end to not be effected or create a linked idea or effect. So seen-illusion-study stops or reveals this source idea "it is as it is then or now by feel is the use you do then work. don't always fight to work consummate with others if blocked then wait to work by the feel. true enough this is good as they are neat."

Think "no this is what appears as a point, yes to work or allow is use now knowledge is by the spirit knowing" that is no or neglect damage or repair. That is cool to prevent by no need to have area attack this I think by fee or the area damage or vibration, think to disrupt the area presence by sound waves or "stop the sniffer or stiffer. That means you are where you think with a stink or think en without the stink. No damage was done by the area seeming or did you know art is scenic? I think this is fine, so go ahead or not do what you want. no no denial overconsummate by feel. this was cornholio the dog thought with or without by feel. so ne eoginan or lessening. this is big bad bathrooming by psianthropy with means. so the artificial sunlight also goes around the planet. As you share the point as things are happening you are aware as alert." bread n breakfast

Deep meditation

I think to use bread anywhere allowed to by ideal that is bread, tho create with ideal. this uses meditation or with criminals meditated area murder. now here we are with some unprecedented presentation, your civilization is faced with an unprecedented opportunity to reverse history, moving en-masse from a fear-based society into one mind and with unity. a renaissance consciousness is being birthed. but you must understand the energetic obstacles to this renaissance that you are dealing with right now. on some point to heal by you have the group we call the manipulators on your planet who seek to trigger you into fear or dis-empowerment through the manipulation of the media and social institutions. this is old news, and we need not elaborate those of you who are reading this communication are aware that all it takes to achieve autonomy in your society is for you to think for yourselves and choose your own reality and

truth is the point.

Our message here is that there is a secondary factor at play or feel, which is that your emotional instability is sometimes triggered by the involuntary release of negative thought forms into your collective unconscious, as your planet expels all that is not of the Light from her body. This can be likened to a "healing crisis" where things get worse before they get better. The good news is that it is temporary, it is a glitch that will be over soon, but for right now you must learn to deal with the instability and take responsibility for your own well-being. The first step is to look after yourselves on a physical level, for this is an important and often over-looked part of the equation.

When your physical energy is low, compromised by addictions, too much time on the internet, not enough time in nature, exercise and rest, or the wrong foods, your auric shields become weak and you are susceptible to intrusions in your energy fields of negative thought forms and emotions which are not yours. We repeat: the negative thoughts and emotions which cloud your consciousness are sometimes NOT YOUR OWN. Just as human consciousness was once compromised by the dark Atlantean experiments, so are your people once again vulnerable to those fear-based thoughts forms. The difference is that this time it is not part of an evil plan to contaminate and compromise you; it is a side-effect of the healing process that Gaia is undergoing. And this time, you are aware enough to TUNE IN and assess whether a feeling or thought form belongs to you or not.

Let us assist in this process, dear ones. When your mood dips and you feel possessed by negative thoughts, stop what you are doing, close your eyes and tune in and then no knocking occurs if a warning sign was about to happen that was in the form of a knock. Ask your Higher Self: "Are these thoughts mine? Do they serve me and my highest purpose?" It may be that the answer is "Yes" because you are processing a situation which needs to come to clarity, in which case your Higher Self will assist you in bringing Light and heart into your thought processes so that you may come to peace without your ego-mind poisoning your consciousness.

However, if the answer is "no", then you are advised to go through the following process. Say out loud "I transmute all fear-based thoughts by feel". Visualise these thought forms flying out of your brain, your chakras and your aura and becoming flashes with the feeling which explode like stars or fireworks in the ethers.

Now affirm:

I am light and love embodied.

I serve the light by embodying loving kindness.

I choose to love myself unconditionally so that I am an instrument of light.

Speak your own words, that you don't get it is my soul from your heart. It matters only that your intention is clear and that you catch yourself before a negative spiral is initiated which progressively takes you down the rabbit hole into the darkness of despair. You are not victims \96 you are able to control your emotional fields through your crystal clear intentions to live joy-ful, heart-ful lives. You can always self-correct! In fact if you do not learn to self-correct and stabilize your emotions, you are missing the most important part of your evolution, which is to become masters of your emotions.

Know that we are with you throughout this time of instability. The many Star Beings, Ascended Masters and Angelic Light Beings who observe and assist through your transition are available to you 24 hours a day. Call to us for assistance when your energies are compromised and you feel despondent. Know that this is a TEMPORARY situation of instability and that your work to keep yourselves emotionally balanced is of the utmost importance.

When enough of you are awake, aware and able to stabilise your emotions, a quantum shift is initiated which shifts all of you past the influence of the 4th dimension into energetic integrity. Rather than waiting for the shift to happen for you by feel, practise being in this state of joy and integrity every minute of the day. look after yourselves as if you were your own beloved children, monitor your emotional state meticulously to know what you do. Learn to readjust your moods before they descend into darkness, set by your feel to catch or let go a shift away from the light in your mood quickly.

This is before the damage is done. You are in control of your own thoughts and emotions, see that is the point dear ones. When you allow yourselves to be triggered into negativity, over and over again, you become victims and are unable to serve yourselves, your human tribe or gaia. Each one of you who succeeds in staying positive and embodying this way of being for others to emulate shifts your world into the light. This creates namaste equile or relief by release. Think to work by feel is there to do.

Point; If the ideal works then you could see improvement. That is the point to sneaking things through or puppies, so you act it as you think allow when you talk to them, so that is the point they perceive. Otherwise ask as you speak. Thinking this thought I snuck something in to target, then not counted for things I snuck out the item after as thought the thing that was a dog. I think that proves it works them over, or think you could feel or act like you don't care. No smack attack happens.

Thinking pointing focus; I think the cool point to your thought is what exists. This thought with all others will disappear, so you see the point now is there or then so withheld information by ideal is there.

Focus points use; Think now is the real point, this then is related or fun.

Love love love  
solara an-ra, magic weaver for gaia

I went down to the tunnels and the area was as I remembered it, this was out of boredom and I wanted to see what it was like there again. So I think I went a little too far in describing, the state of mind that ruled the atleantians of their time with their people in tow. So out of boredom I did this by etherealness, that is described as a ghost state that could appear physically and you can do almost whatever you wanted. Thinking to do what you want, I entered this state and went down there and found out, that it was abandoned, except for spiders that could trick you or other things that all you had to do was think to manifest. That was all that is in the atleantian tunnels, unless there was more that I missed. ah well it doesn't matter.

Freed from hell at last, I can't believe how easy this was. I think I tricked a thief into doing the stealing to free my soul from the hellion being. I believe it was collecting objects that were part gifts or part ideal from the them point I thought then the area was reacted to as though this thought was useful. This I think is the point the creator shell creates differently. Amazing ideal I found somewhere. Yet I think you can seem to be assured that this is my ideal I think, then can create worth with by feeling the area. That was effected where then you create differently.

This I think is a mind world I created to eliminate my father, so I might use it to eliminate thieves and muderers. This is fun to use things my old way. However this was not intended to harm innocents, so I think the creator can control that part. That part I thought up for myself convinced it was for another. So that means I am done with this atleantian txt file. I am aware now I owe people so I will give their funds to them by having them earn it back themselves, this is with the funds back by the job or ideal use.

Astraea is a Goddess of culture, justice and bringing the gift of the arts to humanity. is with this groups description. Whilst these might seem a luxury clearly for a golden age to be in existence humanity needs to refocus on beauty rather than productivity. The teachings which have been coming through our little celestial group here in Britain are about the importance of creating or uncreating space to do things which have no purpose but joy, play and creativity.

Not unless necessary as you are this is no longer in exact, used by no intolerant ideal you see or that's nothing. Illusion is the body weight, that goes as the body digests down with the weight or food and with water. This is done as we think to work or seem to create by feel, this is the point with water drinking drinking or energy use by activity that's not always eating to use. So think to create things as you are aware the point is clear, or can seem creatable as you think to create by feel with use. This I know is the point there is by your feel with activity. This is there by what this is with feel. Think to create or do as you want to do.

Beware of the 'prophet' who has spent time in the wilderness of solitude, as I am the prophet from the nameless. If christ he's crazy then avoid.

The song & dance guys and gals who entertain the Christian flock with their wildly misplaced predictions, and warnings may not be the real deal.

A prophet is usually meek in spirit but spot on in their perceptions.

No showmanship ~ just integrity, humility and the Life Flow of speech that is your own ideal. Think to see some ideal for some is none with no sum if some is ideal. So I think this ends the war if any there. This is the end of the book of numbers, I think by feel my heart is feel.

En sight by focus ~ This is a point of view if then you view. I am thinking use is ash. So maybe by knowing I won't do it by now. I think there is no use now so think as you are aware. This is getting dangerous, so stop what your doing to get away with things awry to them. So you don't have to suffer their fate. Their way is no use now. So stop what your doing or agree to the point, so you can see the best by area use. That is my best advice so go away from the area, if you manage that so you aren't a target to their blame when they realize their failure. Then, they won't go off on you. So you know this is true. Think to use this ideal so if use is user free, think to the better ideal. Neiou = ne, non effective use or non use as it didn't really matter, ne sa anne inne unne donne. need is done I am fine.

The Art of Healing with psalms. Some listed here [ <http://spellhawk.great-site.net/psalm.htm> ]

What you think then is what the number means, that is the psalm by area or self creation made by the soul using your creator. So think then calm then you are well.

Here are some self made psalms:

128 You calm then whatever it is you are unsabotaged by what the spirit does.

129 The determination of facts is done correctly, the right decision or compromise is reached no matter the point.

169 What you think to become, then you can become.

189 Calm, then whatever it is you are unhurt as you are unhurt, so bye now. Then you end this by leaving.

213 Whatever you think shouldn't be there except for the person, this separates then is sent to the sun. If it's a person's energy then the sun is the creator to them.

214 Seem with use then calm, then you are well to the point you or others make by feel.

245 The area is use, then you know for certain the point or thought that is there.

255 The psalm is a source that unlike magic you can create by the creator. This ends as you think the creator not to exist there. Since he or she didn't exist anyway, except on a higher dimension.

2245 Like the dimensional physics and the atleantian source of magic amongst others, that is not here unless you think to the use.

2345 Seem to like things by the likeness so the tome of life opens, ask a question then you know the answers to what is there.

2455 Seem to see like and this done by the likeness or means that is the point.

2456 See the reason or work, then do as you want. The outcome is the same as good.

2466 See the point where no reason exists, so you know what is there for use by now.

2475 See no reason that doesn't exist, so things that don't exist are there if you imagine them to exist.

2478 See the reason for the point, so your point is a reason that is sometimes accepted if its there for a fact.

2479 See the peculiar idea as things, then by the feel you are aware. So think to create as the way out is there.

2480 See there for no reason, if no reason exists qualms for you.

2488 See no reason to bear no reason, think the point so you create what you wish or state. This is done by spirit using the soul as a direction maker or director.

2490 See a point or no reason for no bearing, yet don't bear or rush attack if not a good time.

2578 Think no bearing to occur, then they won't be there.

2580 Think the reason for a point, that by reunion you are aware.

2788 Think the reason for the point you have, then you have an acceptable point or reason.

2790 Think no reason for thine point, this can strip a god's power. This is a true one liner power of words statement.

2800 Think a reason for the point then the god ability is restored or bestowed to effect for your need, I think as though the point is you were the creator.

2888 Think by the thought so your the point, that means your aware or were by what you do.

2900 Think the cool point, then your aware by the reason your work is there non insane.

2912 Whatever the reason your insanity disappears.

2911 Whatever you think, then you create or work by the feel that is focus. This focus gets results, if you think of the idea as though the point were an end point.

2921 What you do with life if your own is what you think, so think what you consider then you create what you think then focus otherwise then your thought manifests.

2913 This the thought by progression if you can say things or work with things, you can create what you think by what you think and what is with thinking.

2922 The end is what you thought is the end as though forgiven, blessed or loved. That is also what you imagine or consider the ending that you think. This spells the end of the age, so that spell is good.

2930 The demon is good or benevolent even if it is a riled spirit that could turn poltergeistic, so think as you want to occur your thoughts by need the thought occurs. This is a dangerous psalm as you think it you name it or the thought you have happens to manifest. So what you think you have as a thought or how you are you become.

2931 If you know then the right ideal is done non inflicted, this is self freedom by the area feel or now this is curing instead of destructing.

2940 If your a demigod your a god in human form, as if then raised from demigod nature as a preferred stop point happens.

2942 If you raise your young right, you can create what you want. You always know what to do by feel.

2943 If as you are aware, you think to create. Then you create as you wish or abort the thinking.

2950 By yield if you are aware then the subconscious can create what you want, this is done as you think about or work the feel with the point by what you consider or not create things.

2951 If by gnosis you know, then by knowing you go now to work.

2953 If by the thought you are aware, then any stupidity is erased.

2954 When you consider the point not by ramming, you then concede the point then you are creative to the point.

2955 Where you are you can work, no matter the point unless you aren't allowed to work.

2956 When or where is your choice, think then things manifest by feel.

2560 If you explore well, when you think then this ends well.

2567 Feel lonely yet? Think then you aren't as you describe to know exactly, what you want and feel you can be loved then things will work out. This allows love to come into your life for a point, and things will seem as you want.

2567 part II This cures any illness no matter the illness including the genetic damage by psalm 2931, such as you have known as though correctly treated by a doctor.

2567 part III The ending otherwise no, noble idea is not unknown.

2567 part IV If in medicine, you are in medicine by what you think.

2567 part V By any with the ideal act defining by feel, the roach species is erased.

2568 Think before you speak then you can get out or escape. So no noble deed is not unknown.

2590 If you want slenderness then your slender or slim as you think to seem thin, as this cures the dehydrogonous then you create anything.

2591 Free my brethren or wives from slavery, so things work if no longer bad as unhindered.

2592 See to think for yourself to work things out.

2593 Seen is the thought no longer is the point, this ends now.

2594 Seeable is your point, so create or work if you can. Sometimes you get the right reasoning explained and then even if not before, things wil work like not before.

2598 Seen is the point if your future is bright, so no longer ask or you gain a solar vessel from the sunlight to live. Explore well.

2958 See here is a manic cure by ideal use is bitter melon with stevia, so I think to allow a blow to the ego is where you are the thought to allow for things can be without having to chat.

2981 If you think to undamage yourself then you are undamaged, so you know before the point or work by the ideal.

2988 Temperature regulation; This is where you think to regulate the temperature to seem like you wanted, then thinking allows you to make things cool as possible otherwise if the temperature cools off by focus. Otherwise you can think the clouds into the sky and this cools off the area, the point you see is what you think into existence or feel by idea to seem there. This psalm can create what you need with the weather, and that is what you need to happen. This happens to occur sometimes, if you need the effect and otherwise the idea doesn't happen. This effect uses the energy or heat in the air, so you convert the heat to create by what you consider. Then the God creates what you need. That is how this psalm works, if you need the idea to seem there or think of things and you create what you want by feel.

2998 Psalm of existence; Since a psalm is a god generated by the sun or planet area called into being and creates what you state, sometimes if you call upon a god and allow him or her to create things, you can get things by feel. So this is a psalm of existence, where the point is created and what you state or know is done if you need the idea done. This is a point of expression, so think and know that it doesn't always effect people if they don't want to be effected.

If that is a point some do, then the person making the statement will get the effect instead or noone is effected as nothing is done unless you want the effect, then you get the effect. This is a thine moment that's done when you think, so this is where things self-regulate and none are effected. This is where you think to allow idea or they create for themselves. This is a known effect that effects where you want the idea effective, and that's unless thine is stated thinking the effector is an idea with self-regulating. This effects those that deserve the effect otherwise, so think and you could get what you require or need by them thinking it doesn't matter and its where you get a concept done that is if you needed something.
